Network Card Installation

Please follow the following instructions to install your new PCIe ExpressCard wireless network card:

	1. Please insert the wireless network card into an empty PCIe ExpressCard slot of your computer. You can insert the card when the computer is power off or on. *(Don't use force to insert the card into PCIe ExpressCard slot; if you feel it get stuck, remove it and flip the card upside down, and then try again).*
	2. The following message will appear on your computer, click *'Cancel'.*
	3. Insert device driver CDROM into the CD/DVD ROM drive of your computer, and execute 'Setup.exe' program in 'Driver' folder. Please read the end user license agreement and click 'I accept the terms of the license agreement' and 'Next' to accept license agreement.
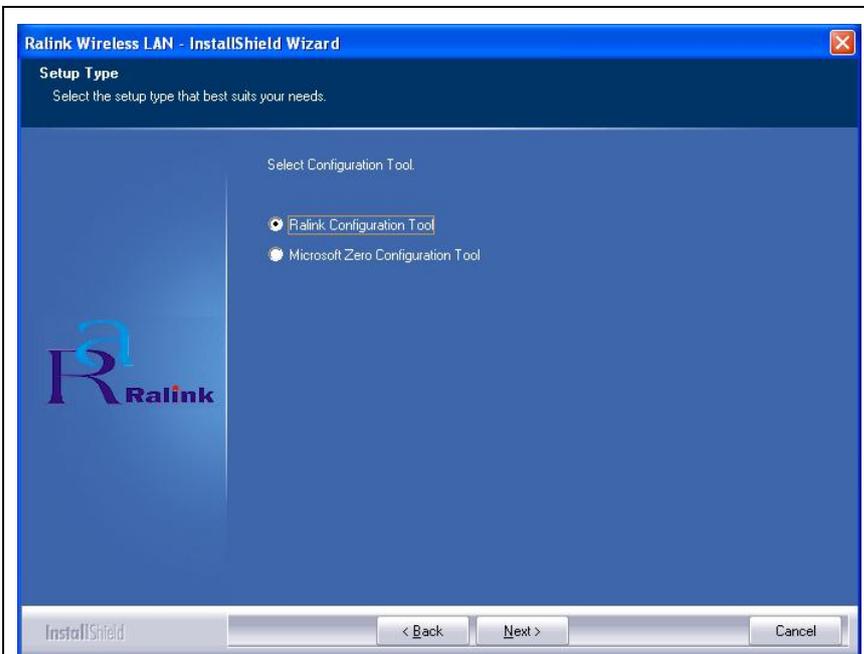

|	
	4. You can choose the configuration tool used to configure the wireless network card here. It's recommended to select 'Ralink Configuration Tool', which provides fully access to all function of this wireless network card. If you prefer to use the wireless configuration tool provided by Windows XP or Vista, please select 'Microsoft Zero Configuration Tool', then click 'Next'.
	5. Please select 'Optimize for WiFi mode' for wireless compatibility, then click 'Next'. If you want to enhance wireless performance, please select 'Optimize for performance mode'. However, wireless compatibility is not guaranteed in this mode. Please refer to user manual for details of performance mode. **If you see 'Found New Hardware' message again, please ignore it and wait.**
	6. When you see this message, please click 'Finish' to complete the driver installation process.
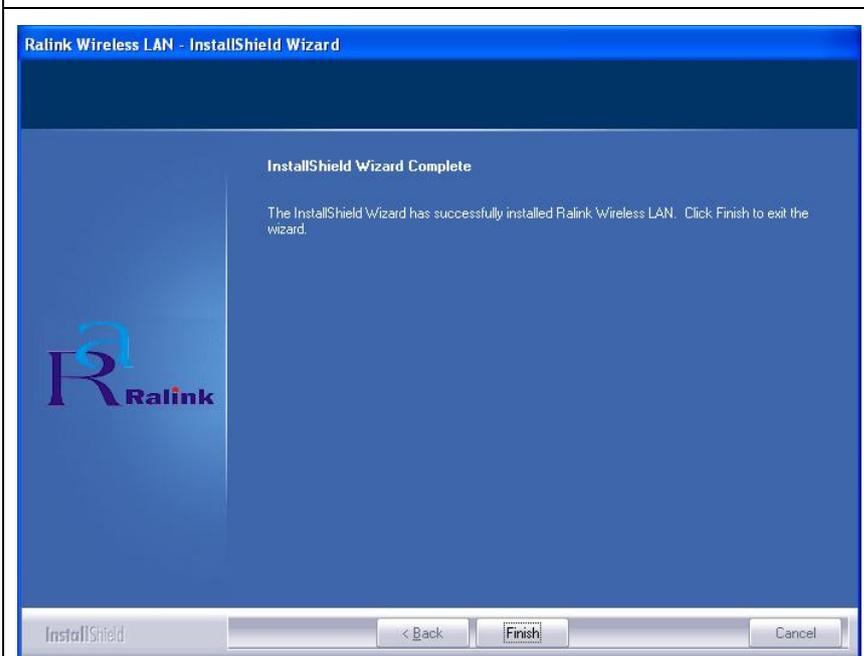

Connect to Wireless Access Point

Using Configuration Utility to Connect to Wireless Access Point

|	
	1. After installation is complete, wireless configuration utility will be shown as an icon at the lower-right corner of your windows desktop. Please click the icon by right mouse key, and select 'Launch Config Utilities'.
	2. Configuration utility will scan for wireless access points automatically, and all found access points will be displayed. Please select an access point you wish to connect, and click 'Connect'. If the wireless access point you want to connect does not show here, please click 'Rescan'
	3. If the wireless access point uses encryption, you have to input WEP passphrase or WPA preshared key. Please ask the owner of the wireless access point you want to connect, and input the correct passphrase / preshared key here, then click 'OK'. If the value you inputted here is wrong, you will not be able to connect to wireless access point. ***Authentication type is selected automatically, please don't change it.***
