Durantcricket

Product catalogue

Welcome...

to Durant Cricket and your guide to our services and products

Durant Cricket manufactures and installs specialist cricket equipment including:

- **Cricket ground equipment**
- **Daktronics LED electronic cricket scoreboards**
- **ECB Approved non turf pitches**
- **Indoor cricket surfaces**
- **Indoor cricket nets**

Our aim is simple...

to supply and install quality products and services to cricket clubs and schools at affordable prices.

Our products have been installed nationwide and our ability to deliver our whole product range gives clubs, schools and organisations one point of contact for all their ground and indoor cricket requirements.

Please feel free to contact us to discuss your requirements in more detail or, if you prefer, we can organise a site visit to discuss your needs in person.

Our products can be found at clubs all over the UK - from grass roots to County level - so please ask to view them at a club near you.

> We design

Specialist cricket equipment for both indoors and out. From bespoke electronic cricket scoreboards to indoor netting systems - we have the know how and experience to make sure your project runs to budget and on time.

> We install

Our team of installers are used to working with our specialist products and can therefore guarantee a quality service. We have a history of on-time, on-spec installations; please contact our sales office to find a site where any of our products have been installed near you.

Our partnerships

Our relationship with some of the biggest names in their particular field has allowed us to offer a broad range of quality products. From scoreboards to non turf pitches, we have a quality solution for all your cricket ground requirements.

Daktronics Official Partner

Durant Cricket is Daktronics' partner in cricket. This means all boards sold in the UK will be either installed or distributed by Durant Cricket. Our reputation for service and quality installations means that clubs can have one point of contact for all their scoreboard requirements.

- Please see pages 10-13 for our broad range of Daktronics products.

Verde Sports Licensed Distributor

Our relationship as a licensed installer and distributor of Verde Sports products means Durant Cricket can install two ECB approved Non Turf Pitch Systems. The 'Premier' and 'Test Match' pitches both have unique playing characteristics and have proved to be two of the most reliable systems on the market.

- Please see pages 16-17 for further information on the two systems.

Bola Distributor

Durant Cricket distributes Bola products to clubs and schools all over the UK. Bola are renowned as the best bowling machine brand on the market.

- Please see pages 22-23 for the full range of Bola products.

Cricket Force

Durant Cricket is a proud supporter of the CricketForce initiative. We will be offering discounts on a range of ground equipment products as well as offering a 20% discount on all Daktronics products.

- Please visit www.ecb.co.uk/development/natwest-cricketforce for further information on how to become a member and take advantage of the benefits available to your club.

PARTS & LABOUR
GUARANTEE

Domed covers are available in the following colours...

Green

Blue

White

Domed covers

Domed shape cricket covers used throughout the country from village to test grounds, please ask to view at a club near you.

- Consists of 3 lightweight units (7.31m x 4m).
- Each unit can easily be manoeuvred by 1 person.
- Chassis consists of 2 mm folded steel with a galvanised finish.
- 25mm tubing is used to create an arch supports system.
- 2 pneumatic fixed wheels and 2 castor wheels - one with a locking mechanism.
- Gutters are 1 piece with water outlets at each end.
- Galvanised finish to guard against rusting.
- Cover tops are made of 610gsm heavyweight material.
- Welded flap to cover the join between the units.
- Supplied in green, white or blue covers.
- Sponsors logos can be incorporated if required.
- 75 metres of tricoflex hose is provided.
- Spare parts and extra hose are available from stock.
- 2 year parts and labour guarantee.

Covers can be used for advertising purposes or to promote sponsors

“Excellent customer service”

Peter Shakeshaft, Ketton CC

See page 14 for our range of non-turf outdoor cricket surfaces

Flat sheet cricket covers

Semi translucent flat sheet cover

Heavy gauge flat sheet cover.

- Quality flat sheet cricket cover made from 530gsm semi translucent material.
- Complete with pulling handles and eyelets.
- Sold by the square metre and made to your exact size requirements.

Semi translucent flat sheet cover

Budget rain flat sheet cover

Light gauge flat sheet cover.

- 25m x 3.66m only.
- 180gsm.
- Green or white in colour.
- Hem reinforcement, eyelets, and pulling handles.

An additional discount on the price of all cricket covers is available for Cricketforce members from Durant Cricket.

“The standard of the product and installation is first class”

Ernest Taylor,
Sheriff Hutton CC,
North Yorkshire

Side sheets and bowlers run up sheets

Side sheets and bowlers run up sheets that can be attached to the mobile covers to increase coverage.

- The package includes 2 x 10m x 3.66m bowlers run up sheets.
- 2 x 25m x 3.66m side sheets.
- Covers are green or white in colour with hem reinforcement, eyelets, pulling handles and weighing 150gsm.
- Supplied with hardware to allow easy fixing, prevents water run off by fitting underneath the gutter.

Sheets come complete with fixing kits for easy attachment to the mobile cover framework

Sight screens

Designed and manufactured with the club game in mind - three sizes of screen and a retractable version are available to cater for every club need.

Latest design incorporates 16" wheels and longer bracing bars to add strength and durability.

Screens are available with either black lattes or a black mesh to accommodate the white ball game. 10 year steel guarantee as standard.

Lattes can be easily removed to guard against vandalism and high winds. Also available in black...

"Thanks for all your help. Excellent service."

Dennis Nicholson,
East Leeds CC

Mesh roller sight screen 4m high x 4m wide

Excellent value for money. Ideal for both school and cricket club use.

- 40mm x 40mm box section frame.
- Heavy duty channel base.
- 3m out riggers.
- 4 x 16" steel centre solid rubber tyres.
- Can incorporate a white or black mesh.
- Driven by a galvanised barrel with gearbox assembly.

4.5m high x 4m wide

- 40mm x 40mm box section frame with a heavy duty channel base.
- 3.2m out riggers.
- 4 x 16" steel centre solid rubber tyres.
- Black lattes available to accommodate the white ball game.
- Lattes can be removed to guard against vandalism and wind damage.

4.5m high x 5m wide

- 40mm x 40mm box section frame with a heavy duty channel base.
- 3.2m out riggers.
- 4 x 16" steel centre solid rubber tyres.
- Black lattes available to accommodate the white ball game.
- Lattes can be removed to guard against vandalism and wind damage.

White vinyl temporary sight screen 2.4m high x 6.4m wide

Ideal for both school and cricket club use.

- 3 sleeves.
- 3 support poles.
- Guy ropes, runners and pegs included.

"We are extremely happy with all the products supplied."

Richard Osmond, Louth CC

Don't forget...

If you're a CricketForce member you can benefit from an additional discount on any sight screens, cricket covers, outdoor cricket cages, electronic scoreboards and replacement netting from Durant Cricket.

Outdoor cricket cages and ball stop netting

2 unique mobile cricket cage designs to cater for every club's budget and needs. 10 year steel guarantee as standard.

6 or 8 wheels and a pulling bar make these mobile cricket cages easy to manoeuvre.

An additional discount on the price of all cricket cages is available for Cricketforce members from Durant Cricket.

10.8m long cages - shown with pulling bars

7.2m long cage - shown without pulling bar

Pro Mobile cricket cage

Quality cricket cage with excellent strength and manoeuvrability.

- Box section cage is designed and manufactured with quality in mind.
- Manufactured from rectangular box section with a hot dip galvanised finish.
- The design includes a pulling bar.
- A pulling bar and 4 or 6 swivel wheels and 2 fixed wheels to allow ease of movement over the outfield.
- One piece black knotted 2.5mm net.

The Pro Mobile Cricket Cage is available in the following sizes:

- 7.2m long x 3m high x 3.66m wide.
- 10.8m long x 3m high x 3.66m wide.

Club Mobile cricket cage

Budget cricket cages ideal for club use.

- Key clamp cage is manufactured and supplied with a sturdy reinforced frame.
- Made from 40mm od x 3.2 galvanised steel.
- One piece black knotted net.
- 6 or 8 wheels allow easy movement over the outfield.

The Key Clamp Cage is available in the following sizes:

- 7.31m long x 2.74m high x 3.65m wide.

Black knotted netting

Replacement cricket netting

Durant Cricket can supply replacement netting for both indoors and out. We can also supply replacement nets for our mobile cages.

Ball stop netting

Due to the amount of lost balls and damage caused by cricket balls being hit into gardens and houses, Durant Cricket has designed three ball stop kits both with unique design features.

High level ball stop kit

High level ball stop kit that can be stored away in the winter.

- One piece steel uprights 7m overall height.
- 75mm box section throughout.
- Complete with 15m haulage rope, pulley and cleat.
- 16z 50mm k-k square mesh black polypropylene netting over edged all round and supplied with rope.
- For use with lightweight surround netting only.
- Maximum distance between posts 10m.
- Not recommended to be used on exposed or windy sites.
- Store horizontally when not in use.

Low level ball stop kit

Low level ball stop kit to avoid ball being lost in hedges and undergrowth.

- 3' high netting.
- Metal hooked support posts.
- 50m with 14 posts.

Mobile ball stop system

A mobile ball stop system that can be made any length. The netting can be lowered after every game if required.

- 6 aluminium masts with pulley system that slots into wheeled base.
- 16z 50mm k-k square mesh black polypropylene netting over edged all round and supplied with rope.
- Bases have telescopic outriders, leveling plates for stability and ground screw anchors for safety.
- Fitted with 360 degree rotational wheels for ease of movement.

Throw down/fielding practice net

20m x 3m netting system ideal for throw downs and fielding practice.

Kit consists of:

- 20m x 3.15m of black 16z heavyweight netting.
- 5 wooden poles.
- Guy ropes and steel pegs.

Electronic cricket scoreboards

Electronic cricket scoreboards

Our exclusive relationship as the official UK partner of Daktronics cricket scoreboards allows us to deliver the complete scoreboard solution.

From advising on the correct product specification through to installation which again will be carried out by our own trained engineers as the official installer and retailer of Daktronics scoreboard products.

CR 2003

Building on the CR 2002 is the CR 2003 scoreboard, which shows more information such as BATSMAN and LASTMAN. This scoreboard is a superior midsize display for both spectators and players.

- Height: 2.06m.
- Width: 3.07m.
- Depth: 15cm.
- Digit Size: 38cm.
- Controlled up to 500m wirelessly.

This scoreboard can be trolley mounted - see details on page 10

CR 2002

The CR 2002 is a great scoreboard for displaying basic information during a cricket match. It is designed for smaller clubs or as an additional cricket scoreboard for larger grounds. This is an affordable option to clearly display the most important information.

- Height: 1.7m.
- Width: 1.7m.
- Depth: 15cm.
- Digit Size: 38cm.
- Controlled up to 500m wirelessly.

This scoreboard can be trolley mounted - see details on right

CR 2002 trolley mounted

CR 2003 trolley mounted

Trolley mounted scoreboards

Trolleys allow the boards to be safely stored to guard against vandalism.

- A range of trolleys are available to allow the cricket scoreboards to be moved at the end of play.
- Use on more than one ground.
- Ideal for school and club use.

CR 2004

The CR 2004 cricket scoreboard has the detail required for county and international cricket. It is operated with a computer and custom designed software making the task of updating the CR 2004 a more efficient process.

The software will provide statistics that may be displayed on a secondary display system.

- Height: 7.01m.
- Width: 5.99m.
- Depth: 20cm.
- Digit Size: 46cm and 38cm.
- Controlled up to 500m wirelessly.

FULL DESIGN & INSTALLATION SERVICE AVAILABLE

Don't forget...

CricketForce members can benefit from an additional discount on any electronic scoreboards from Durant Cricket.

Custom-built cricket scoreboards

Tailor made to suit your requirements

DAKTRONICS SOLUTIONS PARTNER

The Daktronics difference: High quality aluminium and long lasting LED technology

Daktronics is committed to quality at all stages of the manufacture and design process and uses the best materials available...

Improved corrosion resistance

Avoid corrosion with Daktronics' all aluminium construction. When steel ages, it rusts. As aluminium ages, an imperceptible layer forms that contributes to the long-term protection of the scoreboards.

Attractive durable finish

Daktronics cleans and pretreats all of its aluminium products for a long lasting, consistent finish.

Up to 50% lighter

Aluminium is substantially lighter than steel.

Rugged and structurally sound

Designed to withstand severe wind, ice and snow.

Environmentally friendly

Aluminium can be repeatedly recycled without affecting its quality.

LED technology

Light emitting diodes, or LEDs, are tiny, solid-state units that harness a semiconductor chip to convert electric energy into visible light. Daktronics was one of the first major display companies to use LED technology in scoreboards.

Compared to incandescent lighting, LEDs are more robust because there is no fragile filament to break. LEDs save money by consuming less power, operating on less than 10 percent of the power required for incandescent lamps. Plus, LEDs last up to 16 times longer!

The Daktronics scoreboard controller operates wirelessly with a range of up to 500m

We provide a full design and build service and can also supply and install steel framed, wooden clad structures as an alternative to the standard boxed models.

We have carried out numerous installations of all shapes and sizes. Please contact us to view an installation near you.

Freestanding steel frame scoreboards front (left) and back (above)

Middlesbrough CC's old scoreboard

Removal of existing fascia and framework

Construction of new timber framework

Fitting new fascia and components

Our bespoke design, build and installation service includes:

- Free survey and scale drawing of agreed layout.
- Choice of information.
- Made to any size.

The work involves:

- Removal of existing fascia and supporting framework.
- Fitting of new supporting timber framework.
- Fit new fascia using black multi-wall ply board.
- Fit components to agreed drawing.
- Cut scorers hatch if required.
- Supply basic training.

"Middlesbrough Cricket Club would definitely recommend Durant Cricket to other Cricket Clubs that are looking for a first class scoreboard."

Outdoor surfaces

Non turf installations

We have a range of outdoor surfaces suitable for most applications. Our relationship as a Verde Sports licensee allows us to install 2 ECB approved Non Turf Cricket Pitches both with unique playing characteristics. Please contact 01572 757300 to arrange a site survey to discuss your requirements in more detail.

FULL DESIGN & INSTALLATION SERVICE AVAILABLE

“I have been really pleased with the service you have provided and I would definitely recommend your company to other schools and cricket clubs in the area.”

Jamie White,
Madeley Academy

“From planning to completion the project ran smoothly”

Andy Hawkins,
Moddershall CC

Verdepitch Roll Down Surface

The Verdepitch is an outdoor roll down surface that is highly durable and can be taken up in the winter.

- UV stabilised needle punch surface for both indoors and outdoor use.
- Heavy duty, non slip polymer backing.
- Available in metre lengths 2m wide.

Permanent outdoor surfaces

Verde Scanabowl Needle punch cricket surface

Verde Scanabowl is a budget alternative to Superverde with lower wear and spike tolerance. It provides an excellent surface for solid, concrete or macadam, bases particularly when used in conjunction with AP10 Shockpad.

- UV stabilised polypropylene.
- 8mm loop pile height.
- Available in 2m, 2.74m or 4m widths.

Superverde Woven cricket surface

Wilton woven surfaces have been the tried and tested surface for cricket for over 30 years. This surface provides better spike tolerance and is an integral part of the ECB approved 'Test Match' and 'Premier' systems.

- 100% UV stabilised fibrillated polypropylene.
- 8mm pile height.
- High quality woven cricket wicket.
- Available in 2m, 2.74m or 4m widths.

AP10 Shockpad Cricket surface underpad

The AP10 shock pad is the perfect underlay for ball bounce control.

- 100% polyester.
- Flat fully cross linked resin bonded needle punch.
- 4mm thickness.
- Available in 2.5m widths.

Verdegrass 14 Surround carpet

Verdegrass is an ideal hard wearing surface for the surrounds and run ups of practice facilities.

- 14mm long tufted surface.
- Available in 4m widths.

See page 22 for
information on our range
of indoor surfaces

ECB approved non turf pitch systems

As a Verde Sports distributor we can offer 2 ECB approved Non Turf Pitch Systems both with unique playing characteristics...

FULL DESIGN &
INSTALLATION
SERVICE AVAILABLE

'Premier Pitch'

The ECB approved 'Premier Pitch' consists of a combination of factory formed underlays laid over a consolidated hard porous base.

Over the prepared 50mm deep hard porous base the 'Premier Pad' is laid out in the area the ball will bounce during play. The resin bonded fibre part of the pad spreads to load over the base formation, to reduce the differences in compaction that may exist, and the foam above increases the bounce of the ball. AP10 Shockpad is fitted over this to prevent the ball digging into the foam, which could cause a slow loopy bounce, and enhance the angle at which the ball comes off the pitch. The synthetic turf surface covers this to provide the wear layer.

With performance being controlled by man made components, the influence of compaction and the effects of climate change are limited. As a result the Premier pitch provides a very high level of consistency, making it excellent for match and practice use by all age groups and abilities.

Minimal Maintenance

The 'Premier Pitch' requires a comparatively low, in relation to other unbound base systems, level of maintenance in order to keep the facility in top condition. With performance not being wholly dependent on base consolidation pre-season rolling may be all that is required to consolidate any firmness that may have been lost during the winter due to water or frost.

Pace & Bounce

Pitches are easy paced to medium quick with bounce of half stump to stump high.

- Rebound Bounce Parameters 15 - 25%.

The system can also be laid onto a consolidated vegetation free soil area with the following Rebound Bounce Parameters:

- Rebound Bounce Parameters 12 - 23%.

Flexibility

Should ground circumstances change it is comparatively easy and less costly, compared to alternative systems, to relocate the facility and reinstate the old position.

'Test Match Pitch'

The 'Test Match' system is an England and Wales Cricket Board approved system consisting of the tried and tested combination of hard porous aggregate over a consolidated stone base.

To protect the base aggregates the excavation is lined with a porous geo-textile before laying the stone foundation. In the playing area a second geo-textile is included to separate the stone and specially selected hard porous layer. AP10 Shockpad is fitted over the base, to protect the smooth texture of the prepared hard porous base, before the chosen surface is laid and fixed.

This provides a pitch on which the playing characteristics will alter with the climate and the compaction in the base. Rolling consolidates the aggregates, increasing pace and bounce, and watering will soften the base, to achieve the opposite effect. Like grass the pitch will be faster in summer than early spring.

Pace & Bounce

The range is from medium to very fast paced with bounce half stump to above stump high.

- Rebound Bounce Parameters 12 - 25%.

Stump "Boxes"

To allow the use of conventional stumps the stone and hard porous is removed to a depth of 75-100mm. This depth accommodates the point of a standard stump without breaking the lining of the base. Rather than a rigid timber frame the area is lined with geo-textile before being filled with clay soil. This stops the soil mixing with the aggregates without creating a hard edge under the surface.

Low Maintenance

The 'Test Match' system has a combination of features designed to reduce maintenance and improve the longevity of the base. These set it apart from other designs constructed on similar principles and provide the

"ultimate" low maintenance design whilst retaining changeable performance.

The geo-textile lining the base of the excavation prevents erosion and contamination, particularly worm infestation, of the system, and the second layer between the two types of aggregate prevents these from mixing in the crucial playing areas. The AP10 Shockpad protects the hard porous surface from being damaged during use, particularly when the base is wet.

This eliminates the need to roll after use during wet conditions, in order to keep the surface smooth, and reduces the risk of having to remove the surface to attend directly to the hard porous.

Surfaces

In addition to its ECB Approved form, including the Wilton Woven Superverde surface, the 'Test Match' system is also available with the lower cost fibre-bonded Scanabowl surface.

Indoor cricket nets

Our indoor cricket nets are supplied where possible to conform to ECB standards as outlined in document TS3 Sports Halls with cricket provision and TS2 Cricket Specific Indoor Centres.

Multi-bay retractable cricket nets with weighted bottom edges at Sussex CCC

.....
**FULL DESIGN &
INSTALLATION
SERVICE AVAILABLE**
.....

Retractable indoor cricket nets

Single, double, triple and quad bays are available with both a sewn in roof net or fixed roof net with independently retractable wing nets.

- Heavy weight 16z cricket netting supplied in white 50mm mesh.
- Aluminium track way 6m in length, to allow spanning of roof trusses.
- Various support brackets.
- Self lubricating trolleys.
- Additional hardware as required.
- Full user's manual with every installation.
- Batsman's end sight screens.
- Annual cricket nets service agreement available.

Optional extras:

- Weighted bottom edge allows cricket nets to "sit" properly and avoid billowing.
- Lanyard cords as standard to guard against "misshaping" of nets.
- 28z cricket netting at the batsman's end.
- Flame retardant sight screens treated to BS 5867 part 2 type B.
- Auto CAD drawing on request.
- Can be suspended on wires to save costs.

Fixed roof/protection netting

Fixed roof netting can be used on top of a tensioned cage or as part of an independently retractable cricket netting system. Protection netting can be installed to any size or shape to avoid dangerous ball travel.

- Heavy weight 16z cricket netting supplied in white 50mm mesh.
- Secured in sections for ease of maintenance, allowing regular servicing of lights etc.
- Spring tensioned cage.
- Complete with all necessary fixing brackets, hardware and ties.

Tension cricket netting and tensioned cages

Tensioned cage used for indoor cricket. Independent wing nets can be incorporated within the cage to allow cricket games and cricket net practice.

- Various sizes available.
- 50mm diamond mesh.
- Spring tensioned cage.
- Available in green, black or white nets.

Integral door

Indoor cricket surfaces

Roll down and permanent

FULL DESIGN & INSTALLATION SERVICE AVAILABLE

Our cricket surfaces are supplied where possible to conform to ECB standards as outlined in document TS3 Sports Halls With Cricket Provision and TS2 Cricket Specific Indoor Centres.

Roll down indoor surface

We supply roll down indoor cricket surfaces and - for ease of use - we recommend the use of a trolley.

PVC backed

Green needle punch surface for both indoor and outdoor use.

- Available in metre lengths 2m wide.
- 10m length roll is 510mm diameter.
- Weighs 4.6kg per square metre.

Foam backed

Green needle punch surface for both indoor and outdoor use.

- Available in metre lengths 2m wide.
- 10m length roll is 510mm diameter.
- Weighs 3.2kg per square metre.

Mat trolley

- Single or double available.
- Swivel castor wheels for ease of movement.

Indoor cricket surfaces

Permanent indoor surfaces

We supply and install 3 types of indoor cricket surface: tufted, woven or needle punch. All can be installed on to a concrete base incorporating an under pad if required.

Tufted

- 10mm pile height.
- Available in blue or green.
- Advice on layout and floor preparation available.

Woven

- 12mm pile height.
- Available in green.
- Advice on layout and floor preparation available.

Needlepunch

- 12.5mm pile height.
- Available in blue or green.
- Advice on layout and floor preparation available.

Underpad

Bounce modifier

- 5.75mm bounce modifier.
- 2.5m width.

Bola bowling machines

Durant Cricket is an official distributor of Bola products and as such offers the following range of machines to suit all budgets and applications.

Bola Pro Mains operated

Fully enclosed cricket bowling machine.

- Concave profile moulded urethane ball delivery wheels.
- Microprocessor based digital speed control with membrane switch panel.
- Adjustable speed in increments between 15 and 95 mph.
- Spin, swing and pace bowling with 19 spin and swing settings.
- Electronic random variation facility with solid state electronic wheel braking.
- Ball joint complemented by vernier screw adjustment for precision line and length.
- BOLA Power Pack from 230V mains (or 110V if specified).

Also available as:

Bola Pro 12V battery operated machine

Features as above but powered by 12 volt battery.

Bola Club Mains operated

Fully enclosed cricket bowling machine.

- Concave profile moulded urethane ball delivery wheels.
- Microprocessor based digital speed control with membrane switch panel.
- Adjustable speed in increments between 15 and 80 mph.
- Spin, swing and pace bowling with 19 spin and swing settings.
- Ball joint complemented by vernier screw adjustment for precision line and length.
- BOLA Power Pack from 230V mains (or 110V if specified).

Also available as:

Bola Club 12V battery operated machine

Features as above but powered by 12 volt battery.

We're here to help...

If you would like more details on any of the products shown in this catalogue, call us on 01572 757300 or email: enquiries@durantcricket.co.uk

"The products arrived safely and are of an excellent standard."

Shifnal CC

Bola bowling machines

Automatic feeder

An automatic ball feeder to fit all Bola bowling machines.

- Fitted in less than 2 minutes.
- Feeds a ball into the machine every 7 or 11 seconds (as selected).
- Optional remote control on/off switch allows interruption of the sequence when required.
- Warning lights indicate release of ball. The ball feeder offers a unique solo batting practice facility or the option to coach from any position.

Bola stands

Bola stands accept any Bola machine with no modification required. They enable the machine to be easily wheeled around without dismantling and so maximises the time in use. They also address the Health & Safety issues which arise from operating a bowling machine.

Bola stands offer the operator almost complete protection from the ball hit back by the batsman and are a stable standing platform for safe operation.

If there is space to 'park' the machine and stand together this is a drastic saving in set-up time and less potential for the machine to be damaged by mishandling.

Bowling machine balls

- Polyurethane practice balls in red or yellow with soft case to protect bats from damage.
- Dimpled like a golf ball for stable flight
- These give the best accuracy and realistic bounce.
- Yellow balls for better visibility indoors.
- Red for realism.
- Available in packs of 12 only.

Orange 3oz practice balls

- The composition of the Hi-Viz ball has been specially developed to make the ball a little firmer and give extra bounce.
- The ball is most accurate in use and holds its shape better to make the bounce more realistic.
- Available in packs of 12.

12V Battery

A 12 volt leisure battery for use with all Bola machines.

- Fitted with a carrying handle for portability.
- Designed to be run flat and recharged as necessary (unlike automotive batteries).
- Give between 2 and 6 hours between recharges.
- Charge from 12 volt car charger or Bola Power Pack.
