Setting up the base and handset

The installation wizard starts automatically the first time your handset is connected to the base after switching on or after registration. It helps you to configure the following key

- If you want to adjust the settings at a later date:
- Touch the Skip Settings option at the bottom of the display

The handset then switches to idle status. You can configure the settings at any time using the Settings menu on your handset.

Touch the Time field to configure this setting.

- Date Order (Day Month Year/Month Day Year)

To configure the settings:

The Date and Time submenu opens. Set the

Setting the time

changes.

- Time - Time Format (12 hrs/24 hrs) – Date

by touching the fields in sequence and adjusting the settings (see the following illustrations).

Connecting the base station

> The power adapter must always be connected, as the phone will not operate without a

• Use only the power adapter and phone cord supplied. Pin connections on telephone

Connecting the handset charger (if included)

- Connect the flat plug to the power adapter 1.
- Plug the power adapter into the plug socket 2. If you have to remove the plug from the charger again:
- Disconnect the power adapter from the mains power supply.
- Press the release button 3 and disconnect the plug <mark>4</mark>.

Frequently asked questions

- Q: There is no dial tone.
- A: Press call button for 2 seconds (long press) to obtain dial tone. A short press opens the redial list.
- Q: The line is crackling / not clear.
- A: Have you used the new line cable provided? Please do not use an old cable.
- Q: The display is not clear / seems to be broken.
- A: The display is protected by a plastic film, please make sure you have removed the protective film.
- Q: The handset is not registered.
- A: If your handset is not registered, please follow the Registration handset procedure. (see user manual)
- Q: The caller ID is not working.
- A: Have you subscribed to this service (CLIP) from your provider?
- Q: Message indicator flashing and I cannot retrieve my message.
- A: Message indicator will flash to indicate missed calls as well as new messages of text messages. (see user manual)

Please check:

Have you used the phone cord supplied	
Have you fully inserted the power cable into the base station	
Have you inserted the batteries correctly	
Have you charged the battery for 9.5 hours	
Have you set up the Date/Time

Product may not be fully compatible with the national telephone network. It is clearly specified on the box near the CE mark as well as on the bottom of the base station for which country/countries the equipment has been developed. If the equipment is used in a manner inconsistent with this advice or with the instructions of the manual and on the product itself, this may have implications on the conditions for warranty or guarantee claims (repair or exchange of product).

In order to make use of the warranty, the product purchaser is asked to submit a receipt which proves the date of purchase (date from which the warranty period starts) and the type of goods that have been purchased.

Setting the date

The current position is shown in colour and the digit flashes.

• Enter the digits via the keypad. You can change the cursor position by touching the digit you want to change

▶ Touch the 🗹 icon to save your changes or press 🗲 to return to the **Date and Time** page without saving any changes.

Setting the date order

- The date order setting is indicated by \bigcirc .
- ▶ Touch the icon to change the format.

Touch the I icon. The setting is saved automatically. You return to the Date and Time page.

• Touch Save to return to the Welcome page.

Setting the display language The current language is displayed under Display

If you want to change the setting: • Touch the **Display Language** field.

The current language setting is indicated by O.

Touch the O icon next to the language you want to set. If your language is not displayed, the list may be "longer" than the display. You must then scroll through the list. To do this put a finger on the display and move it slowly upwards

▶ Touch the 🗲 icon. The setting is saved automatically. You return to the Welcome page.

Setting the answering machine language

• Touch the AM Phrase Language field. • Set the answering machine language as described

Setting the country

Set the country in which you are going to use the phone. • Touch the Country field. Set the country as described above.

Entering the local area code Touch the Area (Dial Code) field.

Setting up the base and handset

ea (Dial Code

Skip

The Local Prefix is the country-specific area code that precedes the Local Area Code when the country code is not dialled. In Germany, the "0" Local Area Code is then e.g., 89 for Munich or 221 for Cologne.

- Enter the Local Prefix of your country (max. 4 characters; "0" in the example). The field is already populated for the selected country.
- Briefly touch the second input field and enter the Local Area Code (maximum 8 characters, "89" in the example). You can correct incorrect entries using #
- ▶ Touch **✓** after entering the numbers to save the entry.

The Welcome page is displayed again.

• Touch the Save option to save your settings.

Handset in idle status (configurable page)

Once you have configured all the necessary settings, your handset switches to idle status. The configurable page that you can customise is displayed. Here, you can compile important functions for quick access. Some are set by default.

Your phone is now ready for use.

Using the phone

Switching the handset on/off

▶ Press and hold the end call key 🐨 . You will hear a melody.

Switching off the handset is only possible in idle state.

Operating the touchscreen

Icons, list entries, switches and selection areas shown on the display are sensitive areas. Touching these areas allows you to set and start functions and navigate between the various display screens (pages).

Selecting functions/list entries

Touch a list entry or the corresponding icon to select the list item (contacts, submenu, call lists) or to activate/deactivate a function.

Switching functions on/off or selecting functions

Touch the switch briefly to switch on/off or select/deselect functions

The function is switched on or selected if the switch is orange (text on) or the switch is light grey (\checkmark icon).

Options and options bar

Many displays have an **options bar** at the bottom. This displays all the actions that you can apply in the current context.

> Touch an option to perform the corresponding action or touch

Options to display a list of further options.

Activating/deactivating the automatic display lock

The display is automatically locked during a call or when listening to the answering machine to prevent inadvertent operation. You can briefly deactivate the lock (for 3 seconds) to operate the telephone via the display. The lock then reactivates automatically.

To unlock slide across the display from left to right, pressing down on the bottom line.

Making calls

Making an external call

- Enter the number and briefly press G. Or:
- > Press and hold G; enter number. You can cancel dialling by pressing **o**.

Accepting a call

You have the following options: Press G.

• Take the handset out of the charger, if Auto Answer is activated. ▶ Touch → coll to divert the call to the answering machine.

For calling line identification

The number is shown on the display. If the number of the caller is stored in Contacts, additionally the name and number type of the Contacts entry is displayed.

Using lists

Redial list

- The redial list contains the twenty numbers last dialled with the handset. To dial a number:
- ▶ In idle state **briefly** press *G* to open the redial list.
- Press G. The phone dials the last dialled number (marked with a green dot). Or:
- Touch an entry to open the detail view. Press G. The number of the entry marked with the green dot is dialled. Or:
- Touch the desired number
- Managing entries in the redial list
- Open redial list. Touch an entry. The detail view for this entry opens. • You can delete the entry or save the number in Contacts.

Call list

- The last 20 entries are shown in the call list.
- Opening the call list via the messages page or message pop-up opens the Missed Calls list. Opening the call list via the Applications menu page opens the list of all calls.
- You can switch between call lists:
- Show all: Full list of all calls (missed, outgoing, incoming)
- Show by type > Missed: List of missed (unaccepted) calls
- ◆ Show by type ▶ Accepted: List of accepted calls and calls recorded by the answering مە) machine
- Show by type > Outgoing: List of outgoing calls (dialled numbers)
- > Open the detail view: Touch the entry. The display shows all the available information. In the detail view, you can delete the entry or add the number to the contacts.

List entry

- The following information is displayed in the list entries:
- The list type (in the header)
- Icon for the type of entry:
 Call list: ✓ (Missed), ✓ (Accepted), ✓ (Outgoing),
- o_o (Call on the answering machine) SMS list: ⊡ (unread), ⊡ (read)
- call on the answering machine list: مه (call on the answering machine
- The icon is red for new (unread) entries. Caller's number. The caller's name and number type (Home, Office, Mobile) is displayed instead if the caller's number is stored in the contacts. For missed calls, the number of calls
- from this number is also shown in square brackets. Date and time of call (if set).

Open the detail view: Touch an entry. The display shows all the available information. The message is played back in the answering machine list. The SMS text is displayed in the SMS inbox list. You can delete the entry or copy the number for the entry to the contacts.

Call back a caller from the calls list: In the detail view, briefly touch the name or number. If you press the 🕻 key after you have opened a list, the number for the entry marked by a green dot is dialled.

Using lists

Message Centre

Opening lists via the message page in the idle display

You can call up the messages page Messages page (example) by pressing the messages key

- on the keypad. You can access the
- following message lists:
- Answering machine list Image: Network mailbox, if your network provider supports this function and the number of the network mailbox is stored in your telephone
- ♦ SMS inbox
- 🐼 Missed calls list
- Missed appointments list

The list of missed calls is always displayed. The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

5

• Touch an icon to open the corresponding list.

Exception: If you touch the icon for the network mailbox, your telephone will dial the number for the network mailbox. No list will open on the display.

Message pop-up

An advisory tone sounds as soon as a **new entry** arrives in a list. The message key also flashes (if activated). The message pop-up

is displayed and partially covers the idle display. The number of new messages in each list is displayed beneath the icons

▶ Close the pop-up: Touch 🛛 (top right).

Open the list: Touch the relevant list icon. If the network mailbox has been configured: Touching opens the message page rather than a list. The messages LED flashes (if activated), until you have opened a

list or the messages page **Deleting lists**

You can delete the entire contents of the individual lists:

Menu key - > Settings menu page > O System > Clean-up List > Touch the desired list ▶ Touch the desired list type ▶ Touch Yes to confirm.

No calling line identification

- External: No number is transferred. • Withheld: Caller has withheld calling line identification.
- Unavailable: Caller has not requested calling line identification.
- Handsfree mode

Activating while dialling

• Enter the number, press **G** twice.

Switching between earpiece and handsfree mode Press 💪

Switching to mute

Deactivate the handset's microphone during an external call. The other parties cannot hear you, but you can still hear the other party. Switch to mute, cancel muting (activate/deactivate microphone): Touch

Phone settings/applications

All the functions for the base and the handset are provided in a menu (main menu). The main menu is divided into two "pages". The Applications page comprises all the applications offered by your base or handset. The Settings page offers all the setting options for the base, handset and telephony

• Touch the icon to open the menu of the appropriate setting/application. "Applications" "Settings"
