Blue: Micro USB is activated

Function Instructions

Using standard USB Type A

When connecting 4-in-1 connection kit with Samsung Galaxy SII™ and Note™, LED will light up green, even when the USB drive is connected with it. Samsung Galaxy SII™ and Note™ will then recognize the USB flash device and will read the picture and video files automatically. You can also choose the files you need to import to Samsung Galaxy SII™ and Note™ from: (MyFiles/Root/Storage/USB/SDA).

Using SD/SDHC or Micro-SD card

When connecting the 4 in 1 kit with the Samsung Galaxy SII™ and Note™, the LED will light up in green. Once the SD or Micro-SD card is connected, the green LED will turn to red. Samsung Galaxy SII™ and Note™ then will recognize the USB flash device and will read the picture and video files automatically. You can also choose the files you need to import to Samsung Galaxy SII™ and Note™ from: (File search path: MyFiles/Root/Storage/USB/SDA).

Connecting Digital Cameras

When connecting the 4-in-1 connection kit with the Samsung Galaxy SII™ and Note™, the LED will turn green. Insert the USB connector, then power on digital camera. Samsung Galaxy SII™ and Note™ will recognize USB flash device and will read picture and video files automatically. You can also choose the files you need to import to Samsung Galaxy SII™ and Note™ from: (File search path: MyFiles/Root/Storage/USB/SDA).

Charging through the Micro-USB cable using the original Samsung AC adapter

Connect 4-in-1 connection kit with the Samsung Galaxy SII™ and Note™, then connect the Micro-USB cable between kit and the AC charger. (This product does not support third-party USB power adapters)
