Android 4.4.2 (Kitkat) is the Operating System for your Touch Screen
Mobile Phone - Karbonn Titanium S6

INTRODUCTION

Thanks for choosing Karbonn Titanium S6, Dual SIM Android, 3G Tablet based on 1.30 GHz Dual Core Processor. This Mobile Phone is running on Android OS, v4.4.2 (Kitkat). If you'd like your tablet to live a long and fruitful life, please read this guide carefully and keep it for future reference. You never know when you might need it.

And don't worry if the pictures we use to demonstrate your tablet's functions look a little different from what you see on its screen. It's the functions that matter.

Table of Contents

1. *Safety*

1.1 Safety Precautions

⚠️ To use the tablet effectively and safely, please refer to the following information before usage.

SAR Value

- Your Mobile Phone model has been designed to compile with applicable safety requirements for exposure to radio waves. The radio wave exposure guidelines employ a unit of measurement called Specific Absorption Rate (SAR). The recommended SAR limit for mobile handset is 1.6 W/Kg averaged over a 6 minutes period and taken over a volume containing a mass 1g of human tissue.
- The highest SAR value for Titanium S6 is 1.41 Watt/Kg averaged over a 6 minutes period and taken over a volume containing a mass 1g of human tissue.
- Use Mobile Phone when the signal strength is good. Keep your calls short or instead use headset or send a text message. This advice applies especially to children, adolescents and pregnant women.
- If you are using a Bluetooth headset device, please make sure it has a low power emitter.

ROHS Declaration

Declaration of Conformity with the requirements of the e-waste Management Rules, 2011 (adopted by Notification S.O.1035 (E) of Ministry of Environment and Forests)

d. Hexavalent chromium (Cr6+) – not over 0.1% by weight;

e. Polybrominated biphenyls (PBBs) – not over 0.1% by weight;

f. Polybrominated diphenyl ethers (PBDEs) – not over 0.1% by weight.

1.2 Using your Mobile Phone safely

On The Road

Using a Mobile Phone while driving is illegal in many countries. Please follow local laws and drive safely at all times.

Near Sensitive Electronics

Don't use your Mobile Phone near sensitive electronic equipment – particularly medical devices such as pacemakers – as it could cause them to malfunction. It can also interfere with the operation of fire detectors and other automatic-control equipment.

For more information about how your Mobile Phone affects pacemakers or other electronic equipment, please contact the manufacturer or your local distributor.

Your Mobile Phone may cause interference when used near TVs, radios or automated office equipment.

While Flying

Your Mobile Phone can cause interference with aircraft equipment. So it's essential you follow airline regulations. And if airline personnel ask you to switch off your Mobile Phone, or disable its wireless functions, please do as they say.

In Hospital

Your Mobile Phone may interfere with the normal operation of medical equipment. Follow all hospital regulations and turn it off when you're asked to by posted warnings or medical staff.

At a Petrol Station

Don't use your Mobile Phone at petrol stations. In fact, it's always best to switch off whenever you're near fuels, chemicals or explosives.

Around Water

Keep your Mobile Phone away from water (or any other liquid). It's not a waterproof model.

Making Repairs

Never take your Mobile Phone apart. Please leave that to the professionals. Unauthorized repairs could break the terms of your warranty.

Broken Antenna

Don't use your Mobile Phone if the antenna is damaged, as it could cause injury.

Around Children

Keep your Mobile Phone out of children's reach. It should never be used as a toy and it might not be good for their health.

Original Accessories

Only use the original accessories supplied with your Mobile Phone or those

approved by the manufacturer. Using unapproved accessories may affect performance, make the warranty void, break national regulations on the use of mobile phones, or even cause injury.

Near Explosives

Turn off your Mobile Phone in or near areas where explosive materials are used. Always obey local laws and turn off your Mobile Phone when requested.

Emergency Calls

To make an emergency call your Mobile Phone must be turned on and in an area where there's network coverage. Dial the national emergency number and press 'send'. Explain exactly where you are and don't hang up until help has arrived.

Working Temperature

The working temperature for the Mobile Phone is between 0 Degree and 40 Degree Celsius. Please don't use the Mobile Phone outside the range. Using the Mobile Phone under too high or too low temperature might cause problems.

At very high volume, prolonged listening to a Mobile Phone can damage your hearing.

- Please check if it sets Call Barring.

3.8 Can't hear you

Please make sure that the Microphone is on and keep the Microphone near your mouth.

3.9 Short standby

Standby time relates to the settings, the device is possibly in bad signal.
When the device cannot receive signal, the device will search for the signal
station continuously which consumes much battery. Please move to the
place that signal is good or shut down your device.
There is problem with the battery, please change the battery.

3.10 Can't be charged

- Poor connect, check if the charger connection.
- Much dirty, wipe the device and the connector with clean and soft
  cloth.
- Charging under 0▯C or above 45▯C, please change the charging
  environment.
- Damage of the battery or charger, change it.
- If the above information cannot help you with the trouble, please
  record the model number, serial number and guarantee information
  of the Tablet and the detailed description of the problems you meet,
  then contact the local service or distributor.

4. *Maintenance*

- Use a dry soft cloth to wipe general dirt.
- Do not use a hard cloth, benzene or thinner to wipe the Mobile Phone, otherwise, the surface of the Mobile Phone will be scratched or could even result in the fading of color.

5. *Taking Care of your Device*

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your Tablet:

- Always keep the small parts of the device away from children.
- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface

of the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use indoor chargers.
