Introduction

KWizCom Remote List Viewer web part is the best solution to display lists that are located on other SharePoint sites.

Remote List Viewer web part supports MOSS2007/WSS3.0 and SharePoint 2010 server/foundations.

This document provides all the information needed to install, evaluate and deploy this KWizCom product:

- 1. Product overview
- 2. Installation guide
- 3. Component activation
- 4. Administrator guide
- 5. FAQ
- 6. Version release notes

Product Overview

SharePoint, by default, can't present lists web parts from other sites. For example, employees from one department can't view a list that is located on other departments' SharePoint sites.

When using the **KWizCom Remote List Viewer web part** in your SharePoint site, you can display remote lists that are located on other SharePoint sites, and even on other SharePoint servers (on the same server farm).

The Remote List Viewer web part looks like the regular SharePoint List web part:

Also, you can manage the displayed items (edit, view properties etc.) - same way as with the regular SharePoint list web part.

In addition, the Remote List Viewer web part displays the remote list's available views, enabling users to toggle between views (not available with the SharePoint list web parts).

Key Features

Feature	KWizCom Remote List Viewer	SharePoint 2007 out-of-the-box	SharePoint 2010 out-of-the-box
View and manage SharePoint lists/libraries located on other sites/web application/servers (on the same farm).	✓		
Enable users to toggle between views of the remote list.	~		
Hide the toolbar of the remote list	\checkmark		

Installation

Software prerequisites

Server Requirements

- 1. SharePoint 2007 / WSS 3.0 or
- 2. SharePoint Server/Foundation 2010

Client PC Requirements

- 1. Windows Vista/7
- Microsoft Internet Explorer 7+, Mozilla Firefox (Latest version), Google Chrome (Latest version).

Installation Procedure

SharePoint 2007

The Remote List Viewer web part must be installed both on the SharePoint server where it will be displayed and on the SharePoint server/s where the remote list/s is located.

- 1. Log in using SharePoint administrator account to your SharePoint server.
- 2. Unzip the KWizCom Remote List Viewer web part zip file on your WSS/MOSS server.
- 3. Double-click the .msi file in order to begin the web installation.
 - When the installation process is complete it will recycle all application pools automatically.

SharePoint 2010

- 1. Log in as SharePoint administrator account to your SharePoint front-end server.
- 2. Download the product's latest evaluation version (zip file) from KWizCom's internet web site. This evaluation version is fully functional for 30 days.
- 3. Download the KWizCom SharePoint Foundation zip file:
- 4. <u>http://www.kwizcom.com/objects/KWizCom%20SharePoint%202010%20Fou</u> <u>ndation/KWizCom%20SharePoint%20Foundation.zip</u>

REMARK:

KWizCom SharePoint Foundation is a WSP package that includes all KWizCom's shared utilities and licensing modules for SharePoint 2010.

- 5. Extract both zip files' content into the same folder on your SharePoint's disk. You will need now to install and deploy these standard SharePoint WSP packages. This can be done by using SharePoint's stsadm/Pwershell tools, according to Microsoft's guidelines for installing WSP packages.
- 6. For a much quicker automatic installation, right-click the Powershell script file "SP-WSPsInstaller.ps1" and select "Run with Powershell". This will start the automatic installation and deployment process.
- At the end of the installation process, you should see all packages deployed in the Central Admin "Server Solutions" page, and the KWizCom SharePoint Foundation package should be deployed also in the Central Admin web application.

IMPORTANT:

You need to install KWizCom Foundation in a global scope, including in the Central Admin's web application.

Post Installation

SharePoint 2007

 After completion of the installation, you will see a new KWizCom entry in Windows Start -> All Programs -> KWizCom containing the following programs:

About Remote List Viewer web part

Display General Information about the component.

Activate Remote List Viewer web part

This utility enables you (the SharePoint Administrator) to activate the downloaded evaluation version.

2. When you browse your SharePoint Portal/ Windows SharePoint services site, a new Remote List Viewer Web Part will be available for you under "Miscellaneous" group in the "Add Web Part" dialog or under "Server gallery" in the "Advanced Web Part Gallery".

SharePoint 2010

 After completion of the installation you will need to activate the "KWizCom Remote List Viewer web part" site collection feature in the site collections where you want the web part to be used:

Site Collection	Administration > Features		
Home Hebrew Fren Libraries	ch Russian sub1 sub2 Name		Status
Site Pages Shared Documents	Custom Site Collection Help Creates a Help library that can be used to store custom help for this site collection.	Activate	
Lists Calendar	KWizCom SharePoint Remote List Viewer Web Part Use this web part to view remote lists.	Deactivate	Active
Tasks	Open Documents in Client Applications by Default Configures links to documents so they open in client application instead of Web applications, by default.	Activate	
Discussions Team Discussion	Report Server Integration Feature Enables rich reporting using Microsoft SQL Server Reporting Services.	Deactivate	Active
Recycle Bin	Search Server Web Parts This feature uploads all web parts required for Search Center.	Activate	
	Three-state workflow Use this workflow to track items in a list.	Deactivate	Active

2. Once the site collection feature has been activated, you will be able to use the SharePoint Remote List Viewer web part, that will be available in the web part gallery, under the "KWizCom" category:

Un-installation

SharePoint 2007 server

- 1. Log in using SharePoint administrator account to your SharePoint front-end server.
- 2. Go to Control Panel and double-click Add or Remove Programs.
- 3. Select product entry and click Remove button.
- 4. Click Yes to approve the removal of the component.
- 5. Once the product was un-installed, close the Add or Remove Programs screen.

SharePoint 2010 server

1. Retract and remove the solution using SharePoint central admin or by using stsadm/powershell command line.

Component Activation

KWizCom components are available for evaluation prior to purchase. This way you can try our components and verify that they indeed meet your needs. An evaluation version for each KWizCom component contains all features of the component's production version. The only difference is that an evaluation version is time-limited, and will operate for a period of one month.

Once you decide to order a KWizCom component, you will need to follow the following steps:

SharePoint 2007

- 1. Order the component on the KWizCom website <u>www.KWizCom.com</u>.
- 2. Send us the installed evaluation version's *product Code* (you will see the product Code on the "About" product page:

📸 About CalendarPlus Professio	nal 🔀
\bigcirc	KWizCom
KWizCom	Version: 3.2.9491 January 12.2010
Knowledge Worker Components	Product Code:

Please use the <u>Activation Request web form</u>, on KWizCom web site to send us your product code.

- Get the component activation key this key will be sent to you by email once your order is processed.
- Activate your installed evaluation version click Start -> All Programs -> KWizCom -> SharePoint Remote List
 Viewer Web Part->
 Activate SharePoint Remote List Viewer Web Part

SharePoint 2010

 Order the product on the KWizCom website – www.KWizCom.com, or contact our sales team at <u>sales@kwizcom.com</u>.

14

- After the order was made, you can activate your installed evaluation version. Activation is done by the following steps:
 - a. Open SharePoint Central Admin. On the main "Central Administration" page, you will see the "KWizCom Features Administration" icon:

b. Click the KWizCom Features Administration icon. You will be redirected to a page that allows you to manage all your installed KWizCom products' licenses:

Administrator Guide

Introduction

When you browse your SharePoint server/ Windows SharePoint services site, a new Remote List Viewer web part can be added from "Miscellaneous" group in the "Add Web Part" dialog or from "Server gallery" in the "Advanced Web Part Gallery".

Web Part Properties & Configuration Options

The following sections provide details about each category.

Errors

This section provides you with the option to show errors when the web part is not working properly (for debug & support purposes).

Check this option to view error details and uncheck it if these details do not need to be shown.

Source List

Source list
List Web Url
http://server/
List Name
ListName
List View Name - Optional
Hide the list's toolbar

This section includes Remote List connection details:

• <u>List Web URL</u>- SharePoint List web address - enter the URL without the List Name.

You can type relative links and also use the following tokens: [current site], [site collection], [server].

- <u>List Name</u> SharePoint List name enter the full List name.
- <u>List View Name</u> (optional) Remote List View Name here you can enter a specific List View name to show in default.
- <u>Hide the list's toolbar</u> (optional)- check this checkbox if you want to hide the remote list's toolbar.

FAQ

What's the purpose of the Remote List Viewer web part?

The KWizCom Remote List Viewer web part enables you to display on your site/s lists that are physically located in other sites and even other SharePoint servers (located on the same farm).

Does it work on WSS/MOSS?

The KWizCom Remote List Viewer web part works both on WSS 3.0 / MOSS 2007 and on SharePoint Server/Foundation 2010.

Do I have to install anything on my company's client-PCs?

No. KWizCom Remote List Viewer web part is a server installation.

How to hide the remote list's toolbar from the Remote List Viewer web part?

In the configuration window of KWizCom Remote List Viewer - open the Source list category and check the "Hide the list's toolbar" checkbox.

Does the add-on work with SharePoint 2010 server/foundation?

Yes.
