

Record, Playback & Snapshot without a PC!

Capturing your console gaming triumphs is now much easier! If the living room is your war field, all you need is your video game console, TV set and the Game Capture HD. The Game Capture HD is a standalone HD video capture box which allows users to preserve PlayStation 3 or Xbox 360 HD gameplays to an internal or external hard drive without a PC. Installation is easy. Just connect the Game Capture HD to your game console with Component cables, and there you go! With one click, the Game Capture HD can capture and preview live game footage in 1080i resolution. When you're gaming or playing back your recordings, you can also capture the precious moment in an image file freely. You have the right to decide where to save the recordings or screenshots. Besides, all your recordings and screenshots can be moved between the connected hard drives for portability and sharing.
