

ComfortSense™

TOUCHSCREEN THERMOSTAT

*advanced control
for your great indoors*

HOME COMFORT SYSTEMS
Innovation never felt so good.™

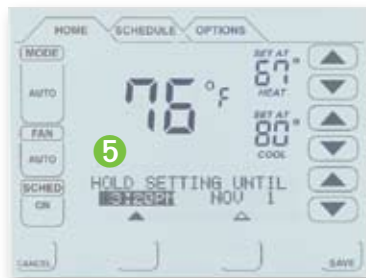

All the comforts of home at your fingertips.

There's no place like home, especially when the air inside suits your comfort level. But if you can't see the air or touch it, how can you put your finger on it? Lennox' new ComfortSense™ thermostat makes it so simple!

With its intuitive touchscreen operation and flexible programming options, the ComfortSense thermostat is easy to use and designed to enhance your family's comfort—and your heating and cooling system's performance. The ComfortSense thermostat helps you conserve energy, too, and that can reduce utility costs.

Easy to read. Even easier to use.

- 1 **Large, easy-to-read touchscreen display** – Soft blue backlight with adjustable brightness and real-time clock
- 2 **Unique, tabbed interface** – User-friendly, file folder-type tabs allow for easy navigation
- 3 **Program schedule touchfield** – Select ON and the system follows the schedule; Select OFF and the system allows you to keep the same temperature until you decide to change it or resume the schedule
- 4 **Outdoor temperature display** – Makes it easy to check the current temperature outdoors, so there's no need to wait for the local weather on TV, radio or the Internet
- 5 **Temporary temperature change** – Allows you to pause the schedule for just a few hours or a few days, and to set the exact date and time you want the schedule to resume

So easy, you don't really need an instruction manual.

- 1 Programming mode** – Simply press the *SCHEDULE* tab to begin programming; the *EDIT* button, *NEXT* button and *ARROWS* are used to select and enter your desired settings

Day or night – your ComfortSense™ thermostat stays on the job, keeping the temperature just how you want it.

- 2 Flexible programming options** – Select temperature settings for a full week, a work-week-and-weekend combination, or for individual days of the week – based on your family’s schedule
- 3 Event programming** – Program your thermostat for two or four events per day, selecting ideal temperatures for the time you wake up, leave the house, return home and go to sleep

It thinks of everything so you don't have to.

- 1 Auto adjust time settings** – *When this function is on, your thermostat automatically adjusts for the change from daylight saving time to standard time; date function also adjusts for leap years*

You're always on time, because the ComfortSense™ thermostat's real-time clock automatically adjusts for daylight saving time and leap years.

- 2 Reminders** – The *OPTIONS* screen allows you to select from a series of service and parts replacement *REMINDERS* that are then clearly displayed on the *HOME* screen
- 3 Contact Information** – When it's time for service, a screen display tells you how to reach your local Lennox dealer

The ComfortSense thermostat keeps your indoor air quality systems, like Humiditrol® and PureAir™, performing effectively and efficiently.

ComfortSense™ TOUCHSCREEN THERMOSTAT

Your link to whole-home comfort

A ComfortSense™ thermostat functions as the command center for Lennox® heating, cooling and indoor air quality systems.

- Works with any Lennox furnace (oil, gas or electric)
- Works with any Lennox air conditioner
- Dual-fuel capable
- Alerts you when it's time for routine service or parts replacement
