User Guide

Introduction

Thanks for buying the Targus Plug-N-Power Charging Station with USB Charging Ports. It simply turns any wall outlet into a mobile device charging station. This product is perfect to use in kitchens, bathrooms and garages, and mounts securely to any 2 socket AC outlet.

Charging Station

Normal Installation

Plug the Charging Station to a 2-socket AC wall outlet. Check AC blades are properly mounted in the socket.

Using the Charging Station

Specification

Electrical Rating: AC120V 15A 60Hz 1800Watts
Max. Peak Spike Current: 36000A
Max. Spike Voltage: 6KV
EMI/RFI Noise Filter: 150KHz to 100MHz
Operating Temperature: 0°C - +35°C
Storage Temperature: -20°C - +65°C

Screw Mounted Installation

Some wall outlet face plates have a center screw hole which can be utilized for a more permanent installation. While this is not necessary for normal use of the Charging Station, it offers a more secure form of mounting.

1. Remove the original screw in the center of the face plate, making sure to leave the face plate in place.
2. Install the Charging Station as indicated above for Normal Installation.
3. Using the long center screw that came with the Plug-N-Power Charging Station, screw the Charging Station into place with a philips head screwdriver.

Note: Compatible with most 5 volt tablets. Some tablets require the use of a USB charging dongle, available for free from Targus.com when you register your product.

Product Registration

Targus recommends that you register your Targus accessory shortly after purchasing it. To register your Targus accessory, go to:

<http://www.targus.com/registration.asp>

You will need to provide your full name, email address, country of residence and product information.

Warranty

Targus warrants this product to be free from defects in materials and workmanship for two years. If your Targus accessory is found to be defective within that time, we will promptly repair or replace it. This warranty does not cover accidental damage, wear and tear, or consequential or incidental loss. Under no conditions is Targus liable for loss of, or damage to, a computer or other device(s); nor loss of, or damage to, programs, records, or data; nor any consequential or incidental damages, even if Targus has been informed of their possibility. This warranty does not affect your statutory rights.

Regulatory Compliance

(applicable to products with electronic circuitry/parts only)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement Tested to Comply

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected;
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not authorized by the party responsible for compliance could void the user's authority to operate this product.
