<u>TP 2000</u> QUICK START UP PROCEDURE

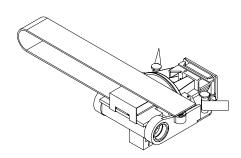

(For Detailed Instructions- See User's Manual)

- Cut, remove and properly dispose of all straps. Remove and dispose of main carton top and packing materials. Retain carton containing accessories.
- Move the printer off the skid and to the location for operation. At least two people should be used to lift and move the printer. <u>Follow all proper lifting techniques to</u> <u>prevent injury, as printer weighs</u> <u>approximately 100 lbs</u>. Dispose of carton tray and skid.
- Open carton containing accessory items, remove contents and dispose of carton. Install Paper Stack Rack and Anti-static paper guide with Phillips screwdriver.
- 4. Install the ribbon using instructions below. (or page 43 in Operator's Manual)

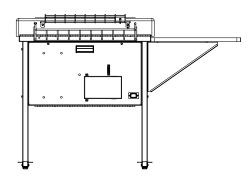

- a) Raise the printer access cover and locate the green knob on right side of chassis. Turn knob counter clockwise until it stops.
- b) Remove the ribbon from package and elastic band from ribbon guide.
- c) Move the print head to center of printer by hand.
- d) Place the ribbon guide in roughly the center of ribbon loop.
- e) Turn the ribbon advance knob to tighten loop.

- Place the cartridge in printer, engaging pins in rear and pivot down under spring retention clips. The ribbon loop must go in front of platen.
- g) Place the guide on the nose of the print head and snap down into position.
- h) Route ribbon behind pins to the left and right of print head.

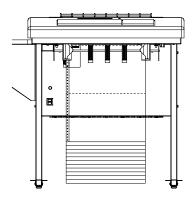

- i) Remove any ribbon slack by slightly turning the ribbon advance knob.
- 5. Make certain that the power switch is in the OFF (0) position. The host computer system should also be off or manually switched off-line. Connect the communications cable to the RS-232C port on the rear of printer and the host computer. Adjust the serial interface settings under Menu 5 if required.

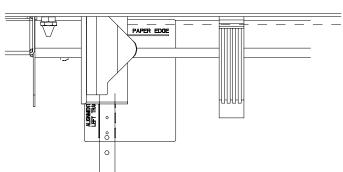

- 6. Verify that voltage setting is correct (U.S.A.=115V).
- 7. Verify power receptacle is properly grounded. Attach power cord and turn power on.

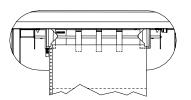

8. Load paper using instructions below. (or page 32 in Operator's Manual)

- a) Press the LINE / LOCAL key to take printer off line.
- b) Place and align supply of forms directly below tractor guides.

- c) Unlock both tractors and position left tractor with alignment mark on printer, allow right to "float".
- d) Open doors on both tractors.
- e) Load top three holes of both sides of form (min. width 8.5 in.) on the bottom three-tractor pins on both wheels.
- f) Close doors on both tractors.
- g) Lock right side tractor.
- h) Press the LOCAL FF LOAD key.
- i) Load profile that matches the current document.

- 9. Run a printer self-test to verify proper operation.
  - a) Press the SETUP key.
  - b) Press FEATURE ^ key once. The LCD displays RUN SELF TEST.
  - c) Press ENTER, the self-test starts.
  - d) Press ENTER again, to stop test.
  - e) Press the LINE / LOCAL key to place printer on line.
