#### Installing "PowerDic"

1. Download PowerDic (.zip) file on your Desktop PC.
2. Extract the zip file to the desired folder on your Desktop PC.
3. The zip file contains Installation SIS file and PowerDic for Symbian S60 User's Manual.

4. Connect your smartphone to the Desktop PC and run the SIS file and the selected dictionary database(s). You can also copy the SIS file directly to your smartphone and run it from there. PowerDic allows the use of multiple dictionary databases.

After installation the “PowerDic” icon should appear in the Menu list.

< Menu list >

**Notes:** If you copy the SIS file directly to your smartphone, choose “Yes” for the installation warning message and “Yes” for confirming the installation of PowerDic. Select “Install menu” and press “OK.” Then choose the location to install the software. We recommend installing in the storage card.

## Uninstalling PowerDic

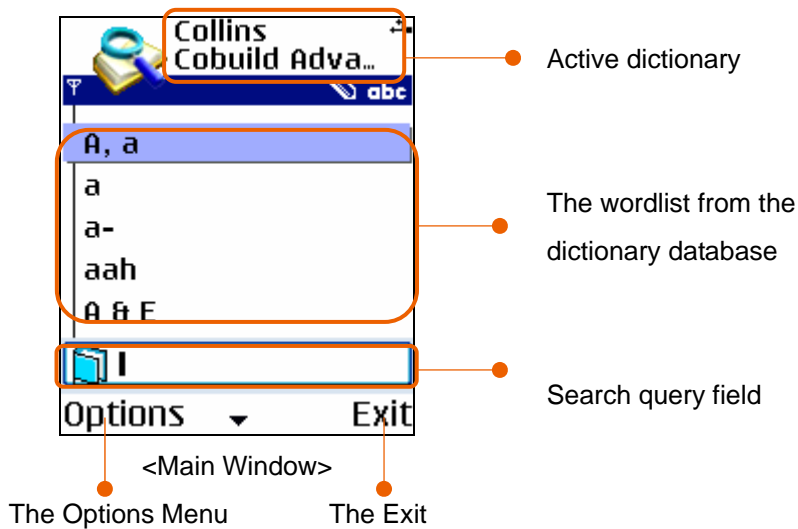

To remove the PowerDic from your smartphone:

1. Go to Menu >> Tools >> Manager
2. Select PowerDic then press “Options” then select “Remove”
3. Choose “Yes” to confirm

## Chapter 3. Features of PowerDic

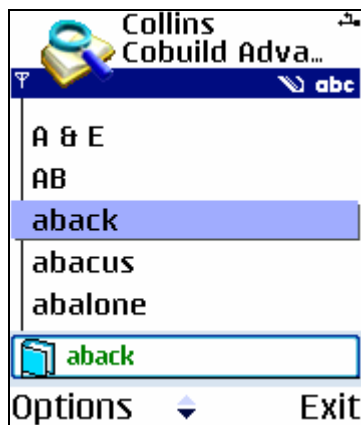

### Main Window

When you run the “PowerDic” for the first time, the program will automatically locate all installed dictionary databases on your smartphone and activate them.

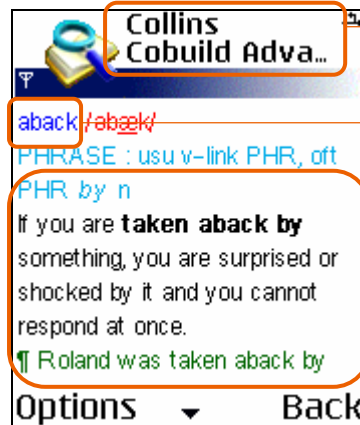

### Word Search

You can select a word using the 5-way navigation button to scroll the word list or type a particular word or a phrase in the search query field . To view the dictionary entry for the word, press the center of the 5-way navigation button. If the word is incorrect or does not exist in the databases, you will see the words which are closest to it in the word list.

< Word search >

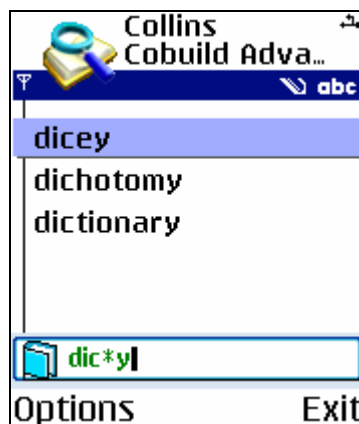

< Contents view window >

- Active dictionary
- The title of entry
- The contents of the word

## Wild Card Search

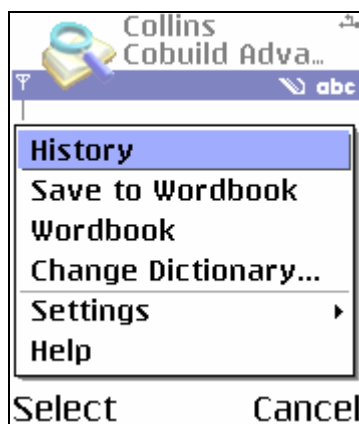

In some cases you may need to search for words without providing all the letters of the word. The result will usually return a group of word entries, satisfying the predefined condition. PowerDic allows you to make such queries by using the \* symbol to substitute for an unknown letter or a group of letters.

For example, if you type “dic\*y” you will get a list of all words in the dictionary, the first three letters of which are “dic” and the last one is “y.”
