Safety Precautions

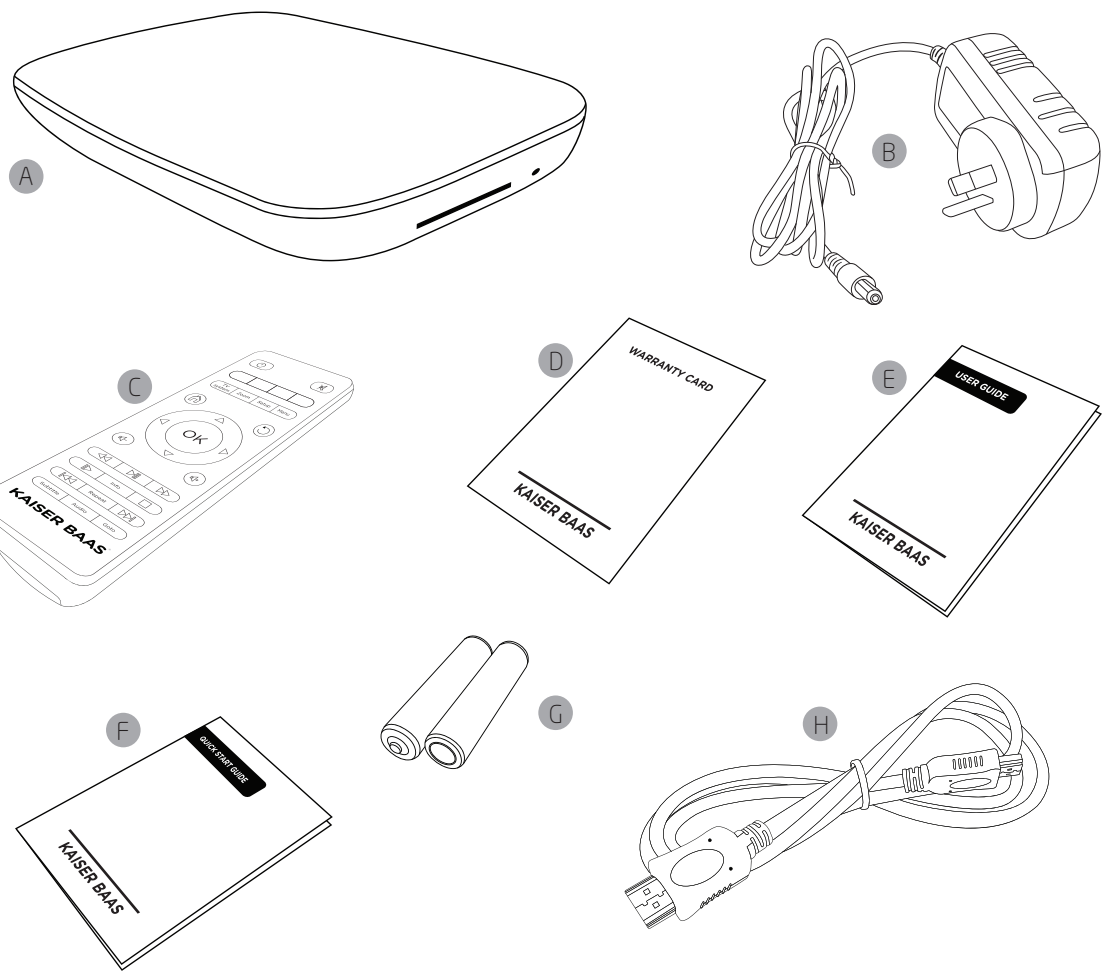
Before using the Smart MediaPlayer+, please ensure you read and understand all the safety precautions below:

- Do not attempt to open the unit or modify it in any way, as this will void your warranty. Maintenance and repairs should only be performed by Kaiser Baas.
- Keep the Smart MediaPlayer+ away from water and other liquids. Do not use wet hands when using the Smart MediaPlayer+ as this may cause the unit to malfunction.
- Keep the Smart MediaPlayer+ away from direct sunlight and heat sources.
- Smart MediaPlayer+ may become slightly warm during use, this does not indicate malfunction.
- Do not place heavy objects on the Smart MediaPlayer+, as this may cause it to malfunction.
- Do not dispose of the unit via conventional domestic waste.
- Use the supplied power adapter; do not substitute for another adapter.

What's in the Box

Please ensure the product package has all the following contents:

- A Smart MediaPlayer+
- B Power adapter
- C Remote control
- D Warranty Card
- E User Guide
- F Quick Start Guide
- G 2 x AAA batteries
- H HDMI cable



Product Diagram

Warning: Before you connect unit to a power outlet, read the safety information in this User Manual

1 Power Status

Power status light turns blue when unit is on

2 SD/MMC reader

Reads secured digital cards

3 Hard Reset

Restore factory defaults

4 2 x USB

Standard USB 2.0 HOST port (Supports FAT32/NTFS/ EXT3/HFS Storage file systems)

5 S/PDIF

Connect to AV reciever

6 HDMI out

Connects to the HDMI input on TV (cable provided)

7 Ethernet Port

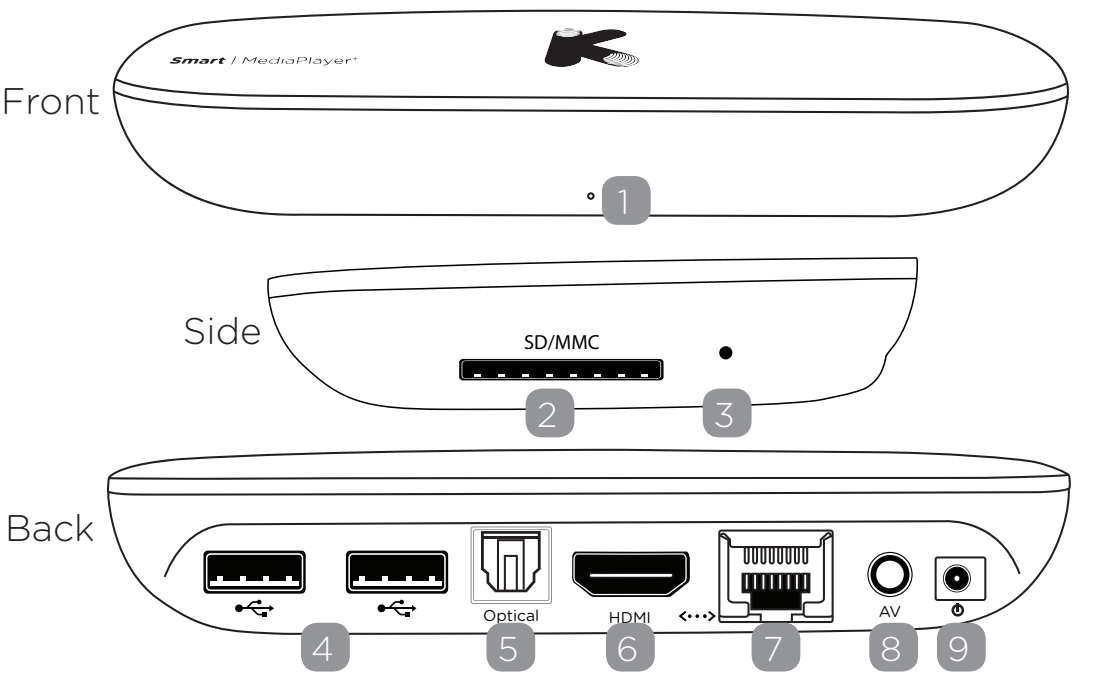
Connect the network cable

8 AV Out

Connects to analog Video & Audio input onTV (cable not provided)

9 Power socket

Connects to the AC pack



Smart MediaPlayer+ Remote

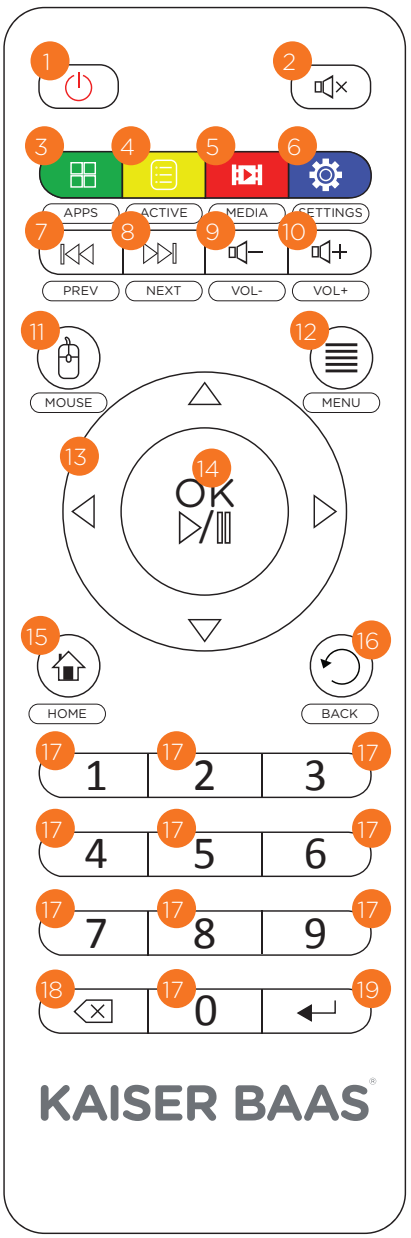
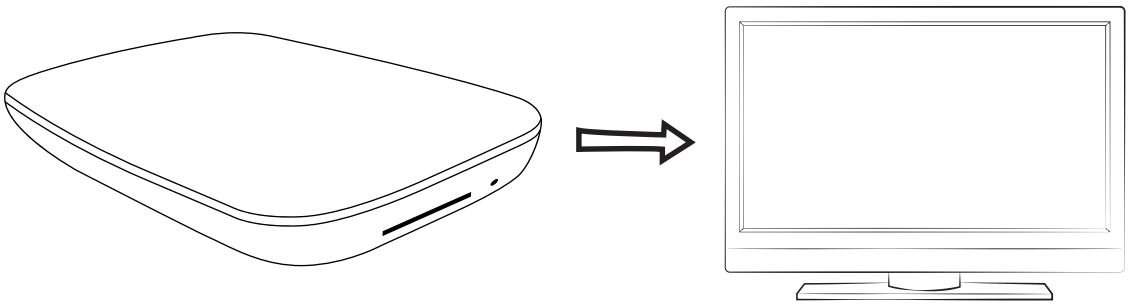
18. Backspace
19. Return

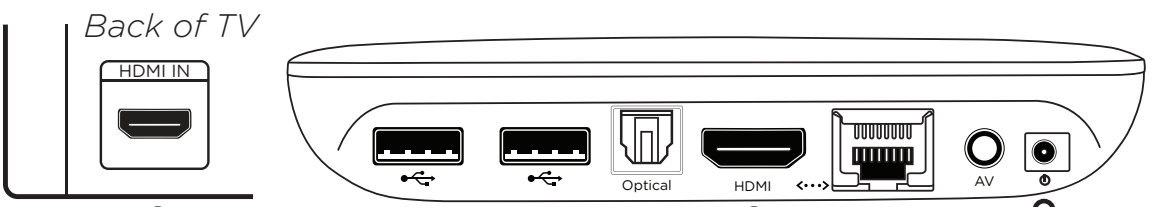


Setting up the Smart MediaPlayer+

TIP: Use the HDMI cable to get the 1080P HD video quality. Video quality for component connection is 1080i and composite is 480i/576i.



Steps to Connect:



1 Connect HDMI cable

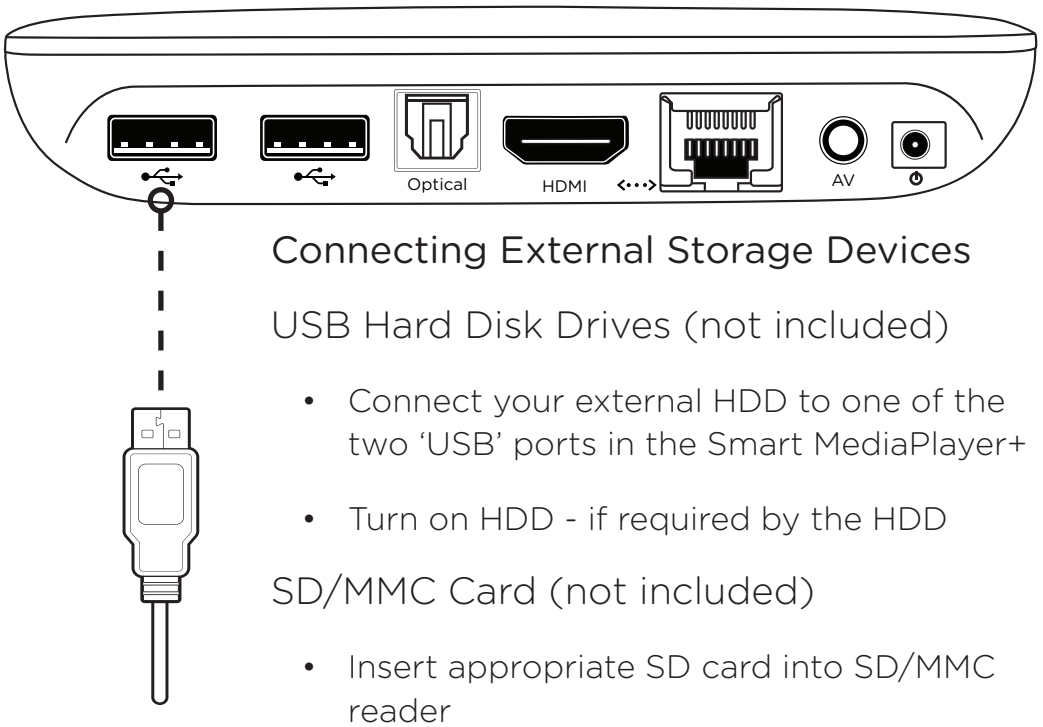
- Connect one end of cable to the back of TV
- Connect the other end to the 'HDMI' port in Smart MediaPlayer+

2 Connect Power

- Connect AC pack to 'Power input' of Smart MediaPlayer+
- Connect the wall plug to a power outlet

Warning: The 'Power socket' is next to the AV out jack. DO NOT insert power cord into AV jack (Yellow) by accident.

3



Connecting External Storage Devices

USB Hard Disk Drives (not included)

- Connect your external HDD to one of the two ‘USB’ ports in the Smart MediaPlayer+
- Turn on HDD - if required by the HDD

SD/MMC Card (not included)

- Insert appropriate SD card into SD/MMC reader

4

Turn the Smart MediaPlayer+ on

Note: Please make sure your TV is on and the appropriate HDMI source is selected.

- ‘Power indicator’ light will turn blue

NOTE: There isn’t an ON/OFF button on Smart MediaPlayer+. If Power status light is Red use Remote control to turn unit ON/OFF. Power status light then turns blue.

For the first run, it may take up to 10 minutes to complete initialization process and will take you to the Start-up wizard.

Note: This wizard will only appear once. You can skip this wizard by selecting Next on every page and then configure later from the Settings menu.

Note: Scrolling will not work when the mouse mode is on so exit the mouse mode if it is active.

Language Setup

This will allow you to choose the language for your Smart MediaPlayer+

Navigation: Use the Up/Down arrow keys to scroll through or highlight

Use the Right/Left arrow keys for horizontal scrolling

Press OK button to confirm selection

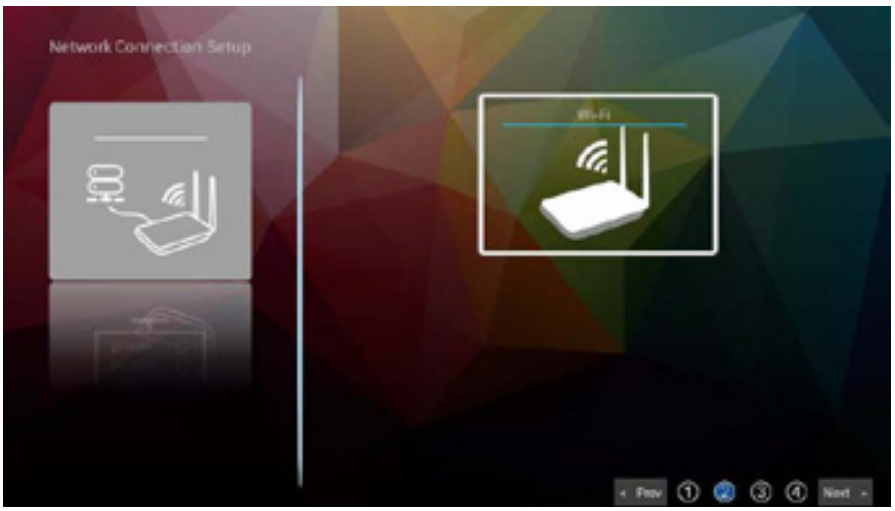
Select Next and press OK to go to next page

Language Setup Screen

WiFi Setup

This will allow you to connect the Smart MediaPlayer+ to your Wireless network.

- Navigation: Highlight the Wi-Fi Icon> Press OK
- You will see a list of available wireless networks (SSID), select your wireless network and Press OK button
- Type the password using the On-Screen Keyboard.
- Press the return button once (Do not press it more than once, that will exit the password)
- Press Right arrow key to Select OK and Press OK button on the remote to confirm
- When the connection is established, you will see 'connected' under the SSID
- Select Next and press OK to go to next page



WiFi Setup Screen

Screen Resize Setup

This will allow you to adjust the screen size and make it suitable to your TV Screen.

Navigation: Use Right/Left arrow keys to make the adjustment.

Once the adjustment is made, Select Next and Press OK button to go to next page

Movies:

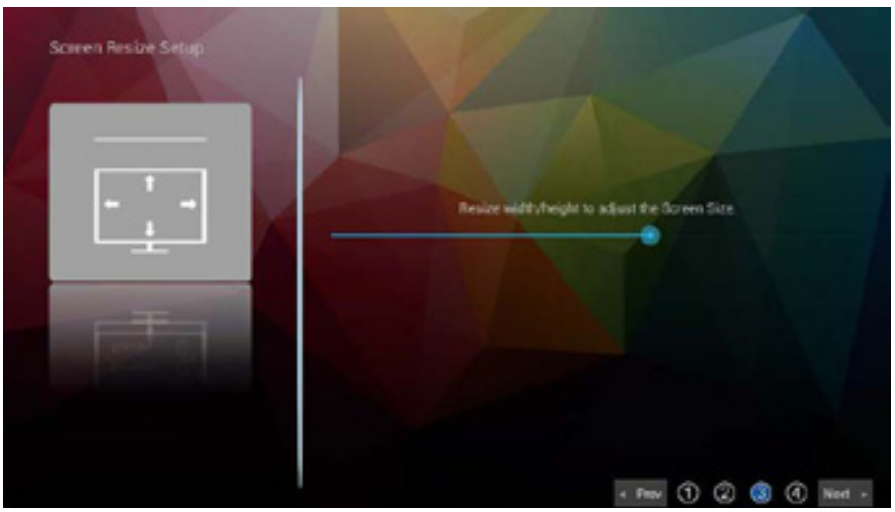
- Displays all the supported video files in current directory.

Photos:

- Displays all the supported image files in the current directory.

Music:

- Displays all the supported audio files in the current directory.



Screen Resize Setup Screen

Time Zone Setup

This will allow you to select the Time Zone for the Smart MediaPlayer+

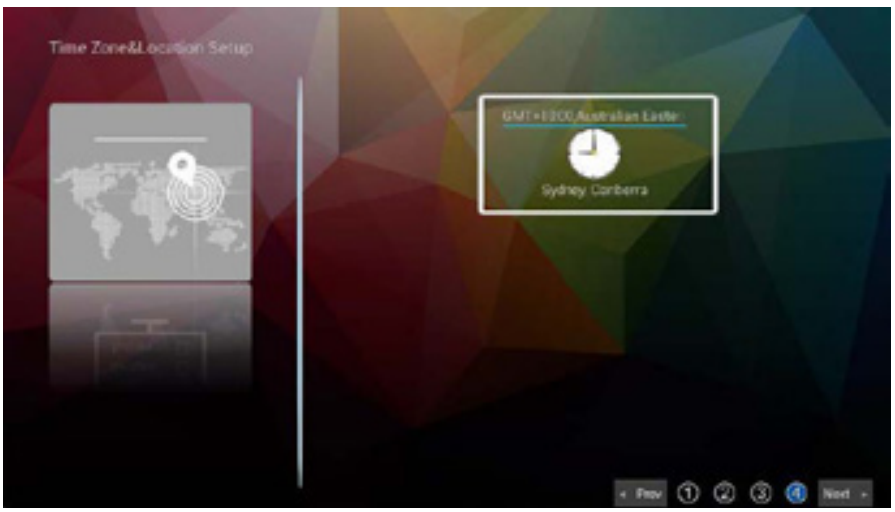
Navigation: Highlight the Time Zone icon

Press Right/Left arrow keys to scroll through time zones

Once the time zone is selected, press the down arrow key

Select Next and Press OK button to confirm

Note: Scrolling will not work when the mouse mode is on so exit the mouse mode if it is active.



Time Zone Setup Screen

Home Screen

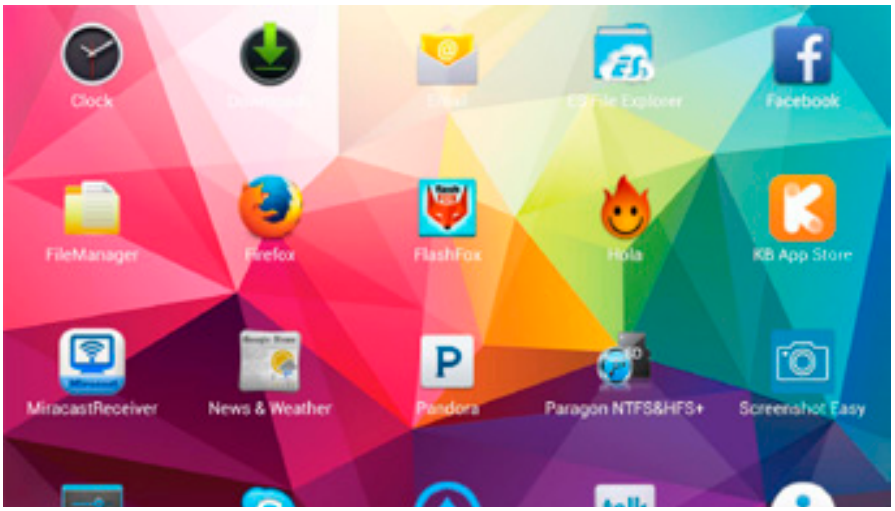
The home screen is the first screen of information displayed when the Smart MediaPlayer+ is setup.

The home screen can also be accessed at any time by pressing the home button on the remote control.

Home Screen Screen

You will see following Icons on Home Screen

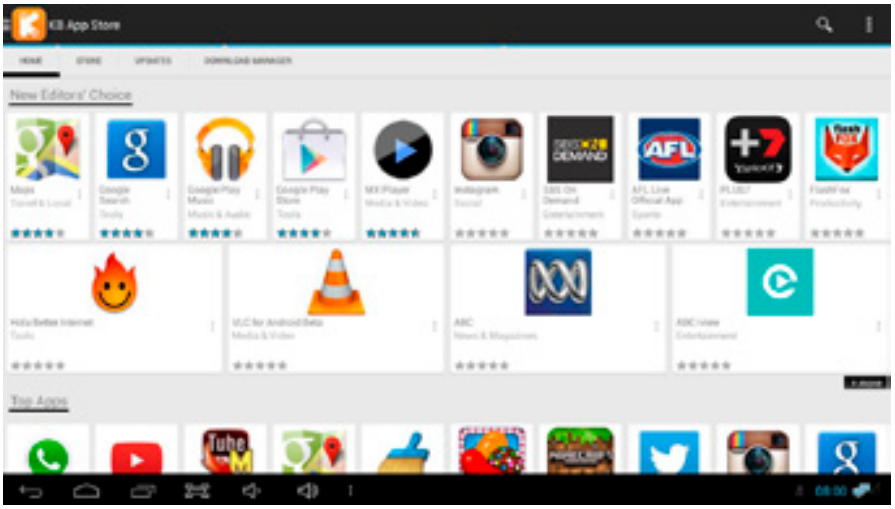
- Facebook : This will launch the Facebook application
- YouTube : This will launch the YouTube application
- WWW: This will launch Internet Browser
- Applications: This will allow you to access applications installed on the Smart Media Player+



Applications Screen

To download more apps (e.g. Google Play Store) you can go to KB App Store.

Note: Please make sure the Media Player is connected to internet before you proceed to KB App Store.



KB App Store Screen

- XBMC (Media Player): This will launch the XBMC Media player
- File Browser: This will take you to the File Manager
- Settings: This will take you to the System Settings
- Power: This will allow you to Power off unit, Restart and Stand by

XBMC Media Player

It allows you to play and view most videos, music and images from local and network storage media.

You can get more information about XBMC at:

http://wiki.xbmc.org/

Playing Media Files through XBMC

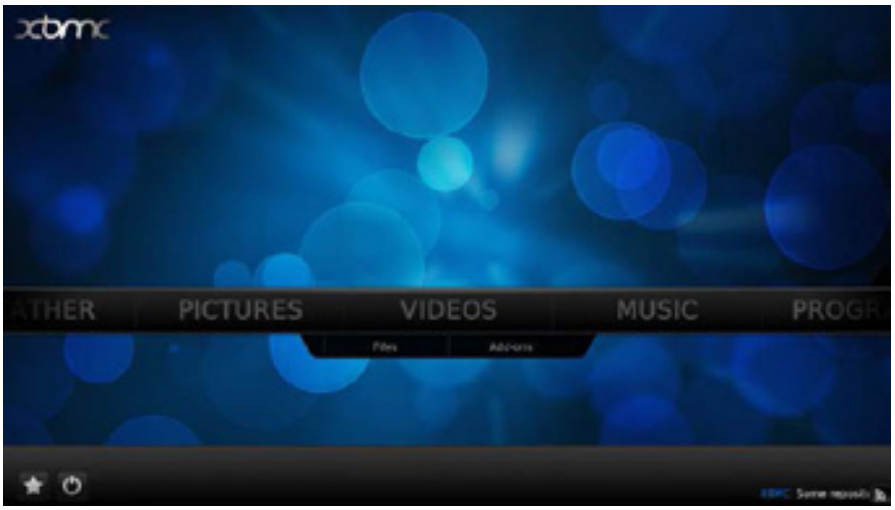
Connect the External Storage Device to one of the USB ports.

Note: It may take up to 5 mins for the Smart MediaPlayer+ to scan and list the hard drive. When the HDD is ready, you will see this message "USB is mounted" on bottom right corner.

If you still do not find the hard drive, please see below section for "Finding Hidden Hard Drive" and follow the procedure.

Videos

XBMC supports all the main video formats including online media. It can import, browse and play your Movie collection with ease. You can also add local and network sources to the Video library.



Videos Screen

Navigation: Use arrow keys to navigate and OK button to confirm selection.

- Open the XBMC program from home screen

  Tip: Alternatively you can press the Media button on the remote control to open the XBMC media player

  Note: For the first run, it may take few minutes to load.

  Note: Scrolling will not work when the mouse mode is on so exit the mouse mode if it is active.

- Go to Video > Select Files and Press OK

- Open usbhost0/usbhost1/usbhost2 and you can directly view the sources there. (You need to know clearly which drive connects to which USB port).

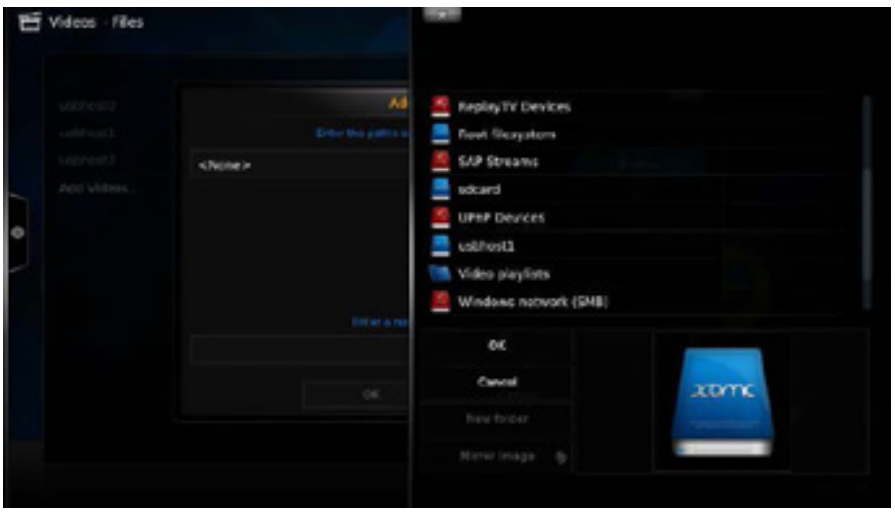
Video Files Screen

Open the Folder and select the Video file, Press OK to launch movie.

Note: For various reasons, some HDDs will not appear in the list. If you do not see them under USB host, Please refer to the following section "Finding Hidden Hard Drive".

Finding Hidden Hard Drive

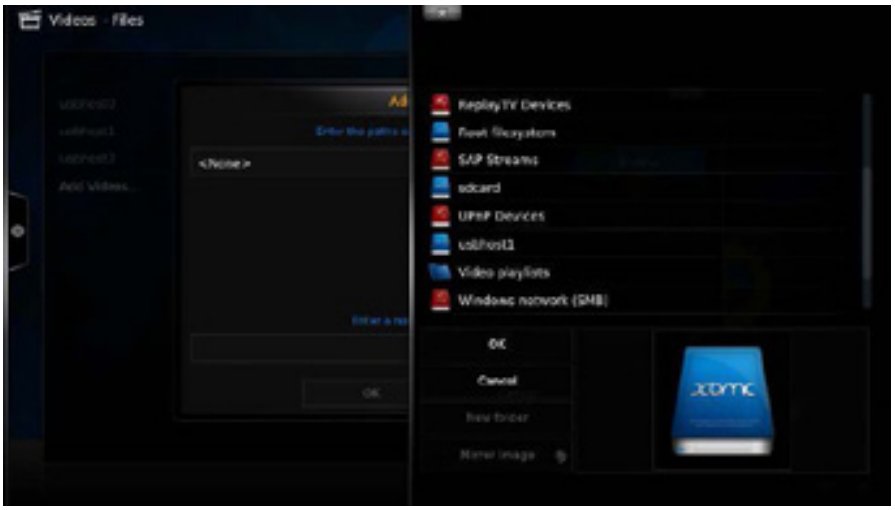
- Go to Video > Go to Video > Select Files and Press OK
- Select Add Videos and then Browse
- Scroll down and Open SDCARD



Finding Hidden Hard Drive Screen

- Open Paragon folder and you will see the HDD contents there
- Open the folder that you want add as a video source
- Then Press the Left arrow key to navigate to OK, and press OK button
- Open Paragon folder and you will see the HDD contents there
- Open the folder that you want add as a video source

- Then Press the Left arrow key to navigate to OK, and press OK button



HDD contents Screen

Tip: Alternatively, you can use mouse mode on the remote control.

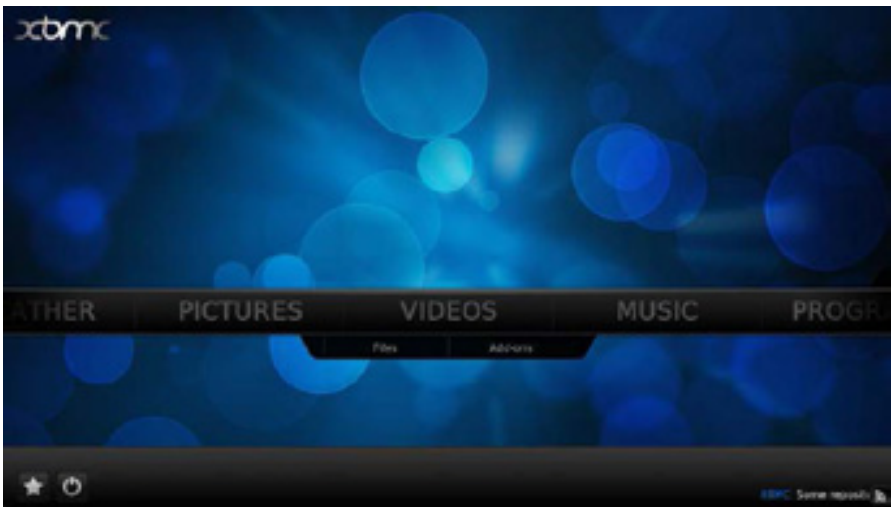
- Select OK on the Next Window (Add Video Source)
- Now you will see the newly added folder under Videos-Files.
- Open that folder, select the Movie file and press OK button to play the movie.

Adding Video Sources and Setup Movie Scraper

Media sources are the links that tell XBMC where your content is stored and what type of content is contained within each one. You can have multiple sources for each media type.

You can use local media, file shares, removable USB drives, etc.

Step 1: Go to “Videos” in the main screen

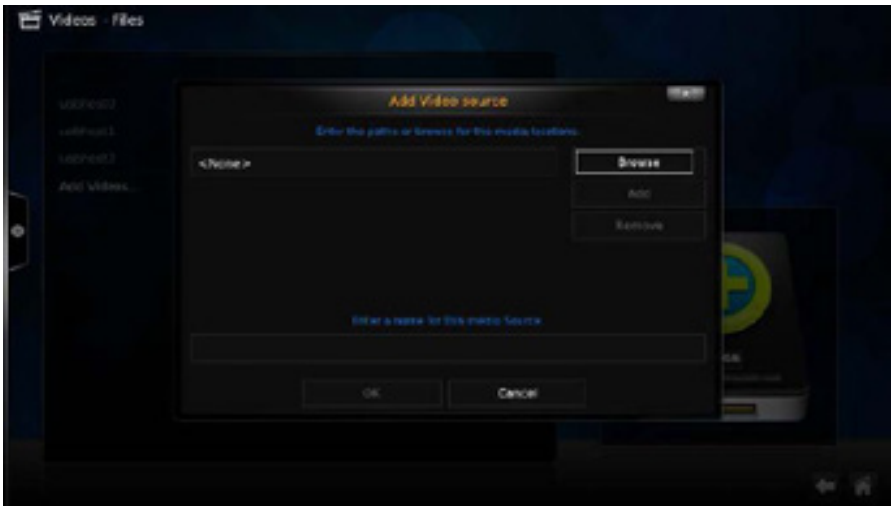


Videos Screen

Step 2: Now click “Add Source”.

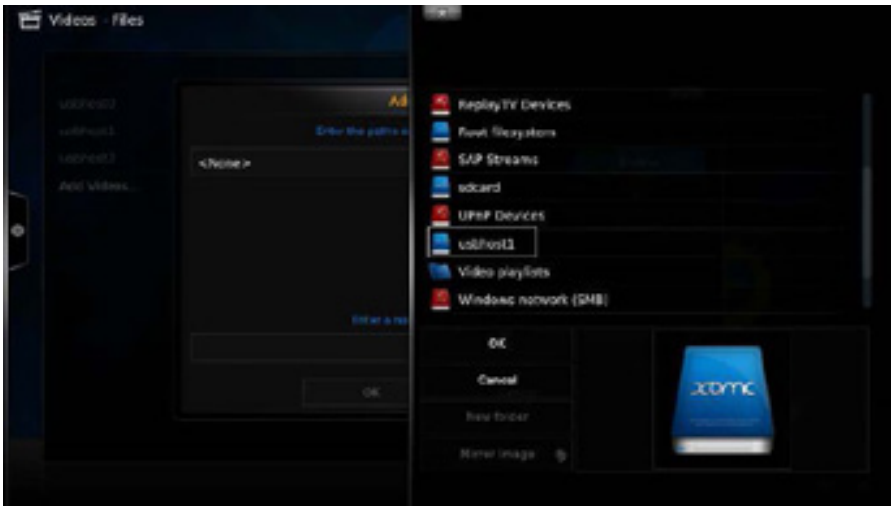
Video Files Screen

Step 3: Then click the “Browse” button.



Add Video Source Screen

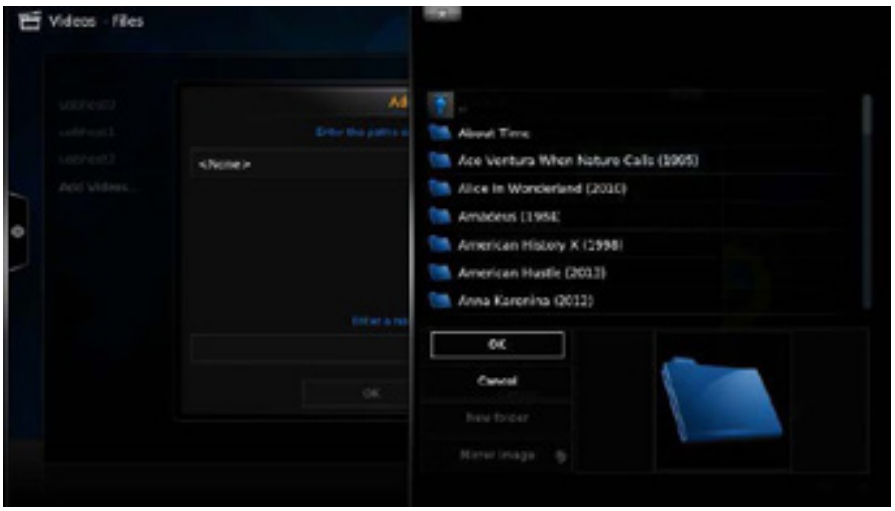
Step 4: Now browse to the storage device where you keep your videos stored and open it



Browse Video Screen

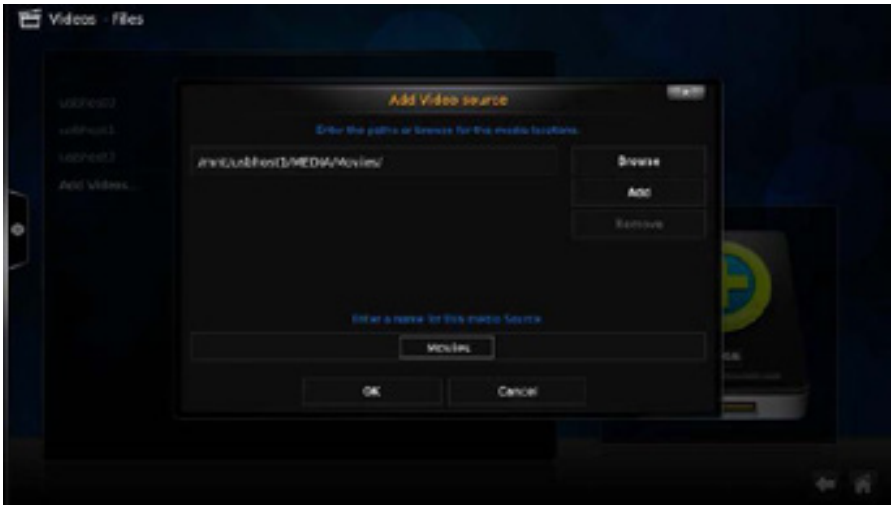
Once you located the folder that you want to add as a video source, open the folder.

Then Press the Left arrow key to navigate to OK, and press OK button.



Browse Video Screen

Step 5: Name this Video Source however you like. If it is a movie folder, you will probably want to name it “Movies”, and if it is a TV Show folder then you will probably want to name it as “TV Shows”. Then click “OK”.



Add Video Source Screen

Step 6: Scraping - With this feature you can let Smart MediaPlayer+ pick the Fan-Art and Thumbnails from the internet that way giving your Media Player a very nice look by showing the appropriate Fan-Art and Thumbnails when browsing your media.

Note: Please make sure the Smart MediaPlayer+ is connected to internet to do the scraping.

The set content window will display, this is where you tell what type of media is in the folder. Press the OK button to go scroll through the Media Type and then Select Movies. Press the down arrow key and navigate to OK. Press OK button on the remote control.

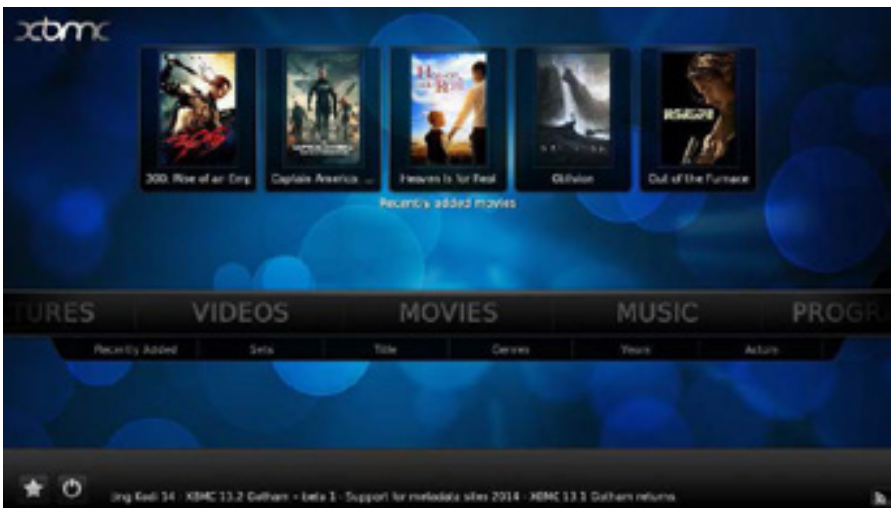
Tip: If you do not want to set the content and scraping now, you need to select the media type as ***None,*** *you can then Set the Content and Scraping later by selecting the source and bringing up the contextual menu on the Remote control.*

Set Content Screen

Step 7: Press Yes to scan the content to the library. It will start scanning all your Movie files from the specified folder. This process may take a while depending on the number and size of the movies present.

Video Files Screen

Create a new library called ‘Movies’



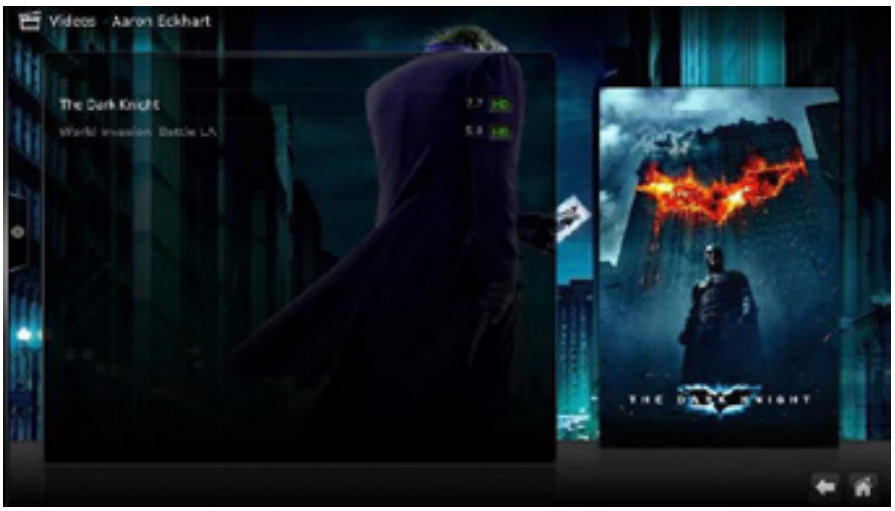
Video Files Screen

You can browse the movies by following categories: Recently Added Movies, Sets, Title, Genre, Year or Actors.

For example if you select the category ‘Actors’, you will see the list of Actors name from the Movies stored on your External Storage Device.

Pick one from the list and press OK.

Browse ‘Actors’ Category Screen



Browse ‘Actors’ Category Screen

You will now see the movies from the selected actor.

Note: Scraping content is based on the Movies stored on your External Storage Devices. These categories on the library will not work if External Storage is removed from Smart MediaPlayer+.

Also, when you reconnect the hard drive, please make sure to connect it to the same USB port (e.g. USB0 or USB1) when the scraping is made otherwise it will not find the movies.

Remove a Source: Highlight the Source > Press the Contextual Menu button. You will have the Remove source option there. Select and Press OK.

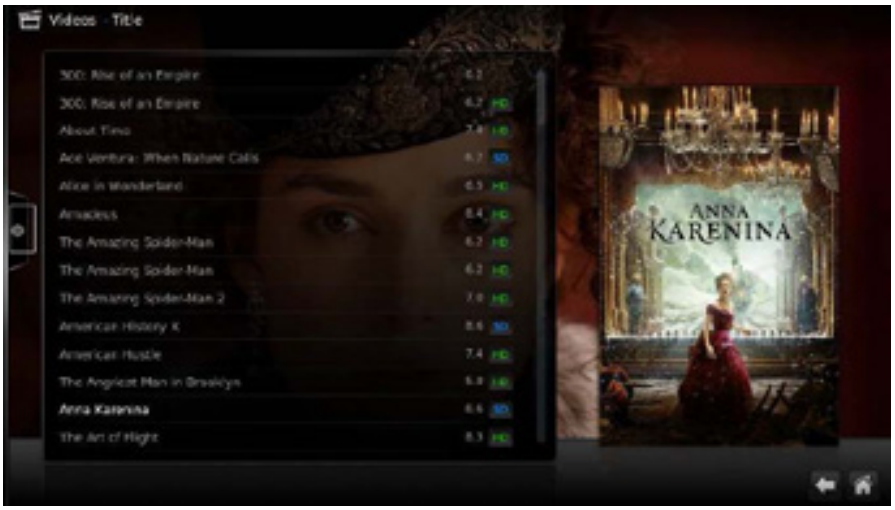
You can also set the Scraper for TV Shows and Music Videos with the same procedure. If you have those stored on your storage device, add TV Shows/Music videos folder as a source and on Step 6.

For TV Shows: Select TV Shows as the Directory Content.

For Music Videos: Select Music Videos as the Directory Content.

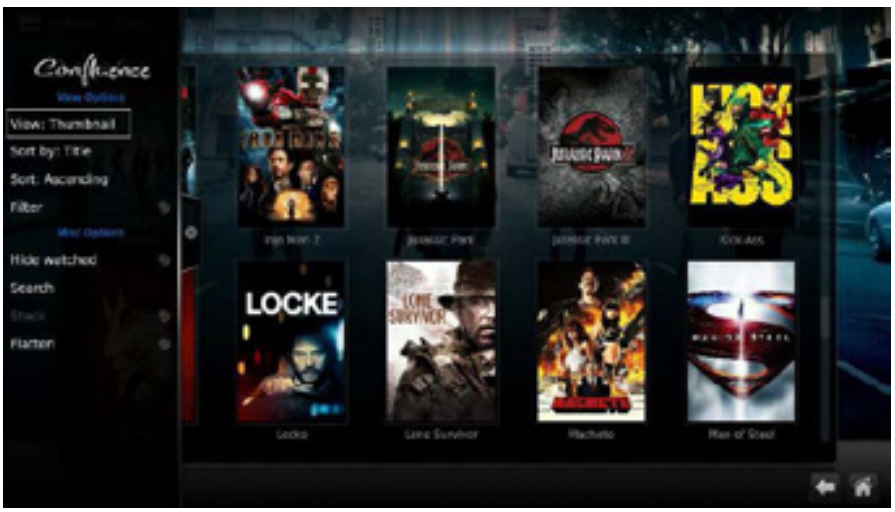
Press the down arrow key and select OK then press the OK button on the remote control.

Changing folder views: By default, folder view is set as lists. To change it, press the left arrow key to launch side bar.



Video Titles Screen

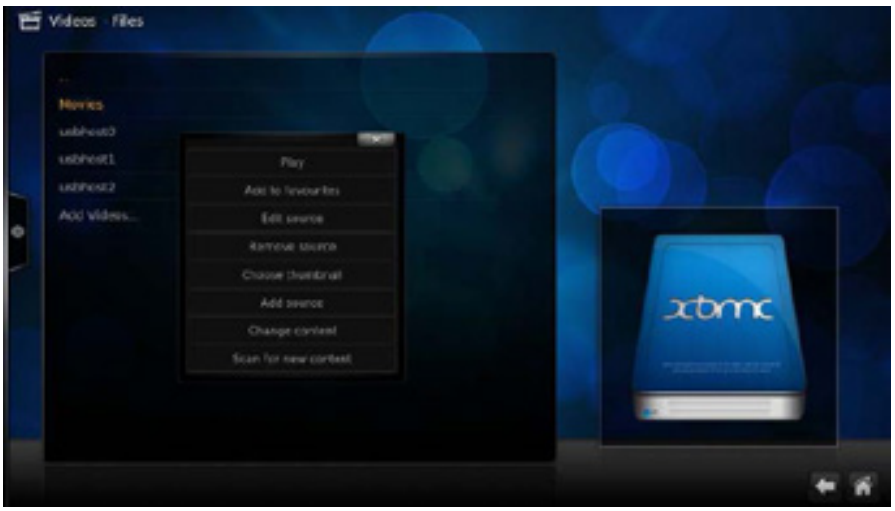
Select the view that you want. For examples Thumbnail



Change Video View Screen

Set the content and Scraper after adding the Source:

- On the main screen, go to Videos > Files
- Highlight the Movie Source
- Press the Contextual Menu button on the Remote Control
- Select ‘Set Content’ and Press OK



Video Files Screen

From here, please follow from Step 6 on the above Section ‘Adding Video Sources and Setup Movie Scraper’

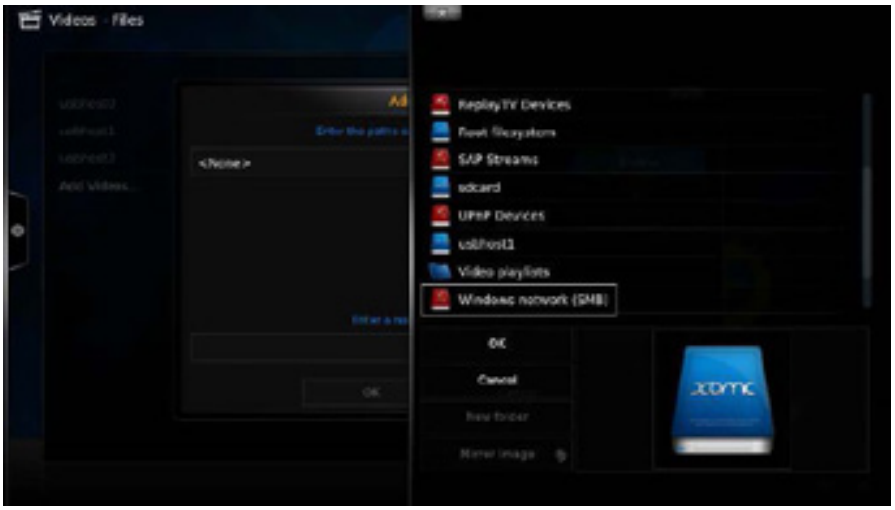
Adding a Source from the Network

Note: Make sure the Smart MediaPlayer is connected to the network via either LAN or Wi-Fi.

- On the Main screen, go to Videos > Files
- Add Video Source and then navigate to Browse, press OK

- Select ‘Windows Network (SMB)’
- You will see the list of Computers and Network Storage Devices connected to the same network.

Note: On your PC, you need to share the folders and turn the Password Protected Sharing off.



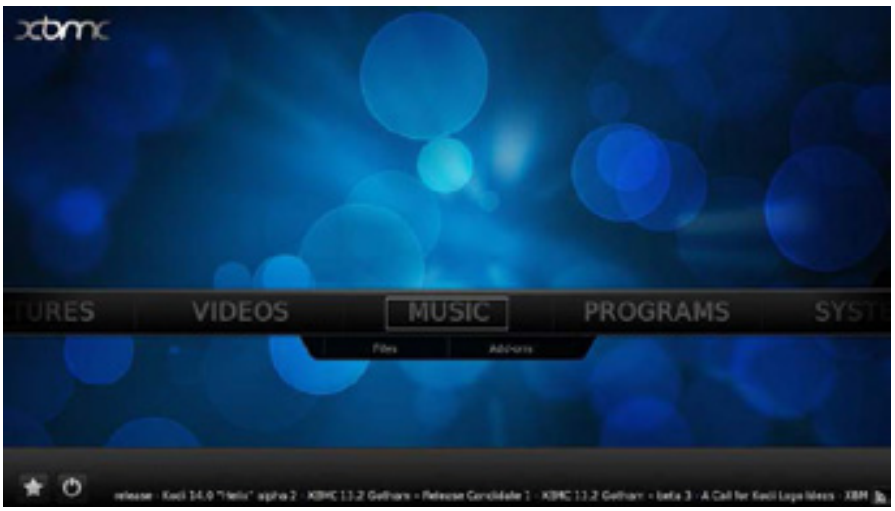
Video Files Screen

- Open the Workgroup or Domain
- Open the Computer/Network Storage Device
- Once you located the folder that you want to add as a video source, open the folder
- Then Press the Left arrow key to navigate to OK, and press OK button
- From here, please follow from **Step 6** on the above Section **‘Adding Video Sources and Setup Movie Scraper’**.

To Change the Settings for Video: On the XBMC main screen, go to Settings and then Video

Music

You can add local and network sources to the Music library. For more information about this, please visit: http://wiki.xbmc.org/



Music Screen

Navigation: Use arrow keys to navigate and OK button to confirm selection.

Note: Scrolling will not work when the mouse mode is on so exit mouse mode if it is active.

Adding Music Source

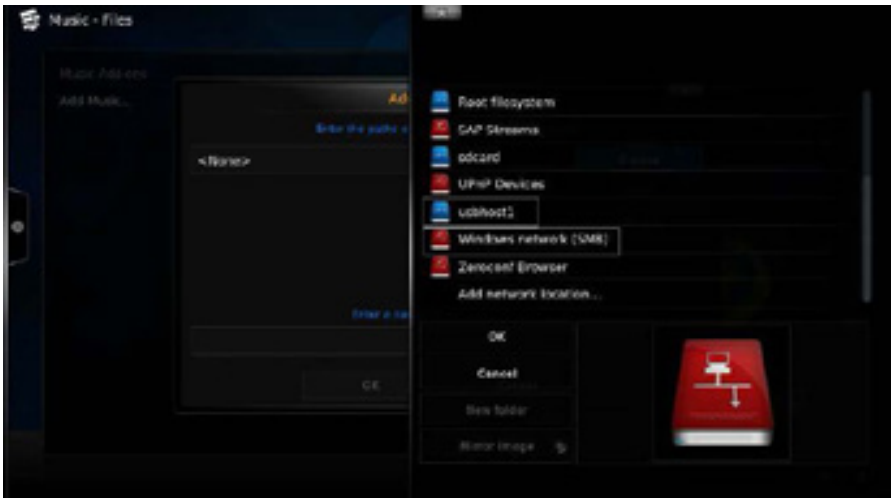
Navigation: Use arrow keys to navigate and OK button to confirm selection.

On the XBMC main screen, Go to Music > Select Files and press OK.

Click Add Music and then Browse.

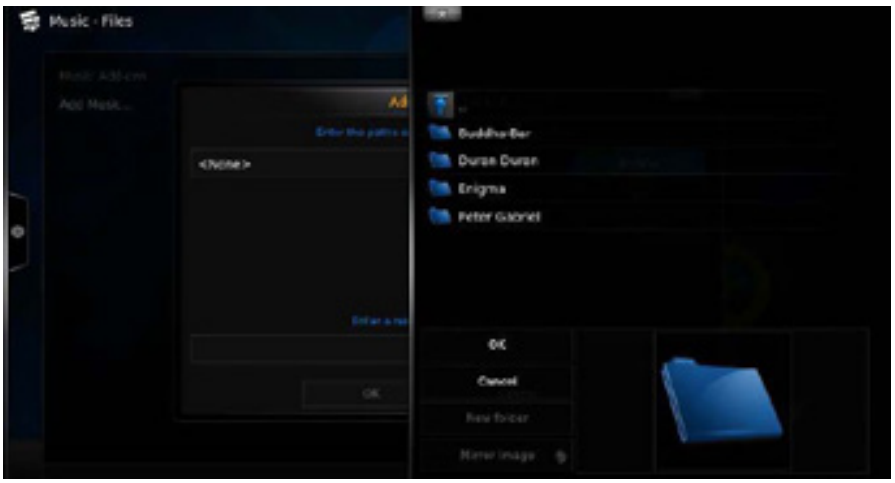
Add Music Screen

- Select the usbhost0/usbhost1/usbhost2 from the list. (You need to know clearly which drive connects to which USB port.)
- To add a source from network select Windows network (SMB)



Add Music Screen

- Press OK button to open the USB Drive
- Open folder that contains Music and Press Left arrow key to navigate to OK



Music Files Screen

- Press OK Button or use mouse mode on remote control
- Select OK on the Next Window (Add Music Source)
- Now you will see the newly added folder under Music

Music Files Screen

- Open that folder, select the music file and press OK button to launch the music.

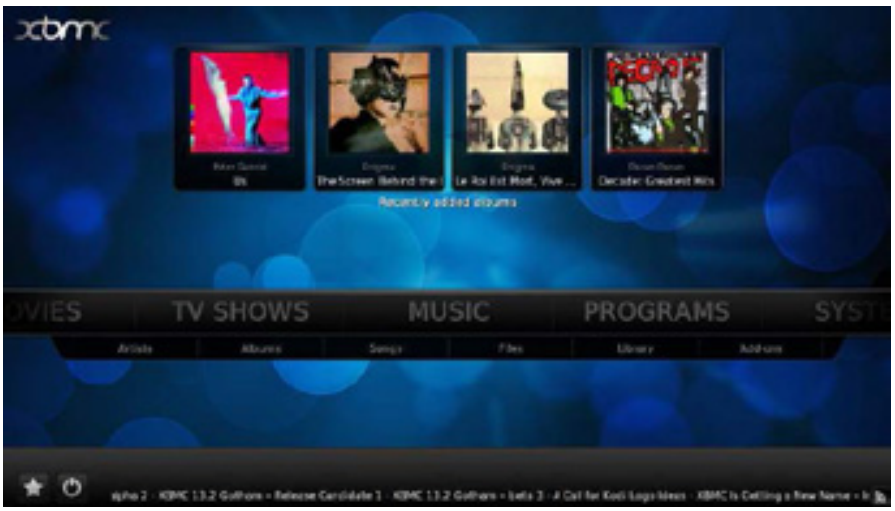
Note: Due to various reason, some HDDs will not appear in the list. If you do not see them under USB host, Please follow the Finding Hidden Hard Drive

Scanning Your Music into the Music Library

- To scan your music collection into the Music Library, go to Music>File and highlight the Source folder with music files.
- Press the Contextual Menu button on the remote control to bring the Context Menu
- Select the option labelled “Scan Item to Library”. XBMC will then scan the selected music source into the library database.

Scan Items Screen

Once the scan is complete, you can browse your collection by Artist, Albums, Songs etc.



Scan Items Complete Screen

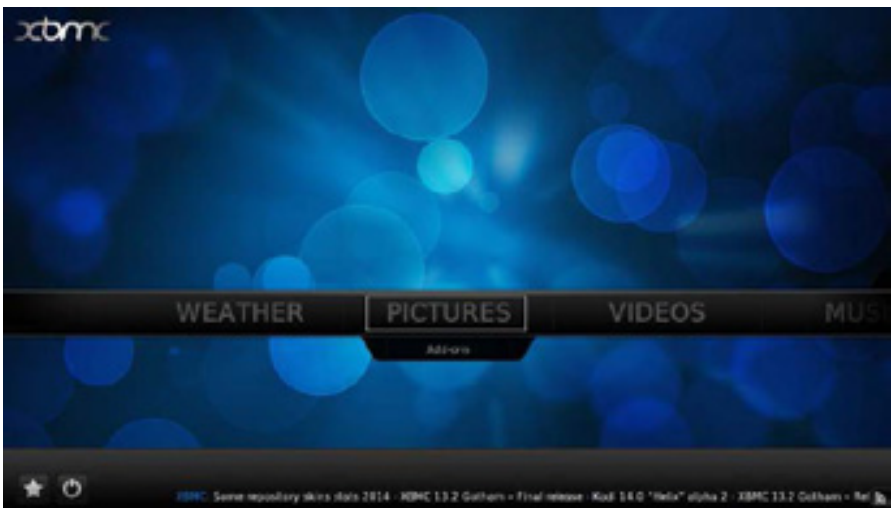
To Remove a Source: Highlight the Source > Press the Contextual Menu button. You will have the Remove Source option there. Select and press OK.

To Change the Settings for Music: On the XBMC main screen, go to Settings and then Music

Pictures

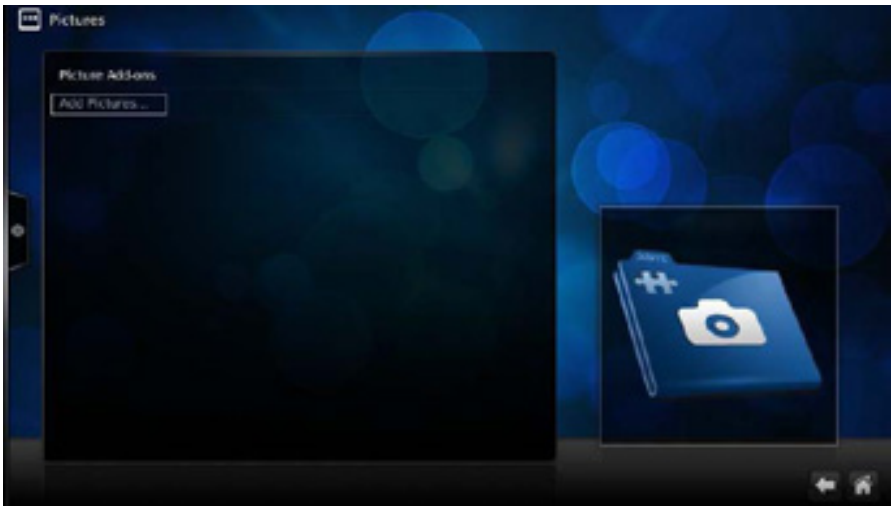
The Smart MediaPlayer+ allows you to view images as a slideshow with nice transition effects and even allows you to listen to your music while viewing your slideshow. For more information about this, please visit: http://wiki.xbmc.org/

Note: Scrolling will not work when the mouse mode is on so exit the mouse mode if it is active.



Pictures Screen

- Select Picture and Press OK (Do not click Add on)
- Select Add Picture and then Browse



Add Picture Screen

- Select the usbhost0/usbhost1/usbhost2 from the list. (You need to know clearly which drive connects to which USB port)
- Press OK button to open the USB Drive
- Open folder that contains Images and Press Left arrow key to navigate to OK

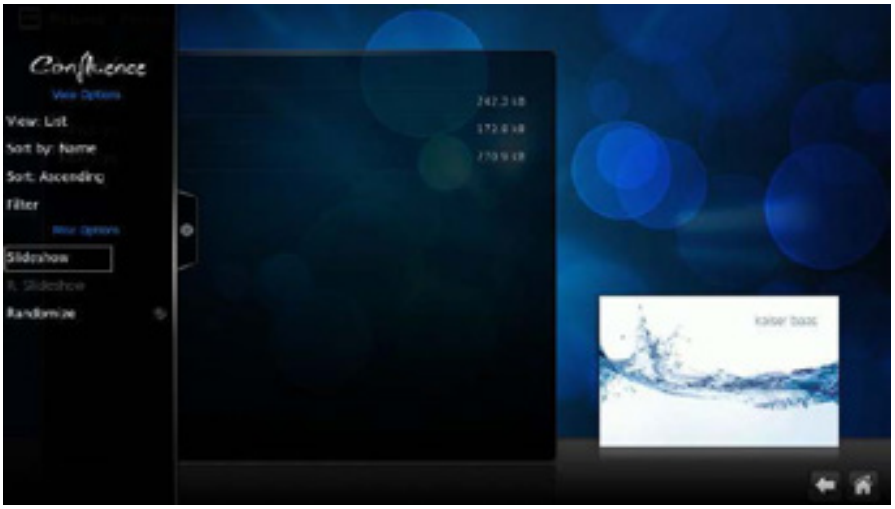
Tip: Alternatively, you can use mouse mode on the remote control.

- Select OK on the Next Window (Add Picture Source)
- Now you will see the newly added folder under Picture

Add Picture Screen

- Open that folder, select the image file and press OK button to view the image.

Start a Slide show: Open the Image folder and then press left Arrow key, Select Slideshow.



Start Slideshow Screen

*Note: Due to various reason, some HDDs will not appear in the list. If you do not see them under USB host, Please follow the **Finding Hidden Hard Drive** section of the manual*

Playing Music with your SlideShow: In order to play music with your slideshow, simply start a music source (playlist, song, etc} and then start the slideshow. The music will play in the background.

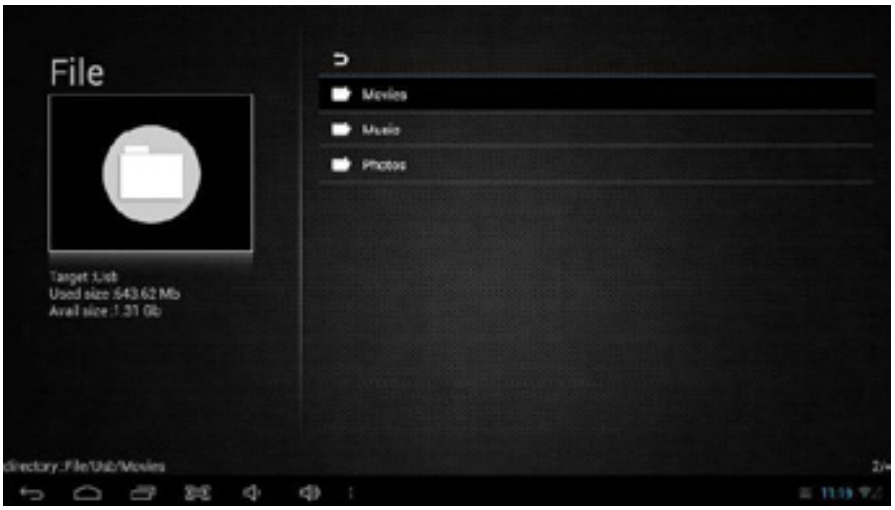
Remove a Source: Highlight the Source > Press the Contextual Menu button. Select the Remove Source option and press OK.

Change the Settings for Pictures: On the XBMC main screen, go to Settings and select Pictures

For all other features on XBMC Media Player, you can find information on http://wiki.xbmc.org/

File Browser

The file broswer is a file manager application that allows to browse and access directories and files on both local and external storages.



File Browser Screen

Settings

The Settings menu lets you customize the way you use the Smart MediaPlayer+ and set preferences for the device.

Tip: This menu can also be accessed by pressing 'Settings' button on remote control

Navigation: Use Up/Down arrow keys to scroll through options.

Press OK button to confirm selection and right left arrow keys to switch Right and Left panes.

Note: Scrolling will not work when the mouse mode is on so exit mouse mode if it is active.

Following options are available under Settings Menu:

Wireless & Networks

- Wi-Fi : Turn Wi-Fi ON/OFF
- Data Usage : Check the data usage
- More : For advanced Network Configurations. You can also access the Ethernet setup here.

Note: You may need to turn the Wi-Fi off to enable the Ethernet connection.

Device

- Sound : Adjust system sounds such as volume, audio output etc.
- Display : Adjust the display settings

- Storage : Check the storage status
- Apps : This will allow you to uninstall applications.

Note: You cannot uninstall some apps as it may affect the functionality of the device.

- User : Add users

Personal

- Location Access : Change the location settings here
- Security : Device security settings (Note : recommended default settings)
- Language & Input : Change the language and keyboard input methods here
- Backup & Reset: Set up Backup & Restore. You can also do the 'Factory Reset' from this option.

Accounts

- Add accounts : Create or delete accounts such as Gmail, Facebook, skype, Google etc.

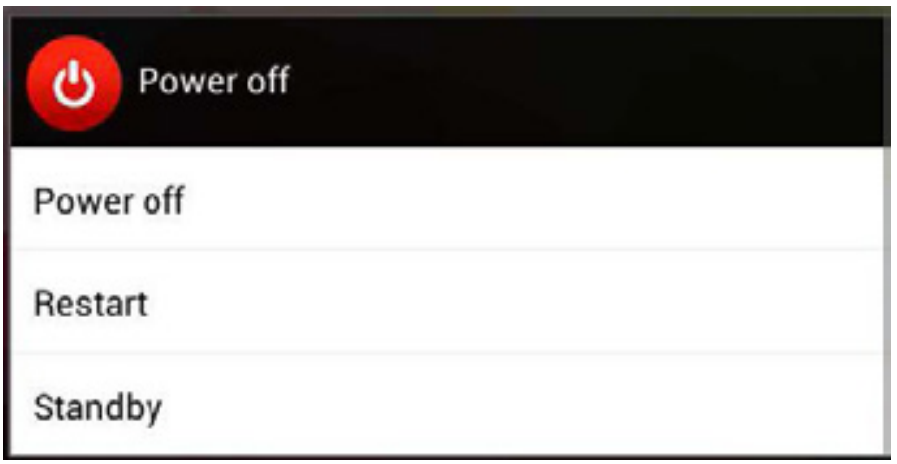
System

- Date & Time : Adjust the time settings
- Accessibility : Setup the accessibility options such as Magnifications, Text to Speech etc.
- Developer Options : Please do not change anything here, it may affect the functionality of the device.

- About MP : View information about the Android version, Firmware version etc.

Power off the Smart MediaPlayer+

Click the power icon on the home screen and select Power Off



Power Off Screen

Alternatively, hold the power button on remote control until you see the message “shutting down”.

Tip: When the device is turned off, the blue light will turn to red.

Other features

Kill Apps: To close an application running on the back-ground:

- Press the Active button on the remote control
- Use the Right/Left arrow keys to scroll through and select the application
- Press the Up arrow key
- You will see a Popup with the question “Are you sure to close this app?”
- Select Yes and Press OK button

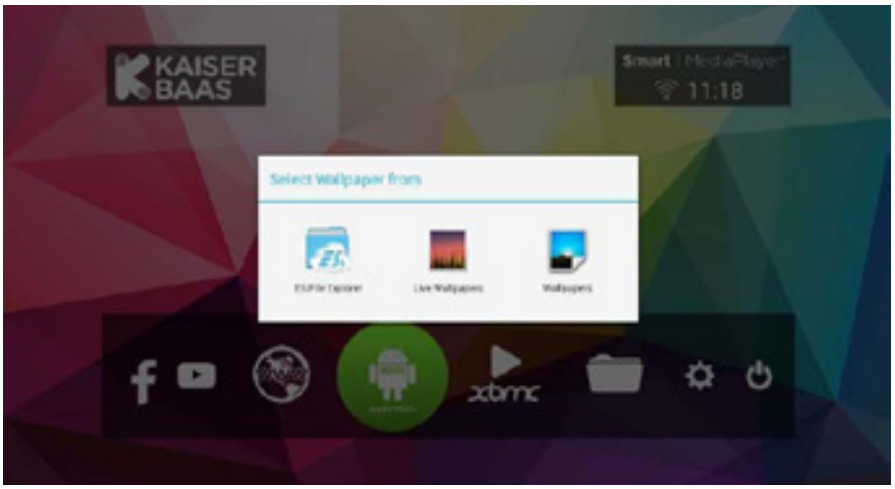
Wallpaper:

- Go to Home screen > Press the Contextual Menu button on the remote control
- Click ‘Set the Wallpaper’, Press OK

Home Screen Screen

To use your own image from a storage device, select the first option; ES File Explorer then browse and locate the image file from your Storage Device.

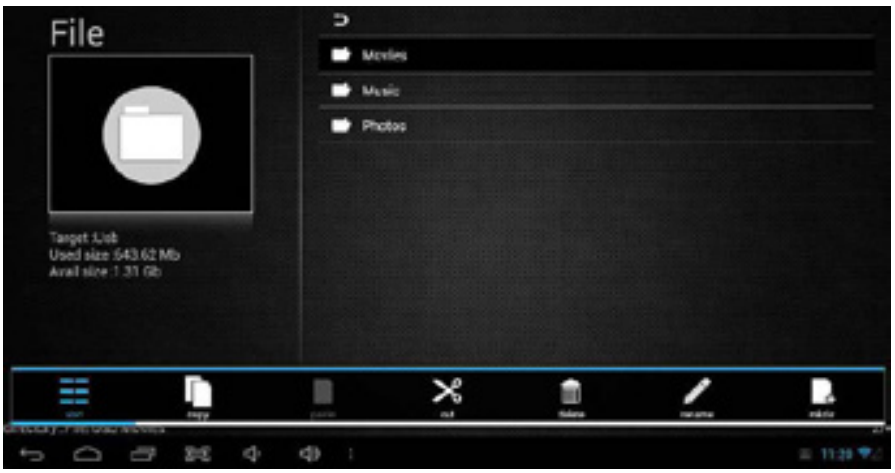
To use the preloaded wallpapers, select Live Wallpapers/ Wallpapers.



Select Wallpaper Screen

File Transfer: This will allow you to copy/move files or folders from one location to another.

- Go to the File Browser Application from the Home Screen
- Open the Source Storage Device
- Highlight the file/folder
- Press and hold the OK button on the Remote Control
- You will see the popup bar with these options; Sort, Copy, paste, delete, rename, Make Directory

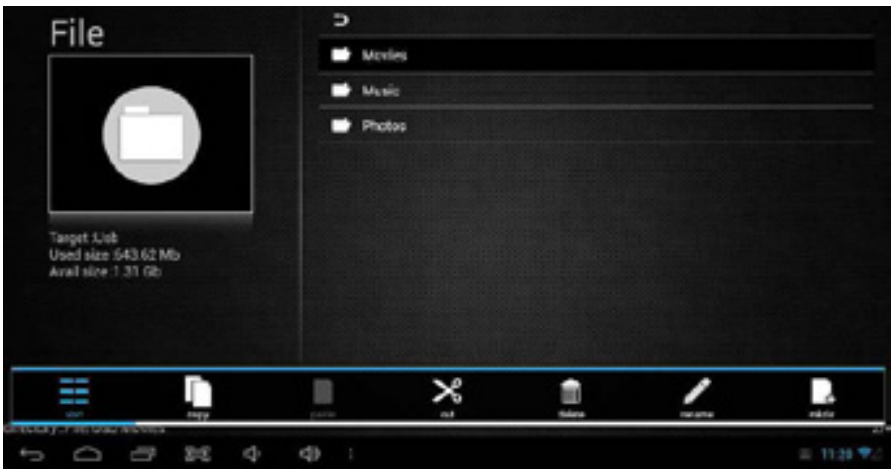


File Transfer Screen

- Select Cut or Copy to transfer the file or folder to another location

Note: If you select Cut, it will permanently move the file/folder from its original location.

- Go to the destination location and press and hold the OK button
- You will see the popup bar with Paste option, select Paste and press OK.



File Transfer Screen

Firmware Upgrade

Firmware is an important set of instructions that tells your media player how to operate, what the interactive screens look like etc.

You need to keep the Smart MediaPlayer+ updated. Kaiser Baas always develops newer, faster and more efficient ways of doing things that your media player needs to know.

To upgrade the firmware;

- Go to Applications from home screen
- Open the System Update app

Factory Reset

There are two ways to do the Factory Reset.

- Hold the reset button for 10 sec (or until it reboots) on the Smart MediaPlayer+ while it is ON

  Tip: you can use this option if the device doesn't boot. Make sure you the device is ON and blue light is up.

- Go to settings > Backup & Reset > Factory data reset

  Note: Make sure you tick Erase SD card box before you proceed to Reset.

Frequently Asked Questions

Q. There is no picture on the screen?

A. Ensure the power cable, HDMI cable is connected correctly. Ensure your TV source option is selected correctly to display the Smart MediaPlayer+. If there is still no response, disconnect then re-connect the power cable.

Q. The Smart MediaPlayer is not responding?

A. It may be loading various tasks. Press the Active button on the remote control, Select the running apps and press Up arrow key to close it.

Q. Why can't I get to the option I'm trying to select with the remote?

A. Switch to "Mouse" mode for some apps to try and utilize its functionality – keep in mind that some apps are purely designed for touch screen operation and may not function at all on the Smart MediaPlayer+. You may want to try connecting an external mouse, keyboard or joystick to achieve optimum operation.

Q. The audio is out of sync with the video?

A1. If you have a delay that is consistent regardless of the file, you can manually adjust the delay by following these steps:

- Open any video that has audio playing
- Bring up the on-screen-display and select the audio options
- Select Audio offset and then adjust the audio until the delay is corrected

- Back in the OSD audio settings, scroll down and select Set as default for all videos.

Q. Where is the Userdata folder for XBMC?

A. The userdata folder is located on the local memory /Android/data/org.xbmc.xbmc/files/.xbmc/userdata/ /sdcard/Android/data/org.xbmc.xbmc/files/.xbmc/ /data/data/org.xbmc.xbmc/files/.xbmc/

Q. Can I launch Android apps from within XBMC?

A. XBMC can launch other Android apps by going to "Programs" (on the main screen) and selecting the app you want to run.

Q. Can I use my Smart Phone to control XBMC?

A. Yes, XBMC remote control app is available on both Appstore and Google Playstore. Download it to your Smart Phone and then configure it. For more details, please visit http://wiki.xbmc.org/
