HDS 6200

Compact, next-generation, ultra-high speed laser scanner

HDS6200 unlocks the potential of ultra-high speed, "phase-based" laser scanning technology for fast, productive as-built surveys. "Next-generation" advances in speed, portability, data quality at range, temperature capabilities and tilt sensor integration all combine to deliver significantly lower project costs.

FEATURES

- Higher accuracy – high distance and angle accuracy
- Less noise – major reductions in scan data noise
- Higher sensitivity – can better detect laser returns
- Higher scan density – increases the range
- Scan speed – up to 1,016,727 points per second
- Added context – the ability to calculate return data out to 79 m
- Full integration: scanner, controller, data storage and batter
- Setting up and moving the scanner is fast and easy
- Operate the scanner from a simple, side touch panel. An optional PDA or laptop with Leica Cyclone SCAN software provide added scanner control and valuable field QA. Wireless LAN (WLAN) is also fully integrated

Leica C10 Scanner

The all-in-one laser scanner

Today, the most popular class of laser scanner – ScanStation™ is now in a compact, all-in-one ScanStation C10 platform. It features major productivity advances, including a Smart X-Mirror™ that lets users conduct full-dome (360°X270°) scans in just minutes.

FEATURES:

- A dual-axis compensator
- Interface total station prisms, GPS SmartAntenna
- On board graphic controller with data storage
- Powerful camera/video
- Hot swap batteries
- Tribrach with laser plummet
- Optional Wi-Fi connection for laptops
- Up to 10x faster full dome scans: now, just minutes
- Move, setup and tear-down faster
- Up to 90% field labor savings vs traditional methods
- Designed for incremental upgradeability

INOVx RealityLINx Software Available

Leica TS30 0.5" Total Station

Pride in Accuracy

This total station redefines precise surveying by offering unmatched accuracy and quality. Surveyors with demanding tasks do not need to make compromises.

When compromises are simply not accepted

The TS30 total station is ready for any challenge. Surveyors take great pride in accuracy. The Leica TS30 delivers impressive performance. More importantly it is a champion in perfectly combining angle measurement, distance measurement, automatic target recognition and motorization. The accuracy of the Leica TS30 is in a league of its own, a true companion for surveyors with pride.

FEATURES:

- Angular accuracy – 0.5" Pinpoint EDM accuracy
- 0.6 mm + 1 ppm to prism
- 2 mm + 2 ppm to any surface
- Automatic Target Recognition (ATR) accuracy – 1"
- World's best Dynamic Tracking Performance
- Fastest Start-to-Finish Workflow

Leica TM30 Monitoring Total Station

Every half second counts

Combination of speed and accuracy allows engineers to effectively and cost efficiently measure and control vital infrastructures. Outstanding reliability and robust design with experience in high precision sensor technology. The combination of SmartEye vision technology and unique direct drive technology provides faster, more precise and longer range measurements than ever before.

FEATURES:

High accuracy angular measurement – The TM30 offers 0.5" or 1" angular accuracy, ensuring that the highest accuracy standards are met every time.

SmartEye vision – The TM30 includes SmartEye vision technology to automatically measure targets up to 3000m with millimeter accuracy. This advanced technology enables large areas to be monitored with a single instrument.

Unique high precision PinPoint EDM – Measure targets with higher accuracy than ever before with next generation PinPoint EDM technology. Features a unique precision of 0.6 mm + 1ppm to prisms and 2 mm + 2 ppm to natural surfaces.

Move, Lock, Measure, Transmit – The TM30 quickly moves with unmatched speed to monitor points. SmartEye vision then effortlessly locks onto the prism. The long-range PinPoint EDM is harmonized with precise angle sensors to complete the measurement process. Measurement data is available for on-board storage, or to be transmitted to any location via cable, radio, mobile phone or the internet.

Leica Viva System

Welcome to Leica Viva A Complete Surveying System

NEW

Surveyors are constantly faced with ever changing circumstances. Changing economic conditions, legal regulations, the emergence of new technologies and increasing competitive pressure affect their working environment. Visions arise from the interaction of your experience, your knowledge and your creativity. The fulfillment of your visions into reality is what makes the profession of a modern surveyor so exciting – and what makes those who manage this achievement successful.

Leica GS10 and GS15

Can't find a more flexible system

A versatile and proven GNSS System – An ideal solution for today and tomorrow.

FEATURES:

- Proven GNSS technology – Reliability and Accuracy
- Smart Check – RTK data processing to guarantee results
- Smart Track – Advanced four constellation tracking of all GNSS satellites today and tomorrow
- Smart RTK – consistent results in all networks
- GS10 and GS15 are built for the most demand environments
- Deliver the hallmarks of Leica GNSS – reliability and accuracy.
 - SmartCheck – RTK data-processing to guarantee correct results
 - SmartTrack – advanced four constellation tracking of all GNSS satellites today and tomorrow
 - SmartRTK – delivers consistent results in all networks

Designed to suit any surveying task.

- Exchangeable communication devices for field base stations and RTK rovers with removable SIM cards (Built-in for GS15)
- Fully scalable sensor allows you to buy only what you need today and upgrade with additional functionality as you need it
- Integrated web server to configure the logging of Leica or RINEX raw data and measure with one button press in the field
- Rugged

Built for the most demanding environments.

- IP67 protection against dust and immersion to 1m
- Built for extreme temperatures of -40°C to +65°C
- Integrated antenna technology to avoid breaking, losing or forgetting antenna (for GS15)

GS15

GS10

GS10

The World's **FASTEST** Robotic Imaging Total Station

Leica TS15i

Designed for live streaming
of images to the instrument
and data collector

**SPECIAL
LEASE RATES
AVAILABLE**

FEATURES:

- Angle measurements of 1", 2", 3", and 5" with quadruple axis compensation
- In prism mode a distance of 3'500m is achieved with an accuracy of 1mm+1.5ppm on a single prism in standard measuring mode
- Measure up to 1'000 m and more with an accuracy of 2mm + 2ppm
- Add GNSS functionality to the Leica Viva TS11 total station to further improve productivity
- The Viva TS11 can be used as a Leica SmartStation for TPS setup without the need of control points, traverses, and resections

LEICA TS15i FEATURES:

— Best-in-class Imaging

- Image Notes – Capture an image, screenshot or template, sketch on it and link it to any object in the database.
- Image Assisted Surveying – Simply tap on the display and the total station will turn and measure the desired target.

— Best-in-class One-Person-Surveying

- Search – PowerSearch finds your prism within seconds
- Lock – Viva TS15 stays locked onto your prism in the most demanding environments
- Measure – PinPoint EDM seamlessly blends with precise angle sensors to complete the measurement

Capture Camera — High-resolution camera enhances total station productivity. Image Capture users can take high-resolution images of the surveying scene

Sketch Tool — captured image can be enhanced through sketching with any color, line style and width to uniquely transfer valuable information.

Linking of Images — After capturing and sketching, the annotated images can be linked to any object of interest (point, line, area) or simply stored with a time stamp.

Leica GNSS SmartPole

Surveying Instantly Leica SmartPole

Leica SmartPole saves time in both the office and the field. It is no longer necessary to first measure orientation points and only then detail points. Simply begin the survey and conduct the setup On-the-Fly while completing the survey. Once the TPS orientation and coordinates are known, all measured points are automatically updated.

FEATURES:

- **Flexible Alternatives:** Users can survey and stake out with RTK GPS or the remote total station, or both—whichever is best, depending on the area and the distance to the points to be measured.
- **Unconventional Control:** With SmartPole, surveyors can establish control points with RTK and measure to them simultaneously with the total station to reset its position.
- **On-the-Fly Measurements:** With SmartPole, set up the total station in the most convenient location, instantly begin the survey and determine the total station coordinates and orientation On-the-Fly while conducting the survey for unmatched productivity.

Leica GNSS SmartStation

SmartStation – A Versatile GNSS System

Just set up Leica SmartStation and let GNSS/GPS determine the position. No need for control points, long traverses or resections. Then measure and stake out with the total station. Use TPS and GNSS separately when required. Put the GS15 Antenna on a pole as an RTK rover or use the TPS as a standard total station.

FEATURES

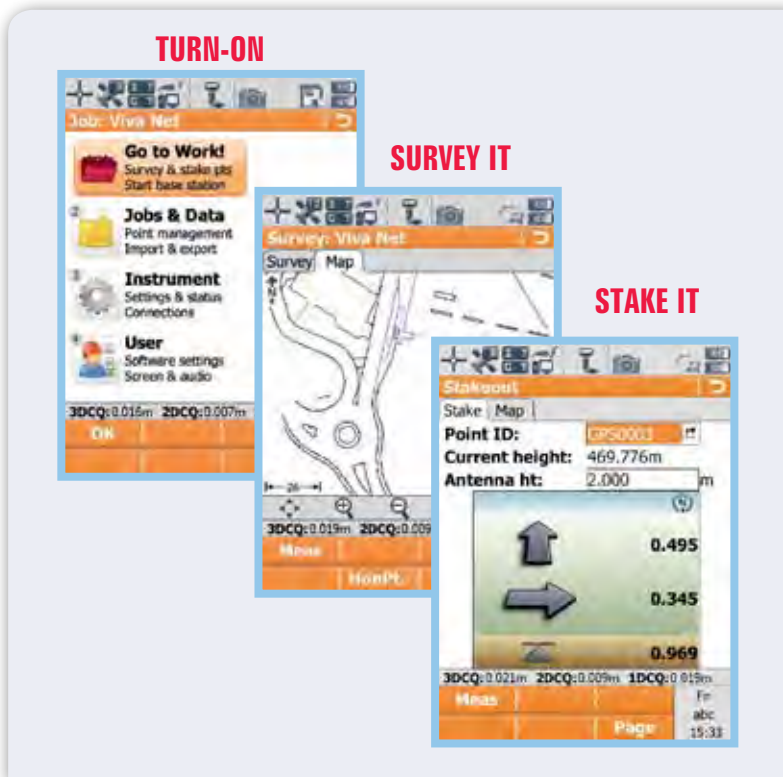

- **Transparent GPS:** Once the GS15 GPS Antenna is connected to the TPS1200+, all survey operations are conducted through the total station keyboard, thus requiring minimal GPS expertise.
- **Long range vision:** The SmartStation can be located at ranges of up to 50km from a reference station and still provide accurate positioning (horizontal: 10mm+1ppm; vertical: 20mm+1ppm).
- **Incredible versatility:** The modular design allows surveyors to use the SmartStation as a total station, RTK GPS rover or both.

Leica Viva NetRover

The All-In-One GNSS Network Solution

Leica Viva NetRover integrates the latest technology from Leica Geosystems, the world's leading measurement solutions provider. All the components of Viva NetRover work seamlessly together, creating lightweight and cable-free network rovers.

TURN-ON & MEASURE

- Viva NetRover is always ready to measure
- Full support of RTCM3.1 transformation message positions are automatically supplied in local coordinates

QUICK TO LEARN

- SmartWorx Viva LT with simplicity in mind
- Clear graphics, logical menus

DESIGNED FOR NETWORKS

- Best in class performance
- Field controller with built-in 3.5G mobile broadband
- Future proof

Leica GS09 GNSS

Your tasks, your choices, our solutions

Choose from a wide range of available functions and applications that you really need to complete your tasks. By configuring the system for personal requirements, the investment cost is minimized and its operation is not complicated to use.

GS09 ROVER

GS09 CONTROLLER

GS09 System

- RTK Rover – exceptionally rugged and light-weight pole setup without any cables
- Base Station – easily set up RTK base station operates without controller
- Network Rover – a complete surveying system, operating in all reference networks
- SmartStation – the GS09 fits onto a TPS creating one easy-to-use instrument
- Snap to communication devices

GS09 Controller

- Ergonomic – QWERTY alphanumeric keyboard and function keys for rapid data entry
- Color Display – large display with touch screen functionality
- Removable Memory – up to 1 GB data storage on CompactFlash card

GS09 SmartWorx Field Software

- Based on the proven and familiar operating concept of the system 1200 with new Icon-based Menus – quick to learn, ensuring instant productivity
- Application Programs – enable any survey task to be easily and efficiently completed
- Field-to-Office – transfer data between the work site and the office computer
- Plug and Play – automatic detection of communication devices for easy setup

LEICA TPS 1200+

 **SWISS** Technology
by Leica Geosystems

The Total Station with the Plus

Leica TPS1200+ is our most competitive total station ever, providing the most accurate EDM with the smallest laser dot and measuring distances over 1000 meters.

Plus = Flexibility and Scalability

With Leica's SmartStation, SmartRover and SmartPole options, you can add full GNSS functionality to your TPS1200+ Total Station whenever you want. Customize your surveying equipment to your specific tasks, crews and budget. Combine TPS and GNSS in the most efficient way. Invest in flexibility while at the same time increase productivity.

FEATURES:

- **Pinpoint Reflectorless Measurement:** the built-in telescope allows surveyors to measure inaccessible or hard-to-reach targets with the smallest laser dot (2cm at 150ft.) More than 3,000 feet away without reflectors with accuracy up to 2 mm.
- **Automatic Target Reognition:** with one prism, the tps1200+ has a guaranteed measurement range of 1.8 Miles, angle accuracy of 2, 3, or 5 second and base positioning accuracy of 1mm.
- **Twice As Fast:** the tps1200+ achieves angle measurements in 1 to 5 seconds depending on required accuracy, 50% faster than the competition.
- **GPS Compatible:** with a quick snap-and-click, the modular tps1200+ can connect to the leica gps1200 receiver to add full GPS RTK capabilities.

Leica Flexline Total Stations

The new generation of Total Stations:

Leica FlexLine TS09

PERFORMANCE GUARANTEED

A true performance Total Station that continually delivers regardless however demanding the task may be. For mid-to-high accuracy applications. Equipped with all FlexLine features from removable USB memory, Bluetooth® wireless technology, Emitting Guide Light to a complete range of application software, your TS09 guarantees maximum performance.

Leica FlexLine TS06

FLEXIBILITY THAT COUNTS

A Total Station that is ready for any challenge. Designed for mid accuracy applications. As standard, an alpha-numerical keyboard and a complete set of application software is included. For additional flexibility, a wide range of options ensures that you can always count on your TS06 Total Station.

**SPECIAL
LEASE RATES
AVAILABLE**

Leica FlexLine TS02

IDEAL TODAY, PERFECT TOMORROW

The ideal Total Station for standard measurement tasks. Designed especially for mid-to-low accuracy applications. It comes complete with a standard set of application software. For more convenience add Bluetooth® wireless technology to connect any data collector and use the Software which best suits your tasks and requirements.

Bluetooth® and USB Option

Bluetooth® cable-free connection
USB memory stick for flexible data transfer
Mini-USB for fast data transfer

Alpha-numerical Keyboard available

Rapid entry of numbers, letters
and special characters
Minimizes errors
Enhance productivity

Angular Accuracy 2", 3" or 5"

Quadruple axis
compensation to
guarantee accurate
and reliable angle
measurement

DNA03 & DNA10 Digital Levels

DNA03 Height measurements with 0.3 mm standard deviation per km double leveling (invar staff).

DNA10 Height measurements with 0.9 mm standard deviation per km double leveling (invar staff).

ADVANTAGES THAT MOVE YOU AHEAD:

- LC-display presents all important measured data at a glance and shows the next step directions
- Double your data safety: save your work automatically in the internal memory and, after the measurement, on a PCMCIA card.
- Alphanumeric keyboard provides the highest levels of efficiency at work, optimum comfort
- Save up to 50% in time with Leica digital levels
- Measuring without mistakes or fatigue
- Geo Office Tools is a program that controls data exchange, the configuration of the instrument, creates code lists and stake out height lists and maintains the system software.

GENERAL CONSTRUCTION LASERS

Rugby 100/100LR

An automatic self-leveling general construction laser for exterior jobs of any size, large or small.

Use for:

- Checking grade
- Precise depth control for sub base and fine grade excavation
- Concrete forming, pad placement
- Setting foundations and footings

Item	Description	MSLP*
6003493	Rugby 100 GC Package	\$1225.00
6003499	Rugby 100 LR Package	\$1420.00

Rugby 260SG, 270SG, 280DG

- The Ruby 260SG is a rugged general Construction laser
- The Rugby 270SG is a fully automatic, single grade laser for general construction
- The Rugby 280DG Multipurpose Plus-A horizontal, vertical and dual grade for Exterior or Interior use

Item	Description	Your Price
768537	260SG w/Rodeye Plus/Alkaline Batt.	\$1640.00

Rugby 320SG, 410DG, 420DG

Rugby Grade Lasers are automatic and self-leveling for jobs large or small. Can be used for any application involving precise grade control such as:

- Building pads, parking lots and runways
- Precise depth control for sub base and fine grade excavation
- Agricultural usage such as land leveling or tilling
- Concrete forming and framework
- Retention ponds and batters
- Setting foundations and footings
- Compatibility with the widest range of machine control solution

LOCATORS

Leica Locators

The Digicat 500i and 550i represent the latest design in cable location technology. With state-of-the-art digital signal processing (DSP) and intelligent software, the Digicat i-Series locators make ground surveys a simple and speedy task; increasing onsite safety and ultimately saving time and money.

The Digicat 500i and 550i locate buried conductive services by receiving electromagnetic signals which radiate from them. The Digicat's software interprets the signals and provides the operator with an audible and visual response to the position and direction of the buried services.
