

CAT. #787 — LIGHTWEIGHT PLASTIC STETHOSET®

- Comes complete with stethoset and Part B (most popular) attachment.
- An instant check as to the performance of a hearing aid can be made with this instrument.*
- Invaluable for parents testing of child's hearing aid before sending off to school each morning.
- Entire testing of hearing aid takes only 30 seconds.
- Body Aids may also be tested by detaching tubing and snapping receiver directly into socket.
- Unique swivel at base of stethoset permits adjustment for comfortable fit at all times.
- Ear tips easily removed for cleaning or replacement.
- To order Part B only please specify **CAT. #787B**.

*Performance check indicates whether aid is weak and/or distorted.

CAT. #787

CAT. #787B — PART B ATTACHMENT

PART B consists of Tubing, Male Snap-In-Attachment, Female Canal Tip and Earmold Receptacle. May be purchased separately as a replacement part. Overall length is 12". Part B may also be used by itself when used in conjunction with an Earmold. Grey section snaps into mold and other end attaches to Hearing Aid, or Canal Tip.

CAT. #787B

CAT. #787C — EXTRA LARGE ATTACHMENT

Used with **CAT. #787** and **CAT. #2196** Stethosets when Custom or Canal Aids have an unusually large size canal. (Comes complete with tubing and snap in end.) Overall length is 12".

CAT. #787-A — STETHOSET ATTENUATOR

This device provides 20 dB of attenuation. Easily snaps into place between the stethoset attachment and the Stethoset frame. Use with high power hearing aids to reduce the sound output for testing. Effectively reduces output by 25 dB, Use with high power hearing aids to reduce sound for testing.

CAT. #787A

CAT. #788 — UNIVERSAL TESTING STETHOSET KIT

Test any type Hearing Aid without having to order additional accessories.

This Universal Kit**comes complete with:**

CAT. #2953 — HEINE OPERATING OTOSCOPE SET

An otoscope for instrumentation under magnification. Both the lens and speculum can be swiveled. Ideal for use with nasal and spreadable specula.

- Swiveling lens and speculum. Clears the way for access and examination under magnification and illumination.
- Open construction. Ideal for instrumentation.
- XHL Xenon Halogen Technology. Extremely bright, white light.
- 2.5X lens in protective frame. Prevents scratching.
- The relative positions of light bulb and speculum can be fixed. Helps with instrumentation, easily returned to normal position.
- Connection system compatible with other manufacturer's handles when using the Twist Lock Handle.

**TWIST-LOCK**

All full-size Heine otoscopes and handles are available with “**Twist Lock**” connection for compatibility with other manufacturers.

CAT. #2340 — HOTCHKISS "BRITE LITE" OTOSCOPE

The Hotchkiss Otoscope new optical system triple condenses the light of the bulb's filament and produces brightness of illumination many times greater than other otoscopes. Referred to as the "Gun-type Otoscope" it carries its power supply (2 AA Cells) in the clip on the handle, which is easily removed for battery replacement.

- Each speculum is 60% larger than the preceding one, thus it gives greater selection of tip sizes in the smaller range, where size is more critical.
- Light emanates from the specula tip along the line of vision. The illuminated and viewed areas are one and the same.

CAT. #	ITEMS
#2340	Hotchkiss Otoscope Set
#2321	Otoscope Bulb
#2341	Rechargeable Unit with 2 AA Cells
#2322	Disposable Adult Specula (300/Box)

CAT. #3313H — WELCH ALLYN LUMI-VIEW™ PORTABLE BINOCULAR MICROSCOPE

The Welch Allyn Lumi-View Portable Binocular Microscope provides the optical properties of a binocular microscope in a portable and affordable instrument. It is the only instrument providing three-dimensional viewing and illumination into a small cavity such as the ear canal.

- Delivers three dimensional viewing into small cavities.
- 1.5X Magnification (2 Diopter) delivers excellent detail.
- Halogen illumination with reflector provides brighter whiter light.
- Provides magnification & bright light in ear canal, allowing for both hands to be free for cerumen removal, if desired.
- Available in two styles - **Headband style** for comfort and durability or **Spectacle style** (without lenses) which easily accepts prescription lenses or can be worn as is. Both styles (headband and spectacle) are available with either a direct plug in power cord or a portable rechargeable battery unit.
- The convenient rechargeable battery offers complete freedom of movement around the office. When completely charged the battery will last approximately 90-minutes if used continuously.
- All units come complete with an extra bulb, an assortment of five reusable specula, and an insufflation bulb.
- Ideal working distance is 7"- 15".

CAT. #3207-LED — WELCH ALLYN SOLID STATE PROCEDURE HEADLIGHT

The Solid State Procedure Headlight uses one of the most advanced lighting technologies. This headlight provides cool, bright, white light for procedures and examinations for well-defined illumination without the heat of Halogen lighting.

- Working Distance: 40cm (15.75").
- Spot Size Range: approx. 4cm (1.5") to 15cm (5.875") within working distance.
- Weight: 6 oz.
- Battery Run Time: 60 minutes on a full battery.
- Lamp Life: 10,000 hours.

CAT. #3073 — WELCH ALLYN SOLID STATE PORTABLE HEADLIGHT

The Solid State Portable Headlight illuminates precisely where it is needed, with cool, bright light that ensures comfort for both the patient and user. This headlight supplies bright, white, shadow-free light allowing one to see tissue characteristics without distortion. Rechargeable batteries housed in the headband make this a completely portable headlight.

- Lightweight: 4 ounces
- Soft terry cloth headband is comfortable to wear.
- Battery Run Time: 90 minutes on a full battery.
- Lamp Life: 10,000 hours.

CAT. #3701 — HEINE 3S HEADLIGHT

- Choose from 2.5X, 3.5X or 4.0X magnification.
- Ultra-bright 3S LED Headlight for powerful, coaxial illumination.
- Stepless light intensity control. Optimal brightness setting prevents reflection.
- Precision iris aperture adjustment. Small diameter is ideal for ENT.
- Uses mains or portable power supply. Integrated attachment option for HR/HRP.
- Binocular Loupes and Prism optics for Video adaptation.
- Micro-Absorption System for the Integrated Cooling Fan ensures quiet and vibration-free operation.
- Optional yellow filter reduces blue light. Avoids premature hardening of composites.
- Viewing Angle adjustable over a wide range.
- Multi-coated glass optics for maximum brightness.

Specifications:

Illumination: 50,000 Lux at a working distance of 250mm (9 7/8").

Color Temperature: 6,250 Kelvin.

LED Life: 50,000 hours operating life.

Spot Adjustment: 30mm (13/16") to 80mm (3 1/8") at 420mm (16 1/2") working distance.

Angle of Declination: Individually-adjustable for every examination.

Rheostat: Headband-mounted.

Operating Time: 10 hours with mPack & 4 hours w/mPack unplugged.

SINGLE USE EARTIPS (100/PACK)

These multi-size single use eartips are made from softer material for better attenuation from external noise and increased patient comfort. The multi-flanged design makes fitting size less critical for simplified ear canal assessment and fast eartip selection.

- Designed for OAE and TYMP screening.
- Sized from 3mm to 16mm.

CAT. #3128-282 — WELCH ALLYN™ AM 282 MANUAL AUDIOMETER

Welch Allyn's AM 282 Manual Audiometer offers cost-effective audiometric testing capabilities.

- Ideal for physician's office for screening audiometry.
- Wide intensity range: Increments of 5 dB steps.
- 11 frequencies: 125 Hz to 8000 Hz.
- Compact, lightweight design.
- Calibration storage for standard earphones.
- Optional insert phones.
- Tone Type: Continuous.
- Headset: Telephonics External Headset Earphones with Type 51 cushions (60 ohm impedance).
- Headband: Exerts a force between 4 and 5 N when the earphones are separated by 145 mm.
- Capacity: Minimum of 10 hours of power for either battery type with a Low Battery icon display.
- Set includes: Carrying case, Headset, Audiogram forms (1 pad of 50), User manual, Threshold audiometry card and Power plug/power supply.
- Power: Universal AC/DC line power and "AA" battery.
- Dimensions: 12.59" W x 8.76" D x 3.18" H.
- Weight: 2.55 lbs with batteries.

CAT. #	ITEMS
#3128-282	Complete set includes: Manual Audiometer, Headset, Carrying Case, Audiogram Form, User Manual, Threshold Audiometry Card and Power Source.
#3130	Response Hand switch
#2228	Audiocups
#3134	Replacement Audiogram Form (1 Pad of 50)

CAT. #3137-286 — WELCH ALLYN™ TM 286 AUTOTYMP

The Welch Allyn TM 286 AutoTymp provides flexible screening for tympanometry, acoustic reflex measurements and audiometry to meet your testing needs today and in the future. The TM 286 AutoTymp is lightweight and portable. It is designed to make detection and documentation of middle ear pathologies fast and accurate.

Tympanometry: 226 Hz

- Ear Canal Volume (ECV)
- Compliance Peak (cm³)
- Pressure at peak of the tympanogram (daPa)
- Gradient (GR) in daPa (width of the tympanogram)

The tympanograms and the following summary information are clearly shown on the crisp LCD screen once the test is complete. LEDs on the probe guide tester through the test sequence. All test results can be printed on the internal printer. The ASHA normal box can be shown as a guide on the display and printouts, if desired. A hand-held probe is provided with versions providing 226 Hz only measurements.

Tympanometry and Reflex:

Ipsilateral reflex measurements may be performed along with 226 Hz tympanometry. Available frequencies are 500, 1000, 2000 and 4000 Hz. All reflex results may be displayed and printed as:

- Reflex tracings and dB HL values
- Yes/No response

CAT. #3722-M — EARSCAN 3 MANUAL AUDIOMETER

The Earscan 3 Manual Audiometer allows you to select test frequencies and levels to meet your testing requirements. Settings are saved and can be changed at any time. Operator to patient communication is built in, allowing test instructions to be presented via the headset. Calibration mode is password protected ensuring integrity of data.

- Pure tone air conduction audiometer.
- Ultra portable, weighing less than 10 oz.; Large, easy to read LCD screen.
- Talk-over feature for communicating with test subject.
- 4 AA Batteries or AC powered (adapter included).

CAT. #3722-S — EARSCAN® 3 SCREENING AUDIOMETER

With the automatic screening function, simply set the frequencies and levels you want to test, and the audiometer will only test those specific frequencies and levels. The Earscan 3 is a fully programmable audiometer, allowing the entire testing procedure to be customized.

- Operator to patient communication is built-in, allowing test instructions to be presented via headset.
- Calibration mode is password protected to ensure the integrity of data.
- The high levels option allows for testing of patients with a more profound hearing loss.
- The dual headset option provides the ability to have two headsets calibrated to the same unit.
- Data can be transferred to a printer via RS-232 interface or to a PC via USB interface.
- Compatible with Seiko DPU-414 Printer (**CAT. #3723**)

CAT. #3703 — WELCH ALLYN® OAE HEARING SCREENER

The portable OAE Hearing Screener is a precise & objective tool to use for screening and hearing loss in newborns, infants, toddlers, pre-school and school-age children in just seconds. Requires minimal patient cooperation and gives fast, accurate results in 10 seconds.

- Simple printer interface for patient data documentation
- 10 test memory storage in device
- Can be fitted with variety of ear tip sizes

CAT. #3739 — FRYE® FP35 TOUCH PORTABLE HEARING AID ANALYZER

The Fonix FP35 Touch is a valuable tool for any hearing aid clinician. Within its sleek, compact design is the ability to check that hearing aids are functioning properly as well as verify the suitability of its amplification for a particular patient all with the convenience of touch screen control. The FP35 Touch also has excellent computer compatibility and can be controlled using a simple Windows-based interface from within NOAH.

- REM option is available.
- Composite and digital speech input signals.
- Visible speech; coupler targets.
- Test functionality of frequency-shifting hearing aids.
- Third octave analysis.
- Full-sized graphs, improved printing.

CAT. #3740 — FRYE® FONIX 8000 HEARING AID TEST SYSTEM

The FONIX 8000 Hearing Aid Test System is a direct descendent of the FONIX 7000 Hearing Aid Test System, prized by hearing health professionals the world over for its dependability, accuracy, and advanced testing capability. The new FONIX 8000 advances the science of hearing aid testing even farther with the introduction of the optional 8120 Polar Plot Sound Chamber.

- Polar plot testing option.
- Simultaneous mode, manual mode & program modes with pure tone signals from 200 Hz - 8,000 Hz in 100 Hz Increments.
- Automated test sequences can be purchased.
- Enhanced DSP test.
- Tests digital hearing aids with digital speech signal.
- Quick coupler measurements and real-ear measurements.
- New auto detect battery simulator pills.
- Advanced testing capability.

Please Note: The FONIX 7000 cannot be upgraded to the 8000.

CAT. #2228 — AUDIOCUPS

To utilize the full accuracy of an audiometer, threshold measurements must be made in quiet conditions. When a testing booth is not available, noise-excluding earphone shells, which completely enclose the outer ear, are desirable for precise testing. These noise-excluding enclosures which will fit most standard audiometer headphones.

- Permit accurate pure tone audiometry where noise is too high for un-shielded earphones.
- Can be fitted easily to any audiometer earphone using standard TDH 39 inserts.
- Complete freedom from threshold shift – no change in audiometer calibration.
- Subsequent periodic re-calibration can be adjusted w/out removal of inserts from AudioCups.

CAT. #3562 — E-SCOPE® II ELECTRONIC STETHOSCOPE

The E-Scope II Electronic Stethoscope is for Hearing Healthcare Professionals who wear hearing aids. The E-Scope II delivers dramatically improved sound quality making physical diagnosis faster and easier. Sounds produced are pure and clean, and murmurs and faint blows become easily distinguishable. It can also be used in a treadmill stress test. The slim-line design with volume and filter controls on the head allows it to be draped comfortably around the neck and operated easily by the user. The sound quality is exceptional with 64 gain positions.

- Designed to allow Hearing Healthcare Professionals to keep hearing aids in ears while wearing and using stethoscope.
- E-Scope II's jack accommodates headphones or direct audio input.
- Provides up to 50 dB of gain with 130 dB SPL maximum output.
- Lifetime technical support provided by manufacturer.
- Selector switch for heart and lung sounds.
- Runs for 4 months on standard AAA battery; 2 minute timer for battery conservation.
- Silhouette option available but not recommended due to limited success associated with the frequency response of a T-Coil verses the frequency response of the body sounds that remain of interest to the stethoscope user.
