BREAKING NEWS • BREAKING NEWS • BREAKING NEWS • BREAKING NEWS • BREAKING NEWS

By May 2013 both GDC Guidelines & a NEW European Directive will become law making the re-capping of needles illegal.

Kent Express now offer two ranges which will fully address this problem:

- Insafe is an autoclaveable Injection System with in-built needle sheath (see cover for details)
- Ultra Safety Plus offers both a single use, and an autoclaveable version (see below)

Ultra Safety Plus

- Sterile, disposable, passive and active aspirating injection system for single patient use with needle stick injury prevention device.
- BDA Accredited.
- Fitted with XL needles.

2.2ml Syringes x 100, Autoclavable Polycarbonate
Handle x 1 plus Silicone Tips x 5

207211 27G Short - Grey **207213** 30G Short - Yellow
207212 27G Long - Grey **207214** 30G Extra Short - Yellow

£16.50

Ultra Safety Plus 50/50

- Sterile, disposable, aspirating safety syringe system complete with 50 disposable handles.
- Full aspiration for a safer injection.
- Needle guard to help prevent needle stick injury.
- Permanent locking for safe disposal.
- Bevel-indicator so the needle can be correctly inserted into the tissue.

Handles x 50 and Syringes x 50

ADVANCED HYGIENE IN PRACTICE

Here's what our customers think...

Venus Pearl

Heraeus

- Creamy, non-sticky nano-hybrid universal composite that delivers an easy and convenient handling behaviour with excellent sculptability.

save 20%

The Dental Care Centre

Nice consistency, does not stick to instruments, easily polished and good shading. A good product.

Innovation	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Efficacy	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>

Westbrook House, Newbury

Venus Pearl by Heraeus is great material to use, I used it for the first time and found that has really good handling properties, does not stick to the instruments and two things that puts it in front of its rivals are: 1.Simple layer technique and 2. It is very easy to polish with simple polishing technique.

Innovation	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Efficacy	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>

Bathampton Dental Practice

This was a very nice composite to use. It comes in a neat little box with instructions. I did not use the shade guide dial provided as we were only using single shades. The composite was non sticky and of a good consistency for easy placement and shaping better than some other composites that I have used. The aesthetics were good and also includes A2.5 shade for those situations in-between shades. Overall a very pleasing result.

Burnham Dental Practice

The composite was not sticky, easy to place in any kind of surface or cavity. Composite can quickly be polished and smoothed with less effort. The composite colour shades with large variety, which the sparkling shine stability lasts for a long time without the need for lots of discing.

Palodent Plus Sectional Matrix System

Dentsply

- Palodent Plus Sectional Matrix system for Class II Restorations.

Bathampton Dental Practice

A fantastic piece of kit. I used this for Class II composite restorations and one of the problems is getting a really good contact. I selected and placed the sectional matrix using the pin tweezers which give a bit of extra confidence that you are not going to drop it and aid placement which could be a bit fiddly otherwise The ring was placed snugly using the forceps. I love the fact that you can place the wedges through/under the ring and that due to the hollow design of the wedges you can even place two if so desired.

I got an excellent contact, so tight on one occasion I had a little trouble removing the matrix.

What is nice is that they have even thought about the design of the forceps for compressing the rings back into shape, if over time they become a little overstretched. Very pleased with the result and will look to use this for most of my posterior composites. I think the only exception would be if a full cusp had fractured, as the matrix does not wrap completely around the tooth, but it can easily handle MOD using two rings if needed.

Carfax Dental Practice

Great idea to improve contact points. Simple to use and adapt to technique. It took a little time to place but I guess that's me getting used to it. I particularly like the wedge guard concept.

Riva Light/Self Cure HV Capsules

SDI

- High viscosity, glass ionomer restorative material.

Dental Excellence

Difficult to manipulate initially. High viscosity formula helped shaping compared with previous Riva products. Would definitely buy again.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Colehill Dental Centre

Useful product, especially in children and when a quick core build-up restoration is required. It does take about 5 minutes to set hard enough to be prepared though, but at that stage its easy to cut. Easy enough to contour as its setting. I will continue to use Riva in deciduous teeth as it does seem to be a lot stronger than the current GIC I'm using. A quicker setting product would suit my requirements much better.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

The Dental Practice

A GI based material with the added benefit of fluoride release, which is great in those iffy cases & teeth that need to be monitored over a period of time.

1. Ease of use – fairly ok just like the other capsules in the market, nothing extraordinary.
2. Good working time.
3. Not as pasty & sticky as other GICs.
4. Sometimes esp with smaller cavities, material get wasted, would prefer to use powder/liq version.
5. Works well in kids.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Cullompton Dental Centre

I found this product fairly easy to use. There is a slightly longer waiting time compared with Fuji IX GP Extra before final adjustments and also need to apply a coat before and after adjustments. However the setting time is rapid and it sets really hard. The nozzle needs to be slightly longer to access tricky cavities. It's excellent value for money and overall an excellent product.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

High Road Dental Surgery

This product was excellent to use. I like it much more than Fuji as it didn't set very quickly in the gun. I notice though that sometimes Riva set quickly as were placing the filling, but this may be due to our bright head light. All in all a great product. We are now using Riva.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Tri Plaque ID Gel

GC

- Three tone plaque disclosing gel that identifies new, mature and acid producing biofilms.

Bridlington Dental Practice

I found this product a good disclosing gel. The ability to highlight acidogenic areas of plaque was innovative although I'm not sure it meant a great deal more to patients. Interesting to the dentist though! It was tasteless and easy enough to apply not being too thin. It also removed easily enough. I would use it over other disclosing gels, as although more expensive, a tube lasts so long that the cost per patient is pence.

Innovation	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Ease of Use	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Efficacy	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Patient Comfort	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Whitening

pola whitening

SDI

Advanced take home tooth whitening system.

- The high viscosity, neutral pH tooth whitening gels ensure the greatest patient comfort in a take home kit. The unique blend of soothers, conditioners and high water content assist in reducing sensitivity. The formation of plaque and tooth decay is significantly reduced.
- High viscosity gel ensures it can be easily and securely placed into the tray and remains in the tray for the entire procedure.
