Operating manual

Mobile telephone

Compatible with hearing aids
(HAC Hearing Aid Compatible to M3 / T3 Rating)

The »sydney« mobile phone has an integrated induction coil and is compatible with hearing aids.

You will have to configure the settings of your hearing aid accordingly for an ideal operation with your mobile phone. Kindly read the user manual of your hearing aid.

⚠ Prolonged listening at full volume may cause hearing damage.

We congratulate you on the purchase of your »sydney« mobile phone and we hope that it will render you many years of reliable service. You have chosen a modern and reliable system. Kindly read the user manual carefully in order to start using the device properly and to familiarise yourself with all the possibilities of the system.

Standard delivery scope
Kindly check if all following parts are included:
- Mobile phone »sydney«
- Desktop charger
- Charging cable
- 1x rechargeable battery Li-Ion 3.7V/ 750 mAh
- Short guide
- User manual
- Warranty card

Should any parts be missing, kindly contact your specialist dealer or the manufacturer directly.

Standby	Hold [#ⁿ] Switched ringer Off / On – Silent Mode
Hold [1]	A connection is established to your mailbox and you can play messages recorded; -> Page 34.

Start

This chapter will provide you with basic information about handling the user manual and the telephone.

Way of displaying in the user manual

Display	Description
6ᴹᴺᴼ	Press shown key briefly
2 Sek. 7ᴾᴿ	Press shown key for 2 seconds
Keep pressed	Keep shown key pressed
🔡	Input digits or characters
Options	Presentation of text on display
e.g. ⅄�ᴉᴉ	Presentation of display symbols
OK	Press soft key → Page 13

Stand-by mode

All descriptions in this user manual are based on the assumption that the telephone is in stand-by mode. The stand-by mode can be reached by pressing the 🔚 key several times. Maybe you might have to deactivate the keypad lock.

Energiesparmodus

After some time in stand-by mode, the phone changes to energy-saving mode. The display is now no longer illuminated. Press any key to activate the stand-by mode.

Softkeys

The soft keys ⌐•— and ⌐—•⌐ have different functions assigned to in the different menus. In this user manual they are always named corresponding to the texts in the display.

Key	In stand-by mode	In the menu
⌐•—	- Open main menu	- diverse functions
⌐—•⌐	- Open phonebook - Trigger keypad lock	- diverse functions

Navigation within the menu

All functions can be reached via different menus. Kindly refer to the menu structure to get to the desired function → Page 66

Menu (key)	Open main menu
⬆ / ⬇	Select desired sub menu
OK (key)	Open sub menu
⬆ / ⬇	Select desired function
OK	Open function
⬆ / ⬇ OK	Select desired setting
⌨	Input digits or characters via the keypad.
Key (soft key)	Confirm input
Key (soft key)	One level back
☎	Cancel programming and saving processes and return to stand-by mode

Create phonebook entries – Example

The way to navigate within the menus and effect settings is explained here using the Phonebook as example. Proceed for all settings as shown in this example.

Menu	Open main menu
△ / ▽ Phonebook list OK	Select phonebook and confirm
△ / ▽ Add new contact OK	Select sub menu and confirm
△ / ▽ To SIM or to phone OK	Select storage location and confirm
Name OK OK	Open input mode, input names and confirm
△ / ▽ Number OK	Open input mode, input number and confirm
Save? Yes or No	Save entry or cancel

Input text and digits

The numerical keys also have characters printed on them for entering text.

Your telephone offers different methods for the input of text. These are used for creating or editing of contacts in the Phonebook menu, when searching for names in the Phonebook and when writing messages (SMS).

Note:

Not every method is always available in every application.

Input text

Multitap

In order to input text in multitap mode, the key with the respective character/symbol group has to be pressed. If the first symbol of the group is needed, the key is pressed once. If the second symbol is needed, the key is pressed twice etc.

→   To insert a further character that is on the same key, input first the first character as usual. Wait for about 2 sec. and input then the next character

ABC   Upper case Multitap
abc   Lower case Multitap
123   Digits

 → To switch between text and digit input,
   press the ⌗ key.

Punctuation and special characters
 Press the ✳ key while inputting text.
 Punctuation and special characters are displayed.
 Use keys △/▽ to select the desired character and accept it
 with the soft key OK. To insert a space press the key ⌀.

4
Set up phonebook

In the phonebook of the telephone you can save up to 500 entries.

• Input all numbers with the area code always.

• If the memory capacity is used up, the display shows a corresponding message when the next entry is being saved. If you want to add new entries you have to delete old ones first.

• The phonebook entries are sorted alphabetically. To go directly to the desired contact entry, press the corresponding first letter. If you want to search manually in the entries, use keys ▵ / ▿

→ You can get to know the number of entries that can be stored on your SIM card from your provider.

Input names
The digit keys have numbers printed on them for the input of names. To input characters, the respective key has to be pressed correspondingly often. Information about input methods

0-	Input space
Delete	Delete
✐ / ✐	Move cursor left or right

Create phonebook entries
See page 15.

Save in stand-by mode

🎛	Input telephone number
Save	Open menu
▲ / ▽ To SIM or To phone OK	Choose storage location and confirm

medium	(SIM or telephone)

5
Accept and make calls

Answering call

✐   Answer call

Reject call

☎   Reject call

End call

☎   End call

Make a call

📱   Input number

Delete   Delete last digit if input
                               wrongly

✐   Dial number

Call list

Your phone stores the last dialled numbers **(redial)**, the received
calls and the **missed numbers** in a call list.

✐   Open call list

△ / ▽ ✐   Select entry and
                               connect

Dial numbers from phonebook

You have to have numbers stored in the phonebook → Page
15.

| Names | Open phonebook |
| $\boxed{\triangle}$ / $\boxed{\triangledown}$ | Select entry and connect |

Direct-access keys

You have to have numbers saves as direct dial numbers →
Page 35.

3 sec. $\boxed{\text{M 1}}$, $\boxed{\text{M 2}}$ or $\boxed{\text{M 3}}$ Press respective key

Setting the headset volume

You can adjust the volume while phoning.
➕ or ➖   Select desired
volume

⚠ Prolonged listening at full volume may cause hearing
damage.

Display call time

During a call the call time is displayed in hours, minutes and
seconds.

Hands-free

Use this function to hear your conversation partner via the loud-
speaker.

| Handsfr. | Activate hands-free |
| NoHandsfr | Deactivate hands-free |

Put microphone in handset in mute mode
During a call you can switch on and off the microphone of the handset.

Options	Open menu
⬆ / ⬇ Mute	
On	Switch off microphone
	(mute)
Off	Switch on microphone

Keypad lock
The keypad lock should prevent that functions are activated by mistake.

3 sec. [★⌫] key Activate keypad lock

→ When the keypad lock is activated incoming calls can be answers as usual.

3 sec. [★⌫] key Deactivate keypad lock

Switch on/off ring tone
You can switch off the ring tone – there will be only the vibration alarm.

3 sec. [#⌨]   Switch off ring tone

3 sec. [#⌨]   Switch on ring tone

If the ring tone is switched off the symbol 𝄢 appears on the display.

During a call

Options   Open menu „Options"

At this level you reach the functions that you can carry out during a call:

Hold

▵ / ▿   Hold individual call

OK   Hold current call

→ If a call is held, this menu item changes to Continue call.

To continue the call on hold::

▵ / ▿   Continue call   OK   Continue call

New call

▵ / ▿   New call   OK   Select function

                                  Enter telephone number and call

→ The first call is being held.

Phonebook

▵ / ▿ Phonebook OK   Open phonebook

Mute microphone

▵ / ▿ Mute On

Call list

A call list is available. Your telephone stores the last dialled, accepted and missed calls.

→ If a number coincides with an entry in your Contacts the corresponding name is displayed

Displayed symbols for:

dialled calls ➚

answered calls ➘

missed calls ✕

Call from the call list

	Open call list
▵ / ▿	Select entry and call

Show details

	Open call list
▵ / ▿ OK	Select entry and request details

Optionen | Open menu

The following functions can be carried out here:

Delete	Delete entry

Send text message	Entry send a text message

Carry out the functions and confirm these afterwards.

7
Messages (SMS)

→ It might be that not all offered functions are supported by every network. For more details contact your mobile service provider

Message settings
→ The sending of text messages is effected via a service centre. If you want to send and receive text messages (SMS) you have to store a service centre number on your phone. As a rule your service provider has already effected this setting

Navigate to the menu „Message settings.

Menu	Open main menu
▵ / ▿ Messages OK	Select menu and confirm

⬜ / ⬇ Message settings

OK   Select menu and
                                confirm

Profile settings
Navigate to menu „Message settings".

⬜ / ⬇ Profile settings

OK   Select menu and
                                confirm

⬜ / ⬇ Profile 1, Profile 2

or Profile 3 Edit   Select profile and
                                confirm

The following functions can be carried out here:

Profile name   Edit profile name

SMSC address   Edit SMS service centre
                                number

Validity   Set validity
Here you can specify for how long it should be tried
to deliver a sent message.

Message type   Set message type
Carry out the functions and confirm them.

General settings

Delivery report

Select „Delivery report - On" to receive a corresponding message when the message (SMS) has been received at destination.

Reply path

Select „Reply path - On" to include the reply path of your provider when sending a message (SMS).

For further details kindly contact your provider.

Navigate to menu „Message settings".

▵ / ▽ General settings	
OK	Select menu and confirm
Delivery report	Activate or deactivate
Reply path	Activate or deactivate

Memory status

Navigate to menu „Message settings".

▵ / ▽ Memory status OK	Select menu and confirm

→ The used and available memory locations for the phone and the SIM card are displayed.

Create SMS

→ A message can contain up to 457 characters, including spaces. A standard message contains 160 characters. When using more than 160 characters additional cost might occur.

Menu	Open main menu
⬜ / ⬛ Messages OK	Select menu and confirm
⬜ / ⬛ Write message	
OK	Select menu and confirm
🔢	Compose your text.

→ Information about input methods → Page 16.

Options	Open menu
Insert templates OK	
Ready OK	

Here you can carry out different functions

Send only OK

or Search	Enter number or select from phonebook.

Save and send OK		Enter number of select from phonebook. The message (SMS) is stored in the „Sent" folder and sent to the number selected.
Save OK		The message (SMS) is saved in the „Sent" folder.
Send to many OK		Several recipients can be selected from the phonebook.

Carry out the functions and confirm these afterwards.

Sent and received messages (SMS)
→ You are informed about incoming messages (SMS) with a ring tone of your choice. A message is shown on the display. Press the soft key „View" to display the message.

Received messages (SMS) are saved in the „Inbox" folder. Sent messages (SMS) and drafts are saved in the „Sentbox" folder.

Edit saved SMS

Menu	Open main menu
⬛/⬜ Messages OK	Select menu and confirm
⬛/⬜ Inbox / Sentbox OK	Select menu and confirm
⬛/⬜ OK	Select message (SMS) and confirm
Options	Open menu

The following functions can be carried out here:

Reply	Reply to number from which the message (SMS) was sent .
Delete	Delete message (SMS)
Forward	Forward message (SMS) to another number
Copy to phone / Copy to SIM	Copy Message (SMS)
Move to phone / Move to SIM	Move message (SMS)
Use number	Use the number from which the message (SMS) was sent

Voice messages (Voicemail)

→ Maybe not all offered functions are supported by every provider. For detailed information kindly contact your mobile service provider.
These might be services at a charge. In order to use voicemail messages "voicemail"1, you have to save a corresponding number in your phone. As a rule your service provider has already effected this setting.

1 Voicemail, also called Mailbox (answering machine in mobile network).

Configure voicemail messages (Voicemail)

Menu	Open main menu
△ / ▽ Messages OK	Select menu and confirm
△ / ▽ Voicemail messages server	
OK	Select menu and confirm
△ / ▽ <Space> Options	Select voicemail server and open the menu Options
△ / ▽ Edit OK	Select menu and start editing
△ / ▽ Name Edit Ready	Open input mode, input name and confirm

⬆ / ⬇ Number OK	Open input mode,
	edit number and
	confirm
Save? , Yes or No	Confirm changes
	or cancel

In the menu „Voicemail server" you can also carry out this function:

| Call Voicemail OK | The voicemail number |
| | is dialled. |

Listening to voicemail message

Navigate as previously described to the menu item „ Call Voicemail" and press the soft key OK or hold ⬜1
The connection to „Voicemail messages" is established and you can listen to messages.

Further useful functions

Direct-access keys

On the direct dial key $\boxed{M1}$, $\boxed{M2}$ or $\boxed{M3}$ numbers can be stored that can be directly dialled by keeping the corresponding key pressed → Page 36.

→ Each number that you want to use as direct dial number has to be stored in the phonebook.

This is how you save numbers to a direct dial key:

Menu	Open main menu
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Phonebook list OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ configure $\boxed{M1}$/ $\boxed{M2}$/ $\boxed{M3}$ OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ ⬜ Edit	Select direct dial key and confirm

Select:

View	to display the number
Modify	to dial an entry from the phonebook
Delete	to delete a stored number

Carry out the functions and confirm these afterwards.

Speed dial

You can assign numbers to keys $\boxed{2^{ABC}}$ to $\boxed{9^{wx}_{yz}}$. Keep the respective key pressed for more than 3 seconds and the assigned number is dialled.

→ Each number you wish to use as speed dial number has to be stored in the phonebook.

Menu	Open main menu
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Phonebook list OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Speed dial OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Status On	Activate speed dial
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Configure number OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ ⬚ Add	Select desired key and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ ⬚ OK	Select entry and confirm

Date and time

In this menu you can set and adjust Date and Time.
This is how you get to the menu:

                         „Vibration only"
                         and confirm
Save? , Yes or No   Confirm changes or
                         cancel

Calculator

A simple calculator for basic arithmetic operations.
Choose the required arithmetic operation with keys ⬛ and
⬛ (+, −, x, ÷).
With key ⬛ you can insert a decimal point.
With key ⬛ you change the algebraic sign (±).

Menu	Open main menu
⬛ / ⬛ Extras OK	Select menu and confirm
⬛ / ⬛ Calculator OK	Select menu and confirm

Example
To calculate „-5 x 2.5" you need the following
keys:
⬛ ⬛ = -5
⬛ ⬛ ⬛ = x
⬛ ⬛ ⬛ = 2.5
OK = −12.5
Delete = Delete

Tone control

This function is very welcome especially by people with hearing aids. The tone control is set to normal by default. Two further settings are possible:

• Low frequency
• High frequency

Menu	Open main menu
⬛ / ⬛ Settings OK	Select menu and confirm
⬛ / ⬛ Set pitch OK	Select menu and confirm
⬛ / ⬛ normal , low frequency or high frequency OK	Select settings and confirm

Select the frequency range for your very personal sound experience.

Network settings

Network selection: In this menu you can select other mobile networks than the ones of your network provider. However such agreements have to exist in order to do that.

Preferred networks: You can select and edit mobile networks predefined by the SIM card. In order to change the priority use keys ⬆ / ⬇ .

→ Maybe not all offered functions are supported by every provider. For detailed information kindly contact your mobile service provider.

Menu	Open main menu
⬆ / ⬇ Settings OK	Select menu and confirm
⬆ / ⬇ Network settings OK	Select menu and confirm

Network selection or
Preferred networks

Follow the menu structure → Page 66.

Security settings

In this menu you specify which functions of the telephone or the SIM card are to be protected by a password/PIN. PIN and password can be changed.

→ You receive PIN and PIN2 with the SIM card. Further information can be obtained from your SIM card service provider.

Menu	Open main menu
⬜ / ⬜ Settings OK	Select menu and confirm
⬜ / ⬜ Safety settings OK	Select menu and confirm

SIM lock

→ You receive the PIN with your SIM card. If you deactivate the SIM lock you do not need to enter the PIN on switching on the phone.

It is recommended to leave the SIM lock activated in order to make it more difficult or unauthorised persons to use your phone

Telephone lock

→ From the factory the password is 1234. If this lock is activated, you have first have to enter the password for the telephone lock and afterwards the PIN on switching on the phone

Change password	Change passwords/ PIN
Follow the menu structure →	Page 66.

Tips

Lock the phone with your personal PIN. You can protect the phone against unauthorised access with a PIN specified by you.

Menu	Open main menu
⟐ / ⟐ Settings OK	Select menu and confirm
⟐ / ⟐	
Safety settings OK	Select menu and confirm
⟐ / ⟐ Change password	
OK	Select menu and confirm
⟐ / ⟐ PIN OK	Select menu and confirm
Enter old PIN OK	
New PIN OK	
Input again OK	

PIN- & PIN2 code

PIN- (**P**ersonal **I**dentity **N**umber) and PIN2 code are 4 to 8-digit numbers. You receive the PIN and PIN2 code together with the SIM card of your internet provider.

PUK- & PUK2 code

PUK- (**P**ersonal **U**nblocking **K**ey) and PUK2-Code are 4- to 8 digit numbers. These are only needed if you have entered the PIN code of your SIM card wrongly three times in a row and the SIM card is locked. You receive the PUK and PUK 2 code together with the SIM card from your network provider.

Telephone settings

This is how you navigate to the menu „telephone settings".

Menu	Open main menu
⌂ / ▽ Settings OK	Select menu and confirm
⌂ / ▽ Telephone settings OK	Select menu and confirm

Automatic keypad lock

You can configure the telephone in such a way that the keypad lock is automatically activated after a certain time in stand-by mode.

Menu	Open main menu
▲ / ▽ Settings OK	Select menu and confirm
▲ / ▽ Safety settings OK	Select menu and confirm
▲ / ▽ Auto. keypad lock OK	Select menu and confirm

Function keys

You can configure which menu or which function will be opened when pressing the keys ⬛ / ⬛ in stand-by mode.

Menu	Open main menu
⬛ / ⬛ Settings OK	Select menu and confirm
⬛ / ⬛ Phone settings OK	Select menu and confirm
⬛ / ⬛ Function keys OK	Select menu and confirm
⬛ / ⬛ Top or bottom Edit	Select key
⬛ / ⬛ ____ OK	Select menu or function and confirm

Call settings

→ Maybe not all offered functions are supported by ever provider. Kindly contact your mobile service provider for detailed information. These might be services at a charge.

Caller ID

With this function the transmission of your own number to the person being called is activated/deactivated.

Menu	Open main menu
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Call centre OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Call settings OK	Select menu and confirm
Caller ID OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ controlled by network , Hide own number or Send own number OK	Select settings and confirm

Call waiting

This function informs you during a call that another caller is trying to reach you.

Menu	Open main menu
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Call centre OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Call settings OK	Select menu and confirm
$\boxed{\triangle}$ / $\boxed{\triangledown}$ Call waiting OK	Select menu and confirm

Then select:

Activate	OK	to activate the call waiting function
Deactivate	OK	to deactivate the call waiting function
Query status	OK	to show the current setting

Call diverting

With the following functions you can forward incoming calls to assigned numbers.

Menu	Open main menu
⬛/⬛ Call centre OK	Select menu and confirm
⬛/⬛ Call settings OK	Select menu and confirm
⬛/⬛ Call forwarding OK	Select menu and confirm
⬛/⬛ Cancel all call OK forwarding actions	Deactivates the call diverting for all calls

Select the desired settings for Deactivate call diverting

Divert all voice calls
Divert, unreachable
Divert, no reply

Divert, if busy
Divert all data calls
OK
Then select:
Activate OK
 To new number OK
Search OK   Input number or
                                  select from
                                  phonebook.

 Or:
To voice message OK   Call diverting
                                  is active.
Deactivate OK   Corresponding call diversi-
                                  on is deactivated
Call status OK   Show current setting

Call barring

With the following functions you can effect limitations on incoming and outgoing calls.

Menu	Open main menu
⌐△⌐ / ⌐▽⌐ Call centre OK	Select menu and confirm
⌐△⌐ / ⌐▽⌐ Call settings OK	Select menu and confirm
⌐△⌐ / ⌐▽⌐ Call barring OK	Select menu and confirm

Select the calls to be barred:

   Outgoing calls
     All calls
     International calls
     International calls. except for private PLMN[1]
   Incoming calls
     All calls
     During roaming
   Activate all
     Password for call barring
   Abort all
     Change password for call barring

→ [1] Privat-PLMN (**P**ublic **L**and **M**obil **N**etwork) describes the network where your SIM card is registered (home network).

or
| password for lock |
  | Old password |
  | New password |
  | Confirm new password |
OK

→ By default the password is 1234.

Automatic redial

If this function is activated, an automatic redial is activated when the number dialled is "busy".

Menu	Open main menu
▵ / ▿ Call centre OK	Select menu and confirm
▵ / ▿ Call settings OK	Select menu and confirm
▵ / ▿ Advanced settings OK	Select menu and confirm
▵ / ▿ Auto. redial On	Activate function

Broadcast messages

Your mobile phone support the reception of Broadcast[1] messages

→ Information about broadcast messages, tariffs, data and offers can be obtained from your SIM card service provider.

Menu	Open main menu
☐ / ☐ Messages OK	Select menu and confirm
☐ / ☐ Broadcast message OK	Select menu and confirm

[1] Broadcast is also called **CB** = **C**ell **B**roadcast (information services of your network provider)

Factory settings

The telephone can be reset to the factory settings.

Menu	Open main menu
☐ / ☐ Settings OK	Select menu and confirm
☐ / ☐ Safety settings OK	Select menu and confirm
☐ / ☐ Reset factory settings OK	Select menu and confirm

→ By default the password is 1234.

Bluetooth®

Activate / deactivate bluetooth

Menu	Open main menu
△ / ▽ Extras OK	Select menu and confirm
△ / ▽ Bluetooth OK	Select menu and confirm
△ / ▽ Activated On	Activate Bluetooth®
or	
△ / ▽ Activate Off	Deactivate Bluetooth®

⚠ If Bluetooth® is activated, the battery drains very quickly. Deactivate the function when you do not need it!

You have the possibility to connect your »sydney« mobile phone via the Bluetooth® connection with a Bluetooth® headset.

Menu	Open main menu
△ / ▽ Extras OK	Select menu and confirm
△ / ▽ Bluetooth OK	Select menu and confirm
△ / ▽ Search audio device OK	Select menu and confirm

→ Information on pairing your Bluetooth® headset can be found in the user manual of your Bluetooth® headset.

| ⬚ / ⬚ Pair | Select device and establish connection |
| 🎛 0000 OK | Input PIN and confirm |

→ The required PIN can be found in the user manual of your Bluetooth® headset.

After having successfully coupling the devices you can choose from further functions.

→ Information how to use the headset while phoning can be found in the respective user manual of the Bluetooth® headset.

Emergency call function

This telephone is equipped with a comfortable emergency call function. 1 number and up to 3 message (SMS) numbers can be entered for an emergency call. In order for this function to work as planned you have to record a message first. See following chapter „Record SOS voice message".

Record SOS voice message

If you trigger an emergency call, a SOS short message (SMS) can be sent to up to three numbers.

A typical short message should contain the following information: This is an emergency call from ... **Your name** ... . I need help.

Menu	Open main menu
☐ / ☐ Settings OK	Select menu and confirm
☐ / ☐ Help settings OK	Select menu and confirm
☐ / ☐ Record SOS message OK	Select menu and confirm
🎵	Compose your text.

→ Information about input methods → Page 16.

Save Save?	Saving process save SOS message or discard.

Enter/delete SOS voice call number

This is how you insert a number from the phonebook as emergency call number.

→ Each number that you would like to use as emergency call number has to be stored in the phonebook.

Menu	Open main menu
⬆ / ⬇ Settings OK	Select main menu and confirm
⬆ / ⬇ SOS settings OK	Select menu and confirm
⬆ / ⬇ SOS voice call number OK	Select menu and confirm
⬆ / ⬇ SOS Nr.1, SOS Nr.2 or SOS Nr.3 Edit	Select a memory location
⬆ / ⬇ OK	Select a entry of the phone book and confirm

After the emergency numbers have been set you have additional options. Choose the desired voice call number:

⬆ / ⬇ Friend Options	Select a memory location
View	Show entry
Change	Change entry
Delete	Delete entry

Enter/delete SOS short message number

This is how you insert an entry from the phonebook as SOS short message emergency call number.

→ Each number that you wish to use as emergency number has to be stored in the phonebook.

Menu	Open main menu
◻ / ▽ Settings ☐ OK	Select main menu and confirm
◻ / ▽ SOS settings ☐ OK	Select menu and confirm
◻ / ▽ SOS short message number ☐ OK	Select menu and confirm
◻ / ▽ SOS Nr.1, SOS Nr.2 or SOS Nr.3 Edit	Select a memory location
◻ / ▽ ☐ OK	Select a entry of the phone book and confirm

After the emergency numbers have been set you have additional options. Choose the desired voice call number:

◻ / ▽ Friend Options	Select a memory location
View	Show entry
Change	Change entry
Delete	Delete entry

Setting the SOS mode

You can choose if an emergency call should be sent as voice call or as an emergency SMS to registered phone numbers.

Menu	Open main menu
▵ / ▿ Settings OK	Select menu and confirm
▵ / ▿ SOS settings OK	Select menu and confirm
▵ / ▿ SOS mode settings OK	Select menu and confirm
▵ / ▿ Make SOS call, Send SOS Message or Off OK	Select mode and confirm

Emergency Call Function, Example

The emergency call function is explained here according to one example.

Emergency Call as SMS messages

The required phone numbers must be stored in the phone book (relatives/friends).

Do the following settings:

Menu	Open main menu
△ / ▽ Settings OK	Select menu and confirm
△ / ▽ SOS settings OK	Select menu and confirm
△ / ▽ SOS numbers OK	Select menu and confirm
△ / ▽ SMS SOS Nr.1 to SMS SOS Nr.5 Edit	Select a memory location
△ / ▽ ⬚ OK	Select a entry of the phone book and confirm

After setting the five SOS SMS numbers please make the following settings:

Back	
△ / ▽ SOS mode settings OK	Select menu and confirm
△ / ▽ Send SOS Message OK	Select menu and confirm

In the case of an emergency call:
The phone sends up to 5 emergency messages (SMS). The recipient receives the message and can help you.

Starting the emergency call
Slide the **emergency call switch** upwards. A siren is sounded. The phone dials the set number. Depending on the settings selected, the number is redialled or the next number is dialled.

Ending the emergency call
After making the call or to cancel the emergency call, slide the **Emergency call switch** back down.

Services

This menu contains the SIM Application Toolkit (commonly referred to as STK) of your mobile phone provider. The content and functions available vary from provider to provider and are dependent on the SIM card used.

SIM Application Toolkit (STK) is a GSM system standard which enables the SIM to initiate actions which can be used for various value-added services.

→ Please contact your local mobile phone provider for details. They may concern services which are subject to charges.

Menu Structure

Main menu

Pressing the ⌊←⌋ = Menu key to open the main menu.
Then use the ⌊△⌋ / ⌊▽⌋ keys to select a menu option and
confirm the selection. For further information on the menu
and operation, → Chapter 3, Page 12.

Trouble Shooting

Problems and solutions

Problems	Solutions
The mobile phone cannot be switched on.	– No battery inserted. – Battery is not charged.
The display is locked" when the mobile is switched on.	– Enter the PUK to unlock" the SIM card. Contact your service provider.
No signal quality is displayed.	–No network connection. The mobile phone is in a location where there is no network service. Move to a different location or contact your service provider.
Keypad does not function or only functions very slowly.	- The operating speed of the display is reduced in the case of low temperatures. This is normal. Use the phone in a warmer location.

A message appears in the display for some functions, indicating execution/use is not possible.	- Many functions can only be used after the respective service has been applied for. Contact your service provider for more details.
Screen frozen or no response when pressing keys.	- Remove the battery for 3 minutes and try again.
No connection to the mobile telecommunication network.	- Contact your service provider.
The Insert SIM" message appears in the display.	- Ensure that the SIM card has been installed correctly. Contact your service provider, if necessary.
The battery cannot be charged or is empty within a short time.	- Battery is defect. - Place the phone correctly in the charging unit or connect the charging unit properly. Clean the contact surfaces on the mobile phone and charging unit with a soft, dry cloth. - Charge the mobile for 4 hours.

Safety Information

Intended use

This mobile phone is designed for use when connected to a mobile phone network. Any other use is considered unintended use. Unauthorised modification or reconstruction is not permitted. Under no circumstances open the device or complete any repair work yourself.

Areas of use

- Do not use the phone in prohibited areas.
- Switch the phone off in the vicinity of medical equipment (e.g. in hospitals).
- Do not use the phone in petrol stations or near fuels and chemicals.
- Check with the airline whether mobile phones may be used on board.

[16] Appendix

Maintenance and care

The telephone is maintenance-free. If it becomes dirty, give it an occasional wipe with a soft, damp cloth. Never use alcohol, thinner or any other organic solvents.

The telephone should not be exposed to direct sunlight for a long period of time. Furthermore, it should be protected from high levels of heat, moisture or strong mechanical vibrations.

Warranty

The telephone is very reliable to operate. However, should malfunctions occur despite it being installed and used correctly, please contact your local dealer or contact the manufacturer directly. The warranty includes free repair and return. The requirement for this is that it must be sent in its original packaging. Therefore, do not throw this away. The warranty will become void in the event of damage resulting from incorrect handling or repair attempts by unauthorized people (breaking the seal on the device). Repairs will only be carried out under warranty if the completed warranty card is returned accompanied by a copy of the dealer's invoice/till receipt. **Quote the number of the device in all correspondence.**

Disposal of used electric and electronic units (applicable in the countries of the European Union and other European countries with a separate collection system).

The symbol on the product or the packaging indicates that this product is not to be handled as ordinary household waste but has to be returned to a collecting point for the recycling of electric and electronic units.

You protect the environment and health of your fellow men by the correct disposal of this products. Environment and health are endangered by a faulty disposal. Material recycling helps to reduce the consumption of raw material. You will receive further information on the recycling of this product from your local community, your communal disposal company or your local dealer.

Rechargeable batteries

The rechargeable batteries that come with the device can be recycled. Please dispose of these rechargeable batteries in receptacles designed for that purpose or return them to a retail outlet. Dispo-se only of those batteries that have been completely discharged to ensure environmental protection.

SAR Information

Information on radio frequency emissions and specific absorption rates (**SAR** = **S**pecific **A**bsorption **R**ate). All the applicable safety standards related to radio frequency emissions were implemented during the development of this mobile phone. The limit values are based on scientific directives and contain a safety margin in order to guarantee the safety of all persons regardless of age and state of health. The values specified in the directive concerning radio frequency emissions are based on a unit called SAR. SAR values are established using standard methods in which the phone is operated in all possible frequency bands with the highest power output. Although the SAR values of various phone models can differ, all the models were developed to maintain the relevant directives on radio frequency emissions. The following information applies to residents of countries which, as with the European Union, have adopted the SAR limit value recommended by the **ICNIRP** (**I**nternational **C**ommission on **N**on–**I**onizing **R**adiation **P**rotection) which lies at 2W/Kg (averaged from 10 gram tissue):

The highest SAR value measured, averaged over 10 g tissue, was < 1.05 W/kg for this mobile phone measured at the ear.

Technical Data

Standard:	GSM 900, 1800, 1900 MHz Triband
Dimensions:	50,5 x 134 x 17 mm (B x H xD)
Weight:	101 g incl. battery
Power supply:	Input: 100–240 V, 50–60 Hz, 0.2 A
	Output: Mini–USB 5 V,500 mA
Battery:	Model: SKL BL-5C 3.7V, 750 mAh
Stand-by time:	Up to 170h
Max. call time:	Up to 120 min
Display:	5.08 cm (2") colour, resolution 176 x 220
SMS:	Standard SMS
Permissible ambient temperature:	-10°C to 40°C
Permissible relative humidity:	30% to 75%
