

Rolletic Original is a unique body massager that can effectively form the body, tighten problematic parts and eliminate or reduce cellulite. Its guaranteed results, which have been proved many times, make Rolletic Original one of the most wide-spread devices for body forming and tackling cellulite problems.

<http://www.youtube.com/watch?v=hLHzm6yM-TU>

It is the only device of its kind which has successfully passed clinical testing:

http://www.beauty-systems.cz/wp-content/uploads/klinicke_hodnoceni_rolletic.pdf

For its owner, it represents low costs (purchase and operation), a nearly zero failure rate and ease to use. Using Rolletic Original, studios and wellness centres will enjoy repeat customers and thus solid incomes. The device can also be effectively combined with other procedures.

What can Rolletic Original do?

- Reduce size of treated spots (decrease in cm)
- Tighten muscles
- Smooth skin
- Break down fat pads
- Eliminate cellulite
- Support blood stream
- Release muscle tension
- Form the body
- Support the flow of lymph (lymphatic circle)
- Detoxify the body
- Increase immunity and overall health
- Earn solid incomes to its owner

For achieving the best possible results, we recommend that you follow our unique treatment procedure plan that was designed by leading Czech physiotherapists, i.e. 30 to 60 minute treatments, 2 to 3 times a week.

How does Rolletic Original work?

The Rolletic Original body massager uses one of the methods of traditional Chinese medicine. Therapeutic massage is mentioned in the ancient „Medical Classic of the Yellow Emperor“ from the Qin and Han dynastic periods. The stimulating effects are achieved by massage in the area of acupuncture lines, reaching all distant parts of the body, or organs connected to them. Interaction and massaging movement on the lines result in regulation and direction of Qi (life energy), regulation of Yin and Yang elements, and regulation of the blood stream and internal organ functioning. The result has a positive effect on the overall physical and mental condition.

The massage is performed by 20 rollers made of hard, but very smooth wood, with a unique shape that allows all the acupressure points to be massaged in a given position. The so-called massaging drum (rotor) consists of 20 of those rollers, and rotates in one direction, at a constant speed of 53 rpm. Immediate contact with the selected area leads to better nutrition of skin cells, thus improving their activity. The skin becomes more supple and pliable, and also firmer. Adipose tissue metabolism improves considerably; surface veins and lymphatic vessels empty faster, and metabolism in the skin, subcutaneous area and muscles improves as well. The above-mentioned therapeutic effect has a remarkable eliminating effect on the factors resulting in cellulite. The exercise also relaxes blocked muscle groups and accretions, softens scar tissue, makes subcutaneous layers firmer, reduces the volume of massaged body part, and eliminates cellulite.

Another favourable effect of massaging by Rolletic Original is the release of internal opioids, substances similar to morphine. These substances suppress pain, and bring about a feeling of relaxation, bodily pleasure and satisfaction. The therapeutic use of Rolletic has wide indication possibilities and an excellent effect. The method of treatment is safe, without side effects. However, certain principles have to be followed, and the massage itself has to be performed correctly. The principles include specifically a proper drinking regime (at all times, not just during the exercise), and appropriate diet. Furthermore, we recommend you use our exercise plan when massaging, as it has been designed by leading Czech physiotherapists, always in 50- to 60-minute courses, twice or three times a week. <http://www.youtube.com/watch?v=OYFEe2tQH2k>

The most suitable clothing is (elasticated) leggings, a sports T-shirt and socks. The massaged body parts respond spontaneously with a tickling sensation, followed by itching and warmth. These symptoms will disappear after 2 or 3 sessions. The massage is extraordinarily successful on the abdomen, hips and thighs. It is also recommended for new mothers and people with flabby skin after a slimming diet.

Rolletic Original – benefits you will get

From the user's prospective:

- bodyforming effects last for a long time, there is no „yo-yo effect“
- the price of the treatment with Rolletic Original is much lower than with most other products
- increasingly more women can afford to get Rolletic Original for a daily home use
- there is no need for assistance or supervision from other people when using it
- the effects of Rolletic treatment have been clearly proved by many years practice and feedback from thousands of users

From the salon owner's prospective:

- clients achieve obvious results so they keep coming back
- quick return of investment (ca. 50 days of operation)
- there is no need for assistance or supervision when using it; you can install more machines in your studio while having only one employee
- long durability (5 or more years with every day – all day use)
- minimum failure rate
- low electricity consumption
- no need for periodical technical maintenance

Rolletic Original – why it is better than its copies?

- **Unique shape of the rollers** for a perfect massage of every part – no need for infrared which other producers use to conceal the low effects of their rollers
- **Constant speed of rotation** for a perfect massage – any speed change is undesirable for this kind of massage
- **Top quality of used beech wood** and the way of wood working (high frequency drying process, varnish bath, etc.) - machining of high quality and thoroughness
- **Massive construction** and higher weight for a perfect stability during exercises
- **Silent vibrationless running**
- Exclusively top quality components – **Siemens engines, SKF bearings,...**
- nearly **zero failure rate**, no need for periodical technical maintenance
- classic design matching most interiors
- **Rolletic Original has been developed by leading Czech physiotherapists and dermatologists**, not just mechanical engineers
- Rolletic Original has passed **medical (clinical) testing**

Rolletic Original is never with infrared!

The genuine Rolletic Original machines never use infrared for the following reasons:

It is not possible to equip efficiently any of such massagers with infrared. Its rays nearly do not penetrate the rollers, thus their effect on human body is inconsiderable. Moreover, the rollers of Rolletic Original are so close to one another that hardly any light would penetrate at all. What other manufacturers are offering is not infrared but only a conventional red light (often by means of LED technology). This only brings an aesthetic effect and possibly can make the user feel a higher temperature while being massaged.

Rolletic Original has been developed by leading Czech physiotherapists so that its massaging rollers along with the drum diameter and constant spinning could work to best effect. The effects are so high that any supportive means, such as warm cosmetics or infrared, are not necessary. Conversely, they can bring harm to some users.

REREFENCES:

Jana Lhotska (Slender Life, Brno)

“I use Rolletic Original in my studio and I am very satisfied with it because it represents a professional device. Customers can see results after several treatments and that is why they keep coming back. What I appreciated most was the promptness of their after sales service – when a minor fault occurred, though it did not hinder the proper operation, the company sent for a technician who immediately sorted it out.”

Jan Julenyi (Anna Relax Centrum, Cookstown, Northern Ireland)

“From our experience, the immediate benefit of Rolletic Original consists in body revitalisation and the promotion of body circulation, thereby getting rid of fatigue and tightness. The invigorating feeling is multiplied by the loss of backache and arthralgia. To sum up, the benefit of Rolletic Original is that in a drugless and agreeable way it eliminates what we find unpleasant.”

Dana Rybarova (Brno)

“I used to attend a local studio for the Rolletic treatment, but due to the lack of time I decided to get one for home. For half a year, I have been taking exercise twice a week and I am convinced it helps me. My skin is smoother and generally I feel better. The waistline and hipline have also decreased.”

Lenka Smahelikova (Masaze Lenka, Vyskov)

“I am very satisfied with the Rolletic Original in our studio. The skin gets smoother and centimetres decrease. The effect is obvious, which is reflected in internet forums where 90% of Rolletic users praise it.”

Miriam Greksova (Bella studio Bratislava, Slovakia)

“Our clients enjoy using Rolletic Original as one of our fit machines related to the skin beauty effect. It genuinely smoothes and strengthens the skin and eliminates cellulite.” For more, see: <http://www.bellastudio.sk/rolletic.xhtml>

Jana Vasovcova (Prague)

“I bought Rolletic Original about 3 years ago. I use it especially after a hard and long day at work where I spend all day sitting at the table. That is why my whole body aches in the evening. Using Rolletic Original helps promote the blood circulation, stretches the loose skin and almost makes me forget what cellulite is. In addition, after 3 years using it still looks as good as new and there has never occurred any fault.”

Jana Povova – lymphatic therapist – 23 years experience in physiotherapy (Prague)

“I have been successfully using Rolletic Original for 8 years. I can confirm that Rolletic messages form the body, smooth and strengthen the skin and detoxify the organism. The average decrease of particular body lines (waistline, hipline, etc.) after about 10 hours amounts to 8 – 12 cm under condition that the users keep their fluid intake.”

Are you buying a genuine Rolletic Original?

First of all, make sure that you are buying a genuine Rolletic Original as it often happens that other machines mostly from Poland, Slovakia, Ukraine or Russia bear this name, too. Rolletic® is trademark protected, thus no other competing product can bear the name. Rolletic Original had been produced by Sentaco until the company closed down in 2009. Since 2010, it is exclusively produced by Beauty Systems. The latest models of Rolletic Original (since 2011) are also signed with a logo embroidered in the leatherette, by which you can easily recognise the most modern and technically sophisticated type manufactured by means of the latest technologies, e.g. rollers machined by high frequency drying process, etc.

Rolletic Original is always supplied with appropriate documentation (user's manual, exercise manual, CE declaration of conformity, warranty). Further, the distributor will give you a thorough training on how to use Rolletic Original properly.

Before it is offered for sale, every Rolletic Original is tested. The heart of the machine, i.e. the massage drum, is tested by 50 kg for the period of 4 hours. Upon passing this procedure, the drum gets its serial number. Subsequently, the drum is centred and positioned for a correct operation under load, thereby the later faults of the drum are eliminated. The Siemens engine (with SKF bearings) is also subjected to testing under load for 3 to 5 hours.

Upon the assembly of the whole machine, it is tested under load for 1 hour. Further possible faults of the machine have been eliminated by this testing. For instance, in 2012 there have not been any warranty claims at all.

Another important factor is the package and transportation of the machine. Rolletic Original is transported on a pallet where it is fixed. Possibly, it can also be stored in a wooden case with the walls of 12 mm.

Some of the differences between Rolletic Original and its competing products

The handles of Rolletic Original are flat with the overlap of 1-2 cm so they can be easily held. This is very important as most of the competing products are equipped with inclined, round handles without any overlap representing insufficient support points for users. Such designs are merely aesthetical, not practical.

Rolletic Original

Competing products

All of the metallic components of Rolletic Original are always galvanized which is not the case with competing products for the reason of price and competition fight.

All of the bearings in Rolletic Original are made by a premium producer SKF. They can be found in the engine, shafts, massaging drum, massaging rollers (each roller has 2 SKF ball bearings; there are 40 pieces of bearings in the drum in total). If any of competing machines uses bearings on its shafts, they are not made by SKF (financial reason). More often, the bearings on the rollers are replaced by bushings.

The carcass of Rolletic Original is made of 18 mm laminated boards while its main braces are made of beech balks. The inside of the carcass is lined with foam to prevent vibration and noise. All of the edges exposed to the user are covered with an ABS edge. The competing products are always made of thinner chipboards (12-14 mm) and the noise protection is usually not incorporated. Due to economy of material, the competing products are covered with leatherette all over the machine, including the areas which are easy to wear out.

Rolletic Original

Competing products

Rolletic Original has 20 rollers of a unique shape for perfect massaging of every part. The shape had been designed by leading Czech physiotherapists and tested for several years in hospitals in order to develop a perfect shape for the most effective massage. Most of the competing products have only up to 18 rollers of a smaller diameter for the reason of a lower production price. The competitors use various accessories (e.g. infrared, collagen, ionization, vibration, etc.) to make up for the lower efficiency caused by the unsuitable shape of rollers.

Rolletic Original

Competing products

Rolletic Original has the most sophisticated mounting of the rollers. Each roller has two pins and two SKF bearings, which ensures a long lifespan and high load capacity for the user. Most of the competing products use plastic bushings instead, which means that their lifespan and load capacity are not so high as well as their production costs.

Rolletic Original

The rollers are made of high-quality beech wood free of knots and seeds and with the perfect machining process including the unique high frequency drying process and varnish bath (3 layers). The rollers are never coloured. Most of the competing products do have those coloured in order to conceal the knots and seeds in lower-quality wood. This is cheaper for producers, but dangerous for providers because users can even get injured when taking exercise.

Rolletic Original has solid wooden chairs ensuring a good stability for massaging. The chair stretchers are also important. On the basis of individual users, they are used for massaging in particular positions. Most of the competing products have metal chairs without any stretchers, so they cannot be effectively adjusted for a given massage plan. Moreover, the competing chairs are narrow and unstable due to lower production costs.

Rolletic Original

Competing products

Rolletic Original has a constant speed of 50 rpm. The speed along with the rollers and the drum diameter have been tested and designed by Czech physiotherapists for the purpose of the best possible massaging effect. The competing products enable the change of revolutions, which is not desirable from the physiological point of view. Low revolutions do not start the flow of lymph (the effect of massage is low). High revolutions can harm (overflow of lymph).

Rolletic Original has a robust shape and a higher weight which is why it can be effectively used by users up to 150 kg of weight. The machine is very stable alongside the chair and the kneeling bench.

Rolletic Original Motor and controller

Rolletic Original is exclusively equipped with EMP Slavkov motors and SKF bearings. For the reason of production savings, and thus to the exclusion of quality, the competing machines prefer components of much lower quality, mostly made in China.

The load capacity of Rolletic Original is up to 150 kg. This is achieved by means of a very good and thorough machining and the world's top-quality components.

Rolletic Original is operated via an LCD controller made by Unitronics, an Israeli company, which prides itself on a nearly zero failure rate. Unlike most of the competing products that use solely English as an operating language, the controller of Rolletic Original includes software also in the Russian language.
