Product Specifications

Bluetooth Compliant Standards: V1.2

Bluetooth Profiles Supported: HSP, HFP, A2DP, AVRCP

Transmitted Power: Class 2

Wireless connection range: 10 Meters

Frequency Band: 2.402GHz~2.480GHz

Charger's Output Power: DC 5-6V 400mA

Built-in Rechargeable Lithium ion Battery: 3.7V/170mAH

Normal Charging Time: ~ 2 Hours

Talk Time: Up to 8 Hours

Play Music Time: Up to 8 hours

Standby Time: up to 170 Hours

Operating Instructions

Charging

a) The internal battery of the BD825 Envy must be fully charged before it can be used.

Charging can be accomplished using either the travel charger or car charger (depends on the package purchased).   First, plug the mini USB connector from the charger into the mini USB charger port, then plug the charger into an AC outlet or cigarette lighter socket in your car, to charge the internal battery.

b) Normal Charging Time: Using the included travel charger or car charger and USB cable, the internal battery will take approximately 2 hours to fully charge.

c) Charging Indicator: The Red LED on the BD825 Envy will light up during the charge cycle and turn off when charging is completed

d) Low battery indicator: The Red LED on the BD825 Envy will begin to flash every 4 seconds when the internal battery is low on power.   When this occurs, it is necessary to recharge the BD825 Envy as described above.

Note:

a) In the case where the BD825 Envy has not been used for a long time or the internal battery has run completely flat, it may take several minutes before the Red LED lights up.

b) When low battery indication occurs, and the battery is not recharged, the BD825 Envy will automatically switch off.

Power On

a) While the BD825 Envy is off, press and hold the MFB (multi-function-button) for 3 seconds.

b) An audible tone will be heard through the earphones and the Blue LED lights up for 3 seconds.

c) Release the multi-function-button, and the device is Power On.

Power Off

a) With the BD825 Envy in Standby Mode, press and hold the MFB (multi-function-button) for 3 seconds.

b) An audible tone will be heard through the earphones and the Red LED lights up for 3 seconds.

c) Release the multi-function-button, and the device is Power Off.

Pairing the BD825 Envy with a Mobile Phone

(The BD825 Envy must be paired with your Bluetooth enabled audio device or mobile phone before it can be used)

1) Pairing Procedure

a) Place the BD825 Envy and the audio device or mobile phone within 3 feet of each other

b) The BD825 Envy should be Power Off

c) Press and hold the MFB (multi-function-button) for 6 seconds until the Red LED and Blue LED start to flash alternately……the BD825 Envy is now in Pairing mode

d) Initiate the Bluetooth function on your audio device or mobile phone by setting it to search for new Bluetooth devices (Please refer to your audio device or mobile phone's user's manual for detailed information)

e) When the audio device or mobile phone shows "BD825" found, stop searching and select "BD825"

f) When prompted, key-in PIN Code "0000" and press enter...your audio device or mobile phone and the BD825 Envy will pair with each other.   Once pairing is established, a long tone will be heard through the earphones the Blue LED will flash 5 times slowly.   After pairing is completed the BD825 Envy will switch to Standby mode, and the Blue LED will flash every 12 seconds.

g) Once the BD825 Envy enters into Pairing Mode, you will have 2 minutes to finish pairing. Should the pairing fail within this 2 minute time frame, a long tone will be heard through the earphones, the Red LED will light up for 3 seconds, and then the device will automatically turn off. If this occurs, you must repeat the pairing procedures as described above.

h) After the BD825 Envy is paired with the audio device or mobile phone, return them to Standby Mode, and make sure they are within a distance of 30 feet (in open space with no obstruction; when indoors, effective distance may shorten depending on building construction and materials used for construction) from BD825 Envy.   You are now ready to use the BD825 Envy to play music, place or receive phone calls.

Note:

Some mobile phones may require an additional step of adding a short press of the MFB (multi-function-button) on the BD825 Envy and manual acceptance of the connection on the audio device or mobile phone.

Connection

a) Every time the BD825 Envy is turned on, it will automatically search and connect to the last connected Bluetooth device.

Note:

Some Bluetooth devices require manual acceptance of the BD825 Envy's signal

b) When the BD825 Envy is in Standby Mode, when you short press the MFB (multi-function-button), it will automatically connect to the last connected Bluetooth device.

Power Save Feature

If the BD825 Envy is not connected to any paired device for more than 4 hours, it will automatically power off to conserve battery power.   When this happens, power on the BD825 Envy to reconnect.

Disconnect

a) The BD825 Envy disconnects from the audio device or mobile phone by the following methods:
1) Use the audio device or mobile phone or other Bluetooth devices to break the connection.
2) Power off the BD825 Envy.

Answer Incoming Calls

a) A ringtone heard through the earphones will announce an incoming call
b) Answer the incoming call by pressing the MFB (multi-function-button) on the BD825 Envy once

End Calls

a) When the BD825 Envy is in Talk Mode, press the MFB (multi-function-button) on the device once to end the call

Reject Incoming Calls

a) A ringtone heard through the BD825 Envy will announce an incoming call

b) Reject the incoming call by pressing and holding the MFB (multi-function-button) on the device for 3 seconds.

Voice Dialing

a) Before using Voice Dialing make sure your mobile phone supports the voice dialing function, and your mobile phone has the voice dial tag recorded. (Refer to user's manual of the mobile phone for detailed instructions)

b) If the phone supports the voice dialing function, when the BD825 Envy and mobile phone are connected, short press the MFB (multi-function-button) once, and an audible tone will be heard through the earphones, then say the Voice Call tag to make the Voice Dial.

c) If the BD825 Envy is playing music, short press the MFB (multi-function button) once.   The music will stop and an audible tone will be heard through the earphones.   Then say the Voice Call tag to initiate the voice dial.

Last Number Redial
a) Redial the last number dialed by pressing the MFB (multi-function-button) on the BD825 Envy twice quickly.

Note:
Depending on the mobile phone being used, when you stop the music player and initiate phone calls from the BD825 Envy, after the call is completed the music player may not resume playing automatically.   If this occurs, press the   MFB (multi-function button) to re-access the A2DP service, and the music playing function will be restarted.   When using certain phone models, the music player must be restarted from the mobile phone.

Call Transfer between the BD825 Envy and a Mobile Phone
a) Transfer a call from the BD825 Envy to a mobile phone by holding the MFB (multi-function-button) for 3 seconds, a short audible tone will be heard through earphones and the call is now transferred to the mobile phone.

b) Transfer a call from the mobile phone to the BD825 Envy by pressing the MFB (multi-function-button) once quickly; the call is now transferred from the mobile phone to the BD825 Envy.

Volume Adjustment
a) During a call, press the "V+"button or "V-"button on the BD825 Envy to increase or decrease its earphones' volume.

Call Holding
a) During a call, press and hold either "V+"or "V-" button for 3 seconds to put the call on hold.
Answer 2nd Call during a Call
a) During a call, when the 2nd call comes in, press and hold either "V+"or "V-" button on the BD825 Envy for 3 seconds to answer the 2nd call

Call Swap
a)   With two callers on the BD825 Envy, press and hold either "V+"or "V-" button for 3 seconds to swap between the two callers.

Note:
Call holding can only be done only if your mobile phone and its SIM support this function.

Playing Music from the Mobile Phone through the BD825 Envy

First, make sure your mobile phone or audio device supports Bluetooth Advanced Audio Distribution Protocol (A2DP) and Audio Video Control Protocol (AVRCP) functions (on some phones the A2DP function may appear as AV function).   The A2DP function allows the mobile phone to stream music wirelessly to the BD825 Envy.   During music play, the AVRCP function allows the MFB (multi-function-button) to be used to Play or Pause the music from the mobile phone or audio device, can be used to select the previous or next music.

Due to variations of mobile phones, procedures to play music through the BD825 Envy are not always the same. When the BD825 Envy is paired with a mobile phone, depending on the software in the mobile phone, there are a number of ways to initiate music playing.   For some phones, music play through the BD825 Envy can achieved by simply pressing MFB (multi-function-button) once; for some phones when the music player on the mobile phone is started music will be streamed through the BD825 Envy automatically.   Some mobile phones will require that the "Mode Button" on the device be pushed to initiate the A2DP function. Other mobile phone models will require the user to select the device used to hear the music when the music player is started.
(Always refer to the User Guide of your mobile phone for details on playing music through A2DP)

Note:

1) To answer an incoming call while the music is playing If a call comes in while the mobile phone is playing music through A2DP, the player will stop the music automatically.   The incoming call ring tone will be heard through the BD825 Envy.   To answer the incoming call, short press the MFB (multi-function-button) on the BD825 Envy.   After the call ends, the player will resume playing the music automatically.

2) Play or Pause Music
a) While music is playing, short press the MFB (multi-function-button) on the BD825 Envy to pause the music
b) While in pause mode, short press the MFB (multi-function-button) on the BD825 Envy to resume the music playing

3) Volume Adjustment
a) While music is playing, press "V+" or "V-"button on the BD825 Envy to increase or decrease the volume.

Simultaneous Pairing to Audio Video Device and Mobile Phone
The BD825 Envy can be paired with an Audio Video device and a mobile phone at the same time, allowing the user to play music from AV device, and make or receive phone calls on the mobile phone using the BD825 Envy.
a) Following the pairing procedure, first pair the BD825 Envy and establish AV service to Bluetooth A2DP and/or AVRCP enabled PMP, or AV dongle.
b) Operate the BD825 Envy or AV device to break the connection between the two and return the BD825 Envy and the AV device to standby mode.
c) Initiate the BD825 Envy into pairing mode again and pair with mobile phone, make sure the

mobile phone is connected to the BD825 Envy through headset profile, if the headset connection is not established, operate the mobile phone to make the connection.

d) Press "V+" or "V-"button on the BD825 Envy to connect to the AV device.

After you have completed the above procedure, you can begin music playing by operating the AV device.   Different methods may be required to begin music playing, please referred to the User Guide of your device for operation procedure.

During music playback, if a call comes in on your mobile phone, the BD825 Envy will stop the music playing and the ring tone will be heard through the earphones, answer or reject incoming call as previously described.   Music playback will resume after the call is ended.

Note: Not all devices will resume music playback automatically.

Restore Factory Default Setting

a) Make sure the BD825 Envy is in Standby Mode

b) Press and hold both "V+"and "V-"buttons for 10 seconds until the Red LED and Blue LED alternate quickly

c) Press and hold both "V+"and "V-"buttons again for 3 seconds until an audible tone is heard twice from the Speakerphone

d) The BD825 Envy will power off automatically.

e) Now the device resets back to the factory default setting (all previous stored different device pairing records will be deleted
