German Quality & Design

What is the chef's recommendation?

Hailing from Germany, Chef Christian Bruhns has more than 26 years of culinary experience, gained from his various stints around the globe such as Hilton Beijing, Hilton Shanghai, Hilton Airport Manchester and St Regis in Singapore.

With a strong passion & expertise in the culinary arts, Chef Christian Bruhns strongly believe that perfect meals can be easily prepared with great cooking appliances, strong cooking techniques, fresh ingredients and lots of love and passion for friends and family you are spoiling with culinary delights.

It is no wonder Chef Christian Bruhns is a strong advocate of Webber kitchen appliances which are equipped with features that professional and home chefs alike appreciate!

"As Germans are known for our precision, high quality, advanced technology and functional design; I am glad they are all found on the Webber range of appliances! I hope you enjoy cooking on them as much as I do!"

Christian Bruhns
Celebrity Chef &
Webber Chef-Ambassador /
Product Developer

Doing our part for the environment

The need for energy and resources conservation has never been more important in this century. Webber believes that every appliance we offer should create the least environmental impact; not only from the production stage but begins right from the design stage.

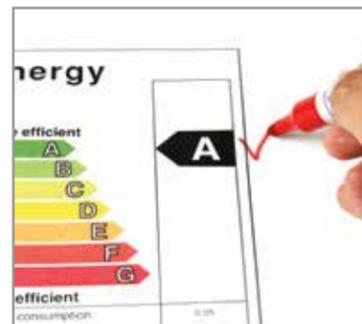

Webber appliances are not only made with the toughest, best quality materials for durability but also equipped with energy savings features.

When you invest in a Webber appliance, you have made a wise choice in the responsible use of the earth's resources.

ENVIRONMENTAL PROTECTION

From the design stage up till the delivery of Webber appliances to your doorstep, every effort is made to ensure the least carbon footprint is created.

GREEN APPLIANCES

All our ovens are rated Class A in the European Union (EU) Energy Labelling Scheme for all household products (A being most energy efficient and G being the least).

ENVIRONMENTALLY FRIENDLY

Intelligent features on Webber's range of appliances such as pyrolytic self cleaning on the ovens reduces the use of harsh household chemicals and the release of harmful gases into the environment.

ENERGY SAVERS

Webber appliances such as the induction hobs harness clean and green energy for efficient cooking and cleaning, saving up to 45% energy compared to conventional hobs.

SMART DESIGN

Our appliances are built with intelligent technology such as some of our hoods which automatically reduces the suction power upon detection of lesser fumes. Replaceable carbon filters and ionisers help to clean and refresh the living environment before, during and after cooking!

PRODUCTS THAT LAST

By building durable appliances that withstand everyday's use, Webber aims to create less consumer disposable waste and conserve nature's valuable resources.

60cm Built In Ovens: The Edel Collection Experience the joy of perfect cooking!

Chefs love using ovens for their many functions; be it roasting, grilling, baking or just keeping food warm. Webber brings to the home kitchen a full collection of ovens of different capacities and functions to tailor to all your culinary requirements!

Packed with features such as Pyrolytic self cleaning, Touch Controls and Digital Timer to keep track of your cooking, you will be suitably impressed with the perfect cooking results.

SENSOR TOUCH CONTROL

Innovative Sensor Touch controls means you have everything at your fingertips for easy accessibility to the oven's full functions. The large display provides easy visibility with the user-friendly timer and functions displays.

PYROLYTIC SELF-CLEANING

The oven automatically burns off any residue grease or stains in the oven cavity, all you need is a damp cloth to remove the carbon residues. A safety feature ensures that the door is automatically locked until the temperature in the oven has cooled down to a safe level.

No more messy clean ups or the need for detergents!

FULL TELESCOPIC RACK

The telescopic rack allows you to check on your cooking effortlessly. You can easily extend the baking tray all the way out of the oven cavity to baste your meats or remove heavy roasts without worry of tipping hot trays!

User friendly & safety features for enjoyable cooking!

Webber ovens come with a host of user friendly and safety features that allow you to enjoy cooking with total peace of mind!

LARGE CAPACITY COOKING

Offering up to 25% more space than conventional 60cm ovens, the spacious interior means you can prepare larger food quantity with better cooking results thanks to better air circulation.

EASY CLEAN ENAMEL CAVITY

All Webber ovens come with Enamel Klean. This special grey coating is scratch resistant & designed to withstand chemical erosion like lemon juices, etc. Each roasting and grill pan are also treated with the same protective coating to make your oven cavity and cooking accessories looking new and clean!

FULLY REMOVABLE DOOR WITH FULL INNER GLASS

All Webber ovens come with easily removable oven door for easy cleaning and accessibility to the oven's interior.

Built for easy cleaning, the full inner glass door has no unsightly joints or screws and can be easily removed for cleaning. The use of an advanced heat reflective glass for the inner door means that the outside door surface remains cool.

4 LAYER GLASS DOOR

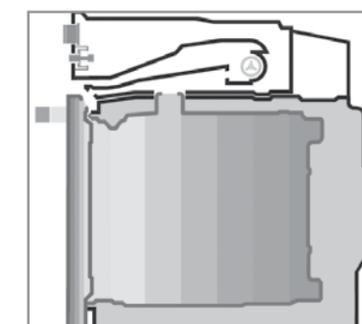

All pyrolytic ovens are equipped with quadruple glazed glass panels to ensure that the outer door temperatures are kept as low as possible even during pyrolytic cleaning.

COOL OPERATIONS

Webber's pyrolytic ovens are equipped with an integrated cooling fan designed to keep the control panel cool and reduce the temperature of both the oven's door and the housing cabinetry.

Please note that all accessories must be removed from the oven cavity during pyro-cleaning.

COOL DOOR DESIGN

Webber ovens are equipped with Cool Door system to guarantee maximum security in your kitchen. Whilst cooking, you can be sure that the oven door temperature is always safe. The glass panels and reflective films ensure heat stays inside the oven cavity, keeping the outside door temperature cool.

Webber Oven Functions

Webber 60cm ovens comes with up to 10 multi cooking functions. By selecting the ideal cooking function, you can be assured of perfect cooking results!

TEN FUNCTIONS OVEN

Ideal for:
Roasting / Baking

Suitable for baking (bread, cakes) and roasting on a single shelf (such as searing red meats). Oven needs to be pre-heated.

Ideal for:
Pastries/ Pizzas / Slow Cooking

Great for pastries and pizzas where a crispy base is desired. Also for slow cooking dishes such as stews & casseroles.

Ideal for:
Meringues, pies, lasagne

The top heat browns gently for a great mouthwatering finish to dishes such as gratin or dishes with cheese toppings.

Ideal for:
Pizzas, quiches

The inner and outer heating elements works simultaneously to offer rapid & even grilling; effectively browning the top surface of the food item.

Ideal for:
Grillings meat & seafood / sausages

Top & Bottom heat combined with fan for even cooking, also suitable for roasted vegetables & grilling different food items together.

Ideal for:
Simultaneous cooking on 3 levels / Baked seafood, roasting meats

Combines the benefits of fan and conventional cooking; convenient & time saving for cooking different food items at the same time.

Ideal for:
Cookies, muffin, small food items such as canapes, tartlets

Allows batch cooking on several shelves at the same time.

Ideal for:
Gentle thawing of meats, seafood & desserts

Gentle and quick defrosting and thawing of ready made dishes like cream filled items & delicate meats like seafood.

Ideal for:
Poultry such as whole chicken, duck & turkey

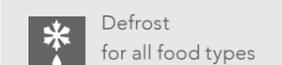

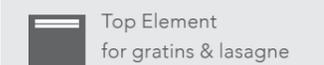

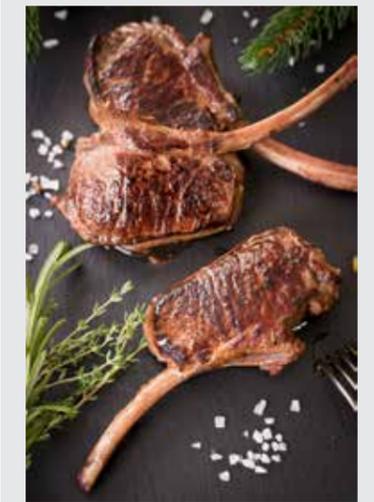

Can be used with most of the oven's functions particularly the grilling functions for even crisp browning and minimise spitting.

Ideal for:
Roasting, baking, slow cooking, grilling of all food types in these cooking styles

All models include an additional interior oven light; which enables the user to observe the cooking progress without opening the oven door.

SEVEN FUNCTIONS OF WEBBER GAS OVEN

Please refer to individual product's specifications for full details

All in the family!

Webber 60cm Edel Ovens Collection are designed to match the 45cm Harmonie Collection Compact Ovens. The same sleek linear lines framing black glossy glass lends a modern touch to any kitchen configurations!

Compact Ovens: Harmonie Collection Offering you the best of all worlds!

Webber offers you a diverse range of Compact Ovens - The Harmonie Collection that offers you the best of both worlds! Combining speed and traditional cooking, these ovens are ideal complementary add-ons for your standard ovens or on its own.

Select your ideal combination of cooking functions be it bake, steam, roast, grill or microwave; or all these functions in one oven!

VARIOUS COOKING METHODS ON THE COMPACT OVENS:

MICROWAVES

Microwaves cooks food from inside out with speed and precision to save time & energy.

GRILL

Grills uses the radiant heat from the top grill of the oven to quickly seals and brown food.

CONVENTION

In this mode, the heating element around the an provides fast & high cooking temperatures up to 240°C for fast & even cooking.

PURE STEAM

Steam is generated to surround the food in a "water bath" to gently cook whilst retaining the food's vitamins, minerals & textures.

STEAM ASSISTED

In MA4343X, steam can added during the roasting or microwaving process to retain the moisture and textures of delicate food such as poultry & fish.

COMBINATION

Depending on models and functions selected, you can use a combination of 2 or more cooking methods eg. Microwave with Steam for best cooking results in the shortest time!

Note: Not all models have all the above cooking functions, please refer to individual product's specifications

Features

45cm Compact Oven

- 34L Convection + Microwaves + Steam
- Top Grill
- Convection Fan & Heater
- Stainless Steel Cavity

Induction Hobs: The Prazision Collection Experience cold heat technology

Induction technology is the safest form of cooking. Webber Induction Hobs are equipped with Auto Pan Detection sensor, Over heating protection, Overflow protection, Auto Switch Off, Child-lock protection and Power Surge protection.

As heat is induced directly in the cookware without heating up the hob's surface area, the hob's surface and the surrounding ambient temperature remains cool and safe to touch.

FAST, POWERFUL & PRECISE COOKING CONTROLS

Webber induction hobs allow you to prepare all kinds of cuisines with its adaptable cooking power. With up to 9 heat settings, you can choose the most gentle (50w) for melting of chocolates to the most intense (2500W) for deep frying or fast boiling. Due to its instantaneous rise in temperature, the boiling point is achieved at least twice faster than conventional hobs!

CONSTANT & UNIFORM HEAT

The heat generated on induction cooking is uniform and even, making it ideal for preparing pancakes, crepes as well as fast searing of red meat with its constant and intense heat!

SIMPLE & EASY TO USE

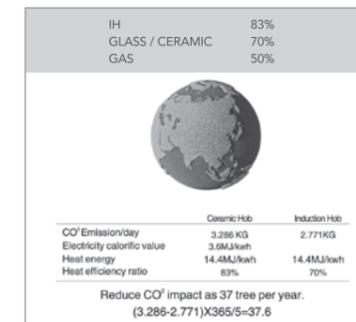

Webber Induction Hobs are pleasant and easy to use due to its cool cooking surface and sleek design with no protrusions. Spills and stains are easily removed and cleaning is a breeze.

With a 99 min timer that automatically switches the cooking zone off, there is no need to watch over your cooking!

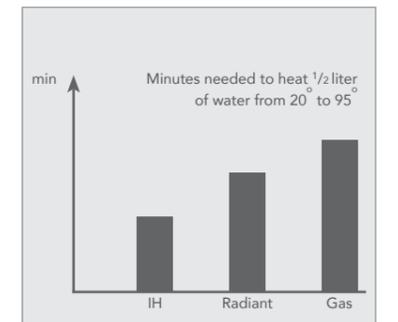

GREEN COOKING

Induction cooking reduces the user's risks of exposure to carcinogenic carbon particles since there is no open flame or carbon emission during the heating process. The hob's vitroceramic hob is also produced by Eurokera in France, with no harmful components to the environment. As there are no crevices on the hob's surface and no burnt on stains, there is also no need for household cleaning chemicals!

ENERGY SAVINGS

Induction cooking offers a host of benefits especially in the energy savings. Compared to gas hobs, induction harnesses up to 83% of the energy used to heat the exact diameter of the cookware compared to only 50% on gas cooking!

TIME SAVINGS

Webber induction heats up twice faster than a ceramic or gas hob because the heat is instantaneous with all energy directed into the cookware instead of heating the hob's surface!.

Features

60cm Induction Hob

- 4 Induction Zones with auto cookware size adaptation
- Front Left: 1500W

Asian Gas Hobs: The Stärke Collection

With Asian cooking, fast, powerful and even heating is required to bring out the flavour, and taste yet at the same time; preserves the food texture. Webber's Stärke Collection of gas hobs is designed to offer you the ultimate convenience, gas and time savings and ease of cooking!

POWERFUL, FAST & EVEN HEATING

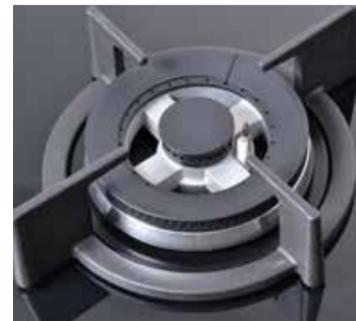

The new series of Asian Gas Hobs boast of top aspiration technology & 5 injectors burners for added safety & better air ventilation resulting in higher & stronger gas power. With wok burners equipped with 5.0kW power on triple ring burners, you also save on gas consumption & cooking time!

HEAT RESISTANCE BURNERS

Equipped with cast iron wok and grid supports and brass burners that withstand heat up to 800°C, you can be assured of the fastest heat transfer and the most efficient cooking.

Brass burners and caps with self interlocking system means easy & fuss free cleaning.

ADDED SAFETY & CONVENIENCE

All the Asian style Gas Hobs are equipped with the flame safety device from renowned Orkli.

The 8mm tempered glass top are certified by international lab testing standards.

Integrated battery ignition means you can easily turn on the gas burner with a single hand movement.

Features

80cm Asian Gas Hob

- Gas on Glass – 2 Burners
- 2 Triple Ring Wok Burners: 5.0kW
- Integrated Battery Ignition: Pulse Igniter (DC1.5V)
- 8mm Tempered Glass

Suction Hoods For fresher & cleaner air

Webber's range of hoods are certified by Intertek for the following, particularly the actual suction power & sound level (Acoustical and Airflow Testing for HVAC Equipments); unlike uncertified brands which tend to overstate the hoods' airflow by up to 25%.

Intertek is an internationally recognised laboratory for testing, inspecting and certifying products to ensure their quality, safety & efficiency. Products certified by Intertek are internationally recognised to meet quality, health, environmental, safety and social accountability standards for all markets in the world.

In this catalogue, we have stated the suction power of our hoods according to Intertek standards and based on open air flow (for easy comparison to non-certified hoods from other suppliers). Webber combines technologies with nature to bring you fresh smelling air in your kitchen to make cooking a breeze.

**HIGH SUCTION POWER ENGINE
MOUNTED ON ALUMINIUM DIE CAST**

Boasting high suction power up to 1200m³/h, Webber hoods are strong yet stable and silent with aluminium mounting.

**SLEEK & MODERN DESIGNS WITH
SMART FEATURES**

Webber hoods are designed to complement our range of built in ovens and hobs. Sleek and attractive, they are also equipped with various sensor and soft touch controls and features like LEDs and timers.

ENERGY SAVINGS AND EFFICIENT

All hoods are fitted with extra bright energy-savings LED lights to enhance your cooking experience.

GRÜN IONISER

Negative Ions are naturally occurring in areas near waterfalls; and they effectively remove bacteria and allergens while purifying the environment. Webber brings these features to your home with a built in ioniser in the hood.

CARBON FILTERS

Carbon filters are equipped on all Webber hoods to remove odours and to keep the ambience air fresh and clean smelling. They are easily replaceable to keep your kitchen fresh smelling year after year!

METALLIC FILTERS

Webber offers 3 or 5 layer metallic filters to effectively trap oil residue during heavy cooking.

The metallic filters on our hoods can be easily cleaned by placing them under running soapy water.

Features

90cm Island Hood

- White Marble Finish
- Select your ideal controls:
 - Infra Light Sense control
 - Control by hands movements
 - Remote Control
 - Bluetooth
 - Phone Android App
- Carbon Filters

Outdoor Cooking System: The Outsign Collection

Webber offers you an exclusive outdoor cooking system for creative food preparation.

Created by professional chefs in France and crafted with the most robust and high quality materials, you can be assured of a perfect outdoor cooking experience!

Equipped with a star shaped grill powered by portable LPG gas for even and fast heating, the cast iron plancha is perfect for fast searing, grilling and cooking.

FAST AND EFFICIENT COOKING!

With 52cm diameter cooking surface, the maximum temperature can go up to 300°C in just 7 minutes!

The heat setting can be easily adjusted for fast and even cooking in all seasons!

SAFE & EASY TO USE

With safety features such as a low gravity centre and patented double panels to prevent burns; and thermocouple gas safety ; you can enjoy a perfect outdoor cooking experience with total peace of mind!

DESIGNED FOR PROFESSIONAL USE!

Available on its own or with a host of accessories to form different configurations, this unique outdoor system aims to create a focal point for all your outdoor entertainment events!

Set up a cocktail area with the round glass table accessory; a buffet table with the extended table or combine both to create a live cooking counter easily; perfect for family gatherings or professional culinary events.

For serious outdoor enjoyment!

Set up a cocktail area with the round glass table accessory; a buffet table with the extended table or combine both to create a live cooking counter easily; perfect for family gatherings or professional culinary events.

Features

Outdoor Cooking System

- Free standing System for use with LPG gas cylinder
- 52cm Cast Iron Plancha
- Retractable wheels
- Adjustable Heat Settings: 110°C to 290°C
- Achieve 280°C in just 10 minutes
- Stabilized Temperature controlled by thermostat
- Star shaped Burner for fast & even heat distribution

Safety

- Increased Stability
- Heat Insulating Walls
- Protective Awning
- Flame Failure Device

Technical Specifications

- Cast Aluminium Shell, Polyester Paint
- Electro-polished Stainless Steel
- Enameled Cast Iron
- Nickel-chrome Plated Burner
- Crimp & Screw Assembly

Wine Cellars: The Weinefest Collection Optimal Wine Storage

Webber wine cellars are created to replicate the real underground wine cellars' environment for optimal wine storage.

PRECISE TEMPERATURE CONTROLS

Equipped with an intelligent thermostat system which provides a temperature range of 5°C to 22°C, Webber wine cellars' temperatures can be easily adjusted for storing different types of wines!

DUAL TEMPERATURES IN ONE

Dual compartments in all Webber wine cellars allow you to set different temperatures in the same wine cellar for different wines!

UV PROTECTION WITH BLUE LEDS

Wines need to be protected from UV exposure to develop properly. Webber wine cellars are equipped with a triple Layer of UV Tinted Doors. The use of Diamond Blue LEDS instead of harsh white or halogen lights greatly reduces UV exposure to your precious wines!

CIRCULATING FAN COOLING FOR OPTIMAL TEMPERATURE CONTROLS

Built in circulating fan ensures cool air is distributed evenly throughout the wine cellar interior; avoiding any "warm spots"; thus providing a constant temperature for wine to fully mature & blossom.

ACTIVATED CARBON FILTER FOR ODOURS CONTROL

As wines are "living" products, smells and odours in the environment can affect their taste and smell. With the activated Carbon Filter, there is no risks of odours or smells affecting your precious vintages!

STABILITY & HUMIDITY CONTROL

For wines to develop and mature, stability is of utmost importance. Therefore, Webber wine cellars offer high quality wood shelves made from Sapele and a vibration-free compressor to reduce movements when you open or close the door.

Built in Humidity Controls in the wine cellars prevent corks from drying out and wines evaporating!

Features

182 Bottles Wine Cellar

- Free Standing Dual Zone
- Electronic Temp Controls
- Temperature Range: 5°C to 22°C

CWD24B

Water Dispenser: AquaStream Pure drinking water at your fingertips!

Webber's unique water dispensers combines functionality with aesthetical appeals; offering pure water solutions for your modern homes and offices!

Using modern technology and a comprehensive 6 step filtration system to convert tap or bottled water into pure or alkaline water, you can now enjoy quality water effortlessly!

ENJOY HIGH QUALITY WATER WITH COST AND TIME SAVINGS

No more time spent on boiling, cooling and storing water. Enjoy boiling hot or icy cold water or room temperature water at just a touch of your fingertips! Select the ideal amount of water to dispense each time easily too with the customisable volume.

CONVERT TAP WATER INTO ALKALINE PURE DRINKING QUALITY WATER

Instead of buying bottled water and back-breaking water bottles installation, now you can enjoy fresh drinking water in the comfort of your own home or office! Enjoy instant preparations of hot and cold beverages!

TECHNOLOGICALLY ADVANCED

Webber water dispensers are equipped with up to 6-Level AquaPure Filtration System with Ultraviolet Germicidal Lamp to effectively filters impurities for fresh pure drinking water.

WATER PURITY CERTIFIED

Water quality after passing through Webber water dispensers are certified by SUCOFINDO (Indonesia independent laboratory to be 100% safe & suitable for human consumption; offering total assurance for you and your family's health!

TOTAL PEACE OF MIND

Wash your fruits & vegetables, prepare your favourite beverages, make ice cubes and cook with fresh purified water from the AquaStream water dispenser easily!

ENJOY THE HEALTH BENEFITS OF ALKALINE WATER

Enjoy the health benefits of alkaline water. Believed to support the body's wellness, rehydrates and detoxifies the body. Now you can enjoy these benefits readily.

Enjoy the health benefits of clean and pure water!

SLEEK DESIGNS FOR YOUR KITCHEN & OFFICE PANTRY

Comes in 7 colours to suit all designs and décor! The classy and sleek designs allow you to display your water dispenser on countertops for easy water access!

Available in 7 Classy Colours:

Sleek Silver Glossy Black Vanilla Ice Sexy Red Zesty Yellow Lime Green Tangerine

Features

Point of Use Water Dispenser

- Touch Control TFT LCD Display
- Dispenses Hot / Cold.
- Room Temperature water
- One-Touch Water Dispensing
- Auto Amount Dispensing & Programmable Settings
- Flexible Temperature Settings
- Reboil Option
- 5-Levels AquaPure Filtration System
- Advanced Ultra Violet Germicidal Lamp with Lifespan Indicator
- Hot Water Protection Lock
- Child Protection Lock
- Energy Saving Timer
- Sleep Mode
- Simple DIY Filter Replacement

Built In Induction Hobs

Enjoy cooking on the Webber by Bompani Induction Hobs!

Equipped with BOOSTER function for fast heating & (Power Settings for flexible heat adjustments; and smart safety features such as Automatic Cookware Detection and Overflow Safety, you can enjoy safe & cool cooking at all times!

Features

60cm Induction Hob

4 Induction Zones with Auto Cookware Size Adaptation

- Front Left & Rear Right : 1500W
- Front Right & Rear Left: 1200W
- Black Vitroceramic Glass
- Sensor Touch Controls
- 9 Power Levels
- Cooking End Timer
- Booster Function for Quick Heat up

Safety

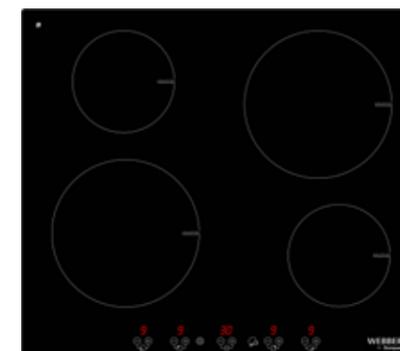

- Automatic Cookware Detection
- Child Lock
- Automatic Stop
- Overflow Device
- Residual Heat Indicator

Technical Specifications

- Total Power up to 2800W
- 220-240V / 50-60Hz
- Max Output: 13A
- Actual Dimensions: W580 x D510 X H51mm

Retro Fridges

The fun and wonderful collection of Webber by Bompani Retro Fridges make the best statements in design and technology!

With Class A++ energy savings features and a sleek, retro design available in both top and bottom mount fridge freezer configurations in 60 & 70cm widths, you can also pick from a fun range of colours to match your beautiful home!

Features

Retro Fridge 70cm Width

- Fridge Freezer (Bottom Mount Freezer)
- Energy Class: A++
- Climate Class: T
- Multi Level NO FROST
- Gross Volume: 415L
- Net Volume of Fridge: 285L
- Net Volume of Freezer: 97L
- Freezing Powers: 4 Stars
- Super Freeze
- Auto Defrost: Fridge and Freezer
- Crystal Shelves with Chrome Trimmings
- Anti-Bacterial Inner Linings
- LED Illuminations

Cleaning

- Easy Clean Anti-Bacterial Inner Linings

Included Accessories

- Ice Box

Actual Dimensions

- W700 x D710 x H1887mm

Technical Specifications

- Energy Consumption per year: 325kWh
- Delivered with 13amps plug
- 220-240V/50-60Hz

Also available in Glossy Cream

Built In Guide And Dimensions

All description and technical diagrams are intended as a guide only. For any technical information, full dimensions and installation details, please refer to the instruction and installation manuals supplied with the appliances.

INSTALLATION GUIDELINES FOR OVENS

Models:
SP465104EX / SE470103EX / SE465092EX
/ SE465091EX / BSE454081EX /
BSE454112EX

INSTALLATION OF OVENS IN THE FITTING RECESS

Webber ovens are designed for integration into a kitchen unit. The dimensions of the fitting recess are given for each appliance. The surrounding cabinetry must be able to withstand an ambient temperature of 80°C to prevent any heat damage.

It is essential that the installation instructions for the ovens are complied with. The ovens must be fixed into the fitting recess using the screws provided. The fixing holes located on the lateral mountings are accessible when the oven door is open.

Any of the ovens can be installed either in a column unit, or unit a worktop surface without special ventilation, unless the oven is fitted above a refrigerator (not

recommended). In this case, a wooden shelf, with an opening of at least 150mm at the back behind the unit providing ventilation for the refrigerator, must separate both appliances.

IMPORTANT REMINDERS

ELECTRICAL CONNECTION

Please supply adequate electrical supply to the ovens for optimal performance. There should be strictly no sharing of power supply with other appliances. The electrical connection must be carried out according to the socket plate attached to the back of the appliance by an electrician, who must ensure that the appliance has been connected in compliance with the assembly instructions and local standards.

When the appliance is not connected to the ring main through an adaptor plug, an omnipolar disconnecting device (with a contact opening of 3mm minimum) must be installed on the supply side to comply with safety regulations.

The feeder cable (not supplied) must be

long enough to attached to the oven, to be fitted when placed on the floor in front of the unit.

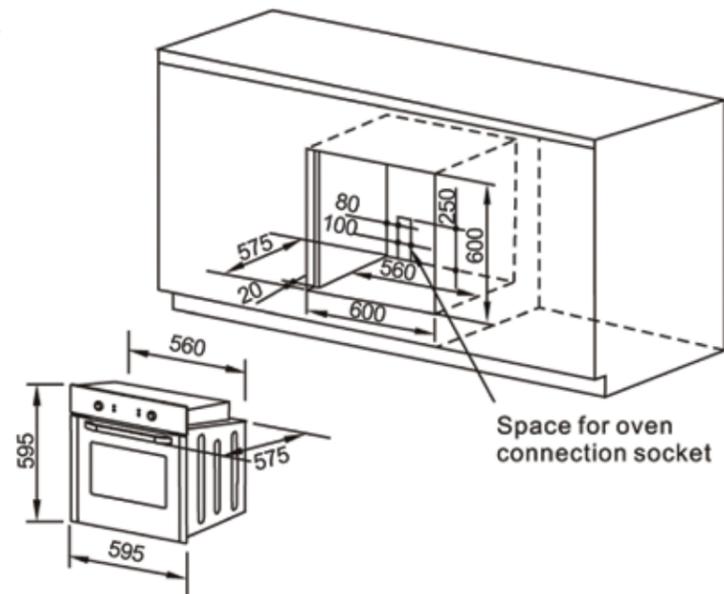

Please provide minimum 15amps power supply for all ovens to prevent electrical tripping.

IMPORTANT NOTICE

Due to humid conditions in Asia, electrical appliances such as ovens may experience condensation on the built-in heating elements. If ovens are not used regularly or have not been used for more than 1 month, we recommend that you preheat the oven at the lowest temperature and progressively increase to desired temperature after every 15 minutes to prevent tripping of electrical circuit.

Important Notes For Installation

INSTALLATION GUIDELINES FOR COMPACT AND STEAM OVENS

Models: MA4343X / MC4442X / MS4341X

INSTALLATION

Please provide sufficient space at the back for connection and airflow outlet.

COMPACT OVEN MA4343X / MC4442X

These appliances may be installed beneath a worktop surface or in a column housing (open or closed) which as the required built-in dimensions.

For optimal operations, air ventilation is necessary and therefore important for the following to be observed:

- The oven can be installed in a kitchen column and under an open or closed counter with the given cut-out dimensions.
- The material of the housing unit must be heat resistant
- For added safety, it is important to fix the oven in the column housing with the screws provided.
- Do NOT switch on the compact oven's electrical supply until it is fully installed in the housing unit

STEAM OVEN MS4341X

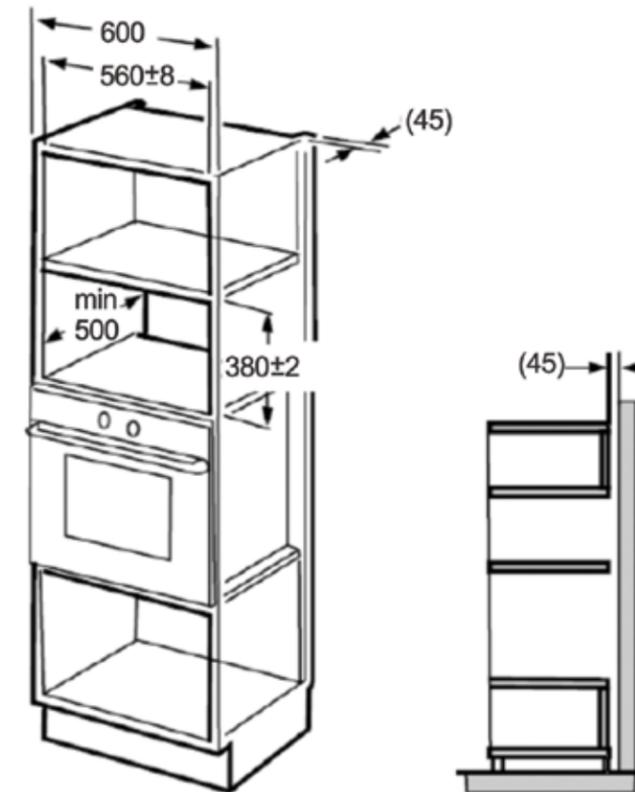

This oven has a high performance airflow system which will provide optimal performance as long as the following are observed:

- Oven may be fitted either underneath a work top or in a suitable sized column unit.
- Cut a hole measuring 50mm x 50mm in the back of the wall of the insert space for the electric cable to cross through
- Centre the oven in the unit, and make sure that it is at least 2mm from any other unit besides it.
- For greater safety, it is important to fix the column housing with screws provided
- Do NOT switch on the steam oven's electrical supply until it is fully installed in the housing unit

*Dimensions are only given as an indication, see models for accurate measures

Important Notes For Installation

A. Built-in furniture

INSTALLATION GUIDELINES FOR MICROWAVE OVEN: MG4281X

INSTALLATION

Please provide sufficient space at the back for connection and airflow outlet.

MICROWAVE OVEN MG4281X

These appliances may be installed beneath a worktop surface or in a

column housing (open or closed) which as the required built-in dimensions. For optimal operations, air ventilation is necessary and therefore important for the following to be observed:

- The oven can be installed in a kitchen column and under an open or closed counter with the given cut-out dimensions.
- The material of the housing unit must be heat resistant

- For added safety, it is important to fix the oven in the column housing with the screws provided.
- Do NOT switch on the microwave oven's electrical supply until it is fully installed in the housing unit

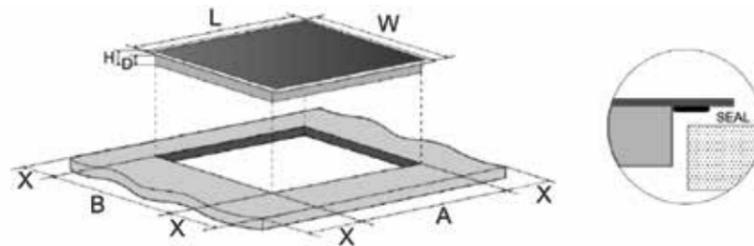

*Dimensions are only given as an indication, see models for accurate measures

Important Notes For Installation

IMPORTANT NOTE:

- Cut out the work surface according to the sizes shown in the drawing.
- For the purpose of installation and use, a minimum of 50mm space shall be preserved around the hole.
- Be sure the thickness of the work surface is at least 30mm. Please select heat-resistant work surface material to avoid larger deformation caused by the heat radiation from the hotplate.
- Under any circumstances, make sure the Induction cooker hob / ceramic cooker hob is well ventilated and the air inlet and outlet are not blocked.
- Note: The safety distance between the hotplate and the cupboard above the hotplate should be at least 760mm.

IMPORTANT NOTE:

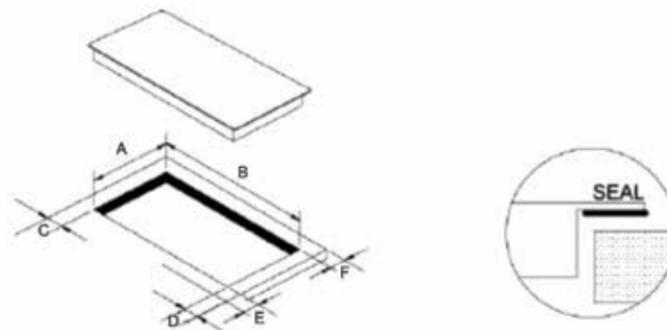

Most hobs malfunctioning issues are related to poor ventilation / wrong installation.

For optimum operation, it is important to provide sufficient air ventilation in cabinetry. The induction hob is fitted with a cooling fan that sucks the air through the rear and discharges it to the front.

It is necessary, during installation, to strictly adhere to the recommendations provided in the user manual.

Minimum distance from hob to back wall is subject to the type of materials for the back splash/ back wall and the size of the cookware, when in doubt, please contact Aftersales Service Department at +62 828-170-88999

German Quality & Design

Webber appliances are conceptualised with German Quality and Design in mind. Our appliances are equipped with state of the art technologies as well as user-friendly features to enhance the user's experiences.

At Webber, we believe that offering you total peace of mind and satisfaction goes beyond offering you a good product. We believe that your experience and relationship with us should begin as soon as you hear about us. We have set up the Webber Gallery for you to experience the full range of Webber appliances; understand the various features and functions and clarify any questions you may have with our Gallery team before you invest in a Webber. After the delivery and installation of your Webber appliances, our Product Specialist will also visit your home to conduct a full product demonstration on the usage and maintenance of our Webber appliances; ensuring that you can fully reap the benefits and features and extend the lifespan of your Webber appliances. Our friendly Customer Care Centre team will also be glad to assist you on any installation or usage issues should the need arise.

Begin your experience with Webber now by visiting us at:

Opening Hours:

Monday & Saturday: 9.00 – 5.00pm
 Tuesday – Friday: 9.00 – 6.00pm
 Sunday & Public Holidays*: 10.00 - 5.00pm
 *Closed on selected public holidays
