SENSITIVITY OPTIONS

Sensitivity pertains to how much effort is needed to move the mouse pointer in any direction. The higher the sensitivity, the more responsive the mouse will be.

- 1. Select the number of sensitivity stage needed.
- Click on the stage you would like to preset and adjust using the arrow on the slider below.
- Click "Apply" when done. To switch between different sensitivity stages, simply assign the Sensitivity Stage Up and Sensitivity Stage Down functions to the desired buttons.

Enable X - Y Sensitivity

By default, the X-axis (horizontal) and Y-axis (vertical) use the same sensitivity values. However, you may set different sensitivity values to each of the axes by selecting the *ENABLE X-Y SENSITIVITY* option.

CREATING MARCOS

If the button function or key is not listed, or if you would like to assign a marco to a button, select "Marco" from the menu. In addition, all saved marco will be shown on a sub menu for quick selection when you mouse over the "Marco" option.

09 | Dragonwar | 10

ASSIGN BUTTON TAB

In the Assign Buttons tab, you can assign various functions to each of the buttons based on your own preferences.

CLICK

Perform a left mouse click

MENU

Open a context-sensitive menu

WHEEL CLICK

Click once on the assigned button to activate scroll wheel. Drag your Dragonwar G12 to scroll in the direction of the mouse movement.

IF FORWARD

Assign a "Forward" command in Windows Explorer / Internet Explorer.

IE BACKWARD

Assign a "Backward" command in Windows Explorer / Internet Explorer.

DPI CHANGE

Assign the DPI speed up

AUTO RELOAD

Assign M button + AUTO RELOAD = auto reload

SCROLL UP

Scroll up the page you currently viewing

MARCO MANAGER

To create a marco command, simply click the **START RECORD** button. Once you have recorded a macro, you may edit the commands you have entered by selecting each command on the macro screen.

- A. Load the *Marco Manager* and click on the *Marco Select* tab.
- B. Click "*Record*" to start creating a macro.
- C. Type in the desired sequence of keystrokes, then click "**Stop**" to end the recording.
- D. Click "Apply" when done.

PROFILE

Profile contains the default settings of your device. Any changes made within each tab will automatically be saved into the current profile. If you want to rename this profile, you may do so by typing on the field below PROFILE NAME.

- **a. Profile Name:** Enter a profile name of your choice.
- **b. Path to executable (*.exe):** Enter a You can even set a profile to work with a specific program or application by using the *LINK PROGRAM* option and clicking the button to search for it.

POLLING RATE

The higher the polling rate, the more often the computer receives information about the status of your mouse, thus increasing the mouse pointer's reaction time. You can switch between 125Hz (8ms), 500Hz (2ms) and 1000Hz (1ms) by selecting your desired polling rate on the dropdown menu.

LIGHT EFFECT

The light Effect allows you to configure the LEDs of your Dragonwar Reload. You can set the lighting to Breathing, Full light. Similar to the previous tabs, the changes made here are also automatically saved to your current profile.
