Product highlights

Phone line protection

These connectors accommodate an RJ11 cord, routing the telephone line through the surge protector to guard against spikes and surges.

Power blocker

This automatic shutdown technology senses when the device has reached capacity and automatically shuts down electricity to your equipment. It protects against subsequent surges, even if you are not present

8 child-safe outlets

Safety slides provide a protective barrier that block the outlet so small objects cannot get in. Keeps children safer.

V3 Advanced Surge Technology

This new surge protection technology provides 27% greater surge protection capacity and better heat dissipation for safe, more reliable and longer lasting surge protection.

40 dB EMI/RFI noise filtration

Built-in filtering technology ensures the best performance from your components. It guards against signal interference and loss of data. The higher the dB rating the better the noise reduction.

\$250,000 equipment warranty

Protects your connected equipment for the life of the product.

6 ft power cord

Provides power to the unit which can be 6 feet from the AC outlet.

Offset right-angle plug

This flat and angled design conveniently directs the cord away from the lower outlet and allows furniture to sit more closely to the wall.

Protection indicator light

This LED alert lights up to indicate the surge protector is working properly.

Dual cord management systems

Collects the power cords and directs them away from the device in an organized fashion to keep the area clutter-free.
