Global Monitoring Plan of the Stockholm Convention on persistent organic pollutants: visualization and
on-line analysis of data from the first monitoring report (2008) [online]. Masaryk University, 2013.
Available from: <http://www.pops-gmp.org/visualization>.

Introduction

- Web site <http://www.pops-gmp.org/visualization> presents POPs data from environmental monitoring programmes as provided to GMP regional reports. Data are sorted by matrices, time, and compounds of interest.
- Five analytical outcomes are available:
 - World map – monitoring overview;
 - Available data – parameters;
 - Available data – years;
 - Reported values;
 - A case study showing the data validation process for POPs atmospheric concentrations from GMP1 reports and analysis of variability and regional backgrounds for twelve parameters.

**WORLD MAP -

BACKGROUNDS**

WORLD MAP - MONITORING OVERVIEW

An interactive map displaying monitoring activities in the individual years.

» [Open the visualisation](#)

AVAILABLE DATA - PARAMETERS

Regional availability of monitoring data on compounds of interest in key matrices.

» [Open the visualisation](#)

AVAILABLE DATA - YEARS

Regional availability of monitoring data in selected time periods.

» [Open the visualisation](#)

REPORTED VALUES

Reported concentrations in the key matrices. For air, only the concentration values reported from the background (urban, suburban, rural, remote, mountain and polar) sites were included.

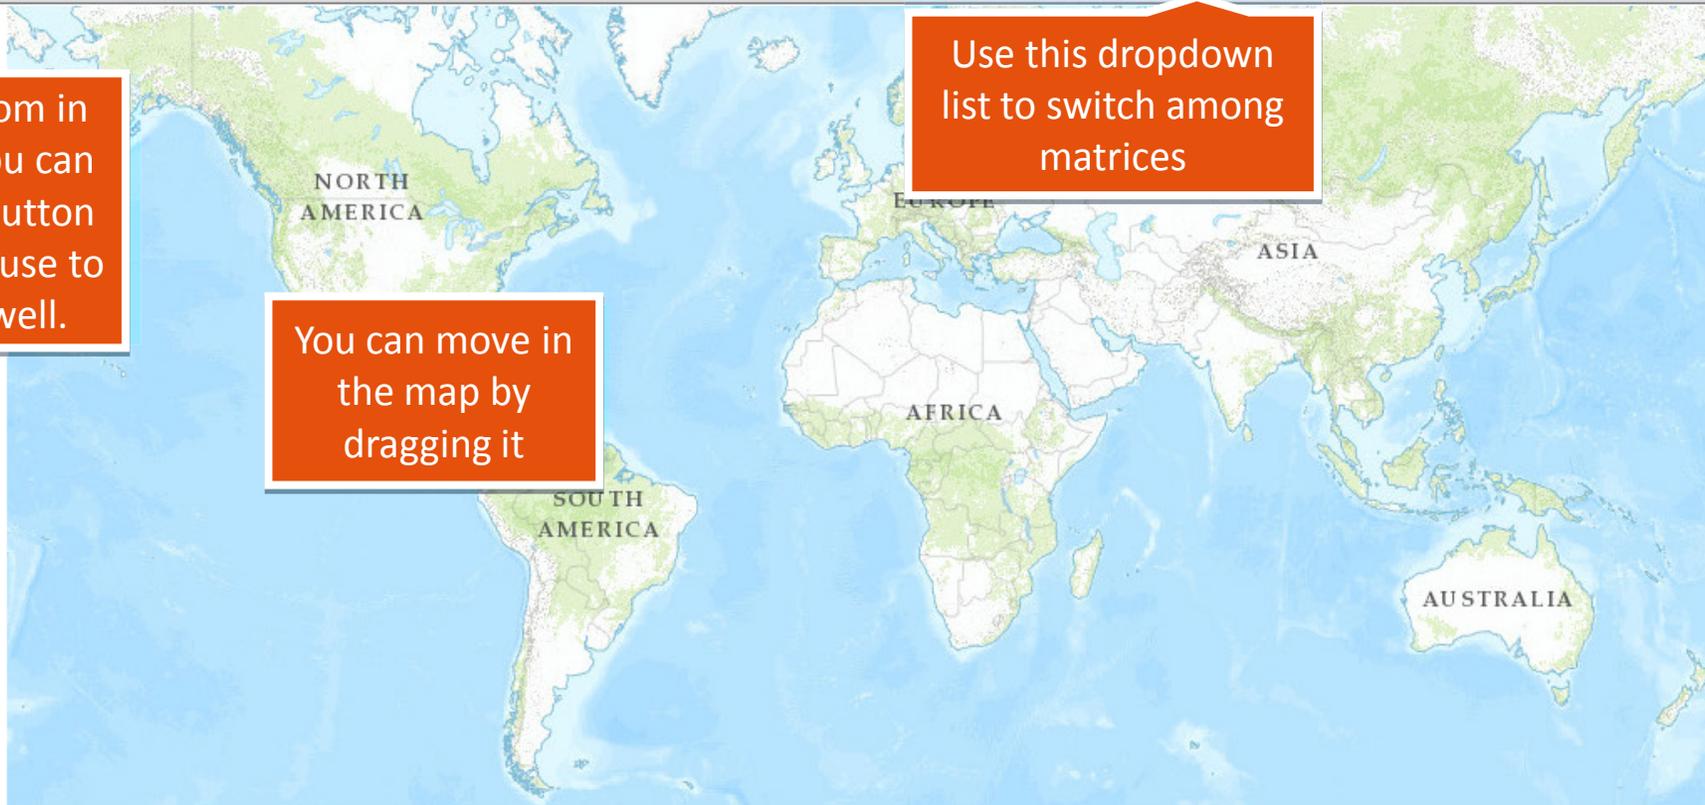

» [Open the visualisation](#)

REGIONAL BACKGROUNDS

Statistical evaluation of reported background atmospheric concentrations.

» [Open the visualisation](#)

Drag to zoom in and out. You can use scroll button on your mouse to zoom as well.

Use this dropdown list to switch among matrices

You can move in the map by dragging it

10000
5000 mi

Current YEAR: 2009

Time slider mode:

Single time point

Basemap:

Topo

Use these buttons to move, play or pause slideshow in the selected time scale

Use this dropdown menu to select time interval, in which the data are displayed

Select the type of map to be displayed

Matrix: Sampling method: UN region: Compound: Year (2001):

| Detail for: Czech Republic / Beta-HCH / 2001 | | | | | | | | | | | |

Czech Republic
beta-HCH

Matrix: Sampling method: Compound:

Parameter: Unit: Year:

Use dropdown lists to select from available values to filter the output.

Legend

Min Mean Median Max

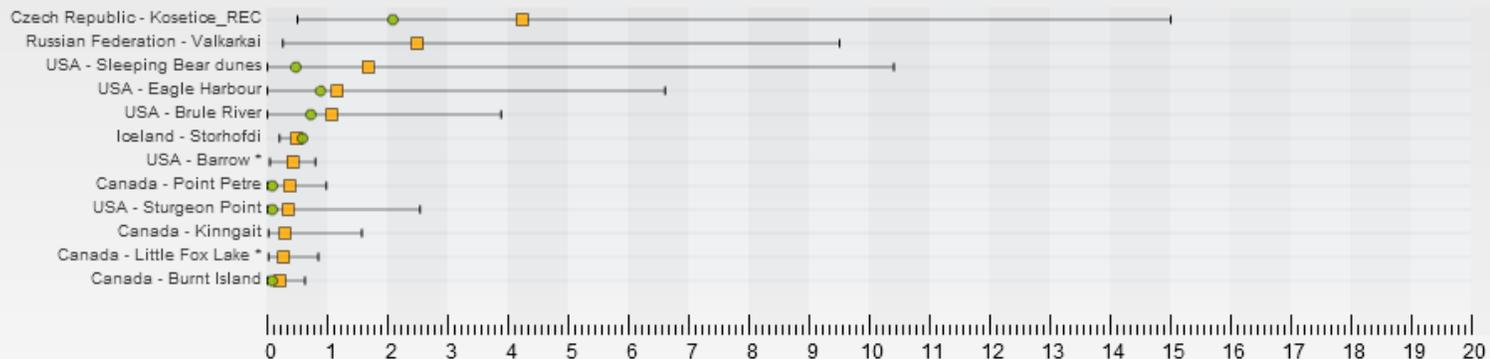

* - Records marked with the asterisk are taken from multiple-year aggregation.
 (LoQ/N) - Values in paranthesis indicate proportion of records under limit of quantification (LoQ) and total number (N) of records.

Reported values are shown as a box-and-whisker plot. A plot consist of minimum, maximum, mean and median. If a value is unavailable, appropriate symbol is not displayed.

DETAIL OF SELECTED VALUE

Matrix: Air active
 Country: Czech Republic - Kosetice_REC
 Min: 0.5 (5/51)
 Max: 15 (5/51)
 Mean: 4.15 (5/51)
 Median: 2 (5/51)
 N: 51
 Unit: pg/m3

Legend

Min Mean Median Max

* - Records marked with the asterisk are taken from multiple-year aggregation.
 (LoQ/N) - Values in paranthesis indicate proportion of records under limit of quantification (LoQ) and total number (N) of records.

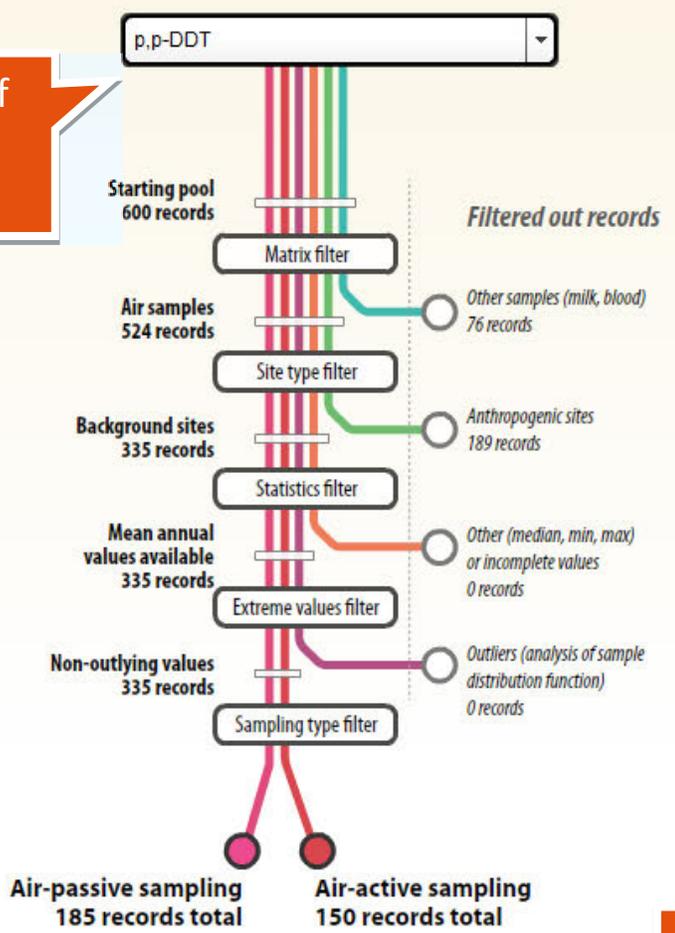

Hover the mouse cursor over a box-and-whisker plot to get additional information about the aggregated value.

Data Validation Inter-regional Variability

Use these buttons to switch between data validation and inter-regional variability

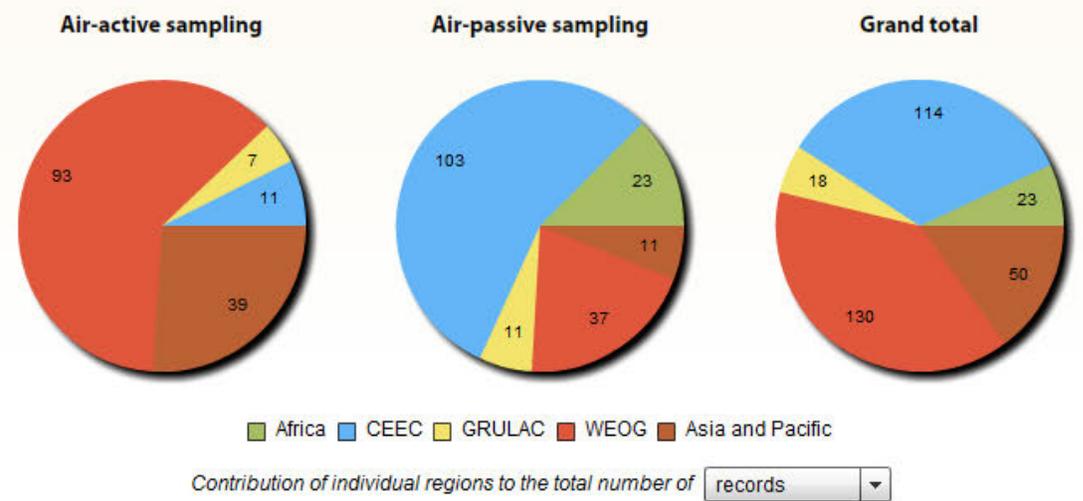

Process of Data Validation

Select one of the 12 parameters.

Results of Data Validation

| Sampling method | Africa | CEEC | GRULAC | WEOG | Asia and P... | TOTAL |
|---|---|--|---|---|--|---|
| p,p-DDT Air-passive sampling | 13 countries 20 sites 23 records 2005 - 2008 | 19 countries 69 sites 103 records 2003 - 2008 | 3 countries 6 sites 11 records 2005 - 2006 | 13 countries 25 sites 37 records 2005 - 2006 | 3 countries 8 sites 11 records 2006 - 2008 | 51 countries 128 sites 185 records 2003 - 2008 |
| p,p-DDT Air-active sampling | 0 countries 0 sites 0 records | 1 countries 1 sites 11 records 1998 - 2008 | 1 countries 3 sites 7 records 2002 - 2004 | 9 countries 16 sites 93 records 1998 - 2008 | 9 countries 33 sites 39 records 2004 - 2007 | 20 countries 53 sites 150 records 1998 - 2008 |

Use this dropdown list to compare regions according to number of records, sites and countries.

REGIONAL BACKGROUNDS

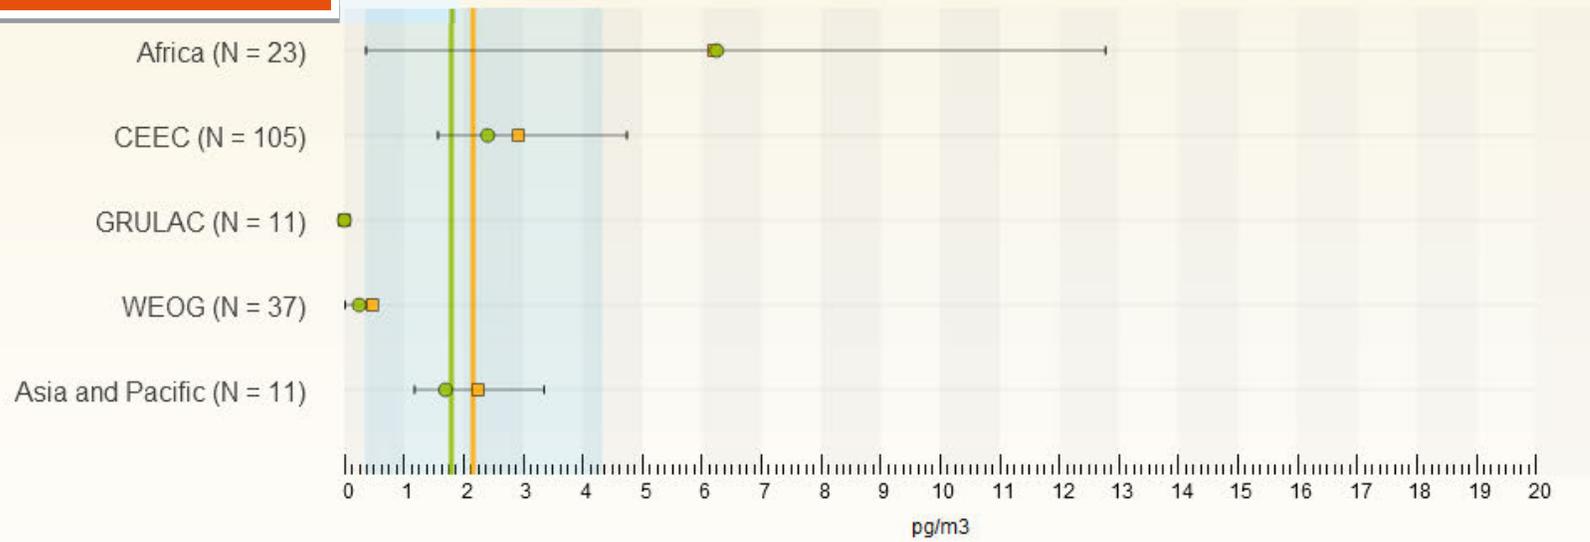

Use these buttons to switch between data validation and inter-regional variability

Data Validation Inter-regional Variability

Use dropdown lists to select the parameter and sampling method.

Parameter: p,p-DDT Sampling method: passive

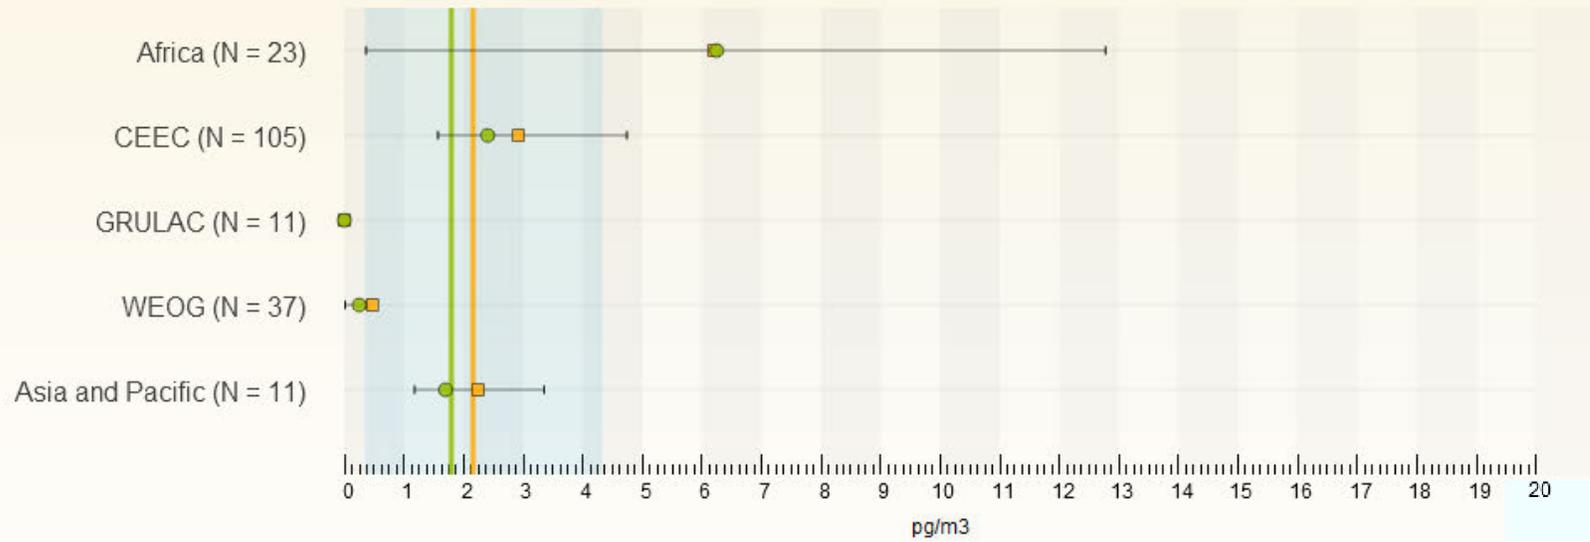

Total median: 1.813 pg/m3
Total geometric mean: 2.173 pg/m3
Total 25th percentile: 0.35 pg/m3
Total 75th percentile: 4.33 pg/m3

Data Validation Inter-regional Variability

Parameter: p,p-DDT Sampling method: passive

Total median: 1.813 pg/m3
 Total geometric mean: 2.173 pg/m3
 Total 25th percentile: 0.35 pg/m3
 Total 75th percentile: 4.33 pg/m3

DETAIL OF SELECTED VALUE

Regional group: CEEC

Geometric mean: 2.92

Median: 2.4

5th percentile: 0.25

25th percentile: 1.56

75th percentile: 4.73

95th percentile: 11.15

N: 105

Hover the mouse cursor over a box-and-whisker plot to get additional information about the aggregated value.

- Previous slides are based on randomly generated data and are provided just for demonstration purposes of the tools available in the on-line visualisation.
