Market Release Note

MRN-TS1001-001

Product number:	TS1001
Product description:	Touch Screen RAS
Product version:	V01-00.3293
Affected parts:	TS1001
Release date:	18 August 2014

Interlogix is pleased to announce the immediate availability of the Tecom Touch Screen RAS (Remote Arming Station). The new Touch Screen RAS brings simplicity and style to your Challenger security system with an easy-to-use touch screen GUI, in a sleek, aluminium surround.

Features

Product compatibility

- Fully-compatible with Challenger V8 and Challenger10

Scramble keypad

- If this option is enabled the numbered buttons are moved after every log in to avoid providing visual clues to the numbers used.

Configurable key display

- The Open and Classic buttons can be hidden to simplify the home screen.

QWERTY keyboard

- A QWERTY key display is provided for easy text entry in non-classic mode only.

Surface or flush mount

- The TS1001 can be surface mounted with a cable entry provided on top of the arming station or flush mounted into a cavity with a large rear cable entry.

Remote firmware upgradable

- Firmware can be upgraded locally via USB or remotely when connected to a Challenger10's LAN using Titan version 3.2 or above.

Egress and open collector output

- There is an open collector output and an egress input provided for door control.

Tamper and egress

- The tamper button and egress input can be disabled to prevent unwanted use.

Multiple history event display

- The TS1001 can display multiple history events on its screen.

Known Issues

Issue	Details
Scramble keypad does not work for classic mode.	The scramble keypad option will not function if you are using classic mode.
Arm/Disarm using one key.	Do not select this option for the Touch Screen RAS as it may cause spurious behaviour.
Updated history events.	You cannot retrieve history events that have happened since accessing the history menu. You will need to exit and log in again for them to be updated.
