2. INTRODUCTION

Clear image quality has been achieved by employing a 1/3" Hi-Res. CCD, which provides a horizontal resolution of 700 TV lines. The camera can be by External Light Sensor; it provides Color image in full light condition (Day) and provides B/W image in low light condition (Night) to reach the best effect. High performance: providing unique ATR (Adaptive Tone Reproduction) , DNR (Digital Noise Reduction), HLC (High Light Compensation), CRS (Color Rolling Support), Privacy function, Mirror function, as well as manually adjusting picture quality functions (Such as Contrast/Sharpness/Color etc.).

3. FEATURES

High Resolution

CCD Sensor provides high resolution reaching 650~700 TVL with advanced and clear picture quality.

Excellent Sensitivity

High sensitivity, low smear, high anti-blooming and high S/N ratio.

Adaptive Tone Reproduction (ATR)

ATR is the Single Scan WDR function; it has the other name with Digital WDR, Software WDR. perfectly shows the image details between dark and light. Newly added environment dynamic detection switch, enhancing WDR image efficiency.

Digital Noise Reduction (DNR)

With 2DNR enable, it can reduce the noise to produce extremely clear picture quality even under low light condition.

Day & Night

Mechanic IR Cut-Filter driving unit with Light Sensor.

High Light Compensation (HLC)

By setting mask are, the user will experience better operation convenience see a clearer image.

Privacy Mask

Privacy image masking with free position, support up to 8 areas of privacy masking zone.

Motion Detection

Camera-site takes the initiative in providing motion detection alert for a more comprehensive monitoring and careful editing of motion detection area. When there are changes within the detection area, the camera immediately issues a warning.

Lens (External manual focus)

Built-in DC-type Vari-Focal lens with ICR / Without ICR.

OSD

OSD (On Screen Display) Setup Menu. Camera tile setup of up to 16 alphanumeric letters.

Mechanism

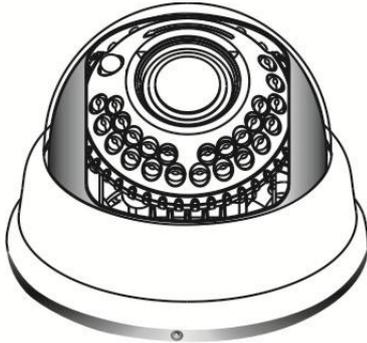

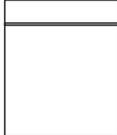

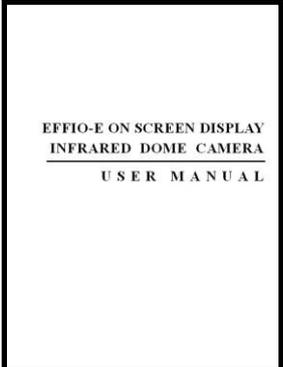

Weatherproofing Housing Design.

Application

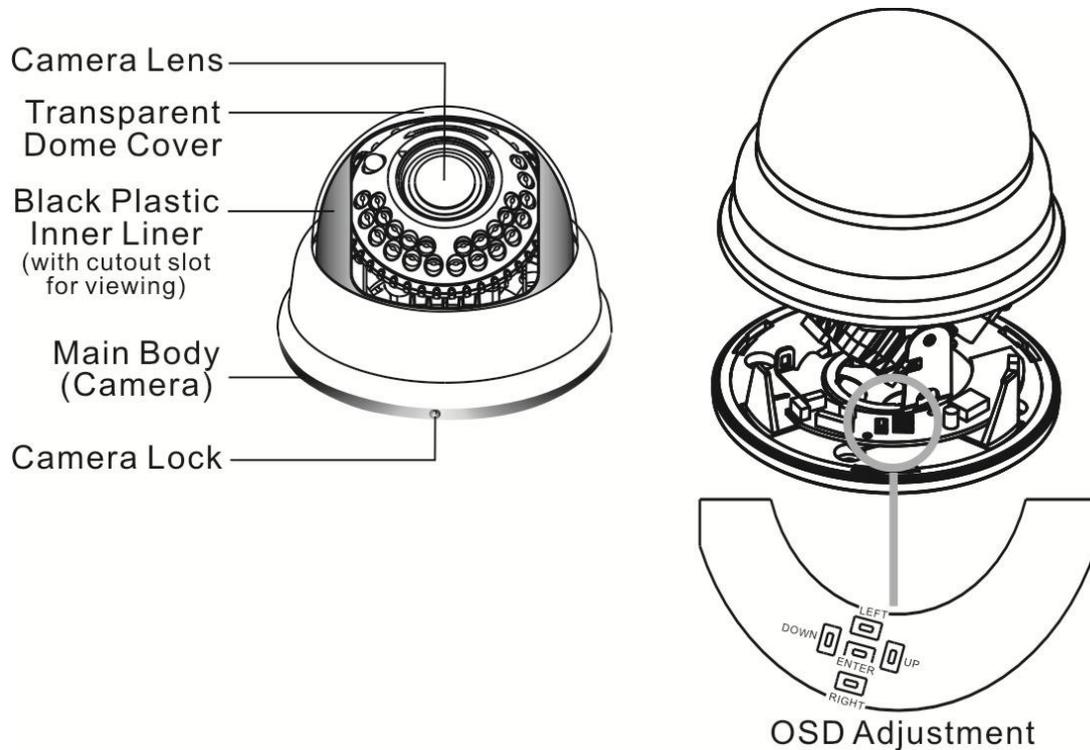

All function can be operated from OSD: AES (Automatic Electronic Shutter), AI (Auto Iris), GC (Gain Control), WB (White Balance), BLC (Back Light compensation), positive/ negative and Horizontal Mirror.

4. PACKING LIST

Check to make sure all of the items shown below are included in your product package.
If something is missing, contact your dealer as soon as possible.
