What's in the box

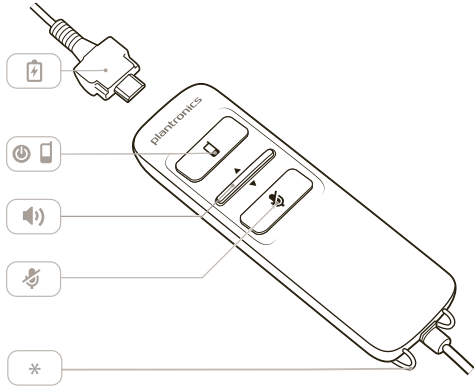

Headset with quick release USB charging cable

Car charger/VPC (vehicle power charger)

Headset overview

 Quick release USB charging cable

 Power and call button

 Volume button

 Mute button

 Optional clothing clip

Pairing

Get paired

The first time you put on your headset and turn it on, it begins voice-guided pairing instructions.

- 1 Wearing your headset, press the Call button  until it flashes red and blue and you hear "pairing."

- 2 Activate Bluetooth® on your phone and set it to search for new devices.
 - **iPhone** Settings > General > Bluetooth On
 - **Android™ Smartphones** Settings > Wireless & Networks > Bluetooth: On > Scan for devices

NOTE Menus may vary by device.

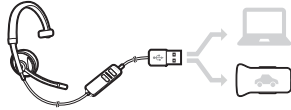

- 3 Select "PLT_B500." If necessary, enter four zeros (0000) for the passcode or accept the connection.

Once successfully paired, the Call button  stops flashing red and blue and you hear "pairing successful."

Charge Your Headset

Your new headset has enough power to pair and make a few calls. It will take four hours to fully charge.

While the headset is charging, the Call button is solid red and turns off when charging is done. It takes four hours to fully charge the headset.

NOTE Your auto may need to be running for the car charger/vehicle power charger (VPC) to charge your headset.

Battery Status

You will hear a reoccurring alert when you have less than 30 minutes of talk time left.

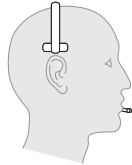

iPhone users can view a battery status icon displayed in the status bar at the top of the iPhone screen.

Fit

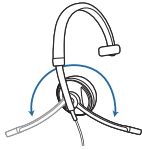

- 1 Lengthen or shorten the headband until the ear cushions fit comfortably over your ears.

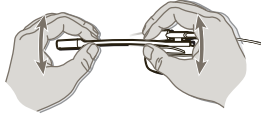

- 2 Position the stabilizer T-bar above your ear.

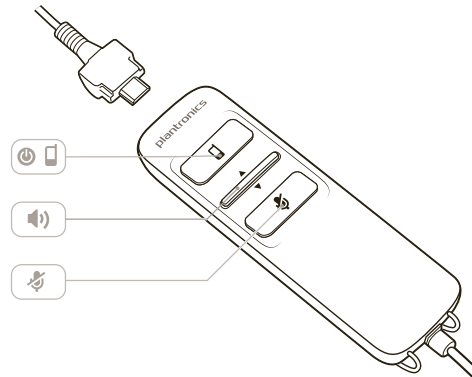

- 3 To wear the microphone on the other side, rotate the boom up and over. Adjust the boom so it points to the corner of your mouth.

- 4 The boom can be shaped to follow the curve of your cheek.

The Basics

Power on or off

Press the Call button  for 4 seconds until you hear “power on/off” to power the headset on or off.

Make/Take/End Calls

Answer a call

Choose:

- Put on the headset to answer call, or
- Tap the Call button 

Answer a second call

First, tap the Call button  to end current call, then tap the Call button  again to answer new call.

End a call

Tap the Call button  to end current call.

Decline a call

Choose:

- Press the Call button  for 2 seconds

Use call back

Double tap the Call button  to dial the last connected phone number.

Activate voice dial (phone feature)

Press the Call button  for 2 seconds, wait for the phone prompt and then tell the phone to dial the name of a stored contact.

Mute the headset

During a conversation, press the Mute button  until you hear “mute on” or “mute off.” While the microphone is muted, the Mute button  is solid red and an alert repeats every 15 minutes.

Adjust the volume

Toggle the Volume button  up or down during a call or while streaming audio.

Use Sensors

The Smart Sensors™ in your headset react when you put on or take off your headset.

Putting on your headset will:

- Answer an incoming call
- Transfer an active call from your phone
- Resume streaming media

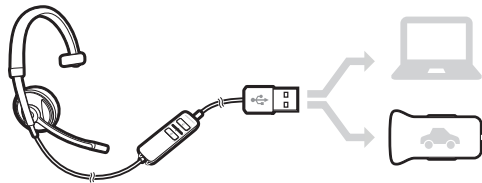

Taking off your headset will:

- Transfer an active call to your phone
- Pause streaming media

Reset Sensors

The Smart Sensors™ are located in the headset ear cushion. Handling the ear cushion may activate the Smart Sensors and cause them to work unexpectedly.

To reset the sensors, charge your headset and place it on a flat, non-metallic surface for more than 10 seconds.

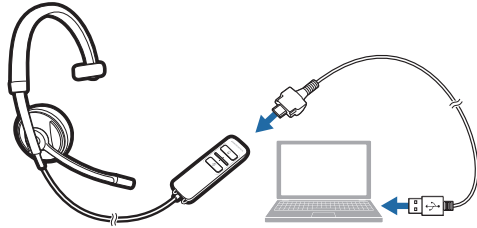

More Features

Computer calls

You can also use your headset to make calls from your computer.

- 1 Connect your headset to your computer.

- 2 Make, take, and end calls from a softphone application such as Skype.
