Welcome to the DealBook[®] for iPad[®] User Manual

In this manual, you'll find instructions on how to use the features and tools in DealBook[®] for iPad[®].

If you're a beginner, you can walk step-by-step through how to use the DealBook[®] for iPad[®] features.

If you've been trading for a while and are familiar with the iPad[®], you can view the DealBook[®] for iPad[®] Quick Start section at the beginning of this guide. When you need more information, you can use the table of contents to quickly reference how to use a specific section or tool.

Before You Use DealBook[®] for iPad[®]...

You should have a basic understanding of the markets. If you are new to trading, GFT offers a variety of free resources to help you learn about a particular instrument and how you can reach your personal trading goals. Visit GFT's website to find out more.

You should also be familiar with using apps on an Apple iPad[®]. While the controls on the screens change depending on the task that you're performing, you'll use a number of touches and finger movements on the iPad[®] screen to place trades and monitor your orders.

Tap – The quick touch of a finger against the iPad[®] screen. You'll use tap to select buttons and options from drop-down menus. You may also use tap and drag with some of the drawing tools.

Swipe – The quick brush of a finger in one direction across the screen. The screen moves in the direction of the swipe.

Pinch – A gesture where you touch the screen with two fingers and move them together or apart. Decrease the distance between your two fingers to pinch in. Increase the distance between your two fingers to pinch out.

Keyboard – The onscreen keyboard appears automatically whenever you tap in a text field.

Tips for Using This Manual

As you browse these sections, you'll notice that GFT uses the following notes to emphasise important information about DealBook[®] for iPad[®].

Describes information on a tool or feature in DealBook[®] for iPad[®]. When you see this symbol, it provides a larger context for information and procedures.

Provides hints, tricks, and shortcuts that may help you as you place and monitor trades in DealBook[®] for iPad[®].

Alerts you of critical information that you need to know while you perform a particular procedure.

DealBook® for iPad® Quick Start

The DealBook® for iPad® workspace is the where you can access the tools that you need to help you trade.

- A. The Quoteboard appears on the left in Landscape orientation. If you're viewing in Portrait orientation, tap **Quotes** to view the Quoteboard. Each instrument appears on a ticket, where you can view pricing and market direction or place an order.
- B. The Details section contains four different views. Swipe to the left or right to move between them.
 - **Account Activity** displays information about your positions, orders, and alarms. Tap the buttons at the top of the section to display your open positions, working orders, filled orders, or alarms.

If you tap Open Positions in this view and then tap a position, you can see these

Close @ Market

Protect with Limit

Protect with Stop

View Chart

Symbol	B/S	Size	Traded Price	Last Price
126084 test (USD)				
EUR/USD.fx	BUY	100,000	1.35940	1.35435
GBP/JPY.fx	BUY	300,000	120.090	119.187

menu options:

- **Close @ Mkt.** closes the position at the current market price.

- **Reverse Position** closes a position and opens a new order in the opposite direction.
- **Protect with...** opens the New Order window. The order type is already set, so you can enter the prices and size for your orders.
- **View Chart** displays information about the instrument in the Chart section.

Stops and limits are working orders; you can view them in the Working Orders view. Tap an order to view menu options for cancelling or modifying your working orders.

AUD/USD.fx	BUY	100,000	1.23782	STP	WORKING	GTC

- **Quote Details** is similar to the Quoteboard; it displays more information on the selected instrument. You can place an order, change your order size, view price details, and compare charts over multiple timeframes.
 - **Today's News** displays the latest headlines from various news providers. Tap on a headline to view the story.
- C. The Chart section plots the real-time prices of an instrument over a particular period of time. You can pan through the chart by swiping in the chart area. You can pinch in to zoom out and pinch out to zoom in.
- a. Tap the **Time Frame** buttons at the bottom of the chart to change the time frame.
 - b. Tap the **Symbol** menu and select a new instrument.
 - c. Tap **Chart Type** and select **Line**, **Candle**, or **Bar**.
 - d. Add and manage indicators on the chart by tapping **Indicators**. This displays the Indicators menu.
 - e. Additional toolbar tools include:
 -  displays the Drawing Mode toolbar. You can use the tools in this to add drawing objects to the chart.
 -  opens a tool for creating a new price alarm.
 -  displays the settings for the chart.
 -  launches an expanded version of the Chart section that fills the entire iPad® screen.
- D. Tap **New Order** to open the New Order window and place a trade.
- E. Tap **Account** to display your real-time account information.
- F. Tap  to display GFT's contact information and tools to manage your account or send feedback on the app.

Section 1: Exploring DealBook® for iPad®

Once logged in, you'll see the DealBook® for iPad® workspace. This was designed to help you monitor the market and place trades efficiently. In this section, you'll learn about the different windows in DealBook® for iPad® and how you can use them to trade.

Logging into DealBook® for iPad®

Once you download the application to your iPad®, you tap the GFT icon to open the app. This opens the app and the login window.

To login, enter your login and password. If you're using:

- A practice account, choose **Demo**.
- A live account, choose **Live**.

GFT sends login and password information by email when you open an account. If you don't have an account, you can tap **Sign Up**. This will take you to the Account Opening pages on the GFT website.

DealBook® for iPad® will lock you out if you enter an incorrect password 10 times.

Save Password? allows to save your login and password information. Because of the nature of the Apple iPad®, GFT does not recommend that you turn this switch to **On**. If you do, a warning window will appear, informing you that there is a risk of unauthorised access to your account.

Viewing the DealBook® for iPad® Workspace

The DealBook® for iPad® workspace is similar to other DealBook® platforms. This is the where you can view quoteboards, charts, and other tools to help you trade.

If you are not logged in, a banner will appear at the bottom of the window. You can hide this banner by clicking . To remove the banner, login to your live or demo account or sign up for an account by tapping **Log In** or **Open an Account**.

Viewing the Quoteboard

The Quoteboard appears on the left side of the screen. Each instrument appears on a ticket, which displays pricing information and indicates market direction.

Symbol	Sell	Buy
GBP/USD.fx ▼ -0.00534	1.5589 ₁	1.5591 ₇
EUR/USD.fx ▼ -0.00956	1.2956 ₈	1.2958 ₄
.BRENT.cfd ▼ -32	11168	11175
.GOLD.cfd ▼ -10.1	1595.4	1595.9

The Quoteboard appears on the left of the screen if you view DealBook® for iPad® in the Landscape orientation. If you're viewing DealBook® for iPad® in Portrait orientation, you need to tap **Quotes** at the top of the screen to view the Quoteboard. The Quoteboard appears over the other sections of DealBook® for iPad®. To close the Quoteboard in Portrait orientation, tap outside the Quoteboard.

DealBook® for iPad® in Portrait orientation

Same orientation with Quoteboard displayed

You can view three different views of the Quoteboard. Tap the icon in the upper-left corner to switch between the views. This displays a different icon depending on the Quoteboard view.

List View displays a series of tickets. Each one shows the symbol and the current ask (buy) and bid (sell) prices. Tap the button in the **Sell** or **Buy** column to open the New Order window and place an order. You can also view the difference between the latest and the last

Symbol	Sell	Buy
.BRENT.cfd ▼ -32	11168	11175

market moves and the market direction.

Chart View shows the same information in the ticket as the List View, but also includes a small thumbnail chart. Change the timeframe for all instruments in the Quoteboard by tapping the triangle next to the selected time frame and tapping a new time.

Grid View also displays the symbol and the current ask and bid prices in the ticket. If you click the **Order Size** button, you can access a number pad and select a different size for your order. Unlike the other views, tapping **Sell** or **Buy** places a quick market order.

When you tap the symbol or the mini chart in the Chart View, additional information about the instrument appears in the Quote Details section.

If you are viewing the app in preview or demo mode, the quotes can be delayed. You can view the quotes in real-time when you log into your live account.

The Quoteboard displays file extensions after the symbol so you can verify which kind of market you are trading. For example, the .fx indicates that you are making a forex trade.

Currency pairs in the Quoteboard will have an additional, smaller decimal after the pip. This is called the fractional pip and it represents tenths of a pip.

You can modify which instruments appear in the Quote Board; see [Adding Instruments in the Quote Board](#) for more information.

Viewing the Details Section

The Details section contains four different views. Swipe the section to move back and forth.

The **Account Activity** view displays information about your positions, orders, and alarms. Tap the buttons at the top of the section to display your open positions, working orders, filled orders, or your alarms.

Symbol	B/S	Size	Traded Price	Last Price	Margin	Floating P/L
2267160 (USD)						
AA.N.cfd	BUY	1	10.08	9.23	0.92	-0.85
AA.N.cfd	BUY	120	9.71	9.23	110.76	-57.60
EUR/USD.fx	SELL	100,000	1.3059s	1.2959s	1,295.89	+995.90
2697642 (USD)						
EUR/CHF.fx	SELL	1	0.0037s	0.0038s	10.88	-0.50

The **Quote Details** is similar to the Grid View of the Quoteboard. This displays information about a specific instrument and you can place an order, change the size of your order, view details about the price, and compare charts over multiple timeframes.

You can change the time frames by tapping the timeframe button and selecting from the menu.

The information in this section updates when you tap the symbol in the Quoteboard or the chart thumbnail in the Chart View. You can also change the instrument displayed in the section by tapping the **Symbol** drop-down menu.

If you want to expand the view of the Details section, click . This expands the section and hides the chart below it. You can collapse the window by clicking .

The **Today's News** section displays the latest headlines from news feed providers. Tap on a headline and you can view the story.

You can also access several other tools in the application title bar.

Tap **New Order** to open the New Order window and place a trade. See [Placing a Market Order from the New Order Window](#).

Tap **Account** to display the **Account** drop-down menu. See [Displaying Account Information](#) to learn more.

Tap  to display GFT's contact information. You can also access information about your account or send feedback on DealBook® for iPad®.

Viewing the Chart

The Chart section plots the real-time prices of an instrument on a graph and provides a snapshot of market movements over a particular period of time.

You can zoom by pinching the chart: pinch in to zoom out and pinch out to zoom in.

You can also display a full screen version of the chart. For more information, see [Section 3: Using the Charting Tools](#).

Displaying Account Information

You can view your account balance and other information by tapping **Account**. This displays real-time account information in the drop-down menu.

3573892	
Cash (USD)	69,557.37
Available Equity	30,564.84
Total Equity	62,322.08
Margin Requirement	31,757.24
Margin %	196%
Unrealized P/L	2,876.28
Floating P/L	-10,111.58
Deposit Funds	

If you have more than one account, you can tap the > next to the account that you want to view its status.

Cash – The current value of your account. This appears in the base currency of your account and includes all deposits, withdrawals and settled profits and losses.

Available Equity - The amount of money that you have available to trade. DealBook® for iPad® calculates this as your Total Equity minus the Margin Requirement on your current open positions.

Total Equity - The gross total of your account, including unrealised profit/loss and floating P/L.

Margin Req. – The amount of money required for maintaining the current open positions. DealBook® for iPad® calculates margin as $\text{Margin} = \text{Volume} * \text{Last Price} * \text{Account Margin Setting}$.

Unrealised P/L (Profit/Loss) – The total value of unsettled profits and losses. When a position is closed in a net-based account and you are trading an instrument with a settlement date, it takes two days for your profits or losses to be added to your cash balance. In the meantime, the values remain in your unrealised P/L.

Floating P/L – The potential profit or loss you would make if your active positions were closed at the current market price.

If you have more than one account, you can make the account that's currently selected the default account by tapping **Make Default Account**.

If you need to add money to your account, you can tap **Deposit Funds**. This opens the Deposit page on the GFT website.

Section 2: Opening and Managing Your Trades

Now that you're familiar with the DealBook® for iPad® interface, we'll look at the tools that you'll use to place and monitor your trades. This section describes the various order types that are available in DealBook® for iPad® and the tools that you can use to enter the market.

Adding Instruments to the Quoteboard

You can add instruments to the Quoteboard by tapping **Add**. This displays a list of available instruments by type and the **Search** field.

If you opened your account in a region that offers more than one instrument type, you may need to tap further selections to get to the instrument that you want.

You can also select instruments from more than one instrument type at a time. After you tap the instrument type and select an instrument, you can tap the instrument type again to hide it.

A number appears next to the instrument type that shows how many instruments of that type are selected.

To select instruments, you can either

- Swipe through the list and select the ones you want. Once selected, a checkmark appears next to the instrument name and the **Add...** button displays the number of instruments selected.
- Tap the **Search** field and enter the first few letters of the instrument name. DealBook® displays a list of results as you type. You can then select the instruments that you want.

Adding instruments to the Quoteboard:

1. In the Quoteboard, tap **Add**.
2. Tap to select an instrument type.
3. Scroll through the list of instruments and tap to select the ones you want.
4. When done, tap **Add...** again.

Searching for a specific instrument to add to the Quoteboard:

1. In the Quoteboard, tap **Add**.

2. In the Quoteboard, tap in the **Search** field.
3. Use the keyboard to enter the first few letters of the instrument name.
4. DealBook® displays a list of instruments based on what you entered. Tap the instrument that you want to select it.
5. When done, tap **Add...** again.

Editing Instruments from the Quoteboard

If you make a mistake when adding instruments or simply need to remove instruments, you can do so from the quoteboard by tapping **Edit**.

Removing instruments from the Quoteboard:

1. In the Quoteboard, tap **Edit**.
2. Tap  next to the instruments.
3. Tap **Delete**.
4. When done, tap **Done**.

You can also change the order that the symbols appear in the Quoteboard by tapping  in an instrument and dragging the ticket to the new position.

Placing a Market Order from the Quoteboard

You can place market orders when you click **Sell** or **Buy** in either the Grid View of the Quoteboard or the Quote Details section.

The confirmation window that appears in the Grid View.

Placing a Market Order from the Quoteboard:

1. In the Quoteboard, make sure the **Grid View** is displayed.
2. If desired, tap **Size** in the instrument ticket that you want.

3. In the number pad that appears, tap the number for the size.
4. Tap **Size** again to close the number pad.
5. Tap **Sell** or **Buy**.
6. Tap **Submit** to confirm your order.

Placing a Market Order from the Quote Details section:

1. In the Quote Details section, make sure the instrument that you want is selected. Tap an instrument ticket in the Quoteboard or tap the **Symbol** drop-down menu and select the instrument that you want.
2. If desired, tap the **Size** button and in the number pad that appears, tap the number for the size you want. Tap the **Size** button again to close the number pad.
3. Tap **Sell** or **Buy**.
4. Tap **Submit** to confirm your order.

If you make a mistake, click X to backspace or C in the number pad to reset the value in the **Size** field back to one.

Placing a Market Order from the New Order Window

When you the Sell or Buy buttons in the Chart View or List View of the Quoteboard or when you click **New Order**, you can display the New Order window.

The 'New Order' window shows the instrument '.USTEC.sb' and account '2697642'. The current market price is 2316.4 for SELL and 2318.4 for BUY. The order size is 1 (x1). The 'Order Type' is set to 'Market'. The 'BUY' button is highlighted in green. The 'Submit' button is also highlighted in green.

Placing a Market Order from the New Order Window:

1. Tap **New Order**. Or if you are in the Quoteboard, make sure the Chart View or List View is displayed and tap **Sell** or **Buy**. Both of these open the New Order window.
2. Make sure the instrument that you want is selected. If not, tap the **Symbol** drop-down menu and select the instrument that you want.
3. If you have more than one account, make sure that the correct one is selected. If not, tap **Account** and select the account you want. Account is only active if you have more than one account.
4. If desired, tap the **Size** button and in the number pad that appears, tap the number for the size that you want. Tap the **Size** button again to close the number pad.
5. Make sure **Market** is selected in the **Order Type** drop-down menu.
6. Tap the **Order** switch to set it to **Sell** or **Buy**.
7. Tap **Submit** to confirm your order.
8. A confirmation window appears. Click **OK**.

Placing a Limit or Stop in the New Order Window

With limit or stop orders, you can specify a price in the New Order window and click **Sell** or **Buy** to place your order.

The 'New Order' window shows the instrument '.UK100.cfd' and account '2267160'. The current market price is 5687.3 for SELL and 5688.3 for BUY. The order size is 1 (x1). The 'Order Type' is set to 'Limit'. The 'BUY' button is highlighted in green. The 'Submit' button is also highlighted in green. The 'Good Until' is set to 'GTC'.

If your limit is a buy, it must be set above the current market price while your stop must be set below the current market price. If your limit is a sell, your limit must be set below the current market price while your stop must be set above the current market price.

If you place an order that doesn't meet these requirements, DealBook® for iPad® will display a warning. After you tap **Close**, the New Order window appears again so you can adjust your order.

If you place a stop, you can set it as a trailing stop.

A trailing stop automatically changes so that when the market moves with your position, your order 'trails' the current price by the number of pips or points that you set. When the market moves against your position, the stop remains set at the last price reached when the market was moving with your position. You can use this to protect profits without limiting potential gains.

When you select **Trailing**, you can enter the number of pips or points that you want your stop to trail.

With position-based trades, DealBook® for iPad® follows a First In, First Out (FIFO) policy; If you have multiple position-based trades in the same instrument and set any kind of limit or stop on a particular trade, DealBook® automatically applies that order to your oldest position first.

In the **Good Until** section, you can specify how long you want your order to be available.

Cancelled is selected by default. This means your stop or limit will stay open until you decide to cancel it. You can select a particular global exchange (Asia/Tokyo, Asia/Hong Kong, Europe/London, or America/New York) by which to close the order.

Placing a Limit or Stop from the New Order Window:

1. Tap **New Order**. Or if you are in the Quoteboard, make sure the Chart View or List View is displayed and tap **Sell** or **Buy**. Both of these open the New Order window.
2. Make sure the instrument that you want is selected. If not, tap the **Symbol** drop-down menu and select the instrument you want.
3. If you have more than one account, make sure that the correct one is selected. If not, tap **Account** and select the account you want. Account is only active if you have more than one account.
4. If desired, tap **Size** and in the number pad, enter the number for the size. Tap **Size** again to close the number pad.
5. Tap the **Order Type** drop-down menu and select **Stop** or **Limit**.
6. Tap the **Order** switch to set it to **Sell** or **Buy**.
7. Tap the **Price** field. In the number pad, enter the new price. Tap **Price** again to close the

number pad.

8. If you place a stop, you can tap **Trailing** and then tap in the **Distance from** field and enter a number. Tap in the field again to close the number pad.
9. Tap **Good Until** and select a global exchange.
10. Tap **Submit** to confirm your order.
11. A confirmation window appears. Click **OK**.

Placing an OCO in the New Order Window

When you select the **OCO** order type in the New Order window, you can simultaneously set a stop order and a limit order. When market movements cause either the stop or limit order to be filled, the unfilled order is automatically cancelled.

With position-based trades, DealBook® for iPad® follows a First In, First Out (FIFO) policy; If you have multiple position-based trades in the same instrument and set any kind of limit or stop on a particular trade, DealBook® automatically applies that order to your oldest position first.

Placing an OCO from the New Order Window:

1. Tap **New Order**. Or if you are in the Quoteboard, make sure the Chart View or List View is displayed and tap **Sell** or **Buy**. Both of these open the New Order window.
2. Make sure the instrument that you want is selected. If not, tap the **Symbol** drop-down menu and select the instrument you want.
3. If you have more than one account, make sure the correct one is selected. If not, tap **Account** and select the account you want.
4. If desired, tap **Size** and in the number pad, enter the number for the size. Tap **Size** again to close the number pad.
5. Tap the **Order Type** drop-down menu and select **OCO**.
6. Tap the **Order** switches for your Stop and Limit and set them to **Sell** or **Buy** as desired.
7. Tap the **Price** field for the stop order and enter the new price. Tap **Price** again to close

the number pad.

8. Repeat step 7 for the limit order.
9. Tap **Good Until** and select a global exchange.
10. Tap **Submit** to confirm your order.
11. A confirmation window appears. Click **OK**.

Placing a Parent and Contingent Order in the New Order Window

With a parent and contingent order, you can set up an entire trade, including entry and exit points as well as risk-management measures, from the New Order window. When market movements cause the parent order to be executed, the contingent orders become active until one is filled.

By default, **OCO** is selected. With this, DealBook® for iPad® will close an unfilled limit or stop order if the market triggers the other stop or limit.

With position-based trades, DealBook® for iPad® follows a First In, First Out (FIFO) policy; If you have multiple position-based trades in the same instrument and set any kind of limit or stop on a particular trade, DealBook® automatically applies that order to your oldest position first.

Placing a Parent and Contingent Order from the New Order Window:

1. Tap **New Order**. Or if you are in the Quoteboard, make sure the Chart View or List View is displayed and tap **Sell** or **Buy**. Both of these open the New Order window.
2. Make sure the instrument that you want is selected. If not, tap the **Symbol** drop-down menu and select one.
3. If you have more than one account, make sure the correct one is selected. If not, tap **Account** and select the account you want.

4. If desired, tap **Size**. In the number pad, tap the number for the size. Tap **Size** again to close the number pad.
5. Tap the **Order Type** drop-down menu and select **Parent and Contingent**.
6. In the Parent section, tap to select the order type you want for the parent order. You can select **Market**, **Stop**, or **Limit**.
7. Tap the **Order** switch for your parent order to set it to **Sell** or **Buy** as desired. The contingent orders will update automatically.
8. Tap the **Price** field for the parent order and enter the new price. Tap **Price** again to close the number pad.
9. Repeat step 8 for the contingent orders.
10. If desired, make sure **OCO** is checked.
11. Tap **Submit** to confirm your order.
12. A confirmation window appears. Click **OK**.

Managing Open Positions

When your order is filled, whether you have a market order or a stop or limit, it becomes an open position; you can view details about it in the Open Positions view of the Account Activity section.

Symbol	B/S	Size	Traded Price	Last Price	Margin	Floating P/L
2267160 (USD)						
AA.N.cfd	BUY	1	10.08	9.23	0.92	-0.85
AA.N.cfd	BUY	120	9.71	9.23	110.76	-57.60
EUR/USD.fx	SELL	100,000	1.3059s	1.2959s	1,295.89	+995.90
2697642 (USD)						
EUR/USD.fx	BUY	1	99.37s	99.38s	10.88	-0.50

If you tap a position, you can view a drop-down menu that contains commands for managing your positions.

Symbol	B/S	Size	Traded Price	Last Price
126084 test (USD)				
EUR/USD.fx	BUY	100,000	1.35940	1.35435
GBP/JPY.fx	BUY	300,000	120.090	119.187

Close @ Mkt. closes the position at the current market price.

Reverse Position closes a position and opens a new order in the opposite direction.

You can also place orders to protect your positions. See [Protecting Open Positions with Stops and Limits](#) for more information.

View Chart displays information about the instrument in the Chart section. You'll learn more about charts in [Section 3: Using the Charting Tools](#).

You can change the order of the columns in the table by clicking . For more information, see [Section 4: Customizing DealBook® for iPad®](#).

Protecting Open Positions with Stops and Limits

You can set stops and limits in DealBook® for iPad® by tapping the desired position in the Open Positions section and selecting one of the **Protect...** commands from the drop-down menu.

Close @ Market

Reverse position

Protect with OCO

Protect with Limit

Protect with Stop

View Chart

Open Positions (2) Working Orders (2) Filled Orders

Symbol	B/S	Size	Traded Price	Last Price
126084 test (USD)				
EUR/USD.fx	BUY	100,000	1.3594 ₀	1.3543 ₅
GBP/JPY.fx	BUY	300,000	120.09 ₀	119.18 ₇

When you select **Protect with OCO**, **Protect with Limit**, or **Protect with Stop**, the New Order window appears; its drop-down menus are already set with the selected instrument and order type, so you can enter the prices and size for your orders quickly.

The 'Protect Position' screen shows a trade for EUR/USD.fx with a size of 126084. The current price is 1.35439. The user can set a Stop order at 1.35436 and a Limit order at 1.35440. The order type is set to OCO. The 'Good Until' field is set to 'Canceled'. The 'Submit' button is highlighted in green.

Remember, if you have multiple position-based trades in the same instrument and set any kind of limit or stop on one of these trades, DealBook® for iPad® automatically uses that order to close your oldest position in that instrument first.

Protecting Open Positions with Stops and Limits:

1. In the Account Activity section, tap **Open Positions**.
2. Tap the position that you want to protect.
3. From the drop-down menu, select the **Protect...** option you want.
4. If desired, tap **Size**. In the number pad, tap the number for the size. Tap **Size** again to close the number pad.
5. Tap the **Price** field. In the number pad, tap the number for the new price. Tap **Size** again to close the number pad. For OCOs, repeat this step to enter both prices.
6. If desired, tap **Good Until** and select a global exchange.
7. Tap **Submit** to confirm your order.
8. A confirmation window appears. Click **OK**.

Managing Working Orders

When you create a stop or limit order, it becomes a working order; you can view details about it by tapping Working Orders in the Account Activity section.

Sell Buy		EUR/USD.fx -0.00422 ▼					
Edit Order		Open Positions (2) Working Orders (2) Filled Orders (2) Alarms (1)					
Cancel Order		Symbol B/S Size Price Type Status Expiration					
View Chart		126084 test (USD)					
		GBP/USD.fx	BUY	100,000	1.58000	STP	WORKING GTC
		AUD/USD.fx	BUY	100,000	1.23782	STP	WORKING GTC

If you have multiple position-based trades in the same instrument and set any kind of limit or stop on one of these trades, DealBook® for iPad® automatically uses that

order to close your oldest position in that instrument first.

If you tap a working order, you can view a drop-down menu that contains menu options for managing your orders.

Cancel Order removes the order from the section.

Edit Order.... opens the Edit Order window.

You'll notice the drop-down menus in this window are already set with the selected instrument and order type, so you can edit the price and size for your order quickly.

Editing Working Orders:

1. In the Orders section, tap **Working Orders**.
2. Tap the order.
3. From the drop-down menu, select **Edit Order...**
4. Adjust the price.
5. Enter the size you want to trade.
6. Click **OK**.

Viewing Filled Orders

When you are placing multiple orders, you can display a list of orders that have been executed or filled by DealBook® for iPad® by tapping **Filled Orders** in the Account Activity section.

Open Positions (9) Working Orders (3) Filled Orders (1) Alarms					
Symbol	B/S	Size	Order Type	Filled Price	Filled Time

EUR/CHF.fx	BUY	100,000	MKT	1.2199 ₉	09/26/11

Section 3: Using the Charting Tools

As you trade, you'll discover that using charts to forecast market moves is essential to your trading strategy. In DealBook® for iPad®, you can monitor the price movements of an instrument easily using the features in the Chart section. In this section, you'll learn more about these features.

Viewing the Chart

In the Chart section, you can view a price chart for the selected instrument.

Prices are shown on the right side of the chart. DealBook® for iPad® highlights the current market prices. The price will be highlighted green if it is higher than the previous price, red if it is lower than the previous price, and gray if the price hasn't changed.

Time appears along the bottom of the chart. You can change the time frame by tapping the different **Time Frame** buttons at the bottom of the chart. You can select from one minute (1m) up to one month (1M).

You can use the tool bar at the top of the section to access a variety of different tools.

You can change the instrument by tapping the **Symbol** menu and selecting a new instrument.

The first two drop-down menus that appear on the left side of the menu display the name of the selected instrument or chart type as their name.

By default, the chart type for the chart is set to candlesticks. You can change this by tapping the **Chart Type** menu and selecting the **Line**, **Candle**, or **Bar** chart type.

Line

Candle

Bar

If you want to add an indicator to the chart, you can tap **Indicators**. For more information on this, see [Managing Indicators](#).

You can also access four tools from the toolbar:

displays the Drawings toolbar. You can use these tools to identify patterns in the chart.7

opens a tool for setting and managing price alarms.

displays a menu of settings for the chart.

launches an expanded version of the Chart section that fills the entire iPad® screen.

In the chart, positions, orders, and alarms appear as a horizontal line.

You can pan through the chart by swiping in the chart. You can zoom by pinching the chart: pinch in to zoom out and pinch out to zoom in.

Changing the Displayed Instrument in the Chart

While the chart updates whenever you tap an instrument in the Quoteboard, you can change the instrument that appears in the chart by tapping the **Symbol** menu and selecting a new instrument.

You can scroll through the list, which displays the symbols that are selected in the Quoteboard. If you need a specific instrument, you can tap **Search** to search for one.

Searching for an instrument to display in the chart:

1. In the chart, tap **Symbol**.
2. Tap in the **Search** field.
3. Use the keyboard to enter the first few letters of the instrument name.
4. DealBook® displays a list of instruments based on what you entered. Tap the instrument that you want to select it.
5. When done, tap **Add....**

If you make a mistake, tap  to start your search over.

Managing Indicators

As you look at the chart, you may want to add indicators to help you forecast price changes.

You can add these and manage the ones that you add to the chart by tapping the **Indicators** button. This opens the Indicators menu.

When you first open the menu, you can click **Add Indicator** to view the available indicators.

Adding an Indicator:

1. Tap **Indicators**.
2. Tap **Add Indicator**.
3. Tap to select one from the drop-down menu.
4. Tap **Apply**.

Once an indicator is applied to the chart, you may need to further modify its settings. You can edit a single indicator by tapping **Indicators**.

Editing an indicator:

1. Tap **Indicators**.
2. Tap the indicator that you want to edit.
3. Tap in the parameter field that you want to edit.
4. Tap **Back** when done.
5. If you have more than one indicator, continue to edit indicators, if desired.
6. Tap **Apply**.

When you edit an indicator, you can also tap **Remove Indicator** to erase the indicator from the chart.

Drawing in the Charts

As you trade, you'll want to examine the charts, looking for possible patterns and trends.

When you tap , the chart displays the Drawings toolbar.

You can use these tools to plot support and resistance levels, spot rising trends and identify simple and complex patterns.

The name of the selected tool appears in the middle of the toolbar.

To exit Drawing Mode, tap  in the right corner or tap  again in the tool bar.

shows when the pointer is active.

The Line Tools menu displays the different line types that you can add to a chart. Double-tap it to see additional line tool types.

creates trend lines, so you can draw lines to map channels, flags or other patterns. Tap this to select it and tap in the chart to place the start and end points.

creates a horizontal support or resistance level on the chart. Tap this to select it and tap in the chart to place it.

draws a vertical line on the chart. Tap this to select it and tap in the chart to place it.

draws parallel lines. Tap this to select it and tap in the chart to place the start and end points. Then drag the line that you just created to set the distance between the lines.

creates a circle. Tap this to select it and tap in the chart to create the highest or lowest point and tap and drag to size the circle.

draws a cross. Tap this to select it and tap in the chart to place the center point of the cross.

creates an ABCD line. Tap this, then tap to plot the A, B, and C points. DealBook® plots the D point for you.

draws a Gartley pattern. Tap this, then tap to plot the five anchor points.

places an arrow in the chart. Tap this to select it and tap in the chart to place it. Tap it twice to display the arrow direction.

creates a Fibonacci retracement. Tap this to select it and tap in the chart to place the start and end points of your Fibonacci line.

adds a line of text to the chart. Tap this to select it and tap in the chart where you want to add the text. Use the keypad to enter the text. Click **Done** once you're finished typing.

displays the Value Calculator. You can use this to calculate the value of a rise or fall.

Tap to select it and tap in the chart to place the start and end points.

displays an  next to all of the drawings. Tap this to delete the drawing. You can also tap **Clear All** to remove all drawings at once.

Once you add a drawing object to the chart, the line remains selected. You can then drag to move it. When done, tap anywhere in the chart to deselect it.

Editing Drawing Objects

You can move most drawing objects by tapping it to select it and dragging it to a new location. You can edit lines by tapping to select it and then tapping an anchor point and dragging. When done, tap anywhere in the chart to deselect it.

You can only move the anchor points of a Fibonacci retracement. You cannot move the whole drawing.

You can view settings for a particular object by double-tapping it. The Settings window differs for each drawing object.

With most drawing objects, the Settings window contains two options.

- Tap the swatch to select a color from the color pad.
- Tap and drag the slider to change the width of the drawing object.

With trend lines, you can also tap **Extend Left** or **Extend Right** to add extensions to your drawing object.

With Fibonacci retracements, you can tap **Levels** to change the value of the current levels, add additional levels, or change the color of the level lines. You can also tap **Text Labels** to choose between displaying Price, Percent, Both or None.

With text, you can tap and drag the slider to change the size of the text.

With the Value Calculator, you can adjust the size of the order by tapping in the field and using the number pad to enter a new value.

When finished, click **Done**.

Setting Alarms

You can set alarms to notify you when an instrument has reached a specific price by tapping

. This displays the New Alarm window.

The 'New Alarm' dialog box is shown. At the top, it says 'New Alarm'. Below that is a dropdown menu set to 'EUR/USD.fx'. There are two large green buttons: '1.3547₂ SELL' and '1.3549₇ BUY'. Below these is a condition switch set to '>e...' and a value field set to '1.35497'. There are two toggle switches: 'E-Mail Alert' and 'SMS Alert', both set to 'ON'. At the bottom are 'Submit' and 'Cancel' buttons.

Adding a new alarm:

1. Tap .
2. In the New Alarm window, make sure that the instrument that you want is selected.
3. Tap the **Condition** switch to choose either >= (greater than or equal to) or <= (less than or equal to).
4. Tap the **Value** field and use the number pad to enter a price.
5. If desired, tap the **Email Alert** or **SMS Alert** switches to choose how you want to be notified.
6. Tap **Submit**.
7. Click **OK** to confirm the alarm.

Once submitted, a line appears on the price chart, representing the alarm. It displays the direction, the size of the position, and the price.

The alarm also appears when you tap **Alarms** in the Account Activity section. If the alarm hasn't been triggered, you can tap it to edit it.

The screenshot shows the 'Alarms' tab in the Account Activity section. A dropdown menu is open over the first alarm, showing 'Edit Alarm' and 'Cancel Alarm' options. The table below lists the alarms.

Symbol	Condition	Price	SMS	Email	Triggered
GBP/JPY.fx	>equal	120.500	On	On	-
EUR/USD.fx	>equal	1.35380	On	On	28-Sep-11 04:55

Editing an Alarm:

1. In the Account Activity section, tap the alarm that you want.
2. Select **Edit Alarm** from the drop-down menu.
3. If desired, tap the direction switch to change >= (greater than or equal to) or <= (less than or equal to).
4. If desired, tap the **Value** field and use the number pad to enter a new price.
5. If desired, tap the **Email Alert** or **SMS Alert** switches to choose how you want to be

notified.

6. Tap **Submit**.

7. Click **OK** to confirm the change alarm.

You can also cancel an alarm if it hasn't yet been triggered.

Canceling an Alarm:

1. In the Account Activity section, tap the alarm you want.
2. Select **Cancel Alarm** from the drop-down menu.

Section 4: Customising DealBook® for iPad®

As you become more familiar with DealBook® for iPad®, you may want to change some of the settings. In this section, we'll look at ways to customise windows and other tools.

Customising the Account Activity Window

You can change the order of the columns in the Account Activity section by tapping . This opens the customization mode where you can drag and drop columns from the section.

Customizing the Account Activity Window:

1. Make sure Account Activity is selected.
2. Tap the buttons at the top of the section to display the view that you want.
3. Tap .
4. Tap and hold on the option that you want. The items in the gray area are already displayed in the section. The items in the green bar are not.
5. Drag the option to the area that you want and release.
6. Repeat step 4 and 5 as needed
7. When done, click **Done**.

You can also reorder columns by tapping on the option you want and dragging it to the new order.

Customising the View in the Today's News Section

You can customise the appearance of the Today's News section. You can expand the view by tapping . This hides the chart and expands the section to display the reading pane.

As in the normal view, you can tap on headlines to read a complete story. When done, you can return the view to the normal layout by clicking .

You can display settings for the Today's News section by tapping . This displays the Settings menu.

You can adjust the font size of the news stories by swiping the **Font Size** scale.

You can turn on and off news providers by tapping the **On/Off** switches.

Using the Chart Settings

When you tap  in the Chart section, you can access the **Chart Settings** pop-up menu.

The first section contains settings for displaying grid lines. Tap the **Horizontal** or **Vertical** switch to turn these lines on or off.

The second section contains settings for displaying positions, orders or alarms. Tap the switch to turn these items on or off.
