Thank you for purchasing the 4POS Laser Scanner

Contents of the box :
1 x 4POS Laser Scanner
1 x User manual
1 x USB Cable
1 x Stand Neck
1 x Stand base

Please follow the steps to make your experience with the 4POS laser scanner as easy as possible.

Step 1:
Insert the RJ45 connecter into the base of the Scanner.

Step 2:
Push the cable into the connector until you hear a "Click"

Pull the cable softly to ensure it has been done properly

Step 3:

Unscrew the wing nut from the scanner neck.

Step 4:

Insert the scanner neck into the base.

Step 5:

Turn the base around & screw the wingnut back in.

Step 6:

Your scanner is now ready for use. The scanner has already been set for all the commonly used bar codes & you do not need to set anything else.

Step 7:

A USB Scanner can only be used with a USB Keyboard. If you are still using a Ps2 keyboard (Round plug with pins), you can either replace the keyboard with a USB keyboard OR simply purchase a USB-2-PS2 adaptor. Not doing this can result in the scanner not working or you could experience strange scans - not consistent or reliable. It is not a faulty scanner!
