

iGo-w

USER MANUAL

E-CIGARETTE

INSTRUCTION MANUAL

For safe and effective use of iGo-W, please read through the following information carefully before using and follow the standard operating procedures strictly.

<1>

Storage: iGo-W and its supporting parts should be kept away from children's reach and stored safely in a dry environment.

Maintenance: iGo-W should be maintained regularly. Clean the screw thread of the different parts such as clearomizer, chargers and power supply with a tissue dipped in purified un-perfumed alcohol (please refer to your local drugstore). Clean screw thread will provide better electronic conduction. Blow into the clearomizer once and a while to evacuate left over liquid. When the vapor diminishes significantly the power supply needs to be charged.

iGo-W power supply: The iGo-W is powered by a 3.7V power supply battery.

iGo-W charge: The iGo-W is specially adapted for iGo-W power supply.

Input voltage of the USB home charger is AC 100V-240V 50/60HZ. The input voltage of USB car charger is DC12V-24V. The input voltage of the USB battery charger is 5V, 500mAh and the output voltage is 4.2V 420mAh. Pay attention to the value of local voltage to be in accordance of that of iGo-W charger.

<2>

1.STRUCTURE

iGo-W consists of power supply, clearomizer and mouthpiece. After entirely assembled, when you press the manual switch, the iGo-W will be activated to vaporizing.

The Structure Of iGo-W

<3>

2.FEATURES

Unpack the box and take out of the kit of iGo-W then twist the clearomizer onto iGo-W battery, press the switch on to enjoy vaporizing.

Do not use iGo-W in a vertical position, since liquid could leak out. Push the manual button for no longer than 5 seconds to avoid overheating of the clearomizer.

In case of iGo-W vaporizing continuously or shows signs of overheating, stop the usage, wait about 10 seconds to start use again.

3.NORMAL CHARGER

Screw the dedicated power supply in the charger, and connect the charger to the power outlet.

- (1). The first charge should be kept for over 8 hours, even if the LED light turns green.

<4>

- (2). Use for 20 minutes

- (3). Charge the power supply for another 1 hours.

Your power supply is now ready for normal use. Normal charging time should be kept for 3 hours(even if the LED light turns green).

The Light Of Charger

Do not use the charger in humid areas.

Do not charge the power supply near a high-temp heat source.

Do not weld or pierce the power supply

If the power supply is found to be emitting any odor or heat or be discolored or deformed or have any abnormally during charging,

<5>

please cut off the power supply from iGo-W body or charger or suspend the use of it.

The iGo-W charger can only be used with iGo-W dedicated power supply. Do not try to use this charger other kinds of power supply. Please keep the iGo-W's components from the reach of the children or animals.

4.HOW TO CHARGE

Charging

Screw the dedicated power supply in the optional USB charger cable. Insert the USB charger cable into the USB port of your

<6>

computer, USB home charger and USB car charger.

Do not charge power supply outdoors or in a damp environment.

Keep all parts out of children's reach.

5.HOW TO FILL THE E-LIQUID

- 1). Take out your eliquid bottle with needle, unscrew the cap.
- 2). Take out an cartomizer and unscrew the nozzle, pierce the eliquid at the edge.
- 3). Fill the tank not less than MIN scale but not more than MAX scale.
- 4). Level your e-Cigarette and wait one minute, connect with the battery, then you could enjoy your vaping.
