INTRODUCTION

Thank you for purchasing VSPV922W which has the unique, ultra-small and delicate design. It can be used in many recording situations. VSPV922W rings more convenience, safety and fun to your daily life.

Approval Information:

All our products meet the requirements of approval FCC or CE, and are granted the FCC or CE certification. They are authorized to bear FCC or CE mark.

FCC:

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

CE:

This product complies with standards including Low Voltage Device Directive 73/23/EEC; EMC Directive 89/336/EEC and R&TTE Directive 1999/5/EC. It passed the subject tests by the authority concerned and is authorized to bear CE mark.

OVERVIEW

Along with the improvement of people's living standard and the development of picture compression and memory technology, the digital video memory has been a part of our daily life. VSPV922W a high-tech product, just meets a plenty of needs of people and market. It possesses a series of advanced functions including digital photography, voice memory, sound trigger recording, high speed USB data transferring and USB charging.

EU Environmental Protection

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

WARNING

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

Attention

The electromagnetic fields at the specific frequencies may influence the picture of the recorder. Be sure to read the following before using the recorder and the mini camera.

The requirements of receiving wireless signal:

The frequency of wireless signal transmit by this product is 2.4GHz FM, maybe interfere by other electronics, such as high-voltage, signal transmitting beacon, wireless remote control and wireless alarm. Please keep away from them as possible. And please try other channel if signal in monitor status is not well.

Trial recording

Before you record one-time events, you may want to make a trial recording to make sure that the recorder and the camera are working correctly.

Notes on image data compatibility

Playback of moving images recorded with your recorder on other equipment and playback of moving images recorded or edited with other equipment on your recorded are not guaranteed.

Do not shake or strike the recorder

In addition to malfunctions and inability to record moving images, this may render the SD card unusable of image data breakdown, damage or loss may occur.

LCD screen and mini camera

Be careful when placing the camera near a window or outdoors. Exposing the LCD screen or the lens of camera to direct sunlight for long period may cause malfunctions.

Back up recommendation

To avoid the potential risk of data loss always copy data to a disk.

Protect your hearing.

Listen by high volume earphone will damage your listening, we suggest you use a suitable volume during listening.

*Overview

Main Device

- 1.Function knob
- 2.Video Input
- 3.AV Output/Earphone jack
- 4.Power switch/Delete/Capture
- 5. LED light
- 6. Speaker
- 7. Channel switch
- 8.TFT LCD

- 9. Select /Back
- 10.Play/Record/Confirm
- 11.UP
- 12.USB jack
- 13.Micro-SD slot
- 14.Down
- 15.Volume
- 16.Microphone

Back side:

1, Toggle switch: use to change between 6.0 and 6.5 audio system.

2. Remote control match button: use to match new remote control's frequency, the match button and start recording button on remote control should be pressed on the same time during matching.

Remote control

-  Start recording
-  Stop recording

Notice:

- 1, When you use remote control to record, press the start recording button will power on the DVR and start to record video, but LCD is still in turn off mode.
- 2, Press stop recording button will stop recording and power off DVR main set.
- 3, During remote control mode, the all buttons on DVR main set are unavailable to operate. After you stop recording and power off DVR by remote control, the buttons on DVR will be available to operate.
- 4, The working range of remote control is 10 meters under unblock situation.

BASIC OPERATION

Power Charger:

Please charge the battery before first using.

1. Connect charger's USB pins into VSPV922W's multifunctional USB port.
2. Connect the charger with standard AC power socket.
3. When the battery is full charged, ( icon on LCD will not flash any more), you can pull out the charger from power socket.

LED lights:

- 1, During VSPV922W is in charging mode, the red LED light will be always turn on.
- 2, After VSPV922W full charged, red LED light will be turn off and blue light start turn on.

Notice:

If you want to charge power when the DVR is recording, it only can works with wireless camera.

Otherwise, the wire camera has no enough power, may cause bad recording effect.

Install the battery:

Pull down the cover according the picture shows below, open the battery back cover.

Shown as Fig below:

The 4 golden female pins of the battery should be full touched with the male pins in the battery house.

Close the cover after install the battery well.

Battery using time information form:

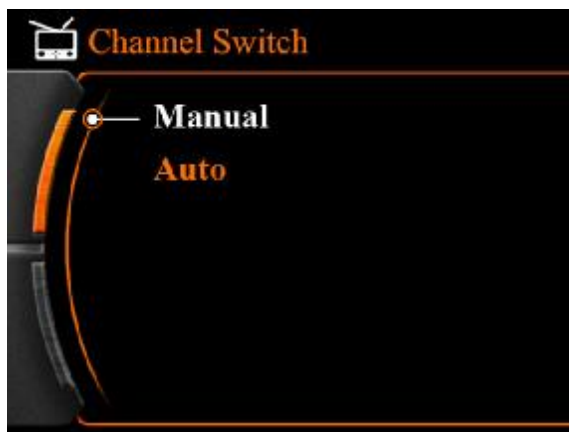

Capability	Charging time	Standby time	Playing time	Recording time
1300mAh	Approx : 4 hours	Approx : 2 hours and 19 minutes	Approx : 4 hours	Approx one hour and 43 minutes

Connect With the Camera:

Picture 1: Wireless camera receiving

1. Install the camera to the location you want to monitor, choose the suitable channel, and then connect with the power source.
2. Switch the Function knob on main set to wireless receiving mode, press channel change button to receive signal which sent from wireless camera.
