## TOSHIBA AT300

READY FOR ACTION

Sturdy Corning® Gorilla® Glass

8.95mm thin

Cameras (front and back)

The ultra-thin, ultra-tough Toshiba AT300 Android™ powered tablet puts the action where you are. At 8.95mm it's not only one of the world's thinnest 10.1" (25.7cm), but also stands out in durability and connectivity. We reinforced the screen with Corning® Gorilla® Glass and the chassis with tough magnesium alloy. So no matter how much you surf and swipe, scratches and fingerprints have little chance to ruin your experience. And despite the diminutive dimensions, we found space for HDMI, USB, Bluetooth®, and SD Card connectivity. All to give you a Android™ tablet that puts you in the thin of things, wherever you are. A powerful NVIDIA® Tegra™ 3 Quad Core processor and its integrated Ultra Low-power (ULP) GeForce® Graphics with 1GB of RAM will run the most demanding apps and is great for gaming. It comes loaded with Toshiba Media Player, File Manager and a host of exclusive apps on Toshiba Places. Android™ 4.0, Ice Cream Sandwich rounds out the package, giving you the very latest operating system and access to over 500,000 additional apps through Google Play™. Super light to carry and with up to 10 hours\* battery life, the thin Toshiba AT300 puts you right in the middle of the action.

### TOUCHSCREEN TOUGHNESS

The Toshiba AT300 tablet is powered by the NVIDIA® Tegra™ 3 Quad Core processor and its integrated Ultra Low-power GeForce® Graphics with 1GB of RAM. The apps run faster, games are played at console-quality, HD video is smoother.

### TOUCHSCREEN TOUGHNESS

The 10.1" (25.7 cm) HD AutoBrite™ LED-backlit screen delivers the beautiful HD resolution (1280 x 800 pixels) and 16:10 aspect ratio you'll want for viewing widescreen movies. And not to worry, the screen is made of Corning® Gorilla® Glass, offering resistance to scratches.

### LET'S HOOK UP

The AT300 can connect in any situation. Connectivity options include a SD card slot and a micro-USB port for swapping files and connecting accessories, Bluetooth® for wireless headphones and keyboards and a micro-HDMI port to plug into a Full HD TV.

\*depending on configuration and level of action on the tablet. 10 hours battery life with video playback 100%

CPU performance may vary from specifications under certain conditions such as the use of battery instead of AC power, certain external peripherals, certain multimedia applications or network connections, complex modeling software and in areas with low air pressure at high altitude (1,000 metres above sea level) and/or certain temperatures. CPU performance may also vary from specifications due to design configuration. Under some conditions, your computer may automatically shut down as a normal protective measure. To avoid risk of lost data, please make periodic back-up copies. For optimum performance, use your computer only under recommended conditions. Please read detailed restrictions in the product resource guide, visit the Toshiba web site: [uk.computers.toshiba-europe.com](http://uk.computers.toshiba-europe.com) and/or contact Toshiba Technical Support.  
 - Graphics processor unit (GPU) performance may vary depending on product model, design configuration, applications, power management settings and features utilized. - Part of the main system memory may be used by the graphics system and therefore reduce the amount of main system memory available. - For PCs configured with 4 GB of system memory, the full system memory space for computing activities will be considerably less and will vary by model and system configuration. - For information about upgrading your system memory please refer to the user manual or contact your local Toshiba service provider. - One GB means one billion bytes, accessible capacity may be less. - Wired and wireless communication capabilities to be applied in countries where approved. - Battery life may vary depending on applications, power management settings and features utilized. Recharge time varies depending on usage. Battery may not charge while computer is consuming full power. After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see your accessories information that shipped with your computer or visit the Toshiba web site at [uk.computers.toshiba-europe.com](http://uk.computers.toshiba-europe.com). - Small bright dots may appear on your TFT display when you turn on your PC. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology. Any small bright dots that may appear on your display are an intrinsic characteristic of the TFT manufacturing technology. - Weight may vary depending on product configuration, vendor components, manufacturing variability and options selected. - Please check your system specifications to ensure optimal results. - Certain notebook chassis are designed to accommodate all possible configurations for an entire product series. You selected model may not have all the features and specifications corresponding to all of the icons or switches shown on the notebook chassis. - Performance may vary depending on product model, configuration, video content/format/settings as well as the performance variations of individual hardware components. Results were achieved on select models and configurations tested by Toshiba at the time of publication.
