

A boost to your business communications

Mitel 600 DECT Phones

Your very own personal communication assistant

Communications and mobility are essential to our modern professional lives. With the Mitel 600 series of mobile DECT phones, versatile communications and efficient cooperation have now become child's play. Wherever you are – at the office, on the production floor, in a warehouse or at your home office – the Mitel 600 family of phones are your reliable communication assistants. With their clever functions, intuitive operation and tried-and-tested ergonomics, they are ideal companions in every situation of your professional life.

DECT

Mitel has been a leading manufacturer and developer of DECT systems for many years. Gathering its wealth of experience into the development of the Mitel 600 DECT Phone family. With the DECT (Digital Enhanced Cordless Telecommunications) technology, these handsets offer a secure and reliable connection to the base station – no matter how dense the volume of traffic may be in a confined area. DECT connections are broadband-based, providing a considerably improved quality of speech compared with GSM mobiles. The installation of area wide, multi-cellular radio networks mean you can be reached anywhere on the company premises.

DECT also offers maximum security

Every time a call is set up, the phone has to log in to the base station which is password protected. Another asset is the DECT technology itself. DECT operates in a dedicated frequency band, which means it is shielded from interference from other radio networks. The phones can therefore be used in situations where the use of GSM phones is not recommended due to the interference potential of the radio waves, i.e. in hospitals or doctor's surgeries.

The excellent sound quality makes stress-free and relaxed working possible, particularly in hands-free mode.

Your very own personal communication assistant

A good assistant is someone who adapts to your individual requirements and your habits. The Mitel 600 series of phones not only look good, the modern design conceals a multitude of possibilities for adapting the phone to your individual usage and communication needs. Many of its keys are user-configurable, making important functions available at a single keystroke.

With more than 44 polyphonic and 29 non-polyphonic ring and alarm tones, allowing you to identify your mobile assistant instantly and by its ringtone. Different ring tones and melodies are assigned to individual callers, enabling you to know who is trying to reach you*. Mitel 600 DECT Phones also adapt their appearance to your personal preferences and habits, with fully customisable menus, fonts, display contrast and brightness.

* This function depends on the DECT platform and the system used.

Your all-round package

ADMINISTRATION MADE EASY

By definition, the function and firmware updates keep the phones up-to-date. With the Mitel 600 family, tasks are made easier with updates possible for administrators via the radio network*. All the devices are provided centrally with the same software, i.e. they do not have to be collected individually for updating. Again security and reliability are top of the agenda: updates are only installed once they are fully downloaded. Malfunctions due to incomplete updates are now a thing of the past.

Mobile High End DECT phones for high performance communication networks

- The ambient noise filter can automatically adjust the ring tone and talk volume to the background noise in any given situation and filters out any distracting ambient noise. Ensuring optimum communication conditions at all times, especially in loud environments.
- User-friendly, wireless function and firmware updates via the cellular network (download over air)*.
- Important events – reminders, incoming call signals, warning of exceeding the system range or indication of battery charge status are all indicated by a 3-colour LED on the handset.
- The intelligent battery management guarantees an overview of the battery capacity at all times, even in cases where an empty battery has been replaced with one that is supposedly fully charged.

SECURITY AND RELIABILITY

With their ingenious surface design the dialling keys are easy to locate at all times, even in conditions of poor visibility. The phones are equipped with a noise filter, dynamic ring tone and adjustable talk volume so you do not miss any important call, and your conversations are always perfectly audible. This also means you can communicate with ease even when you move from a quiet office environment to a loud outdoor storage area. Mitel checks the degree of ruggedness with standardized test cases**.

Mobile High End phones for high-performance communication networks

MOBILE FREEDOM

The Mitel 600 family of mobile terminals is perfectly geared to the Mitel telephone systems, giving you reliable access to the many possibilities provided by the telephone system wherever you are within the company premises. In conjunction with Mitel's SIP-DECT solution, you also benefit from the possibilities and advantages of VoIP technology. As the phones also support the GAP standard, they can also be integrated into the DECT systems of other manufacturers and access the relevant basic functions.

A STRONG FAMILY

Mitel's 600 family provides the right mobile assistant for your communication needs, whatever the application. The phones' outstanding speech quality makes for crystal-clear mobile communications. Operation itself is so simple and intuitive that the User's Manual is certain to gather dust! The large 2" display is perfectly designed for optimum overview and good legibility.

The interface for an optional microSD card in the Mitel 622 ensures high availability. The device data stored on the SD card can be quickly transferred to a replacement handset just by moving the card. The new handset can be used immediately without having to subscribe again.

For each need the right phone

MITEL 612

The Mitel 612 is the entry level model for the business sector. Its local phone book contains up to 200 contacts with 7 entries each*. The redial list allows quick access to the last 20* numbers dialled. Its large TFT colour display provides clear graphic displays and ideal legibility even under difficult lighting conditions. The display size offers the perfect conditions for intuitive menu guidance and ergonomic operation.

With the built-in hands-free functionality the phones provide excellent comfort for normal telephone calls as well as for telephone conferences.

MITEL 622

The user-friendly Mitel 622 is the high-end mobile phones for the professional. Many freely programmable keys support the simple navigation and the use of different lines. Equipped with a Bluetooth® interface for a cordless headset, Mitel 622 allows maximum freedom of movement. The high-quality lithium-ion battery can be charged via the USB interface, independently of the charging bay. The headset socket remains accessible, so calls can still be made via the headset while charging is in progress.

Overview of the Mitel 600 family

A headset allows you to telephone with both hands free. This enables service staff to work on a faulty machine whilst following direct instructions over the phone enabling faster repairs & increase accuracy. With built-in Bluetooth® technology the Mitel 622 makes this function available with wireless headsets.

The phone's outstanding speech quality makes for crystal-clear mobile communications.
