

## AVerTV Box PVR

### Your TV, Your Video Recorder!

Watching TV has become a basic need in our life, but what if you have an important presentation or date when your favorite show is airing? The AVerTV Box PVR saves you out of this dilemma. With this compact TV box, you can schedule a recording for your beloved TV shows if you're not available for them. Even better, you can set a regular recording schedule for a TV series. Scheduling recording doesn't mean you have to pay a high electric bill. After a schedule is set up, it will be automatically powered on when the schedule starts and turned off when the recording ends.

The AVerTV Box PVR can prevent you from missing any crucial moment. The built-in TimeShift function lets you pause live TV show for a call and resume it when you're back to your seat. Also, the Zoom-in function can help you see the details clearly. Besides, the AVerTV Box PVR is fully compatible with TV set, PC monitor and projector. You can choose the way of watching TV as your liking.

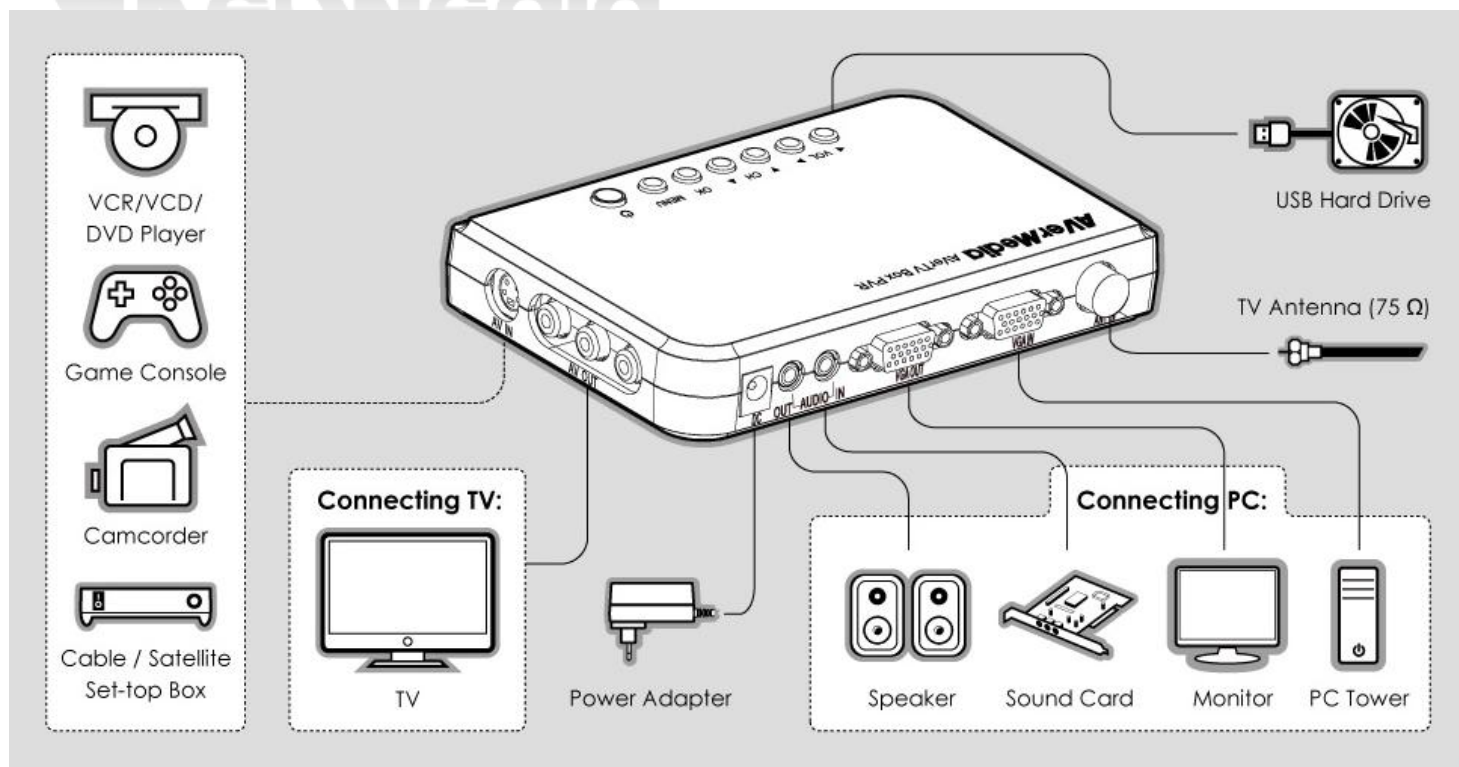

Except TV-related functions, the AVerTV Box PVR allows you to record beloved TV programs and the precious contents from satellite/cable TV set-top box, camcorder and game console. This feature also makes it a convenient tool for digitizing piles of old VHS tapes. The composite input and output work together to present you a zero-lag gameplay experience while recording in the background.
