Introduction

Why Linx for education?

Inspiring children through the use of technology is simple because they are naturally drawn to it. Yet with a winning combination of affordable hardware, cutting edge software and apps designed especially for education, engaging students with technology becomes not only even easier, but it gets down to the business of learning in brilliant ways.

Creative classrooms

The Linx 10 Education Edition* tablet with the Microsoft Windows 8.1 Pro platform plus exciting apps that make learning exciting and imaginative for students and efficient and ingenious for teachers, is an inspiration in itself. It brings all of the technological needs of student, teacher and academic institution together into a simple package that can be used across an entire school.

Supporting 21st century learning

The Linx 10 Education Edition* tablet provides the powerful Windows platform to enable communication, collaboration, critical thinking and creativity, while protecting children on the internet.

Powerhouse performance

Windows combines with the quadcore performance inside the Linx 10 Education Edition* to bring the functionality of a PC with the flexibility and mobility of a tablet, enabling precise control over content to bring videos, photos and educational software to life.

Empowering education

Microsoft is empowering the education community not only through its software, but also with a wide range of products, services, and programmes that help transform learning and make it more accessible for students and teachers. This includes Microsoft's Technology Access Programmes (TAP) that form a global platform for governments exploring a transformation of their education system to prepare students for the 21st century.

Accelerate learning

Using the Linx 10 Education Edition* with Windows, teachers can amplify learning with new insight and an exciting impact. Students will experience immersive learning, which will deliver improved outcomes. Moreover, this technology pulls schools and the communities that interact through them together, allowing true collaboration and connected learning for the advancement of education.

*Terms and conditions apply. Linx 10 Education Edition only available to be resold by partners registered with Microsoft TAP.

Making educating easier

Engaging pupils in learning is the number one priority for all educators, and there is no better way to get the attention of young minds today than with the use of technology. Using mobile tablets and the apps and services that run on them, students of all ages can have access to connected educational resources from anywhere, while teachers can excite, challenge and encourage learners.

The Linx 10 Education Edition* tablet supports 21st century learning by providing the powerful Windows 8.1 Pro platform to enable communication, collaboration, critical thinking and creativity, all while protecting kids on the internet.

From school to home with Windows 8.1 Pro

- Microsoft Windows platform gives pupils the freedom to collaborate, connect, and be more productive both in the classroom and in their own time at home

- Windows 8.1 Pro on the Linx 10 Education Edition* tablet brings more features for teachers
- With new Bing Smart Search, you can save time by simultaneously searching across your PC, OneDrive, the web, and now even apps in the Windows Store, so you can find what you need faster
- Windows 8.1 Pro makes multi-tasking is even easier with improved multi-monitor support
- InstantGo in Windows 8.1 Pro wakes the tablet in under a second with your apps and data already up to date

Creating experiences with Linx 10 Education Edition*

- With a volume license agreement for Office365 under the Student Advantage Programme, Office 365 ProPlus is available at no additional charge
- For teachers, Office 365 enables you to create experiences that help students easily connect with each other, staff, and experts
- Office365 extends learning beyond the classroom and it can be expanded to create an intranet and learning environment for staff and students
- Office 365 is packed with features, including email, Word, Excel, PowerPoint, OneNote, IM, plus one terabyte of OneDrive storage in the cloud
- Important school documents such as policies and procedures, professional development information and news can be securely stored and shared in Office 365

Apps for all teaching occasions

- There are a plethora of exciting apps specifically designed for educators to choose from with Windows 8.1
- Apps downloaded once are accessible to students on multiple Windows 8 devices
- Cutting edge apps include Bing Translator by Microsoft that is your companion when you need to quickly translate what you are looking at

- The Nearpod platform enables teachers to use their tablets to manage content on students' devices, combining presentation, collaboration, and real time assessment tools into one integrated solution
- Apps for teachers include eBackpack that provides teachers and students management and storage for the entire homework workflow process

Your life, but simpler with Microsoft

- Microsoft provides a rich set of professional development resources to make sure you get the most from your tablet and Windows 8.1 Pro
- As a teacher, use this highly affordable technology to discover new ways to teach
- Windows tablets appeal directly to students, accelerating learning and delivering better outcomes
- Microsoft Educator Network provides access to free tools, tutorials, and learning activities for the classroom
- Microsoft IT Academy offers a digital curriculum and certification on fundamental technology skills at reduced prices for academic institutions
- Teaching with Technology is a free online e-course that helps educators develop a deeper understanding of how technology can enhance learning

Making learning lively

Wherever you look today, children of all ages can be seen using mobile technology. From the three year old being pacified by their parent's tablet and a game of shooting small round birds into obstacles, to the 13 year old using their own device to build a presentation for a school project, this is truly the age of the tech kids.

Mobile tablets such as the Linx 10 Education Edition* tablet bring learning and discovery to each student's hands in a personalised, individually tailored world that they are able to control and manipulate to suit their needs.

Affordable access on Linx 10 Education Edition* tablet

- Linx 10 Education Edition* is priced to be easily affordable for students and schools
- Office 365 is packed with features for pupils, including email, Word, Excel, PowerPoint, OneNote, IM, plus one terabyte of OneDrive storage in the cloud
- Office365 can be extended to provide schools with an intranet and learning environment
- With Office365, homework, news and announcements can be securely stored and shared while all can work on real time on assignments and projects
- With a volume license agreement for Office365 under the Student Advantage Programme, Office 365 ProPlus is available at no additional charge

Microsoft Windows 8.1 Pro platform positives

- Linx 10 Education Edition* tablet runs on the cutting edge Microsoft Windows 8.1 Pro platform
- From playing videos to typing up notes in OneNote, Windows 8 is packed with all the functionality that pupils need
- Windows provides students with access to DreamSpark, a Microsoft programme that supports technical education, giving students Microsoft professional-level developer and designer tools at no cost
- Windows allows teachers to create dynamic learning experiences in and outside of the classroom with Linx 10 to deliver the power of a PC and the mobility of a tablet
- Adding superpowers to PowerPoint, Windows provides access Office Mix, a new way to tell stories with voice, video, inking, screen recording and interactive magic

Educational apps for elucidation

- Specifically designed for education, Windows provides a multitude of apps for students to use at school, from algebra to creating books
- Sway is an app for expressing ideas across multiple devices with interactive presentations to create a polished, interactive, web-based canvas of ideas that is integrated with OneDrive, Windows devices, social networks, and the web

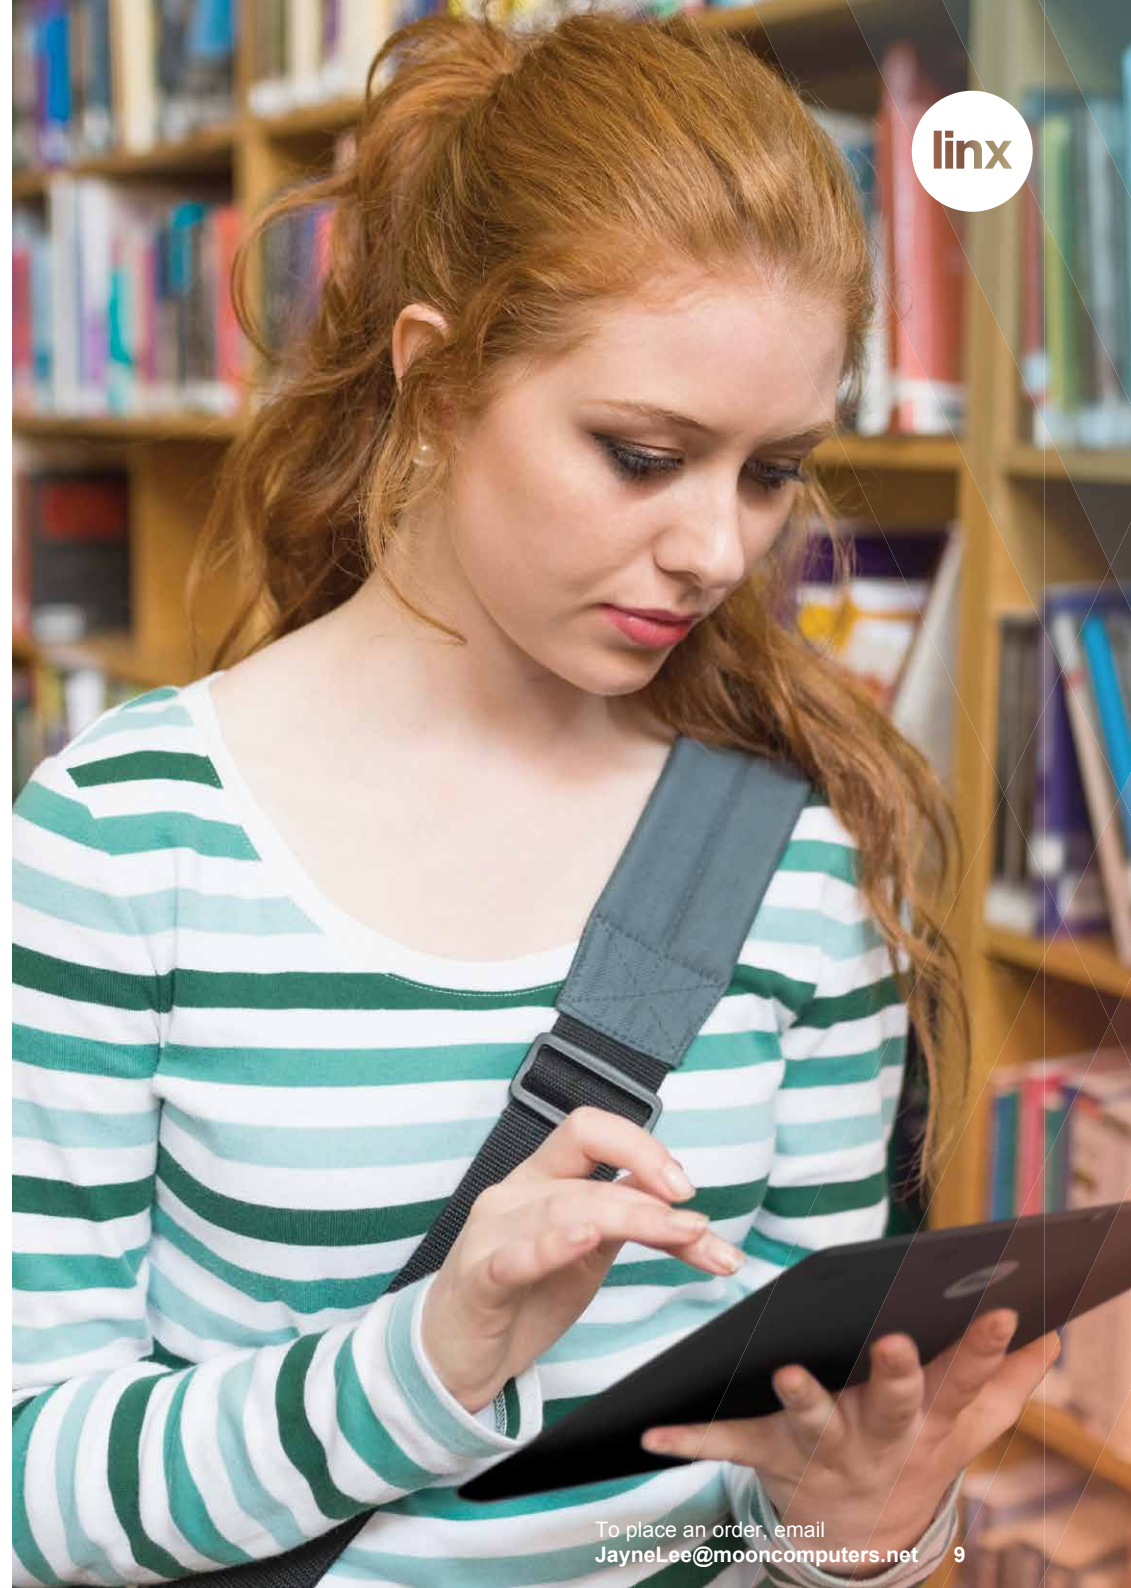

- myHomework is a planner app that helps students stay organised on Windows by allowing them to get assignments, homework reminders, files and announcements direct to their tablet
- CreateBook is an app that allows users of all ages to create stunning eBooks that include text, video and a range of other media, for narrated story books to multimedia revision guides
- DragonBox Algebra 5+ is an educational app that teaches young kids the basics of algebra without them realising they are working

Supportive strategies from Microsoft

- Tablets with Windows give students the freedom to collaborate, connect, and be more productive both in the classroom and in their own time
- From home to the classroom and back, tablets engage students in the national curriculum
- Microsoft supports students and teachers with eLearning solutions
- Microsoft IT Academy enables students, educators and academic institutions to get a digital curriculum and certifications for completing fundamental technology skills
- The Microsoft Virtual Academy helps students learn about the latest technology for free
