iPhone 4S

16GB 32GB 64GB

iPhone 4

8GB 16GB 32GB

iPhone 3GS

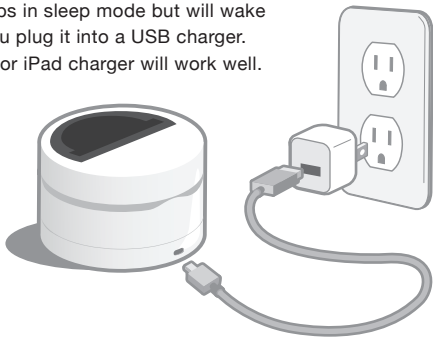

8GB 16GB 32GB

Using Galileo

1. Download the MOTRR App from the App Store.

- 2.** Galileo ships in sleep mode but will wake up after you plug it into a USB charger. An iPhone or iPad charger will work well.

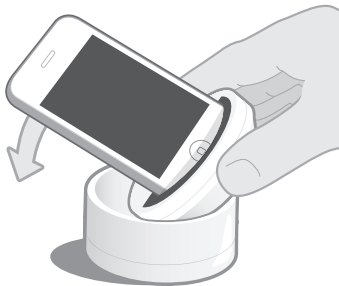

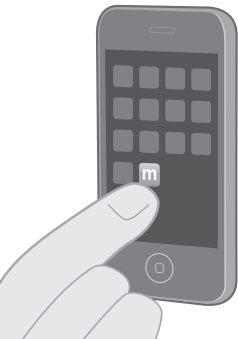

3. Attach your iPhone 4S or iPhone 4.

4. For iPhone 3GS, or iPod touch (4th generation), swap out the rubber insert and replace it with the one that fits your device.

- 5.** Launch the MOTRR app to get started.

- 6.** Manually adjust Galileo to either landscape or portrait position.

7. Rotate the base to check the battery level. You can also view the battery level in the MOTRRR app when connected to Galileo.

- 8.** Hold Galileo's upper ring when removing your device to protect the hinge.

Battery Warning

- Lithium Polymer batteries are extremely hazardous and liable to cause serious injuries to persons or property. The user accepts liability for the use of a Lithium Polymer battery. As the manufacturer and the distributor cannot ensure the battery is used correctly (charging, discharging, storage, etc.), they cannot be held liable for damages caused to persons or property.
- In the event of battery leakage, avoid the liquid coming into contact with skin and eyes. In case of contact with the skin, wash copiously with soap and water. In case of contact with the eyes, rinse copiously with cold water and consult a doctor. If you notice a suspicious smell or noise or observe smoke around the charger, disconnect it immediately.
- Non-compliance with the instructions below could result in fire, shock, or electric explosion.

“Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod or iPhone and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance.
