

UK Amended October 2005

Fisapac has selected Cooler Clean Spray just for you: One of the best disinfectants on the market to ensure perfect hygiene and water quality of your water dispensers.

Procedure for Sanitizing / Disinfecting Fisapac water dispensers Time needed: 15 min.

Instructions for use

- We recommend carrying out this operation every three months.
 - It must be done with the machine unplugged and using cold water.

Method

1. Take out the bottle
2. Drain the top reservoir by the two faucets **only**.
3. Switch off and unplug the machine
4. Take out the cone (N°1 on user's manual page 7)
5. Take out cups and spoons dispenser on the front (N°13, 15, 23 on user's manual page 7)
6. Unscrew the Top panel (N°2 on user's manual page 7)
7. Take it out in raising it up by the back (it force a little bit)
8. Scrub the inside of the reservoir using a soft brush to get rid of the biofilm
9. Clean the reservoir of the machine with a shammy leather steeped in Cooler Clean Spray
10. Spray Cooler Clean Spray in detail
 - Inside the reservoir
 - On the separation cover (Appendix B page 2)
 - On the cone
 - On the taps
 - Inside the Top panel
11. Empty 50 ml of Cooler Clean Spray in the stainless steel tank.
12. Let operate 10 minutes
13. Empty the two faucets.
14. Set up the water cooler
15. Place a bottle
16. Take out one cup on each faucet
17. Plug in the machine
