# 1. Phone's design – the introduction

## *View of the phone and its keys and functions*

1. microUSB port (under the rubber plug).
2. LED.
3. Speaker.
4. Display.
5. The navigation buttons "up", "down", "right", "left" and button "OK"
6. Button <green phone>.
7. Button <red phone >.
8. Keypad.
9. LED diode.
10. Camera.
11. Back speaker (buzzer).
12. Battery cover.

## ***Turning on/off the device***

turn on or turn off your phone, press and hold **<red phone>**.

If the phone is turned on soon after you will be asked for entering a PIN code (you'll see it in the form of stars: \*\*\*\*) and then press **<OK>**.

## ***Installation of SIM card, memory card and the battery***

Turn off the phone, remove the back cover (by unscrewing two screws with the usage of special metal tool which you can find in the box).

Insert the SIM card - SIM card must be placed with its gold contacts facing down in the way in which the recess is stamped.

Insert a memory card. MicroSD memory card should be placed with its gold contacts facing down in the way in which the recess is stamped. The maximum supported capacity of the memory card is 8 GB.

Insert the battery - the battery should be placed in such a way that its gold

contacts will touch the connector in the phone.

Tap the battery cover (pressing it into proper place and tighten the screws).

### ***Battery charging***

Using the nail, pry the rubber cap at the side of the phone to reveal the telephone connector. Connect the microUSB-B cable to the microUSB connector in your phone and then connect the USB-A connector to the adapter and to the low-voltage outlet.

During charging, static battery icon  will be animated which is located in the top of the right corner of the screen.

## 2. Using the basic functions

### *Locking the phone's keypad*

To unlock the phone (when the screen is blank) press any key to turn on the screen then press the left button "Unlock" (located at the left corner at the bottom of the screen) and then the button **<\*>** on the phone's keypad. Keypad will be unlocked.

### *Access to the menu*

To gain the access to the phone's menu press the middle button **<OK>** or **<Menu>** on the desktop of the phone.

Using the navigation keys **<up>**, **<down>**, **<left>** or **<right>** go to the appropriate menu item.

Press the button <OK> to confirm (enter the menu item) or <Back> to return to the previous menu screen / desktop.

## ***Customizing your telephone***

The phone myPhone HAMMER 2+ can be customized to your needs. As a result, the usage will be more pleasant and easier.

### *Turning on/off the „silent” mode*

To turn off the sounds in a standby mode, use the key <#>. Press this button and hold for about three seconds till the message will appear: „Silent mode turn on”. Pressing and holding the key once again <#> will cause the return to the previous sound profile (the profile before muting sounds).

## *Sounds and user profiles*

To set the phone's volume choose **[User profiles]** which is located in **[Menu]→[Settings]→[Profiles]**.

## *Functions regarding calls*

### *Making phone calls*

In standby mode of the phone (on the main screen) enter the number using the keypad.

It is recommended to enter the dial code prior to the number of the phone.

Press the button **<green phone>** to make a phone call.

Press the button **<red phone>** to end the phone call.

### *Receiving a phone call*

During an incoming call press **<green**

**phone>** or **[Receive]** to answer the incoming call.

Press the button **<red phone>** to reject/end the call.

## ***Text messages***

### ***Sending the message***

Choose: **[Menu]** → **[Messages]** → **[Create the message]** → **[SMS]**.

Enter your message using the keypad. The characters are entered letter by letter.

The button **<#>** is used to change the input method. The choices are the following ones:

- PL – there will be introduced only capital letters,
- pl – there will be introduced only

lowercases,

- PI – the first inserted letter will be capitalized and the rest lowercase,
- 123 – there will be introduced only numbers.
- To enter the special character for example: period, comma, dash, etc. press **<\*>** and choose a symbol from the list or press the button **<1>** in appropriate number of times (in a mode other than "123").
- To enter a space between words press the button **<0>**.
- The example of entering the characters:
- *To enter the letter „b” please press the button **<2>** three times. To enter the letter „d” please Press the button **<3>** etc.*

Once you have entered the message press **[Options]** then choose the option **[Send]**.

It will appear the selection list:

- **[Enter the number]** – enter the number using the keypad then press **<OK>**.
- **[Add from the phonebook]** – when you select this option then enter the first few letters of the contact's name to search for it in the phonebook.

Select **<OK>** to confirm the choice. After entering the phone number / chosen contact please select: **[Options]** → **[Send]** to send a message.

### *Displaying the messages*

Select: **[Menu]** → **[Messages]** → **[Inbox]** select the message from the list and then choose **[Options]** → **[View]** → **<Select>**

to read its contents.

## ***Phone contacts in myPhone HAMMER***

### **2+**

#### *Adding new contact*

To add new contact please choose:  
**[Menu] → [People] → [New contact] → <OK> → [to SIM1] or [to SIM2], [On the phone]) → <OK>.**

Enter the contact information by selecting the name or number by the cursor and and then press **<OK>**. After entering the phone number / name press **<OK>**. Select: **[Options] → [Save]** to save the contact. If you want to save a phone contact, apart from the name and phone number, you can add a personal ringing tone.

To move contacts between the SIM card and the phone memory select:  
**[Menu] → [Contacts] → [Options] → [Contacts settings] → [Move contacts] → [From phone] or [from SIM1]**), then choose **[to SIM1], [to SIM2] or [to phone]** and confirm **<OK>**

### *Searching for a contact*

To search a proper contact please select:  
**[Menu] → [Contacts]**.

Type the first letter of the name.

The screen displays a list of contacts beginning with the letter specified.

To find another contact just use the navigation keys **<up>** and **<down>**.

## **3. Using the advanced features**

### ***Connecting with the contact from the phonebook***

To connect with the number from the submenu **[People]** (the phonebook), following steps have to be done:

In a standby mode select **[Menu]**.

Choose submenu **[People]** and then confirm using the button **<OK>**.

In the list of contacts search for the proper contact (by entering a contact name via the keypad) and then make a call by pressing **<green phone>** on the keypad.

### ***Missed calls***

Missed calls are displayed on the phone's screen.

The message on the display informs about the missed call and the icon:  .

To check who has called:

Press **[View]**.

## ***Connecting your phone to the computer***

myPhone Hammer 2+ can be connected to a PC via USB interface. This allows you to preview and exchange the data between your computer and your phone. To do this:

- 1) Connect the microUSB connector to your phone (located on the left side of the phone) then plug USB-A to USB connector of your computer.
- 2) On the phone's screen should appear the information about USB connectivity.
- 3) You should select from the list the following option **[mass-storage device]**.
- 4) The phone is connected to your

computer. The contents of the memory can be viewed using Windows Explorer.

## 4. Remaining functions of the phone

- **[Recently opened]** – displays a history of recently viewed websites,

- **[Settings]** – the ability to configure options such as the homepage, profile, active account data browser options, etc.

## *Using the email*

To use an e-mail firstly you should configure your mail. To do so, please enter it into the **[Menu]** → **[E-mail]** and the configuration will start. Firstly, provide the address then press **[Options]** → **[Next]**. Next select the protocol (POP2 or IMAP) and press **[Options]** → **[Next]**. If you do not want to change the account (the default setting: Auto you should press again **[Options]** → **[Next]**). Set up the receiving server address and press **[Options]** → **[Next]**. We do the same with the transmitting server. Enter your user name, password, profile name, and finally **[Options]** → **[Done]**. After creating

the account **[Options]** → **[Edit]** → **[Advanced settings]**. We complement server settings. Once the servers are configured correctly we go back to the option E-mail and we can pick up the mail.

## **5. General rules of proper phone maintenance**

### ***Information about the certification (SAR)***

Mobile phone is both transmitter and receiver of radio wave.

The phone was designed and produced according to security norms in order to provide the energy of radio waves to exceed the limits set by the Council of the European Union.

Those limits describe allowed level of the influence of the radio waves on whole population and they were created by the independent scientific organisation on the basis of the results of detailed scientific researches together with the consideration of a large security margin. The objective is to provide secured safety for all people regardless of age and health condition.

With reference to the mobile phone, the level of the exposure to radio waves activity is measured by SAR value (**Specific Absorption Rate**). The limit of SAR coefficient that is enjoined by the Council of the European Union is equal to **2W/kg** and refers to the average value on **10 grams** of tissue. The highest value of SAR coefficient for the phone of **myPhone Hammer 2+** is equal to **0,562 W/kg**.

## ***Declaration of conformity with European Union Directives***

Hereby, myPhone Sp.o.o declares that this product complies with the essential requirements and the other provisions of European Directive 1999/5 / EC.
