Automatic redial:

By pressing the key in the menu item Call lists. Now select the desired number from all calls and start with the call.

Searching of telephone book entries:

- open the phonebook:
 - With and button you can browse through the entries. Or:
 - You can use name search: enter the first letter of the entry to search for via the numeric keys (maybe using continue to browse)
- Once the desired phonebook entry is displayed start the call us .

Hands-free:

While calling you can switch on or off the hands-free mode using the key.

7 Speed dial keys

A stored number can be dialled at the push of a button. The keys 2 to 9 can be used to store frequently dialled contacts as follows:

Go to menu with open the phonebook 2x , open the menu Speed dialling 6x , , Set number , confirm it. Select the speed dial keys (2 to 9) -button (add), Select contacts and -confirm it.

Attention: The name has to be already stored in the phonebook, storing a new entry directly to a speed dial key is not possible. The 1 key is reserved for the number of the answering machine (voicemail).

Disposal of used electric and electronic units (applicable in the countries of the European Union and other European countries with a separate collection system).

The symbol on the product or the packaging indicates that this product is not to be handled as ordinary household waste but has to be returned to a collecting point for the recycling of electric and electronic units.

You protect the environment and health of your fellow men by the correct disposal of this products. Environment and health are endangered by a faulty disposal. Material recycling helps to reduce the consumption of raw material. You will receive further information on the recycling of this product from your local community, your communal disposal company or your local dealer.

Rechargeable batteries

The rechargeable batteries that come with the device can be recycled. Please dispose of these rechargeable batteries in receptacles designed for that purpose or return them to a retail outlet. Dispo-se only of those batteries that have been completely discharged to ensure environmental protection.

Dialling using speed dial keys:

Keys to can be used to store frequently dialled contacts. By pressing the respective key for at least 2 seconds the call is initiated.

8 Phonebook

Store names and numbers (always with international dialling code e.g. +49 for Germany). Go to menu with open the phonebook , menu-topics: add new contact, Set M1/M2/M3, copy, copy all, One by one, delete all, speed dial (On/Off), Phonebook settings.

9 Emergency call function

Go to menu with settings 3x , OK SOS 2x confirm .

You can choose the mode of the emergency call in the "Mode Settings" of the SOS menu. Each number you want to define as an emergency call number must be already stored in the phone book. A message will be sent if an emergency call is started.

- Send an emergency call with the SMS function
You can save up to five SOS numbers. A SOS SMS can be set in the „Edit SOS SMS“ menu.

Attention: If you would like to store emergency numbers like ambulance, police, fire brigade etc. as emergency numbers, you will have to check with the respective institution first. We do not assume any responsibility for eventual occurring charges should you call by mistake.
