 - Activating the application with Windows compatible mode
 - Simplified user switch-over
 - Remote desktop
 - Large fonts (Detail settings of screen property)
 - DPI setting other than that of the normal size (Detail settings of screen property)
- In Windows® 7 and Windows Vista®, log in as a user having User authority or higher.
- The following functions cannot be used when the computer is running under Windows® 7.
 - Windows XP Mode
 - Windows Touch

Installation

Install C Controller Interface Module Utility to a personal computer.

Confirm before installation

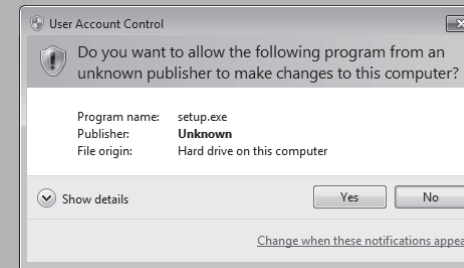

- Log on to a personal computer as a user having an attribute of "Administrator" (Computer administration).
- Terminate all the applications running under Windows® Operating System before installation.
- Install this product before connecting a personal computer and a USB interface.
- When using antivirus or security software, the warning appears and you may not be able to install. Deactivate temporarily antivirus or security software before installation.

- Insert the CD-ROM to the CD-ROM drive. Double-click "Setup.exe" (Otherwise, it is displayed as "setup".) in the CD-ROM.
- Following the instructions on the screen, select or enter the necessary information.

Precautions

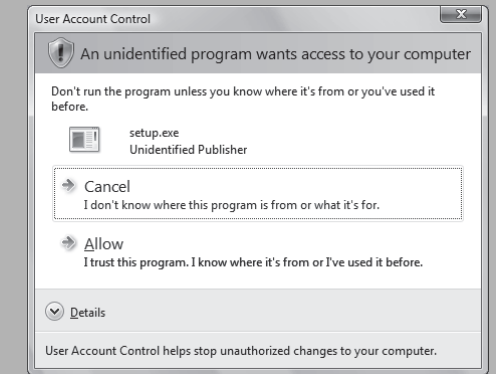

- When using Windows® 7/Windows Vista®, the User Account Control screen appears if user account control is enabled. Click "Yes" or "Allow".

When using Windows® 7

- Select "Yes".

When using Windows Vista®

- Select "Allow".

- If the following messages are displayed several times before completing the installation of this product, the USB device driver must be installed.

When using Windows® 7/Windows Vista®

- Select "Install" and install the device driver.

When using Windows® XP

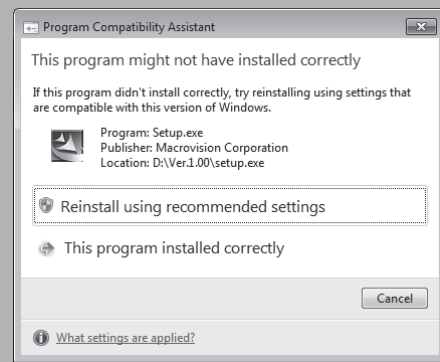

- Select "Continue Anyway" and install the device driver.

Continue to the Backside

- If an overwrite install has been done to upgrade the version of C Controller Interface Module Utility when using Windows® 7/Windows Vista®, the following message may be displayed. In this case, select "This program installed correctly".

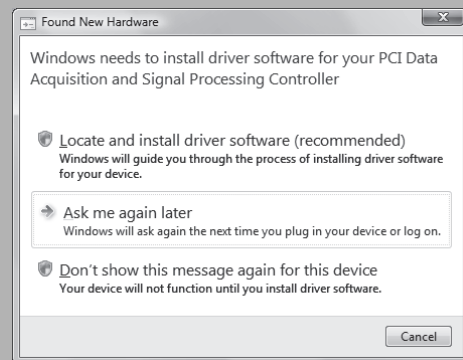

When using Windows® 7/Windows Vista®

1. Select "This program installed correctly".

- The "Found New Hardware Wizard" may temporarily appear during the installation. This occurs for requesting a device registration to Windows®, and this screen will disappear automatically after the completion of the registration processing of Windows®. At this time, never execute any operation with the "Found New Hardware Wizard".
- When using Windows Vista® /Windows® XP, the "Found New Hardware Wizard" may appear, if the Q173SCCF and personal computer (connected using a USB connection) are turned on without installing C Controller Interface Module Utility. In this case, select "Cancel".

When using Windows Vista®

1. Select "Cancel".

When using Windows® XP

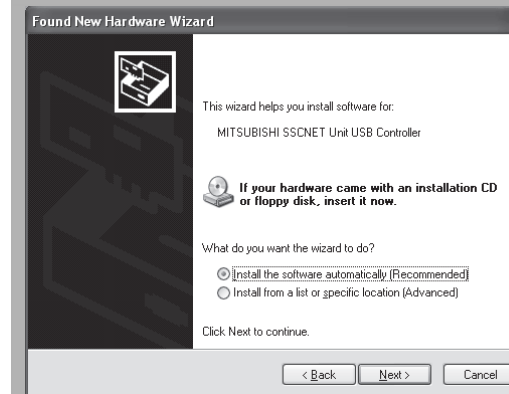

1. Select "Cancel".

Installing the USB device driver

When using Windows® XP, in order to connect with a Q173SCCF via USB interface, the USB device driver needs to be installed. When using Windows® 7/Windows Vista® the USB device driver is automatically installed.

When using Windows® XP

1. The "Found New Hardware Wizard" appears when the Q173SCCF and personal computer are connected using a USB connection for the first time only. The same screen appears when the USB port to be connected is changed.
2. The "Welcome to the Found New Hardware Wizard" dialog may appear. In this case, select "No, not this time".
3. The "This wizard helps you install software for." dialog screen appears. Select "Install the software automatically [Recommended]".
4. The dialog of Windows Logo Test appears. The installing of the USB device driver completes by clicking "Continue Anyway".

Uninstallation

Uninstall C Controller Interface Module Utility from a personal computer.

1. Execute the C Controller Interface Module Utility uninstallation from the control panel of Windows®.
