Getting Started

What's included

Your Fitbit Flex Wireless Activity + Sleep Wristband box includes:

- Flex tracker
- Charging cable
- Wireless sync dongle
- 1 small and 1 large wristband

Flex tracker

Charging cable

Wireless sync
dongle

Wristbands

How to put on your Flex

Choosing your wristband

Your Flex comes with a large and a small wristband. Choose the wristband that fits most comfortably on your wrist.

If you choose the small wristband, please note you'll need to remove the clasp from the large wristband and put it into the small wristband.

Removing the clasp

Push the clasp out with one thumb from the inside of the wristband, then pull out the clasp.

Putting the clasp in securely

Insert the clasp into the wristband and press a few times with both thumbs to ensure that the clasp is flat and in line with the wristband.

NOTE: If there is a bulge on the inside of the band between the two inside prongs of the clasp, find a small object like a credit card to push it flat.

Inserting the tracker

Hold the tracker in your hand with the grey arrow facing up. Insert this end into the wristband, with the arrow pointing toward the holes in the wristband.

How to secure your wristband

1. Put on the wristband so the window of lights are closest to the outside of your wrist and facing you.
2. Align both ends of the wristband so they are directly overlapping each other with the clasp over the two holes that best fit your wrist.

3. Squeeze both the clasp and the wristband between your thumb and forefinger until you hear a click.

You'll know your Flex wristband is securely fastened if both ends of the wristband are fully inserted.

NOTE: If you're having trouble, try securing the wristband off your wrist to get a feel for how it securely clasps and then try again on your wrist.

Care and wearing tips

Keep the following tips in mind when caring for your Flex:

- Clean and dry the Flex regularly, particularly under the band.
- Wear your Flex band loosely enough to allow air circulation.
- Use skin care products sparingly on the areas of the wrist covered by the Flex.
- If you notice any signs of skin irritation or experience any discomfort, please discontinue use.

Setting up Fitbit Flex on a Computer

Mac and PC requirements

Software
Mac OS 10.5 or later
Internet Connection

Hardware
USB port

Software
Windows XP, Vista, 7, 8
Internet Connection

Hardware
USB port

Installing Fitbit Connect on a computer

Fitbit Connect is the software application that connects your Flex tracker to your Fitbit.com Dashboard. It is available to download at no cost from Fitbit.com.

NOTE: If you already have Fitbit Connect installed on your computer, you will need to download the latest version to set up your Flex.

Mac installation

1. Go to <http://www.fitbit.com/setup>.
2. Verify that Mac is highlighted and click the **Download Here** button below Flex.
3. Double-click the .dmg file in your Downloads folder.

NOTE: If the file does not appear on your desktop, search for “Fitbit Connect” using the Spotlight search feature.

4. Run the Fitbit Connect installation package by double-clicking **Install Fitbit Connect.pkg**.
5. Follow the onscreen instructions to complete setup.

PC Installation

1. Go to <http://www.fitbit.com/setup>.
2. Verify that PC is highlighted and click the **Download Here** button below Flex.
3. Go to your Downloads folder and double-click the **FitbitConnect_Win.exe** file.
4. Choose your language and follow the onscreen instructions.

Pairing to a computer

Once Fitbit Connect is installed on your computer, you can pair your Flex to your account. This will sync your data, allow you to manage device settings, and set goals.

Mac pairing

1. On the Menu Bar of your Mac, click the Fitbit Connect icon and choose **Open Main Menu**.

2. From the Main Menu, select **Set Up a New Fitbit Device**.
3. Account Setup:
 - a. Select **New to Fitbit** if you don't already have a Fitbit.com account.
 - b. Select **Existing User** to log into your existing Fitbit.com account.

NOTE: Only one Fitbit tracker can be paired to an account.

If you currently have another Fitbit tracker paired to your account and want to continue using it, choose **Don't Replace** to continue setup using a different email address.

Choose **Replace Tracker** to remove your other tracker from the account, and replace it with your Flex.

4. Enter or confirm your personal information and click **Next**. This information personalizes your Fitbit experience and improves the accuracy of your calorie burn and distance data. This personal information is, by default, only visible to your friends, but you can adjust your privacy settings from your Fitbit.com account to control what information is shared with others.
5. Choose **Flex** as the device you're setting up.
6. Follow the onscreen instructions to remove the Flex tracker from the wristband, charge, and reinsert the tracker into your preferred wristband.
7. Insert the wireless sync dongle and click **Next**.
8. Fitbit Connect will search for your Flex. Once found, the lights on your Flex will begin to blink. Tap the window of your Flex two times with your finger until it vibrates. If Fitbit Connect can't find your Flex, click **Not working** and follow the onscreen instructions for further help.

NOTE: If you experience trouble setting up your Flex, you can get support at <http://help.fitbit.com>.

9. Once Fitbit Connect shows that linking is complete, you **Next** to continue.
10. You're all set. Click **Go to Dashboard** to track your activity and configure your account settings.

PC pairing

1. In the Windows System Tray, right-click the Fitbit Connect icon and choose **Open Main Menu**.

2. From the Main Menu, select **Set Up a New Fitbit Device**.
3. Account Setup:
 - a. Select **New to Fitbit** if you don't already have a Fitbit.com account.
 - b. Select **Existing User** to log into your existing Fitbit.com account.

NOTE: Only one Fitbit tracker can be paired to an account.

If you currently have another Fitbit tracker paired to your account and want to continue using it, choose **Don't Replace** to continue setup using a different email address.

Choose **Replace Tracker** to remove your other tracker from the account, and replace it with your Flex.

4. Enter or confirm your personal information and click **Next**. This information personalizes your Fitbit experience and improves the accuracy of your calorie burn and distance data. This personal information is, by default, only visible to your friends, but you can adjust your privacy settings from your Fitbit.com account to control what information is shared with others.
5. Choose **Flex** as the device you're setting up.
6. Follow the onscreen instructions to remove the Flex tracker from the wristband, charge, and reinsert the tracker into your preferred wristband.
7. Once you've inserted the wireless sync dongle, click **Next**.
8. Fitbit Connect will search for your Flex. Once found, the lights on your Flex will begin to blink. Tap the window of your Flex two times with your finger until it vibrates. If Fitbit Connect can't find your Flex, click **Not working** and follow the onscreen instructions for further help.

NOTE: If you experience trouble setting up your Flex, you can get support at <http://help.fitbit.com>.

9. Once Fitbit Connect shows that linking is complete, click **Next** to continue.
10. You're all set. Click **Go to Dashboard** to track your activity and configure your account settings.

Wireless sync to a computer

Wireless syncing to Fitbit.com is automatic, as long as:

- Your computer is powered on, awake, and connected to the internet
- The wireless sync dongle is plugged in
- Fitbit Connect is installed and running

Your Flex tracker will sync whenever it is within 20 feet of your computer.

You can Force Sync your Flex by clicking on the Fitbit Connect icon, which is located by the time and date on your computer. Select **Sync Now** to start the force sync.

NOTE: If you experience any trouble syncing your Flex with your computer, you can visit <http://help.fitbit.com> for further help.

Setting up Fitbit Flex on a Mobile Device

Mobile device requirements

The Fitbit Flex is capable of setting up and syncing with select mobile devices that support Bluetooth 4.0 technology. To see if your mobile device is compatible with your Flex, visit <http://www.fitbit.com/devices>.

NOTE: If your mobile device is not compatible to sync via Bluetooth, you can still use the Fitbit App to view your data and track your progress, however you will need to complete setup using a Mac or PC.

Before you begin

Your Flex must be charged before you can set up on your mobile device.

1. Remove your Flex from the wristband it came in.
2. Plug your charging cable into a USB port on your computer.
3. Insert your Flex into the charging cable.

You can begin setup once your Flex displays four lights during charging.

Installing the Fitbit app

You can find the Fitbit app on the iOS App store or Google Play store by searching for “Fitbit.” If you already have the Fitbit app installed, check for available updates to make sure you have the latest version.

iOS pairing

Unlike most Bluetooth accessories, like headsets, your Flex must be paired directly through the Fitbit App, not through the Settings app on your iOS device.

1. Open the Fitbit App.
2. Create an account:
 - a. Select **Join Fitbit** if you don't already have a Fitbit.com account.

NOTE: Click **Log In** if you're an existing Fitbit app user. Only one Fitbit tracker can be paired to an account.

If you're replacing an existing tracker, tap **Account** > **Set Up a New Fitbit device**.

- b. Tap **Flex** as the device you're setting up.
 - c. Tap **Set up your Flex**. On the next few screens, enter your personal details. This information personalizes your Fitbit experience and improves the accuracy of your calorie burn and distance data. This personal information is, by default, only visible to your friends, but you can adjust your privacy settings on the Fitbit website to control what information is shared with others.
 - d. Enter your name and the email address and password you'd like to use for your Fitbit account.
3. Tap **All done!** and follow the instructions to remove the Flex tracker from the wristband and charge the device.
 4. Tap **I'm Ready** to start pairing your Flex.
 5. Once found, the lights on your Flex will begin to blink. Tap the window of your Flex repeatedly with your finger until it vibrates.
 6. Tap **Next** to finish setup and go to your dashboard.

NOTE: If you experience trouble pairing your Flex, you can get support at <http://help.fitbit.com>.

iOS syncing

Your Flex can sync directly to supported iOS devices via Bluetooth. To see if your iOS device is compatible with your Flex, go to <http://www.fitbit.com/devices>.

Syncing occurs automatically every time you open the Fitbit App, as long as Bluetooth is enabled in the iOS device Settings app.

Force sync

You can force your Flex to sync while the app is already open.

1. Open the Fitbit App.
2. At the top of the dashboard, tap **Flex**.
3. Tap **Sync Now**.

Real-time dashboard

You can use the Fitbit app to see your stats update in real time. Open the Fitbit app. Once your Flex syncs, the message “Connected to your Flex” will appear at the top of the screen. Take a few steps to see your stats update instantly.

All-day sync

The Fitbit app also supports all-day sync. This setting allows your Flex to sync with your iOS device while the Fitbit app is running in the background.

Tap **Account** and then **Flex** to toggle **All-Day Sync** on or off.

Android pairing

Unlike most Bluetooth accessories, your Flex must be paired directly through the Fitbit App, and not through your Android device's Bluetooth preferences.

1. Open the Fitbit App.
2. Account Setup:
 - a. Select **Get started** if you don't already have a Fitbit.com account.
 - b. Select **Log in** to log into your existing Fitbit.com account.

NOTE: Are you an existing Fitbit App user?

Only one Fitbit tracker can be paired to an account.

If you're replacing an existing tracker on your account press the **Menu button** > **Device Settings** > **Set up new device**. When prompted, tap **Replace** and skip to step 6.

3. Enter the email address and password for your Fitbit account and tap **Sign Up**.
4. Enter your personal details, then tap **Save**. This information personalizes your Fitbit experience and improves the accuracy of your calorie burn and distance data. This personal information is, by default, only visible to your friends, but you can adjust your privacy settings on the Fitbit website to control what information is shared with others.
5. Tap **Set up Now**.
6. Choose **Flex** and follow the onscreen prompts.
7. Tap **I'm Ready** to begin searching for your Flex.
8. Once found, the lights on your Flex will begin to blink. Tap the window of your Flex repeatedly with your finger until it vibrates. If you have trouble finding your Flex, tap **Try Again** and follow the onscreen instructions for help.
9. Once the Fitbit App shows the message "You're all set!" you can tap **Go To Dashboard** to complete setup.

NOTE: If you experience trouble pairing your Flex, you can get support for this and other questions at <http://help.fitbit.com>.

Android syncing

Your Flex can sync directly to supported Android devices via Bluetooth. To check if your Android device is compatible with your Flex, see <http://www.fitbit.com/devices>.

Syncing will occur automatically when you open the Fitbit app, as long as Bluetooth is enabled in both the Android device settings and the Fitbit app. To turn on Bluetooth in the Fitbit app, tap the **Menu button** > **Device Settings** > check **Use Bluetooth**.

Tap to sync using Near-Field Communication (NFC)

Your Flex is equipped with Near-Field Communication (NFC) technology, allowing it to interact with Android devices that support this feature.

With the screen on and unlocked, tap your Android device to the top of your Flex. You may need to adjust the location based on where your Android device's NFC chip is located.

After a moment, the Fitbit app will automatically open. If you haven't opened the Fitbit app recently, launching will automatically sync via Bluetooth.

Force sync

Tapping the Sync icon on the top-right of the menu will initiate a force (manual) sync with your Flex and Fitbit.com.

You can also force sync your Flex through the Devices menu.

1. Open the Fitbit App.
2. Tap the **menu** button.
3. Tap **Device Settings**.

NOTE: Make sure Use Bluetooth is **checked**.

4. Tap **Flex**.
5. Tap the **Sync Now** icon.

Background Sync

The Fitbit app also supports background sync. This setting allows your Flex to sync with your Android device while the Fitbit app is in the background, or minimized.

To turn on background sync, tap the **menu** button > **Device Settings** > choose your **Flex** > tap **Background Sync**.

Using your Flex

Wearing your Flex

Your Flex is designed to be most accurate when worn on your wrist. If you need help securing your wristband, see [How to put your Flex on](#).

Wearing on your Dominant vs. Non-dominant wrist

To get the most accurate reading from your Flex, you can configure whether you are wearing the wristband on your dominant or non-dominant wrist.

NOTE: Your dominant wrist is that which you use for most day-to-day activities, e.g.; writing, washing dishes, throwing a ball, etc.

To configure this setting:

1. Log in to Fitbit.com.
2. Click the **gear** in the top-right corner of the Dashboard.
3. Click **Settings**.
4. Click **Device Settings** on the left sidebar.
5. Under Dominant Hand choose the correct setting.

NOTE: Changes to this setting will not appear until you sync your Flex.

Using your Flex in wet conditions

Your Flex can be worn while you are in the shower or working out. It is sweat-proof, rain-proof, water resistant, and can be submerged in water up to ten meters.

LED indicator lights

Your Flex features a display that consists of 5 LED indicator lights. The lights behave differently depending on what the tracker is doing.

Goal tracking

The indicator lights illuminate as you hit 20% increments towards your goal. Tap your Flex to see your progress. When you reach your goal, Flex will celebrate by buzzing and flashing its lights.

Sleep mode

When you tap your Flex rapidly for one or two seconds to enter sleep mode, it will vibrate and display two slowly dimming lights. During sleep mode, two blinking lights alternate. After you tap your Flex rapidly to exit sleep mode, it will vibrate and flash all five lights three times and then display a spinning light pattern.

Charging

While your Flex is charging, an indicator light will pulse to show the battery level every few seconds. Each indicator light represents progress towards the total charge. When the Flex has charged completely, all 5 indicator lights will blink.

Updating

If an update fails to complete, your Flex's LED indicator lights may cycle back and forth repeatedly, from left to right, and your Flex may no longer respond to taps, charging, or resets.

Alarms

When a silent alarm goes off, the Flex vibrates and the center light flashes.

Battery life and power

Battery life

Your Flex comes equipped with a rechargeable lithium-polymer battery.

With normal use, your Flex should last about five days before needing a charge. You can check the level of your battery by logging in to Fitbit.com and clicking on the gear icon on the top-right corner of the page.

Charging your Flex

To charge your Flex, plug the charging cable into the USB port on your computer. Remove the tracker from the wristband, and insert it into the charging cable, with the LED indicator lights facing up.

The LED indicator lights will progressively illuminate on your Flex as it charges. Each light represents 20% of the maximum charge. Once all five lights pulse in unison, your Flex will be fully charged. Charging completely can take up to three hours.

Memory

When you sync your Flex, your activity data is uploaded to your Fitbit.com Dashboard. Your Flex holds detailed minute-by-minute information for the most recent 7 days, and up to 30 days of daily activity summaries.

Your recorded data consists of steps taken, calories burned, distance traveled and active minutes.

Sync your Flex regularly to have the most detailed data available to view on your Fitbit.com dashboard.

NOTE: Your Flex starts tracking your goal for the next day at 12:00AM for the time zone selected in your personal settings on your Fitbit.com account. You can adjust your time zone at <http://www.fitbit.com/user/profile/edit>.

This does not delete the previous day's data: that data will be uploaded to your Fitbit.com dashboard the next time you sync your Flex.

What Fitbit Flex tracks

Your Flex tracks:

- Steps taken
- Calories burned
- Distance traveled
- Very Active Minutes
- Time asleep
- Number of times awoken

Setting goals with Flex

Your Flex is designed to track your progress towards one specific goal that you define on your Fitbit.com dashboard. Goals can be set for steps taken, calories burned, or distance traveled.

To choose the specific goal you want to track:

1. Log in to your Fitbit.com dashboard.
2. Click the gear icon in the top-right corner of the page.
3. Click **Settings**.
4. Click **Devices**.
5. Under Daily Goal Progress, choose the goal you would like to track.
6. Sync your Flex to send the new goal to your tracker.

NOTE: You can only select one goal to track at a time, but you can change this goal or its value at any time on your Fitbit.com dashboard.

Once you've chosen which goal you want to track, you can set a specific value for that goal on the Fitbit.com Dashboard page or using the Fitbit app for mobile.

Checking your goal progress

When you tap your Flex twice with your finger, the LED indicator lights will show how much of your goal you've accomplished.

Each fully lit indicator represents 20% of your total goal. A blinking light shows the current segment of the goal you're working on.

In the example below, two lights are solid and the third is blinking. This means you've achieved between 40% and 60% of your overall goal.

When you reach your goal, your Flex will vibrate and flash the LED indicator lights to celebrate.

Tracking sleep with Flex

Your Flex can track the hours you sleep, as well as your activity during sleep to help you understand your sleep quality.

To enter sleep mode, tap your Flex rapidly for one to two seconds. Your Flex will vibrate and display two slowly dimming lights to indicate that sleep mode has begun.

NOTE: During sleep mode, your Flex will not display goal progress when you tap twice. Instead, it will alternate two blinking lights, back-and-forth, to indicate that you are in sleep mode.

When you wake up, tap your Flex rapidly for one to two seconds to exit sleep mode. Upon exiting sleep mode, your Flex will vibrate and flash all five LED indicator lights.

If you forget to put your Flex into sleep mode, you can always enter your sleep time at <http://www.fitbit.com/sleep>. After creating a record, you will be able to view your sleep efficiency.

Tracking sleep on your mobile device

You can track your sleep using the Fitbit App on your mobile device. If you use your device as an alarm, the sleep tracking feature will still operate if the Fitbit App is not on your screen.

To track sleep on your iOS device:

1. Open the Fitbit app
2. Tap the sleep tile on the dashboard.
3. Tap the **+ button** in the top-right corner
4. Tap **Begin Sleep Now**

To track sleep on your Android device:

1. Open the Fitbit App
2. Tap the **menu** next in the top-left corner of the app
3. Tap **Sleep**
4. Tap the **+ button** in the top-right corner
5. Tap **Begin Sleep Now**

If you minimize the Fitbit app by pressing the home button, your sleep will continue to be tracked. When you wake up, just open the Fitbit app again, tap **I'm Awake**, then tap **View Summary** to see a summary of your sleep.

Silent Alarms

Your Flex gently vibrates to wake or alert you with its Silent Alarm feature. You can set alarms using your computer or a compatible mobile device.

Silent Alarms can be configured to recur every day, or on particular days of the week.

You can set up to eight alarms on your Flex.

NOTE: Setting multiple alarms may diminish the battery life of your Flex.

Setting silent alarms from a computer

You can set silent alarms from your computer by using the Fitbit.com dashboard.

1. Log in to your Fitbit.com dashboard.
2. Click the gear icon in the top-right corner of the page.
3. Click **Settings**.
4. Click **Silent Alarms**.
5. Click the **Add Alarm** button.
6. Enter the time you want the alarm to alert you.
7. Choose how often you want the alarm to occur:
 - a. Once – Your alarm will alert you at the specified time, and not repeat.
 - b. Repeats – Choose which days you want this alarm to repeat every week.
8. Click **Save**.

Your new alarm will be synced to your Flex the next time you sync your tracker.

NOTE: If you want to sync the alarm immediately, open Fitbit Connect and select **Sync Now**.

Setting silent alarms from an iOS device

To set silent alarms using the Fitbit app for iOS, Bluetooth must be enabled in your iOS Settings app.

Your iOS device also must support wireless sync. To see if your device is supported, go to <http://www.fitbit.com/devices>.

1. Open the Fitbit app.
2. Tap **Account**.
3. Tap **Silent Alarms**.
4. Tap **Set a New alarm**.
5. Set the time by adjusting the click-wheel.
6. If applicable, tap the days of the week you want this alarm to repeat. (for example, at 7:00 AM, every weekday)
7. Tap **Save**.
8. Sync your tracker to ensure that the alarm information is sent to it.

Your iOS device will now sync the alarm to your Flex.

NOTE: Make sure your Flex is nearby in order to sync your alarm. To force sync the alarm to it, tap **Account** > **Flex** > **Sync Now**.

Setting silent alarms from an Android device

To set silent alarms using the Fitbit app for Android, Bluetooth must be enabled in your Android device settings, as well as the Fitbit app Devices screen.

Your mobile device also must support wireless sync. To check if your device is supported, see <http://www.fitbit.com/devices>.

1. Open the Fitbit App.
2. Tap the **menu** button.
3. Tap **Device Settings**.
4. Choose **Flex**.
5. Tap **Silent Alarm**.
6. Tap **Add a new alarm**.
7. Tap **Next**.
8. Tap **Add a new alarm**.
9. Tap the **time** to enter a time.
10. If you prefer, tap the **Repeats** checkbox and tap the days of the week you want this alarm to repeat.
11. Tap **Done**.
12. Tap the **Sync tracker to save alarms** button.

NOTE: Make sure your Flex is nearby in order to sync your alarm. To Force Sync the alarm, tap the **menu button** > **Device Settings** > choose **Flex** > tap the **Sync Now** icon.

Dismissing silent alarms

Your Flex will vibrate and the LEDs will illuminate when your silent alarm goes off. This notification will repeat three times or until dismissed. You can dismiss the alarm by tapping a few times after the vibration has stopped.

You'll know your alarm has been dismissed when one light appears in the middle of your Flex's display, then slowly fades. If you do not dismiss the alarm, your Flex alarm will repeat in nine minutes.

Your Fitbit.com Dashboard

Browser requirements

Browser	Mac Version	Windows Version
 Apple Safari	5.0.5 and higher	Not Supported
 Google Chrome	12 and higher	12 and higher
 Microsoft Internet Explorer	Not Supported	8 and higher
 Mozilla Firefox	3.6.18 and higher	3.6.18 and higher

Using your dashboard

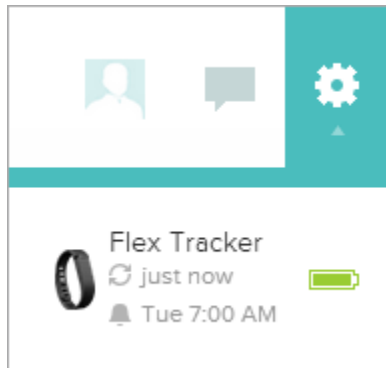

Fitbit provides you with a free online tool to help track, manage, and evaluate your fitness progress.

When you log into Fitbit.com, you will automatically be taken to your dashboard. Your dashboard shows an overview of your progress towards your goals, as well as graphs with historical data.

Logging food, activities, and sleep

From your dashboard, you can launch individual log pages to keep track of your food, activities, sleep, and other custom trackers.

Device info

You can see a quick preview of your tracker's last sync, battery level and upcoming alarms if you click on the gear icon in the top-right corner of the page.

Managing your Flex from fitbit.com

Manage your tracker from Fitbit.com by clicking the **gear** icon in the top-right corner of the page, clicking **Settings**, and choosing **Devices** from the left sidebar.

The Device Settings screen allows you to change:

- **Daily Goal Progress:** Choose which of the goals you want your Flex to display when checking your progress. You can edit the value of this goal from the Fitbit.com Dashboard, or your mobile device using the Fitbit App.
- **Dominant Hand:** Choose which wrist you wear your Flex on to get the most accurate data readings. More information on this topic is located [here](#).
- **Sleep Tracking:** Set the sensitivity of your sleep tracking by changing this setting. The Normal setting is sufficient for most people. If you are a sound sleeper, you can choose Sensitive to capture the smallest movements of your body.

You can manage silent alarms by clicking **Silent Alarms** from the left sidebar.

NOTE: You must sync your Flex in order to apply any changed settings to your tracker.

Updating Fitbit Flex

Fitbit may release free updates for your Flex. You can update your flex using Fitbit Connect on your computer, or the Fitbit app on your mobile device.

It is recommended that you keep your Flex updated. The latest feature enhancements and product improvements are made through updates.

NOTE: Updating your Flex can take up to five minutes and requires a minimum battery level. We recommend that you charge your Flex prior to updating, or while the update is in progress.

Updating Flex on a computer

To update your Flex on a Mac or PC.

1. Click the **Fitbit Connect icon** near the time and date.
2. From the **Main Menu**, choose **Check for device update**.
3. **Log in** to your account using your Fitbit.com credentials.
4. Fitbit Connect will now look for your Flex.

NOTE: Make sure your wireless sync dongle is plugged in. You can make your Flex easier to find by tapping it twice to wake it up.

5. If an update has been found for your Flex, Fitbit Connect will display a progress bar indicating that the update is in progress. Keep your Flex close to your computer while you perform the update.
6. When the update completes, Fitbit Connect will display, "You're all set!"

If you have trouble updating your Flex on a computer, see <http://help.fitbit.com>.

Updating Flex on an iOS device

Your Flex can be updated using the Fitbit app for iOS, if your iOS device is compatible with the Wireless Sync feature. To see if it is compatible, go to <http://www.fitbit.com/devices>.

1. Open the Fitbit app.
2. Tap your tracker name at the top of the app dashboard. You'll be taken to your tracker's device settings page.
3. Tap **Sync Now**.
4. If a device update is available, you will see the option to update. If your tracker is already up to date, "**Update Available**" will not be an option on your mobile device.

NOTE: Make sure your Flex remains near your iOS device while finding and updating it. You can make your Flex easier to find by tapping it twice to wake it up.

When the update completes, the Fitbit app will say, “You’re all set!”

If you have trouble updating your Flex with the Fitbit app for iOS, see <http://help.fitbit.com> for more information.

Updating Flex on an Android device

Your Flex can be updated using the Fitbit app for Android, if your Android device is compatible with the wireless sync feature. To see if it is compatible, go to <http://www.fitbit.com/devices>.

1. Open the Fitbit app.
2. Tap the **Menu** button.
3. Tap **Device Settings**.

NOTE: Make sure Use Bluetooth is **checked**.

4. Choose **Flex** from the menu.
5. If there is an update available, tap the **Update Available** button at the top of this screen.

NOTE: Make sure your Flex remains near your Android device while finding and updating it. You can make your Flex easier to find by tapping it twice to wake it up.

6. When the update completes, the Fitbit app will say, “You’re all set!”

If you have trouble updating your Flex with the Fitbit app for Android, see <http://help.fitbit.com> for more information.

Fitbit Flex General Info & Specifications

Sensors and motors

Your Flex uses a MEMS 3-axis accelerometer that measures your motion patterns to determine your calories burned, distance traveled, steps taken, and sleep quality. Flex also contains a vibration motor, which allows it to vibrate when alarms go off.

Size and weight

	Length	Width	Weight
Small wristband (incl. tracker)	5.5 - 6.9 in 140 - 176 mm	0.6 in 13.99 mm	13.4 grams
Large wristband (incl. tracker)	6.3 - 8.2 in 161 - 209 mm	0.6 in 13.99 mm	14.6 grams

Environmental conditions

Operating Temperature	-4° to 113° F (-20° to 45° C)
Non-operating Temperature	-22° to 140° F (-30° to 60° C)
Water Resistant	Device is water resistant, and can be submerged up to 10 meters.
Maximum Operating Altitude	30,000 feet (9,144 m)

Regulatory and Safety Notices

Model Name: FB401

USA: Federal Communications Commission (FCC) Statement

This device complies with FCC part 15 FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

FCC Warning

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device meets the FCC and IC requirements for RF exposure in public or uncontrolled environments.

Canada: Industry Canada (IC) Statement

IC Notice to Users English/French in accordance with RSS GEN Issue 3:

This device complies with Industry Canada license exempt RSS standard(s).
Operation is subject to the following two conditions:

1. this device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada RSS standard exempts de licence (s). Son utilisation est soumise à Les deux conditions suivantes:

1. cet appareil ne peut pas provoquer d'interférences et
2. cet appareil doit accepter Toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement du dispositif

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

FCC ID XRAFB401

IC ID 8542A-FB401

EU (European Union)

Declaration of Conformity with Regard to the EU Directive 1999/5/EC

Fitbit Inc. is authorized to apply the CE Mark on Flex, Model FB401, thereby declaring conformity to the essential requirements and other relevant provisions of Directive 1999/5/EC.

Compliant with the standard R&TTE 99/CE/05

Conforme à la norme R&TTE 99/CE/05

Other

אישור התאמה 51-37156

אין לבצע כל שינוי טכני בחלק המודולארי של המוצר.

“ 해당 무선설비는 전파혼신 가능성이 있으므로 인명안전과 관련된 서비스는 할 수 없습니다. ”

- 사용 주파수 (Used frequency): 2402 MHz-2480 MHz
- 채널수 (The number of channels): 40
- 공중선전계강도 (Antenna power): 0.4 dBi
- 변조방식 (Type of the modulation): Digital
- 안테나타입 (Antenna type): Horizontal
- 출력 (Output power): 2.19 mW/MHz E.I.R.P.
- 안테나 종류 (Type of Antenna): PCB

KCC approval information

- 1) Equipment name (model name) : 무선데이터통신시스템용 특정소출력무선기기 FB401
- 2) Certificate number : MSIP-CRM-XRA-FB401
- 3) Applicant : Fitbit, Inc.
- 4) Manufacture: Fitbit, Inc.
- 5) Manufacture / Country of origin: P.R.C.

Safety Statement

This equipment has been tested to comply with safety certification in accordance with the specifications of EN Standard: EN60950-1:2006 + A12: 2011.

Disposal and Recycling Information

The symbol on the product or its packaging signifies that this product has to be disposed separately from ordinary household wastes at its end of life. Please kindly be aware that this is your responsibility to dispose electronic equipment at recycling centers so as to help conserve natural resources. Each country in the European Union should have its collection centers for electrical and electronic equipment recycling. For information about your recycling drop off point, please contact your local electrical and electronic equipment waste management authority or the retailer where you bought the product.

Le symbole sur le produit ou sur son emballage signifie que ce produit à la fin de sa vie doit être recyclé séparément des déchets ménagers ordinaires. Notez que ceci est votre responsabilité d'éliminer les équipements électroniques à des centres de recyclage afin d'aider à préserver les ressources naturelles. Chaque pays de l'Union européenne a ses centres de collecte et de recyclage pour le recyclage des équipements électriques et électroniques. Pour plus d'informations ou trouver un centre de recyclage, contactez votre commune ou le magasin où vous avez acheté le produit.

- Do not dispose of the Flex with household waste.

- Batteries are not to be disposed of in municipal waste stream and require separate collection.
- Disposal of the packaging and your Flex should be done in accordance with local regulations.

For additional information on disposal and recycling, including contact details of a distributor in your region, please visit <http://help.fitbit.com>

Pour plus amples renseignements sur le recyclage, y compris les coordonnées d'un distributeur dans votre région, visitez <http://help.fitbit.com>
