Overview of the Kaltura Package for Moodle 2.x

Kaltura's Video Package for Moodle 2.x makes it easy to add the robust capabilities of Kaltura's open source online video platform to any Moodle site. The package was developed specifically for Moodle and integrates with other features and modules, such as resources and activities, so that users can upload and embed media easily.

The package adds the following features for all users:

- My Media: users' personal media gallery, for uploading, viewing, managing, and sharing media.
- Integration as an external repository with the file picker accessible from the text editor: embed your media or media you have access to, anywhere you can author text.

In addition, Teachers and Admins can create two new resources and one assignment type:

- Video Resource: Easily add video content to your course as a specialized resource.
- Video Presentation resource: Create a synchronized view of a Document and a Video.
- Video Assignment: Allows students to submit videos as an assignment submission.

Configuring the Kaltura Package for Moodle 2.x

Only site administrators can configure various settings of the Kaltura Package for Moodle 2.x.

Setting Up the Kaltura Package for Moodle 2.x

After you install the Kaltura Package for Moodle 2.x, configure the package settings. For installation, please refer to the Kaltura Video Package for Moodle 2 Version 2 Installation Guide.

To set up the Kaltura package

 Go to Site administration > Plugins > Local plugins > Kaltura package libraries. A page with various settings options is displayed,

(altura Video Extens	ion
	This page allows you to configure the front page and name of this new site. You can come back here later to change these settings any time using the Administration menus.

Customizing Players and Uploader Widgets

Kaltura's most commonly used widgets include the Kaltura Dynamic Player (KDP) and the Kaltura Uploader. The Kaltura UIConf ID is the unique identifier for Kaltura widgets. We recommend using the default widgets for the Kaltura Video Package for Moodle.

Players can be created, designed and configured with specific features and buttons within the Studio tab, in the Kaltura Management Console. For instructions on how to create, design and configure a player, refer to the KMC User Manual.

After you create a player, you can select it in the Kaltura Package Configuration page to replace the default players.

You can also modify the Uploader widgets (also known as the Kaltura Contribution Wizard - KCW) and Kaltura Presentation Widget, using the Kaltura APIs. Please contact Kaltura for more information on using the Kaltura API or refer to the Kaltura API Documentation.

NOTE: The default widget settings should work out of the box when working with Kaltura SaaS.

To customize the widgets

1. Go to Site administration > Plugins > Local plugins > Kaltura package libraries.

- 2. For each type Video Assignment, Video Resource, Video Presentation Resource, Video used in the text editor you can select a player used to play back media of this type in the appropriate dropdown.
- **3.** Advanced Kaltura users may choose to use a Custom player and insert the player's UIConf ID to use a player that does not appear in the dropdown.
- 4. For Video Resource, check the "Override video resource player setting"; for the selected player to be used for all video resources, Teachers will not be able to choose different players for their video resources if this option is selected.
- 5. For the videos used in the text editor select embedded player width and height.
- 6. For each type Video Assignment, Video Resource, Video Presentation Resource, My Media, Video used in the text editor you can change the Uploader (KCW) to a custom one. We recommend this option for advanced users only.
- **7.** If you are using several applications, select the application name to be used for data aggregation in Kaltura
- 8. Check the "Enable HTML5 flavour", to enable playback on Mobile devices.
- 9. Click Save changes to save.

Enabling the Kaltura Repository

```
To enable the Kaltura Repository
```

1. Go to Site administration > Plugins > Repositories > Manage repositories

Name	Active?	Order	Settings

	Please specify a root category.
Metadata Profile	Moodle Repository Profile (Profile Id: 22421 Created: Monday, 25 June 2012, 12:47 PM
Save Cance	n in the second s
	There are required fields in this form marked *.

- 3. Select:
 - a. The repository plugin name (optional), to determine the name of the repository that is displayed in the File Picker.
 - b. The number of files to display per page.
 - c. The name of the root category of the Moodle application in your Kaltura account.
- 4. Click Save.

To enable the Kaltura Repository to its full functionality, we recommend that you enable the Kaltura Media Filter, so that the media is displayed in an embedded fully functional player.

To enable the Kaltura Media Filter

1. Go to Site administration > Plugins > Filters > Manage filters

Filter	Active?	Order	Apply to		Settings	Delete
Kaltura Media	Disabled 💌		Content	~	Settings	Delete
Activity names auto-linking	Disabled Off, but available		Content	Y		Delete
Algebra notation	On		Content	~		Delete
Convert URLs into links and images	Disabled 💌		Content	~	Settings	Delete
Database auto-linking	Disabled 💌		Content	~		Delete
Display emoticons as images	Disabled 💌		Content	~	Settings	Delete
Email protection	Disabled 💌		Content	~		Delete
Glossary auto-linking	Disabled 💌		Content	~		Delete
HTML tidy	Disabled 💌		Content	~		Delete
Multi-Language Content	Disabled 💌		Content	~	Settings	Delete
Multimedia plugins	Disabled 💌		Content	~	Settings	Delete
TeX notation	Disabled 💌		Content	~	Settings	Delete
Word censorship	Disabled 💌		Content	~	Settings	Delete

Applying filters to headings as well as content can greatly increase the load on your server. Please use that 'Apply to' settings sparingly. The main use is with the multilang filter.

2. Find "Kaltura Media" and select "On" from the dropdown menu.

Repository: Kaltura Capabilities

The Kaltura repository comes with a set of capabilities that can be set on Moodle roles.

Kaltura Capabilities Terminology

- View Kaltura Repository determines whether users assigned to a role can view the Kaltura repository in the File Picker
- **Shared Video Visibility** determines whether users assigned to a role can use media items that are shared in courses they are enrolled in with an admissible role, via the text editor.
- **Course Video Visibility** determines whether users can use media items that were used in courses they are enrolled with an admissible role, via the text editor. Used Videos are defined as media that was embedded in the course and was viewed at least once.

By default users have access to Shared Media of courses they are enrolled in as students, while users that are enrolled to a course as teachers or managers have access to Shared Media and Used Media of that course.

Customizing Roles Capabilities Permissions with Kaltura

The default capabilities assignment can be further customized via Moodle permissions to include additional roles, as well as for creating special use-cases.

To customize roles permissions with Kaltura

- 1. Go to Site administration > Users > Permissions > Define Roles
- 2. Select the role you want to customize

- 3. Click 'Edit'
- 4. Scroll down or search for the string the "Repository: Kaltura" permissions

Repository: Kaltura	
Shared Video Visibility repository/kaltura:sharedvideovisibility	Allow
Course Video Visibility repository/kaltura:systemvisibility	Allow
View Kaltura repository repository/kaltura:view	Allow

- 5. Select the capabilities for this role.
- 6. Click 'Save changes'

My Media

Each user has a personal, searchable My Media gallery for uploading, viewing, managing, and sharing media.

Users are able to use and reuse any of the videos in this repository in various locations within Moodle as well as across various Kaltura applications in the institution. Additionally, users can use this gallery to mark which of their videos will be available for use by authorized users in specific courses.

You are Moodle: My Media Navigation -Upload Search Clear Home My home My Media Logo Black Logo Cyan Logo Lime Site pages My profile My courses Kaltura Kaltura -00 Settings Monday, 25 June 2012, 07:01 PM Monday, 25 June 2012, 07:00 PM Monday, 25 June 2012, 07:02 PM My profile settings Preview Edit Share Preview Edit Share Preview Edit Share Logo Pink Logo Yellow (Video converting) Kaltura Kaltura Monday, 25 June 2012, 07:04 PM Preview Edit Share Monday, 25 June 2012, 07:03 PM Preview Edit Share

My Media is accessed from the Navigation block, in My home > My Media.

To upload media in My Media

- 1. Go to My home > My Media.
- 2. Click 'Upload' button (on the top left).
- 3. The Uploader widget is launched.

	Video	
Upload		
My Content	Upload video	
Webcam	Browse (You can select one file)	

- 4. Follow the wizard to upload your media.
- 5. A confirmation message is displayed, click "Continue".
- The new media is displayed in My Media.

NOTE: Newly uploaded media is converted in Kaltura servers for maximizing user experience with different devices and network capabilities. This process may take a few minutes. While the media is being converted, you cannot preview it, but you can change the metadata, share it and use it.

To search for media in My Media

- **1.** Go to My home > My Media.
- 2. Type the text you want to search for in the text box.
- 3. Click 'Search'.
- 4. The items shown in My Media disaply only items matching the search query.

To preview media in My media

- **1.** Go to My home > My Media.
- Click 'Preview' below the relevant media item A modal box with the media in a player is displayed.

- **3.** Use the player controls to view the media.
- 4. When you are done, close the modal box by clicking the 'x' button on the top right.

To edit media metadata in My Media

- **1.** Go to My home > My Media.
- Click 'Edit' below the relevant media item.
 A modal box with the media metadata is displayed

- 5. Click 'Save' to save your changes.
- 6. A confirmation message is displayed, click 'Continue'.
- 7. When you are done, close the modal box by clicking the 'x' button on the top right.

Using Media in the Text Editor

When the Kaltura repository is enabled, you can embed media everywhere that you have permissions to author content with Moodle's text editor.

For example, you can embed media in quizzes, glossary, forum posts, wiki, and resources.

To use media in the text editor

1. Click the 'Moodle Media' button in the text editor.

The 'insert embedded media' modal box is displayed.

	Insert / edit embedded media	E C

	Add video Player properties Preview	

5. Click "Preview" to view the added video in the selected player.

NOTE: Previewing the video is only available after the video finished the transcoding and conversion process within the Kaltura system. This may take a few minutes and depends mostly on the video duration.

- 6. You can replace the video by pressing the "Replace video" button.
- 7. Click "Save and display" or "Save and return to course" to save the video resource and make it available for course participants.

Creating Video Presentation Resources

The Video Presentation Resource creates a synchronized view of a video aside a document, with key points that can be edited by the author.

- To create a Video Presentation Resource
- 1. Select "Video Presentation" from the "Add a resource..." dropdown in the relevant part of the course you want the resource to appear in.
- 2. Enter the Video Presentation's Name and Summary.
- 3. Press "Add Video" to launch the Uploader widget and follow the upload flow.
- 4. Press "Upload document" to upload the document to be synchronized with the video. Supported documents include *.pot; *.doc; *.axles; *.odds; *.odd; *.odd; *.pot; *.docks; *.puff; *.lax *.pdf; *ppt.

🖺 Adding a new Kaltura Video Presentation to 23 January - 29 January 📀

- 5. Wait until both assets have finished converting:
 - a. You can check the status of the video conversion process by pressing "Preview".
 - b. You can check the status of the document conversion process by pressing "Check status".
- 6. Once both video and document are ready, click "Preview" to synchronize the document pages with the timeline of the video. You can also sync after saving the resource when viewing it as a teacher.

- 7. On the presentation widget, you can sync slides to key points in the video using the Presentation Widget controls. Simply play the video or drag the video scrubber to the selected place for the selected slide/page within the document, and click 'Sync Video/Slide'.
- 8. Save when you are done.

As students play the presentation, the video plays while the slides automatically rotate in full synchronization, based on the key points set by the presenter. Students can easily navigate through the slides with 'forward' and 'back' buttons, or by clicking on a specific slide thumbnail.

Creating and Grading Video Assignments

Teachers can create a Kaltura Video Assignment that requires students to submit Videos as assignments. Following submissions, teachers can view the submitted videos, provide feedback and grade the video assignments.

- To create a Video Assignment (teacher)
- 1. Select "Kaltura Video Assignment" from the "Add an activity..." dropdown in the relevant part of the course you want the activity to appear in.
