1. Concept

The Pocket Pro Winter App, Pocket Pro HL400-W, gives users access to timekeeping functions dedicated to the timing of winter sports.

The innovative and bespoke application makes it possible to time training sessions for winter events with individual starts and finishes, mass start and individual finishes (cross country ski) and also allows users to time several competitors racing at the same time.

All times are memorised and can be recalled and visualised for each competitor.

The Pocket Pro electronic stopwatch is the latest in TAG Heuer's Professional Timing development regime. In addition to the three exclusive timing modes dedicated to Winter sports, this 1/100th second handheld timepiece also encompasses standard stopwatch modes, including Split / Lap time measurement, countdown, and memorising of the time of the day.

Together with its integrated USB connector; free POCKET MANAGER application and Pocket-Pro 800 measurements internal memory, the device makes the downloading, analysis, printing and archiving of results extremely simple.

Results can also be viewed or printed from your laptop or pc instantly.

The USB connector (HL400-4) enables connection to a photocell, a manual switch or a wireless radio input (HL615, HL675).
Pocket Pro Manager adjusts a Lock Time for the USB Input.

Note:

Pressing the hard reset (to the right of the USB connector) resets the Lock Time value to 0.01 sec (minium)

2. Standard Timing Mode

Several timing modes are available :

Date / Time / Count Down / Stopwatch.

Three specific timing modes are also available on the Pocket Pro: A, B, and C.

Mode **A**: Training

Start / Finish

Net Time + Gap with the best time (time to beat)

Mode **B**: Multi-Start:

Several individual Starts/Finishes

Gap with the best time

Mode **C**: Mass Start

Mass start / Individual finish

The Pocket Manager application allows the downloading, analysis, printing and archiving of results to your laptop or PC

2.1. LCD description

1. Number of competitor / Memory status
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Information Split / Lap
5. Chronometers

2.2. General

2.2.1. How to navigate the different modes

To navigate into a different mode :

- The Pocket Pro has to be stopped (**STOP**)
- Reset memory (**START/STOP + MEMORY**)
- Pressing the **MODE** button now allows you to change the Timing Mode

Sequence :

DATE → STOPWATCH → TIME → CD → A → B → C

2.2.2. Power

The Pocket Pro functions with an internal battery. It can be recharged when it is connected to a PC (USB cable) or by a (USB – 5VDC) power supply

When not used for 36hours, the Pocket Pro will switch OFF automatically (LCD OFF)
To wake up the Pocket Pro, just press any button.

It is also possible to switch OFF manually the Pocket Pro by pressing simultaneously the **MODE** and **MEMORY** buttons for 5 seconds.

When the Pocket Pro is OFF, all the times are stored in memory.

The icon  will indicate the level of the battery

During charge: 75% ON / 25% OFF blinking

Fully charged: with USB Cable: icon ON
Without USB cable: icon OFF

Low level (<10% charge): blinking 50% ON & 50% OFF
(you still have 2-3 days autonomy)

2.2.3. Time Memory

The Pocket Pro has a memory of 800 times.

The number of memorized times is shown on the 3 digits (Memory status)

When the memory reaches 90% capacity (720 times), the 3 digits will flash.

Warning

Once the memory is full (800 times), the next time recorded will be stored as 001

The previous time will be automatically deleted

The LCD will continue to flash

The memorised time can be recalled and displayed on the LCD at any time (even during a timing session).

By pressing the **MEMORY** button, the memorized time 001 will be displayed as the button is held down. The number of the memory shown is displayed on the top-left of the LCD

Press the **MEMORY** button again and the next stored time will be displayed.

2.2.4. Delete Memory

To delete the memory, press simultaneously **START/STOP** and **MEMORY** buttons.

Warning

You will not receive a request for you to “confirm Delete Memory”.
Once this step is made, all times are irretrievably deleted.

2.3. Date Mode

This mode allows you to update the date of the Pocket Pro.

To set the date:

- Press the **MEMORY** button: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press the **MEMORY** button to move to the next digit

Validate your setting with the **MODE** button (**SET** icon is OFF)

1. Icon Set ON = Setting
2. Date setting (in red, digit blinking) (25.03)
3. Year setting (2013)
4. Time of the Pocket Pro (setting in menu TIME)

2.4. STOPWATCH mode

This timing mode allows the timekeeper to make a Start/Finish, with intermediate time (**SPLIT**) and lap time (**LAP**) with a 1/100th of a second precision

The time displayed is up to 59'59.99" (1 hour)

SPLIT : Intermediate time, or cumulated time taken at each time (**SPLIT/LAP** button)
The SPLIT Time is to the top of the LCD (mm:ss.dc)

LAP : Lap time or time difference between time taken (**SPLIT/LAP** button)
The LAP time display is in the middle of the LCD (mm: ss.dc)

Running Time : Running time between Start and Finish
The running time is on the bottom of the LCD (mm:ss.dc)

The running time always starts from **00:00:00**.

- To start, press the **START/STOP** button (⏹ icon is ON)
- Three times are running and displayed
- At Split / Lap, press **SPLIT/LAP** Button.

The **SPLIT** and **LAP** time is stopped. The running time (bottom) continues to run.

At each press of the **SPLIT/LAP** button, the counter store increments.
It is possible to recall and view the running time (after **SPLIT/LAP**) by pressing **MEMORY** button.

For simple viewing in this mode, it is possible to reduce the information, and display only **SPLIT** or **LAP**. For this, during the race, press the button **MODE**.

2.5. Count Down mode (CD)

This mode allows you to make a unit count down or loop count-down

2.5.1 Set Count Down

To change the Count-Down value, the memory has to be deleted.

To set the Count-Down value:

- Press the **MEMORY** button: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press again the **MEMORY** button to change to the next digit
- Validate your setting with the **MODE** button (**SET** icon is OFF)

2.5.1. Count Down timing .

- To start the count down, press **START/STOP** button (🏁 icon is OFF)
- The count-down value decrements (on the bottom)
- A timer (on the top) is started (increments)

At any time it is possible to **PAUSE** and **RESTART** the count-down

A long single beep will sound at the end of the Count-Down

The count-down will stop automatically at 00:00.

To restart a new count-down, you have to reset the value by pressing **SPLIT/LAP** button.

During the count-down sequence, by pressing the **MODE** button, it is possible to change the Single Count-Down to Auto-Restart Count-down (loop mode).

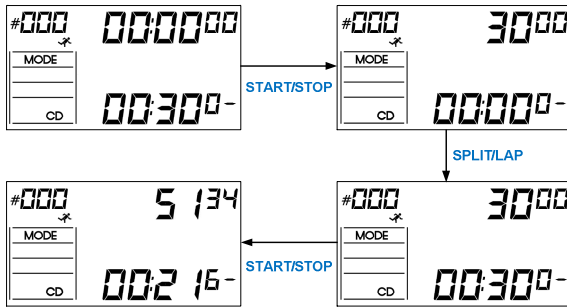

The **CD** icon on the LCD will switch.

In this Auto-Restart Count-Down, during the last 5 seconds, the Pocket Pro will sound a single short beep and a long beep at 00:00

The Pocket Pro will restart automatically from the pre-defined time of the count-down.

The timer will run and show the full time since the first Start.

To stop the sequence, you have to **RESET** the Pocket Pro.

2.6. TIME Mode

This timing mode allows you to memorize the time of day at each split.

This mode is very useful as a back-up system during a timing session and functions similarly to other timing systems working at “time-of-day” such as Chrono Printer, Mini Timer or Start Clock.

In Time mode, you have on the top of the LCD the value 00:00.00 and on the bottom the time of the day of the Pocket Pro.

2.6.1. Internal Time of Day setting

To set the Internal Time of Day on Pocket Pro:

- The Pocket Pro memory has to be reset (**START/STOP** + **MEMORY**)
- Press and hold the **MEMORY** button for 5 sec: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press the **MEMORY** button to move to the next digit

2.6.2. Time of day synchronisation

- Press **SPLIT/LAP** and **START/STOP** buttons simultaneously.
- The time of day of the Pocket Pro will be displayed on the top of the LCD with 1 minute in advance.
- The synchro will be automatic at the end of the full minute

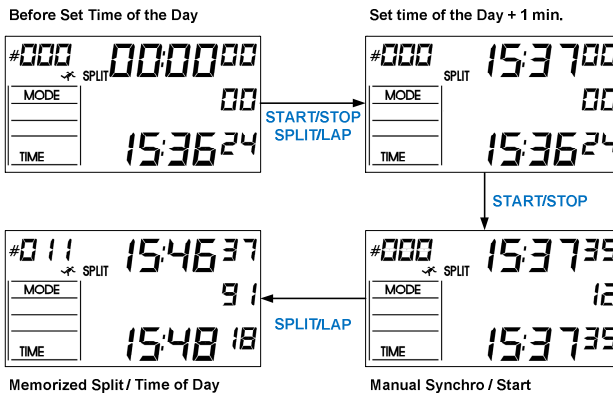

2.6.3. To Synchronise at Zero

- Press **START/STOP** button
- The Chrono automatically starts from zero.

2.6.4. Timing

Once the Synchronization is made, the  icon appear.

To memorize the time of day, press **SPLIT/LAP** button
The time on the LCD will stay and the passing counter (top-left) is incremented.
To see the time of the day running, press **MEMORY** button.

3. Specific Timing Modes

In the Pocket Pro Winter, 3 specifics modes are available:

A: Training

Start / Finish

Net Time + Gap with the best time (time to beat)

B: Multi-Start:

Several individual Starts/Finishes

Gap with the best time

C: Mass Start

Mass start / Individual finish

Net time up to 36 hours

3.1. Training (mode A)

This mode allows you to time individual competitors, with a start, finish, and gap with the best time (time to beat)

Each competitor is identified with the Pocket Pro sequential number (chronological list and not by a bib number)

Maximum time for each competitor: 60 minutes

1. Number of competitor / Memory status
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Net time of the arrival competitor (mm.ss.dc)
5. Gap with the best time (mm.ss.dc)
6. Best Time (time to beat) (mm.ss.dc)

Button **Start/Stop** : Start and Finish for each competitor
Pause available with the same button

Button **Split/Lap** : Intermediate time (1x) during race
Next competitor (after a stop)
Press for 5 sec during run time to disqualify the competitor
(time = 0)

Button **Memory** : Recall / display the memorized times.
Re-calculate all gap times

After each finish, it is necessary to validate the time and record it by pressing the button **Split/Lap** : the running time will be reset for the next competitor.
This also automatically recalculates the new time to beat.

Pressing the **Split/Lap** button during the running time will also pause the time. To restart, press the **Start/Stop** button

3.2. Multi-Start (mode B)

This mode allows several competitors in a race at the same time, and calculates each competitors net time individually, as well as the gap with the Time to Beat.
Time maximum: 60 minutes.

1. Number of competitor / Memory status
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Net Time of arrived competitor (mm.ss.dc)
5. Gap with the best time (mm.ss.dc)
6. Running time of next competitor (mm.ss.dc)

Button **Start/Stop** Competitor Start
 Button **Split/Lap** Competitor Finish
 Press for 5 sec: Disqualify competitor : time = 0

Button **Memory** : Recall / display the memorized times.
 Re-calculate all the gap times

Symbol  switching, means you have more than 1 competitor in the race

3.3. Mass Start (mode C)

This mode allows you to start a group of competitors (start at Zero)

At each arrival, the net time is displayed.

Maximum Time allowed: 36 hours

1. Number of competitor / Memory status
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Net Time of arrived competitor (hours)
5. Net Time of arrived competitor (mm.ss.dc)
6. Running time of race

- Button **Start/Stop** Start race (mass start at zero)
Button **Split/Lap** Individual finish.
Button **Memory** : Recall / display the memorized times (in sequential)

It is not possible to start another race until you have reset all times memorized (**Start/Stop** + **Memory**)

4. Recommendations

Although the Pocket Pro can be used indoors and outdoors, optimal viewing and protection is best when the display is in the shade or covered from direct sunlight and rain.

Never immerse the Pocket Pro in water.

The Pocket Pro is developed to endure light rain.

The USB socket is protected by the black rubber, and prevents any water ingress.

It is very important and recommended to keep the rubber in place at all times when not using the USB connection.

The optimal visibility of LCD is when the Pocket Pro is protected from direct sunlight

The Pocket Pro can overheat in excessive direct sunlight.

The LCD plexiglas is fragile. It is not recommended to clean it with a solvent or alcohol

IMPORTANT

A slightly damp cloth is recommended for cleaning the Pocket Pro

5. Download a new version of Firmware

Program downloads and new releases of the TAG Heuer firmware “up loader” are available free of charge on our website www.tagheuer-timing.com.

For this operation, you need to have:

- Mini-USB cable HL545-3
- The software «TAGHeuerFirmmanager.exe » version minimum V10.0

Procedure

- Copy the software «TAGHeuerFirmManager.exe » onto your hard disk drive
- Connect the Mini-USB cable (HL545-3) to the PC and to the Pocket Pro
- Run the software « TAGHeuerFirmManager.exe »
- Select the COM Port
- Select the file: Update (HL400_xxx.dat)
- Press START on the software.
- Press reset on Pocket Pro
- As soon as the upgrade is downloaded into the HL400, validate the software with OK.
- The HL400 is ready to use.

6. Technical specification

6.1. Pocket Pro characteristics

- Power 5 VDC (rechargeable with USB cable)
- Internal battery 600mAh / 3.7V
- Autonomy 35 days (in use) after full charge
- Shell Aluminium – PVD surface treatment
- Weight 160 g
- Precision +/- 2 sec / month
Calibration available
- Display LCD 3 lines of 6 characters
Battery level / Timing Mode
- Size of characters 7mm height
- Accuracy 1/100th second
- Memory 800 stored times
- Temperature range -20°C to +60°C

6.2. USB Connector

Pin	Description
1	5V
2	D-
3	D+
4	TAG Heuer Photocell
5	GND

7. Quick Guide

Reset memory

Buttons: Start/Stop + Memory

Change mode:

Clear Memory (Start/Stop + Memory)

Button: Mode

Power off

Buttons: Memory + Mode (hold down together for 5 seconds)

Recall recorded times

Button: Memory

Setting (Date / Time / CD)

Button: Memory to select the digit

Button: Split/Lap to change value

Button: Mode to validate the selection

Stopwatch

Button: Start/Stop: start or stop counter

Button: Split/Lap: memorize Split/Lap

Button: Mode: select display Split or LAP or both

Button: Memory: recall split/lap memorized

Count Down

Button: Start/Stop: Start or Stop counter

Button: Split/Lap: reset the preselected Count Down

Button: Memory: countdown setting

Button: Mode: Select single Count Down or Multi Count Down (CD blinking)

Time (function manual back-up with Time-of-Day)

Button: Start/Stop + Split/Lap: Set Time-of-Day (+ 1 minutes)

Button: Start/Stop: Synchro + Start

Button: Split/Lap: Memorize Time-of-Day

Button: Memory: recall/view memorized time

Mode A

Button: Start/Stop: Start / Finish / Restart after pause

Button: Split/Lap (during run): Intermediate

Button: Split/Lap (after stop): Next competitor

Button: Split/Lap (5 sec): Disqualify

Button: Memory: recall / view memorized time

Mode B

Button: Start/Stop: Start,

Button: Split/Lap : Finish

Button: Split/Lap (5 sec): Disqualify

Button: Memory: recall / view memorized time

Mode C

Button: Start/Stop: Start (mass start)

Button: Split/Lap : Finish (individual Finish)

Button: Memory: recall / view memorized time
