

Digital T- Shirt Printer (HD-08FZ)

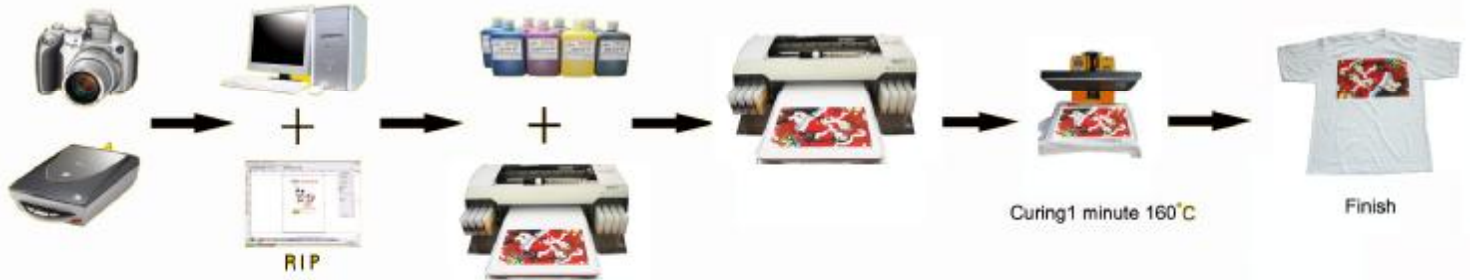

The revolutionary alternative to thermal transfer and expensive screen printing.

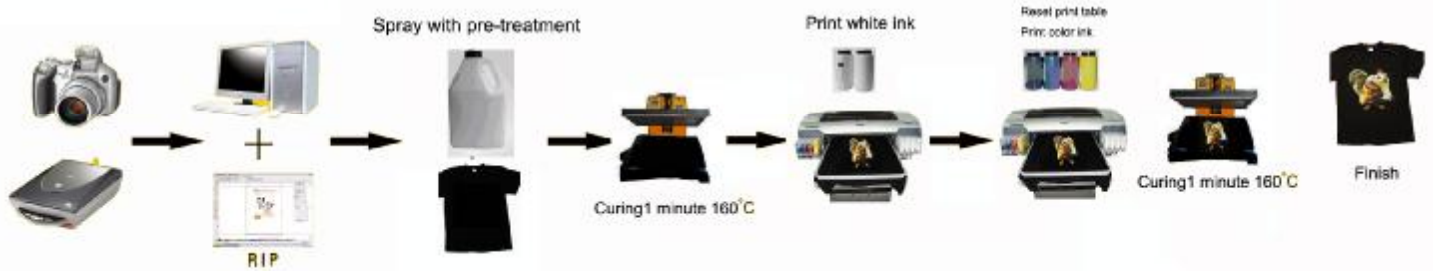

Honde digital T-Shirt printer is capable of printing on black, red, white and any color T-Shirts, color-printing without silk screen and printing plate. It can accomplish printing white, gradient color picture at once. Water durability reaches to 3-4 degree, no color fading and comfortable handle. It accords with the international universal standard and uses green environmental protective inks which completely reach to the highest European quality inspection standard.

Process of Direct to light T-shirt/Fabric

Process of Direct to Dark T-shirt/Fabric

Features:

- | Capable of printing on any dark and white color of T- shirts,include cotton \geq 30%.
- | Printing size: 420mm X 600mm (16.5"*23.6")
