

iSport

Bluetooth Adapter for iPhone & iPod

Mega-impact makeover for your
Bluetooth music performance

Getting to Know iSport

Your new iSport Bluetooth Adapter enables you to listen to music on your iPhone or iPod wirelessly through bluetooth headphones. It enables complete music track controls with iPhone.

iSport works with any Bluetooth headphones, but when used with apt-X enabled Bluetooth headphones (such as Sportsband by JayBird) your Bluetooth music experience is enhanced dramatically with cleaner, clearer professional grade audio. Visit jaybirdgear.com/aptx for more.

Power on/off

iSport uses the power from your iPhone or iPod.

There is no power button, just plug it in.

You may need to unplug, and replug iSport after it has gone into sleep mode, alternatively, push the optional pair button.

Optional pairing button

iSport automatically powers on in pair mode when inserted into a new device. If after being idle and in standby mode, user can push this button to resume pair mode. Push for 7 sec to forget paired device.

LED Status

Blu rapid flashing: Pair mode

Blue flashing: Connected in SBC standard bluetooth mode

Blue double flashing: Connected in apt-X mode

Pairing

Pairing is the process of connecting iSport with your Bluetooth headphones. iSport remembers one paired device only. If you pair iSport with a second Bluetooth device later, you will need to re-pair the original headphones again.

To pair iSport with your Bluetooth headphones:

1. Turn on your iPhone or iPod.
2. Plug iSport into the bottom of the iPhone or iPod.
3. Your iPhone or iPod will authenticate with iSport automatically, this process will take a few seconds. After authentication, iSport will flash faster and enter into pairing mode
4. Put your Bluetooth headphones into pair mode (see your headphones user manual for instructions if needed)
5. iSport and your headphones will find each other and pair.
You can now listen to your music wirelessly.

If you want to pair with another device, you should turn off the original paired headphones first, and follow the above steps.

Trouble Shooting

If the connection between the iSport and headphones fails, it maybe due to one of the following reasons:

1. The iSport and headphones are too far apart (range is 10 meters or 33 feet)
2. You are outdoors or in a large open space where the signal cannot bounce of walls and ceilings to achieve the full 10 meter range.
Try having the devices closer
3. Your body is getting between the devices and causing interference (Bluetooth does not work well in water and your body is mostly water)
4. The headphones passcode is not one of the accepted codes (0000, 1111, 1234, or 8888)

If you experience any unexpected behavior, and music is not playing for you, restart iSport by unplugging from your iPhone or iPod, plug it back in and play a song. Wait a few seconds for reconnection. Alternatively, you can push the optional pair button for 7 seconds to reset the forget all paired devices.

Specs

Bluetooth version	Compliant with Bluetooth V2.x spec
Bluetooth profile	A2DP, AVRCP
Frequency response	2.4GHZ
Effective range	Up to 10m
Power Usage	Low power usage at ~22 mA during music streaming, low power standby and deep sleep mode.
Dimension	31*28*7mm
codec	apt-X (or SBC in the absence of apt-X enabled Bluetooth headphones)
apt-X specs	Compression Ratio 4:1 Audio Format 16-bit, 44.1kHz (CD-Quality) Data Rates 352kbps Frequency Response 10Hz to 22kHz Algorithmic Delay <1.89ms @ Fs 48KHz Dynamic Range 16-bit: >92dB THD+N -68.8dB
Temperature	Storage temperature: -10°C to 60°C Storage Supply Voltage: -0.4V to 3.6V Operating temperature: -10°C to 45°C Operating Supply Voltage: 3.0V to 4.2V

Notices

Keep product dry to avoid affecting the interior circuitry of the product.

Don't put the product in direct sunlight or place in hot areas.

High temperature will shorten the life of electronic device.

Don't expose to extreme temperatures, it may damage the internal circuit board.

Don't take the product apart, or the warranty will be voided.

Don't drop the product.

Don't use chemical or detergent to clean the product.

If the product is not working, contact JayBird support at jaybirdgear.com
