PEDALS

Description

The Mystical sustainer is a distortion pedal with true unique design that can bring the player the possibility of a true very low to very high gain all in one pedal.

The pedal was designed to answer rhythm playing but more than that a soloing playing , one you turn the gain knob up you will get more note clarity, more gain that can hold solo's and a true unique sound.

The pedal features Gain , Level (with allot of output) , Tone from lowing bass to screaming trebles and Fine turning for fine tuning of the trebles

Imagine you have a distortion pedal with a booster pedal before it just like many use when they are doing solo's, now Imagine this in one pedal with a press of a button.
