## Section 1: Getting Started

---

This section explains how to start using your Samsung r211 phone by activating your service, setting up your Voicemail, or getting an understanding of how this manual is put together.

### Understanding this User Manual

The chapters of this manual generally follow the same order as the menus and sub-menus in your phone. A robust index for quick reference to most features begins on page 101.

Also included is important safety information that you should know before using your phone. Most of this information is near the back of the manual, beginning on page 73.

### Notes and Tips

Throughout this manual there is text that is set apart from the rest. These are intended to point out important information, quick methods for activating features, to define terms, and more. The definitions for these methods are as follows:

- **Notes** — Explain alternative options within the current feature, menu, or sub-menu.
- **Tips** — Provide quick or innovative methods for performing functions related to the subject at hand.
- **Important** — Points out important information about the current feature that could affect performance, or even damage your phone.

### Text Conventions

This manual provides condensed information about how to use your phone. To make this possible, the following terms and icon appear in place of repeatedly-used procedural steps:

- highlight** Use the Navigation key (  ) to move a highlighting effect onto a menu item or screen item of interest.
- select** After “highlighting” a menu item or screen item, press the **OK** key (  ) to launch, access, or save a highlighted menu item or screen field of interest.
- Used in place of “select” in long “drill down” procedure steps.

---

**Example:** Select **Settings** → **Call Settings** → **Call Answer**.

---

### Installing the Battery

---

**Note:** Your phone comes packaged with a partially charged rechargeable standard Li-Ion battery and travel adapter.

---

---

**Important:** You must fully charge the battery the first time you use your phone, otherwise you could damage the battery.

---

1. Insert the top end of the battery first, matching the gold contacts on the top end of the battery to those inside the phone.

2. Press the bottom end of the battery down into the phone.
3. Place the battery cover over the battery.

4. Slide the cover upward into place.

### **Remove the Battery**

---

**Important:** You must unplug the Travel Adapter (if it is connected) before removing the battery from the phone during charging to avoid damage.

---

1. If your phone is on, press and hold the  key to turn off the phone.
2. Press the battery cover at point (1) and slide the cover toward the bottom end of the phone.

3. Lift the battery cover (2) up and away from the phone, bottom end first.

- Lift the battery (3) up and away from the phone, bottom end first.

## Charging the Battery

Your phone is powered by a rechargeable standard Li-Ion battery. Only use Samsung-approved charging devices and batteries. Samsung accessories are designed to maximize battery life. **Use of other accessories may invalidate your warranty and may cause damage.**

### Use the Travel Adapter

The travel adapter included with your phone is a convenient, light-weight charger that rapidly charges your phone from any 120/220 VAC outlet.

- Plug the large end of the Travel Adapter into a standard 120 VAC or 220 VAC wall outlet.

---

**Note:** For connection to an electrical supply not located in North America, you must use an adaptor of the proper configuration for the power outlet. Use of the wrong adapter could damage your phone and void your warranty.

---

- Insert the smaller end of the Travel Adapter into the charger/accessory connector on the right side of your phone.

---

**Important!** You must unplug the adapter before removing the battery from the phone during charging to avoid damage.

---

### **Low Battery Indicator**

The battery indicator (  ) in the upper-right corner of the display indicates power level. Monitor the battery strength and ensure your battery is adequately charged.

Three bars (  ) indicate a full charge.

An empty battery icon (  ) indicates a near empty battery.

A blinking empty battery icon (  ) and a tone sounding indicate you have two to three minutes before the battery is too low to operate the phone.

If you continue to use your phone without charging its battery, the phone will shut down.

### **Activating Your Phone**

If necessary, contact your Wireless Carrier and follow their instructions for obtaining service. We suggest that you read this manual to fully understand the services your phone supports.

### **Turning Your Phone On**

- ▶ Press and hold  until the display lights.

---

**Note:** As with any other radio-transmitting device, do not touch the antenna while using your phone as this can affect call quality and can cause the phone to operate at a higher power level than is necessary.

---

- The phone begins searching for a network signal.
- Once the phone finds a signal, the time, date, and day appear in the bottom of the display.
- You're now ready to place and receive calls.

---

**Note:** If you are outside of your carrier's coverage or roaming area, the No Service icon (  ) appears at the top of the phone's display. If you cannot place or receive calls, try later when service is available, or at another location.

---

### **Turn Your Phone Off**

- ▶ Press and hold  for two or more seconds. Your phone powers off.

---

**Note:** If your phone is on and you press  for less than one second, the phone will not power off. This prevents your phone from being turned off accidentally.

---

### **Setting Up Your Voicemail**

Voicemail allows callers to leave voice messages, which can be retrieved any time.

---

**Note:** Once your Voicemail account has been set up, you can use the Voicemail folder (under the Message menu) to view details of voice messages in your Voicemail box.

---

1. In standby mode, press and hold the **1 @ #** key or enter your own mobile number and press **SEND** to dial Voicemail.
2. Follow the prompts in the new user tutorial to setup your mail box.

### ***Listen to Voicemail***

- ▶ In standby mode, press and hold the **1 @ #** key or enter your own mobile number and press **SEND** to dial Voicemail. After connecting, you will hear your voice greeting. You are prompted to enter your password.

## Section 2: Understanding Your Phone

This section outlines some key features of your phone. It also describes the screen format and the icons that will be displayed when the phone is in use.

### Features of Your Phone

- If you enter an incorrect character, briefly press  to backspace (and delete) the character.
- To erase the entire sentence, press and hold .
- To back up one menu level, briefly press .

### END Key

- Press and hold the **END** key (  ) to turn on your phone.
- Briefly press  once to disconnect a call.
- Press  to return to standby mode from any menu, or to cancel the last input.

## SEND Key

The **SEND** key (  ) is used to answer calls, dial calls, and to recall the last number(s) dialed, received, or missed.

- Press  once to answer calls.
- Enter a number and briefly press  to make a call.
- In standby mode, briefly press  to display a list of recent calls to and from your phone.
- In standby mode, press  twice to call the most recent number.
- Press  to pick up a waiting call. Press  again to switch back to the other call.

## Navigation Key

Use the directional keys on the Navigation key (  ) to browse menus, sub-menus, and lists. In standby mode, each directional key also acts as a shortcut to launch applications.

## Understanding the Display Screen

1. The top line of your phone's display contains icons that indicate network status, battery power, signal strength, connection type, and more.

2. The center portion of the display shows information such as call progress information, messages, and applications.
3. The bottom line of the display shows current soft key functions. The sample screen shows that pressing the Left soft key (  ) will display the **Settings** screen, pressing **OK** (  ) will display the Main Menu, and pressing the Right soft key (  ) will show the Contacts **Find** screen.

## Display Screen Icons

Your r211 phone can show you definitions of the icons that appear on the top line of the display.

To access the Icon Glossary:

- ▶ In standby mode, press  , then select **Tools & Settings** → **Settings** → **Phone Info** → **Icon Glossary**. A list shows of the icons that can appear on the top line of the displays.

## Backlights

Backlights illuminate the display and the keypad. When you press any key or open the phone, the backlights come on. They go off when no keys are pressed within a period of time set in the

### Backlight menu.

---

**Note:** During a phone call, the display backlight dims and turns off after 7 seconds to conserve battery power, regardless of the **Backlight** setting. (For more information, refer to “*Backlight*” on page 61)

---

## Your Phone's Modes

### Call Answer Mode

You can choose to answer a call by pressing any key except  or , or by pressing only the  key. (For more information, refer to “*Call Answer*” on page 63)

### Input mode

Input mode determines how you enter text, numbers, and symbols. While at any text entry screen, press the Left soft key () , then choose the input mode from the pop-up menu using the Navigation key.

Optional input modes are **T9 Word**, **Abc**, **ABC**, **Symbols**, and **123**. (For more information, refer to “*Entering Text*” on page 26)

---

**Tip:** You can cycle between **T9 Word**, **Abc**, and **123** by repeatedly pressing and holding the  key until the phone beeps.

---

### Lock Mode

When the phone is in Lock Mode, restrictions are placed on phone use. You can receive calls and messages, but cannot place outgoing calls (except for emergency numbers) until you unlock the phone. Lock Mode also restricts access to menus and the Volume key. Unlock your phone by entering the lock code when prompted. (For more information, refer to “*Change Lock*” on page 67)

## Standby Mode

Standby mode is the state of the phone once it has found service and is idle. The phone goes into standby mode:

- After you power the phone on.
- When you press after a call or from within a menu.

In standby mode, you will see the time, day, and date as well as all phone status icons.

### Place Calls in Standby Mode

1. While in standby mode, enter a phone number, and press  to place a call.
2. Press  to return to standby mode.

### Receive Messages in Standby Mode

You can receive messages in standby mode. An alert tone sounds and a notification message appears in the display when a new message arrives. The following call message options appear:

- **View Now** — This selection allows you to view the messages now.
- **View Later** — This selection allows you to view the messages at a later date.

Highlight the desired viewing option and then press .

## Talk Mode

You can place and receive calls only when your phone is on. While in a call your phone is in talk mode. Press the **Options** soft key to display a list of menu options. (For more information, refer to “*In-Use Menu*” on page 18.)

### Speakerphone Mode

To share a call with other people nearby, place your phone in Speakerphone Mode by pressing the **Options** soft key and selecting **Speaker On** during the call.

---

**Caution!** Keep the phone away from you ear while in Speakerphone Mode. (For more information, refer to “*Responsible Listening*” on page 82)

---

To disable Speakerphone Mode, press **Options** and select **Speaker Off** or end the call.

### Silent Mode

Silences the tones your keypad makes when you press a key.

To enter Silent Mode:

- ▶ In standby mode, press and hold . “**Entering Silent Mode**” briefly appears in the display and your phone returns to standby mode.

### To exit Silent Mode:

- ▶ While in Silent mode and standby mode, press and hold . “Exit Silent Mode” briefly appears in the display and your phone returns to standby mode.

### **Vibrate Mode**

While in Vibrate Mode, your phone does not ring to indicate incoming calls or alarms, it vibrates instead.

### To enter Vibrate Mode:

- ▶ In standby mode, repeatedly press the Volume key () down until “Vibrate” appears in the display.

---

**Note:** The Volume key is on the left side of phone.

---

### **Adjust the Ringer**

In standby mode, press  up or down.

1. In standby mode, press  up or down to set the call ringer volume as desired.

Options are:

- Ringer Off
- Vibrate
- Low
- Low/Medium
- Medium
- Medium/High
- High
- Vibrate/High

When you are satisfied with the setting, press **SET**. Your phone returns to standby mode.

You can also enter the **Volume > Voice Calls** sub-menu by pressing **MENU → Tools & Settings → Settings → Sound Settings → Volume → Voice Calls**. Use the Volume key () on the left side of your phone to adjust the ringer volume setting.

The Vibrate icon () appears in the display when the phone is in Vibrate mode. The Vibrate/Ring icon () appears in the display when the phone is in Vibrate/High mode.

### **Keypad Lock**

You can avoid accidental dialing and/or phone feature activation by locking the keypad when not using your phone.

### To Lock the Keypad:

- ▶ In standby mode, press and hold  until **Keypad is locked!** pops up in the display.

To Unlock the Keypad:

1. In standby mode, press the **Unlock** soft key. Press **\* to unlock** pops up in the display.
2. Press . **Keypad is unlocked!** pops up in the display.

## Section 3: Call Functions

---

This section explains how to make or answer a call. This section also describes the features and functionality associated with making or answering a call.

### Making a Call — Number Entry Dialing

1. With the phone on, enter the number you wish to call using the keypad.
2. Press  to place the call.

### Dialing Emergency Numbers

You can dial any of the numbers 911, \*911, or #911 to place an emergency call.

If you dial 911, \*911, or #911 and press , your phone dials the emergency number 911, automatically.

---

**Important:** Emergency number 911 is hard-coded into your phone. You can dial this number almost any time, even when the phone is locked or restricted.

If you call 911 an audible tone is heard and an Emergency prompt appears in the display for the duration of the call.

---

---

**Important:** Because of various transmission methods, network parameters, and user settings necessary to complete a call from your wireless phone, a connection cannot always be guaranteed. Therefore, emergency calling may not be available on all wireless networks at all times.

---

---

**Important:** DO NOT depend on this phone as a primary method of calling 911 or for any other essential or emergency communications.

---

### Manual Pause Calling

When you call automated systems (like banking services), you are often required to enter a password or account number. Instead of manually entering the numbers each time, you can store the numbers in your Contacts along with special characters called pauses.

To manually call a number with pause(s) without storing it to your Contacts:

1. Enter the number you wish to call.
2. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
  - **2-Sec Pause** — A 2-second pause after which dialing resumes.
  - **Wait** — A hard pause (waits for input from you).

3. Highlight the desired pause option.
4. Press the **OK** soft key to include the highlighted pause in your number sequence.
5. Press  to call the number.

## Making a Call — Contacts Dialing

After you store phone numbers and contact names in your phone's Contacts list, you can dial any Contacts entry without having to remember and enter the entire phone number.

To dial a Contacts entry:

1. In standby mode, press **MENU** → **Contacts** → **Find**. The Contacts **Find** screen appears in the display.
2. Use the keypad keys to enter the first few letters of the name of a Contacts entry you want to call. (For more information, refer to “*Entering Text*” on page 26)
3. Highlight the Contacts entry you want to dial.

To dial the Default Number for this Contact:

4. Press .

---

**Tip:** You can select any number stored in a Contacts entry as the Default Number. (For more information, refer to “*Editing an Existing Contact Entry*” on page 33.)

---

To dial a number other than the Default Number:

5. After highlighting the desired Contacts entry, press the **VIEW** soft key. The **View Contact** screen appears in the display.
6. Highlight the particular number you want to dial, then press .

## Making a Call — Speed Dialing

You can store phone numbers and contact names in your phone's Contacts list. Speed Dialing lets you quickly and easily dial any contact in your Contacts list by using that contact's Speed Dial number in the list. You can assign and change Speed Dial numbers for your Contacts. (For more information, refer to “*Speed Dial Numbers*” on page 37)

### One-Touch Dialing

Speed Dial numbers 002 through 009 are One-Touch dialing numbers. You can call the Contacts phone numbers assigned Speed Call numbers 002 through 009 by pressing and holding a single key.

---

**Example:** For location number 003, press and hold  until the name and number appear in the display and the number is dialed.

---

## Two-Touch Dialing

Speed Dial numbers 010 through 099 are Two-Touch dialing numbers.

---

**Example:** For location number 013, briefly press **1.0.2**, then press and hold **1.0.2** until the name and number appear in the display and the number is dialed.

---

## Three-Touch Dialing

Speed Dial numbers 100 through 999 are Three-Touch dialing numbers.

---

**Example:** For location number 113, briefly press **1.0.2**, briefly press **1.0.2** again, then press and hold **1.0.2** until the name and number appear in the display and the number is dialed.

---

## Pause Dialing From a Contacts Entry

- If you speed dial a contact that contains (two-second) P pause(s), simply wait for the pauses to pass and the dialing to complete.
- If you speed dial a contact that contains (hard) W pause(s), wait for the appropriate prompt(s) from the number you are calling (credit card number, bank account number, and so on) and enter the appropriate response(s).

## In-Use Menu

You can access a number of menus and features while in a call.

1. While in a call, press the **Mute / Unmute** soft key to disable/enable the microphone.
2. While in a call, press the **Options** soft key. The following options pop-up in the display:
  - **Message** — Display the **Messages** menu.
  - **Contacts** — Display the Contacts **Find** screen.
  - **Recent Calls** — View your **All Calls** log.
  - **Send DTMF** — Send your phone number as DTMF tones to the other person on the call.
  - **Voice Privacy** — When set to **Enhanced**, the phone sounds an audible beep when you loose privacy (encryption) on a CDMA connection.
  - **Location** — Turn your GPS location on or set GPS location for emergency calls only.
  - **Speaker On / Off** — Enables/disables Speakerphone mode.
3. With the In-Use Menu showing, do one of the following:
  - Select a menu option to open the highlighted menu or to activate the highlighted feature.
  - To exit the In Use menu, press **CLEAR**.

## Answering a Call

Your phone notifies you of a call in the following ways:

- A ring tone sounds and/or your phone vibrates (Your phone provides: seven ring volume settings including 1- beep, Vibrate, or Silence All, and/or different ring types to distinguish callers.)
- A phone number (unless blocked by the caller) and a name appear in the display (If the caller's number and name are stored in your Contacts list).
- If the caller can't be identified, **Call from unavailable#**, **Call from restricted number**, or no number appears in the display.

Your phone continues to notify you of the call until one of the following events occurs:

- You answer the call.
- You ignore the call.
- The calling party ends the call.
- The call is sent to voicemail.

## Answering an Incoming Call

- ▶ Press . The ring tone and/or vibration stops and the caller's voice can be heard in the earpiece.

---

**Tip:** You can set your phone to answer calls automatically or when you press any key but . (For more information, refer to "Call Settings" on page 63)

---

## Rejecting a Call

When you reject an incoming call, the call is immediately forwarded to your voicemail.

- ▶ During an incoming call, press the **Ignore** soft key. The caller is immediately forwarded to your voice mail.

---

**Tip:** You can mute the ringer to ignore an incoming call by pressing the **Quiet** soft key.

---

## Adjusting the Call Volume

In standby mode, repeatedly press the Navigation key Up or Down until the desired **Voice Calls** level appears in the display, then press the **SET** soft key.

## Calls Log

The Calls log retains information about Outgoing, Incoming, and Missed calls. You can also view times for your last call and the time totals for all calls.

## Review the Calls Log

1. In standby mode, press **MENU** → **Calls**. The following Calls log options appear in the display:
  - **Outgoing Calls**
  - **Incoming Calls**
  - **Missed Calls**

- **All Calls**
  - **Call Timer**
  - **Data Counter**
2. Select the desired Calls log. A list of calls appears in the display.

---

**Note:** In cases where there is a Contacts match for a Calls log entry, the name associated with the number appears in the display instead of the number.

---

The following subsections describe the various Calls log options.

### **Outgoing Calls**

Your phone retains information about the last 90 outgoing calls and stores them in the Outgoing Calls log. You can review the Outgoing Calls log for the time and date of a call, as well as other information.

---

**Tip:** To quickly view your most recent calls, briefly press  in standby mode. Up to 270 of your most recent outgoing, incoming, and missed calls appear in the display.

---

1. In standby mode, press **MENU** → **Calls** → **Outgoing Calls**. A list of your outgoing calls appears in the display.

2. Highlight a call entry, then press the **OPEN** soft key to view further information about the call.
3. Press the **Msg** soft key to send a text message to the number shown in this outgoing call record.
4. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
  - **Save** the phone number in this outgoing call record to a Contacts entry (New or Existing).
  - **Details** — Contacts entries only — Shows details of the Contacts entry you called.
  - **Erase** this outgoing call record. (If this is a recent call, it will no longer appear in the Recent Calls list.)
  - **Lock / Unlock** this outgoing call record.
  - **Erase All** outgoing call records.
  - **View Timer** for outgoing call records.
5. Highlight the desired option, then press the **OK** soft key to perform the highlighted option's function.

### **Incoming Calls**

Your phone retains information about the last 90 incoming calls and stores them in the Incoming Calls log. You can review the Incoming call log for the time and date of the call, as well as other information.

1. In standby mode, press **MENU** → **Calls** → **Incoming Calls**. A list of your incoming calls appears in the display.
2. Highlight a call entry, then press the **OPEN** soft key to view further information about the call.
3. Press the **Msg** soft key to send a text message to the number shown in this incoming call record.

  - **Details** — Contacts entries only — Shows details of the Contact who called you.
  - **Erase** this incoming call record. (If this is a recent call, it will no longer appear in the Recent Calls list.)
  - **Lock / Unlock** this incoming call record.
  - **Erase All** incoming call records.
  - **View Timer** for incoming call records.
5. Highlight the desired option, then press the **OK** soft key to perform the highlighted option's function.

### ***Missed Calls***

Your phone retains information about the last 90 missed calls (calls that were never answered) and stores them in the Missed

Calls log. You can review the Missed Calls log for the time and date of the call, as well as other information.

1. In standby mode, press **MENU** → **Calls** → **Missed Calls**. A list of your missed calls appears in the display.
2. Highlight a call entry, then press the **OPEN** soft key to view further information about the call.
3. Press the **Msg** soft key to send a text message to the number shown in this missed call record.
4. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
  - **Save** the phone number in this missed call record to a Contacts entry (New or Existing).
  - **Details** — Contacts entries only — Shows details of the Contact who called you.
  - **Erase** this missed call record. (If this is a recent call, it will no longer appear in the Recent Calls list.)
  - **Lock / Unlock** this missed call record.
  - **Erase All** missed call records.
  - **View Timer** for missed call records.
5. Highlight the desired option, then press the **OK** soft key to perform the highlighted option's function.

## All Calls

You can access calls from the **Outgoing Calls**, **Incoming Calls**, and **Missed Calls** logs individually, or you can use the **All Calls** option to access all calls from all call logs.

1. In standby mode, press **MENU** → **Calls** → **All Calls**. A list of all of your calls appears in the display.
2. Highlight a call entry, then press the **OPEN** soft key to view further information about the call.
3. Press the **Msg** soft key to send a text message to the number shown in this call record.
4. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
  - **Save** the phone number in this call record to a Contacts entry (New or Existing).
  - **Details** — Contacts entries only — Shows details of the Contact who called you.
  - **Erase** this call record. (If this is a recent call, it will no longer appear in the Recent Calls list.)
  - **Lock / Unlock** this call record.
  - **Erase All** call records.
  - **View Timer** for this call record.
5. Highlight the desired option, then press the **OK** soft key to perform the highlighted option's function.

## Call Timer

View the duration of your last call, total calls, and calls made during the life cycle of your phone using the Call Timer feature.

---

**Note:** Call Timer is not for billing purposes.

---

1. In standby mode, press **MENU** → **Calls** → **Call Timer**. The following options appear in the display:
  - **Last Call** — View the duration of your last call.
  - **Home Outgoing** — View the durations of your outgoing calls.
  - **Home Incoming** — View the durations of you incoming calls.
  - **Roaming Calls** — View the durations of your roaming calls.
  - **All Calls** — View the duration of all calls on your phone since the last reset.
  - **Last Reset** — View the date and time of the last reset of call timers.
  - **Lifetime Calls** — View the lifetime counter of all calls since service was initiated. (The only option is to Reset All, which resets all of the other timers. Lifetime call records cannot be reset.)
2. Use the Navigation key to scroll through the counters.
3. Press **CLR** to exit the menu.

## Data Counter

Use Data Counter to view the amount of data that has been sent or received (or a total of both) using the data services that your phone supports, such as Access Shop. The Data Counter can be a helpful tool for monitoring data usage, especially if your service agreement has specified limits.

1. In standby mode, press **MENU** → **Calls** → **Data Counter**. The following options appear in the display:
  - **Transmit** — View the amount of data (in kilobytes) that your phone has transmitted since last being reset.
  - **Received** — View the amount of data (in kilobytes) that your phone has received since last being reset.
  - **Total** — View the amount of data (in kilobytes) that your phone has transmitted and received since last being reset.
  - **Last Reset** — View the last date and time the counters were reset.
  - **Lifetime Data Counter** — View the amount of data sent/received since service was activated. (The only option is to Reset All, which resets all of the other counters. Lifetime data counter records cannot be reset.)

## Roaming

### What is Roaming?

Roaming lets you use your phone when you travel outside of your Wireless Provider's coverage area. The Roaming icon (  )

appears in the top line of the display when Roaming is active, and extra charges may apply when making or receiving calls.

Some features may be unavailable while roaming. Roaming also consumes additional power from the battery requiring more frequent recharging. Contact your Wireless Provider for more information about Roaming.

### How Roaming Works

System Select lets you set roaming preferences if you move in and out of your home network. The following roaming options are available:

- **Home only** — Your phone is available for normal operation only in the designated coverage area.
- **Automatic** — Your Wireless Provider's Preferred Roaming List (PRL) of networks is used to acquire service. If no preferred networks are found, any digital system is acquired.

---

**Note:** For more information, refer to “System Select” on page 69

---

## Section 4: Menu Navigation

---

This section explains the menu navigation and keypad shortcuts for your phone.

### Menu Navigation

Access the menus and sub-menus in your phone using the Navigation key (  ) and soft keys (  or  ), or use a shortcut.

1. In standby mode, press the **MENU** key (  ). The Main Menu appears in the display.

---

**Note:** More than one menu may appear in your display. This setting can be modified in the **Display > Menu Style** menu. (For more information, refer to “*Menu Style*” on page 60)

---

2. Use the Navigation key to browse through the menus.
3. Press  to access a desired menu or sub-menu.
4. Press the **Back** soft key or the **CLR** key (  ) to return to the previous menu.

### Navigate Using Menu Shortcuts

You can also access menus and sub-menus using menu numbers. To select a menu option, just press the number key that corresponds with the number shown with the desired menu

option. In this way, you can reduce the number of key presses needed to drill down through your phone’s menus.

---

**Example:** Pressing  ,  (for **Tools & Settings**),  (for **Settings**),  (for **Sound Settings**),  (for **Ringer Type**),  (for **Voice Calls**),  (for **My Ringtones**) to reach a list of available ringtones is much shorter than repeated use of the Navigation key to highlight each option followed by pressing .

---

### Quick Search Method

For information on enabling Quick Search, see “*Quick Search*” on page 70.

1. In standby mode and with Quick Search enabled, press the first few numeric keys that correspond to the letters of the menu option or sub-menu title.

---

**Example:** To search for “Inbox” you would enter **462**.

---

2. Press the Down navigation key. A list of menu titles that begin with letters corresponding to the number keys you pressed appears in the display.

3. Highlight the searched for menu or menu item, then press

## Navigation Key Shortcuts

In standby mode, press a Navigation key to launch the key's corresponding application in the pattern shown here.

## Section 5: Entering Text

---

This section outlines how to select the desired text entry mode when entering characters using the phone keypad. This section also describes how to use the T9 predictive text entry system to reduce the number of key strokes needed to enter text.

### Changing the Text Entry Mode

Text messages can be made up of alphabetical characters, numbers, and symbols. You can use the following text entry modes to simplify text entry:

- **T9 Word** — Press each phone key only once to enter the letter of the word that you're spelling. T9 WORD mode letter options are:
  - **T9 Word** — Enter initial capital letters
  - **T9 WORD** — Enter all upper case letters
  - **T9 word** — Enter all lower case letters
- **Abc** — Enter letters by repeatedly pressing each phone key until the desired character (as shown on the key) appears in the display. ABC mode letter options are:
  - **Abc** — Enter initial capital letters
  - **ABC** — Enter all upper case letters
  - **abc** — Enter all lower case letters
- **123** — Enter numbers by pressing the corresponding keys on the phone keypad.

- **Symbols** — Using the phone keypad, enter a symbol into your message by pressing the number above the symbol in the Symbols pop-up window.

The current text entry mode (**T9 Word**, **Abc**, **ABC**, **123**, or **Symbols**) is indicated in the lower part of a text entry screen. To change the text entry mode while composing a text message:

- ▶ Repeatedly press and hold **\*++** to toggle between **Abc**, **123**, and **T9Word** modes.

Or, do the following:

1. Press the Left soft key.
2. Highlight one of the following text entry modes:
  - **T9Word**
  - **Abc**
  - **ABC**
  - **123**
  - **Symbols**
3. Press **OK**.

## Using T9® Mode

T9 Word recognizes commonly used words for the numeric sequence of key presses and inserts the word into your message. T9 Word is much faster than the traditional method of text entry (Abc) and requires only one key press per letter of the word that you're spelling.

1. While composing a text message, press the Left soft key. Select **T9Word**.
2. For practice, enter the word “**Samsung**” by pressing each of the following keys only once:

T9 Word recognizes that the most commonly used word for the numeric sequence you just entered is “Samsung.”

If more than one word shares the same numeric sequence, T9 Word provides the most commonly used word. Press  to display other words, if available.

---

**Note:** To enter a space, press the  key. To enter a period, press the  key. These key functions apply to both T9 Word and Abc modes. (For other symbols, see “Entering Symbols” on page 28.)

---

## Using Abc Mode

1. While composing a text message, press the Left soft key. Select **Abc** or **ABC**.
2. Enter characters while in Abc mode by pressing a key repeatedly until the desired character appears in the display.

---

**Example:** Press  once for “G” and twice for “H”.

---

3. Pause briefly and the displayed character is accepted and inserted into your message.
4. Press  to enter a space and press  to enter a period.

## Entering Numbers

Enter numbers into a text message while in 123 mode.

1. While composing a text message, press the Left soft key. Select **123**.
2. Enter numbers while in 123 mode by pressing the key labeled with the corresponding number that you wish to insert into your message.

## Entering Symbols

Enter symbols such as “@” or “%” into a text message.

1. While composing a text message, press the Left soft key, Select **Symbols**. The first of three symbol screens appears in the display.
2. Use the **Prev** and **Next** soft keys to page through the other symbols, if desired.
3. Press the key that corresponds with the symbol that you wish to enter.

---

**Example:** Press **4=!** for an exclamation point (!).

---

4. Repeat these steps to insert additional symbols into your message.

## Section 6: Understanding Your Contacts

---

This section explains how to manage your daily contacts by storing their name and number in your Contacts. Contacts entries can be sorted by name.

### Your Contacts List

Your Contacts list can store up to 500 entries, with each contact having up to five associated phone numbers, an e-mail address, and a picture ID.

Each phone number can be up to 32 digits in length, including hard pauses. Contact names can be up to 32 characters in length. You can also specify a memory location for each entry, and you can restrict access to the Contacts list to prevent unauthorized use.

---

**Tip:** One-Touch, Two-Touch, and Three-Touch Dialing allow you to call numbers stored in your Contacts list faster. (See page 17.)

---

### Open Your Contacts List

1. In standby mode, press **MENU → Contacts**. The following Contacts sub-menus and options appear in the display:
  - **Find** — Find a phone number by entering a Contact name.
  - **Add New Entry** — Add a number or e-mail to your Contacts.
  - **Speed Dial** — Assign speed dial numbers to your Contacts.

- **Group** — Rename one of your five Contacts groups.
- **Memory Info** — View available memory for dial entries.

2. Select the Contacts sub-menu or option of your choice.

---

**Tip:** You can also access a sub-menu or menu option by pressing the number key corresponds to the menu item number. For example, select **Add New Entry**.

---

### Adding a New Contacts Entry

You can add an entirely new entry to your Contacts list or add information to an existing entry.

#### Using the Contacts Add Option

1. In standby mode, press **MENU → Contacts → Add New Entry**. The **Add New Entry** screen appears in the display with the **Name** field highlighted.
2. Enter a name or phrase to associate with the type using the keypad. (For more information, refer to “*Entering Text*” on page 26.)
3. Use the Up/Down navigation keys to highlight each field.
4. Enter a phone number (**Mobile, Home, or Work,**) or an e-mail address (**E-Mail**) for the new Contacts entry.

5. If desired, assign the new Contact to a **Group**. This lets you send messages to and find this Contact and other related contacts. (For more information, refer to “*Group*” on page 33.)
6. If desired, select a unique **Ringtone** to identify this new Contact. (For more information, refer to “*Ringer Type*” on page 62.)
7. If desired, enter an additional phone number (**Pager** or **Fax**) for the new Contacts entry.
8. Press **SAVE** () to save the new Contacts entry.

### **Saving a Number from a Call**

Once you’ve finished a call, you can save the number of the caller to your Contacts list.

---

**Note:** If the call was incoming and Caller ID information was unavailable, then the Save option is also unavailable.

---

1. After you press  to end your call, the call time, length of call, phone number, and name of the other party (if available) appear in the display.
2. Press the **Save** soft key. The **Save** screen appears in the display showing the following options:

- **Create New** — Lets you create a new Contacts entry.
- **Update Existing** — Lets you add the number or e-mail address you just entered to an existing Contacts entry.

---

**Tip:** You can also store a phone number from standby mode by entering the number, and pressing the **Save** soft key.

---

### Creating a new Contacts entry:

3. Select **Create New**. The following (number type) icons appear in the display:

Mobile

Home

Work

Pager

Fax

4. Select the number type that matches your new entry. The **Add New Entry** screen appears in the display with the number being saved populating the selected number type field. (For more information on creating a new Contacts entry, see “*Using the Contacts Add Option*” on page 29.)

### Adding the number to an existing Contacts entry:

5. Select **Update Existing**. The **Update Existing** screen appears in the display showing your current Contacts list.

- Enter the first few characters of the Contacts entry name under which you will store the saved number. (For more information on finding a Contacts entry, see “*Finding a Contacts Entry*” on page 32.)
- Select the desired Contacts entry. The following (number type) icons appear in the **Update Existing** screen:

- Select the appropriate unassigned number type. The **Edit Contact** screen appears in the display.
- Make any added changes you wish to the Contacts entry. (For more information, see “*Editing an Existing Contact Entry*” on page 33.)
- Press **SAVE** (**OK**) to save the entry.

### Storing Number from a Calls Log

You can store numbers from the Calls logs to your Contacts.

- In standby mode, press **MENU** → **Calls**.

- Press the corresponding number on the keypad to view the following Calls logs:
  - Press **1-2-3** for **Outgoing Calls**
  - Press **2-ABC** for **Incoming Calls**
  - Press **3-DEF** for **Missed Calls**
  - Press **4-ABCD** for **All Calls**
  - Press **5-678** for **Call Timer**
  - Press **5-6789** for **Data Counter**

A list of your calls appears in the display.

- Highlight the number you wish to store in **Contacts**.
- Press the **Options** soft key. The following options appear in the display:
  - Save** — Saves the selected number to your Contacts list.
  - Details** — Contacts calls only — Lets you view the Contacts entry for the recipient of this call.
  - Erase** — Deletes the selected number from the selected Calls log.
  - Lock / Unlock** — Prevents/allows deletion of the selected number.
  - Erase All** — Deletes all numbers from the selected Calls log.
  - View Timer** — Shows the call times for the Last Call, All Calls, Home Incoming, Home Outgoing, Roaming Calls, Last Reset, and Lifetime Calls timers for the selected Calls log.
- Select **Save**. The following options appear in the display:
  - Create New** — Lets you create a new Contacts entry.

- **Update Existing** — Lets you add the number or e-mail address you just entered to an existing Contacts entry.

For more information on saving the number, see “*Saving a Number from a Call*” on page 30.

## Finding a Contacts Entry

### Keypad Methods

#### Find by Name

If you have stored a named contact in your Contacts list, **Find** and **Quick Search** let you locate the entry quickly.

1. In standby mode, do one of the following:

- Press the **Contacts** soft key.
- Press **MENU** → **Contacts** → **Find**.

The **Find** screen appears in the display with an alphabetical list of Contacts showing.

---

**Tip:** If you have **Quick Search** enabled, from standby mode, you can press number keys that correspond to the first few letters of a Contact name, press the Up navigation key, then skip to Step 3. (For more information, refer to “*Quick Search*” on page 70.)

---

2. Enter the first few characters of the name of the contact as it appears in your Contacts list.

---

**Example:** If you saved a contact name as “Amy Smith”, begin your search for that contact by pressing **Find** for “A”.

---

---

**Note:** As you enter letters, the entry names of the closest matches (thus far) appear in the display.

---

3. When the desired Contacts entry is listed in the display, highlight the contact using the Up/Down navigation keys (if necessary). Then, do one of the following:
  - Use the Left/Right navigation keys to select a number associated with the named Contact.
  - Press **Call** to dial the number associated with the named Contact.
  - Press the **Edit** soft key to change the information about the Contact.
  - Press **VIEW** (**OK**) to show information about the Contact.
  - Press the **Options** soft key. The following options appear in the display:
    - **New Contact** — Lets you add a new number to your Contacts list or to the selected Contact.
    - **Erase** — Lets you delete the highlighted Contact.
    - **Send Text Msg** — Lets you send a text message to the selected contact.
    - **Send Name Card Via Bluetooth** — Lets you send the selected Contact to a Bluetooth device.
    - **Call** — Lets you place a call to the highlighted Contact.

4. Select the desired option to enter that option's sub-menu.

## Group

This option lets you find a Contacts list entry with a specific Group name.

1. In standby mode, press **MENU** → **Contacts** → **Group**. The **Group List** screen appears in the display.
2. Select the name of the group you wish to browse. The selected Group list appears in the display.
3. Find and highlight the desired Contacts entry, then do one of the following:
  - Press the **Remove** soft key to delete the selected contact from the Group. (Does not apply to No Group.)
  - Press **OK** to **ADD** an existing contact entry to the selected Group. (Does not apply to the General group.)
  - Press the **Options** soft key. The following options appear in the display:
    - **Send Text Msg** — Lets you send a text message to selected contact(s) in the current group.
4. Press **OK** to enter that option's sub-menu.

## Search by Number

This option lets you find a Contacts list entry by one of its phone numbers.

1. In standby mode, enter the first few numbers of the Contacts list entry you wish to find (such as the area code or area code and exchange — for example, 888-987).
2. Press **Options** → **Search**. The **Find** screen appears in the display listing all phone numbers in your Contacts list that contain the entered digits.
3. Highlight the desired Contacts entry (if necessary). Then do one of the following:
  - Press **Info** to dial the highlighted number.
  - Press **OK** to display information about the Contacts entry associated with the highlighted number. From the **View Contact** screen, you can erase or edit the selected Contacts entry.

## Editing an Existing Contact Entry

Once stored in the Contacts, an entry can be changed quite easily.

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.

3. Use the Up/Down navigation keys to highlight a number stored in this contact entry.
4. Press **CLR** to backspace and delete numbers.
5. Press and hold **CLR** to clear all numbers in the highlighted field.

---

**Note:** You can also add numbers (such as a Pager number or a Fax number) to the entry, assign it to a Group, and add other information.

---

6. When you're finished editing the entry, press **OK**. Your changes are saved and a confirmation message appears in the display.

### **Adding Pauses to Contacts Numbers**

When you call automated systems (like banking services), you are often required to enter a password or account number. Instead of manually entering the numbers each time, you can store the numbers in your Contacts along with special characters called pauses.

- **2-Sec Pause** — A two-second pause stops the calling sequence for two seconds and then automatically sends the remaining digits.
- **Wait** — A hard pause stops the calling sequence until further input from you.

---

**Tip:** You can enter multiple two-second pauses to extend the length of a pause. For example, two consecutive two-second pauses cause a total pause time of four seconds.

---

---

**Note:** Keep in mind that pauses count as digits towards the 32-digit maximum.

---

### **Store Pauses in a New Contacts Entry**

1. In standby mode, enter the number you wish to store (such as your bank's teleservice number).
2. Press the **Options** soft key. The following menu options appear in the display:
  - **Search** — Lets you find Contacts list entries by their phone numbers.
  - **2-Sec Pause** — Adds a two-second pause.
  - **Wait** — Adds a hard pause (awaits input from you).
  - **Send Text Msg** — Lets you send a text message to the entered number.
3. Select the pause option of your choice to enter the highlighted pause into your number sequence.
4. When you're finished entering the number and pauses, press the **Save** function key to store the number in your **Contacts**.

## Add Pauses to an Existing Contacts Entry

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.
3. Highlight a number stored in this contact entry.
4. Use the Navigation key to place the cursor where you want to add a pause (usually at the right-hand end of the number).
5. Press the **Options** soft key. The following menu options appear in the display:
  - **Set Speed Dial** — lets you assign a Speed Dial number to this Contacts entry.
  - **Set As Default** — your phone automatically dials this number when you find this Contacts entry and press the **imp** key.
  - **Wait** — a hard pause (awaits input from you).
  - **2-Sec Pause** — a two-second pause.
6. Select the pause option of your choice to enter it into your number sequence.

7. When you're finished adding pauses, press **OK** to save your changes to the number in your **Contacts**.

## Assigning Speed Dial Numbers

When you add or edit an entry to the Contacts list, you have the option of assigning a Speed Dial number using the Options pop-up menu or of returning to the Contacts menu and using the Speed Dial option. You can also change a contact's Speed Dial number.

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.
3. Use the navigation keys to highlight a number stored in this contact entry.

---

**Note:** If a contact has more than one stored number (such as Home and Office), you can select which of these numbers your phone will dial when you Speed Dial that Contact.

---

4. Press the **Options** soft key.

The following menu options appear in the display:

- **Set Speed Dial** — Lets you assign a Speed Dial number to this Contacts entry.
- **Set as default** — Your phone automatically dials this number when you Find this Contacts entry and press .
- **Wait** — A hard pause (awaits input from you).
- **2-sec Pause** — A two-second pause.

Select **Set Speed Dial** is highlighted. The **Speed Dials** screen appears in the display.

5. Enter, or use the Navigation key to select, an unassigned Speed Dial number.
6. Press  to assign the new Speed Dial number to the selected Contact. You are prompted to confirm the assignment.
7. Press the **Yes** soft key to assign the selected Speed Dial number. The **Edit Contact** screen appears in the display.
8. Press  to save the new Speed Dial number assignment.

### **Add a Number or E-Mail Address to an Existing Entry**

1. Find the desired entry in the Contacts list. (For more information, refer to “*Finding a Contacts Entry*” on

page 32.)

2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.
3. Highlight a number field or e-mail field in this contact entry.
4. Enter the phone number or e-mail address for the new Contacts entry.
5. Press  to add the number or e-mail address to the existing entry.

### **Edit an Existing e-mail Address**

1. Find the desired entry in the Contacts list. (For more information, refer to “*Finding a Contacts Entry*” on page 32.)
2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.
3. Highlight the **E-Mail** field (labeled with the @ symbol).
4. Use the keypad to edit the **E-Mail** address. (For more information, refer to “*Entering Text*” on page 26.)

- To insert the @ symbol, do the following:
    - Press the **abc** soft key. A pop-up menu appears in the display with **Abc** highlighted.
    - Select **Symbols**.
    - Select the @ symbol.
    - Enter the remainder of the e-mail address using the keypad. (For more information, refer to “*Entering Text*” on page 26.)
  - To add the domain type to the end of the e-mail address, do the following:
    - Press the **abc** soft key. A pop-up menu appears in the display with **Abc** highlighted.
    - Select **Shortcuts**.

## Section 8: Browser

---

This section outlines how to launch Browser, how to navigate to other pages on the web, and how the keys on the keypad are used with the web application. Additionally, links to other sites are briefly discussed.

### Browser

With Browser, you can conveniently surf the web and download ringtones and wallpapers using your phone. Each time you launch Browser, your phone connects to the Internet and the service indicator icon () appears in the display.

### Stored Web Content

Browser ends an Internet connection after a certain period of inactivity, however some information from your session remains stored in the phone (if you leave your phone turned on). You can access this information without reconnecting to the Internet. However, if you are viewing stored information, and you select a link to a site that was not accessed in your last session, you automatically re-connect to the Internet.

### Launching Browser

1. In standby mode, do one of the following to launch **Browser**:
  - Press the Left navigation key.

- Press **MENU** → **Browser** → **Go to Web**.

---

**Note:** The first time you launch Browser, the warning message “**Browse & Download use airtime.**” pops up in your display. To have this message repeat the next time you launch Browser, press the **Continue** soft key. To stop this message repeating, press the **Remove** soft key.

---

A list of categories (each representing one or more web sites) appears in the display.

2. Use the navigation keys to browse the categories.
3. Once the desired category is highlighted, press the  soft key to enter the category list.

### Exit Browser

- ▶ Press  to exit **Browser**.

### Using Browser

When you use Browser, some of the keys operate differently than during a normal phone call. Browser presents on-screen items in any of the following ways:

- Text or numeric input.
- Links (embedded in content).
- Numbered options (some may not be numbered).

- Simple text.

You can act upon options or links by using the soft keys.

### Browser soft keys

The bottom of the Browser display is a bar that contains browser commands. The Left and Right (   ) soft keys on the keypad are used to execute the command that appears above them in the display. These are called “soft keys” because their function changes depending on the application.

### Using Links

Links have several purposes, such as jumping to a different page, to a different site, or even initiating a phone call. Links are shown inside of brackets ( [ ] ). You can normally use the Left soft key to select a link when it is highlighted.

### How Browser Keys Work

The following table lists Browser keys and their functions.

**Navigation keys** — Use to browse lists and options.

**BACK Key** — A browse, back-up key. Press once to back up one page. Press and hold to go back to home page. Press to clear the last number, letter, or symbol entered. Press and hold to completely clear the display.

**Asterisk/Shift Key** — Press before entering text to enable uppercase characters.

**Last Key** — Press to enter a zero (0), or to move to the last item in a menu.

**Pound/Space Key** — Press to insert a space when entering text.

**Number 1 thru 9** — Use the number keys to select items in a menu if they are numbered.

**End Key** — Press to exit the Browser and return the phone to standby mode.

**Left Soft Key** — Press to activate the command that appears above it in the display.

**Right Soft Key** — Press to activate the command that appears above it in the display.

## Section 9: Games & Apps

---

This section explains the Games & Apps features where users can download multimedia, applications, games, and check news and sports.

---

**Note:** The default lock code is the last four digits of your telephone number.

---

2. Enter the lock code, then select **Change Lock**. You're prompted to enter the New Lock Code.
3. Enter the New Lock Code. You're prompted to re-enter the New Lock Code for verification.
4. Enter the New Lock Code again. Your changes are stored.

---

**Note:** Your phone does not allow you to view the lock code for obvious security reasons. If you change the lock code, be sure to write down or memorize the new code.

---

## Emergency #

Your phone provides the option of storing three emergency numbers. Each number can be up to 32 digits in length. All emergency numbers can be manually called at any time, even

when your phone is locked or restricted. This can be a useful feature for controlling outgoing calls from your phone.

---

**Note:** Emergency number 911 is hard-coded into your phone. You can dial this number any time, even when the phone is locked or restricted. If you call 911 an audible tone is heard and an Emergency prompt appears in the display for the duration of the call.

---

---

**Important!** Because of various transmission methods, network parameters, and user settings necessary to complete a call from your wireless phone, a connection cannot always be guaranteed. Therefore, emergency calling may not be available on all wireless networks at all times.

---

---

**Important!** DO NOT depend on this phone as a primary method of calling 911 or for any other essential or emergency communications.

---

Remember to always turn your phone on and check for adequate signal strength before placing a call.

### Store Emergency Numbers

For example, to search for “Sally” you would enter:

2. Press the Up navigation key. The **Find** screen appears in the display showing a list of Contact names that match your entry.
3. Highlight the desired Contact, then press  to call the highlighted Contact.

## Memory Info

**Memory Info** lets you quickly and easily review your phone memory usage. To access **Memory Info**, do the following:

1. At the **Settings** menu, select **Memory Info**. The **Memory Info** screen appears in the display showing the following information:
  - **Total Used** memory usage
  - **Available** unused memory
  - **My Images** memory usage
  - **My Ringtones** memory usage
  - **My Sounds** memory usage
  - **Applications** memory usage
2. Press  to return to the **Settings** menu.

## Phone Info

Phone Info options let you identify important information about your phone, such as the hardware and software versions of your

phone, the meanings of your phones status icons, and the phone number assigned to your phone.

### **Phone Number**

This option causes the Phone Number screen to appear in the display and show the ten-digit number assigned to your phone by your Wireless Provider.

1. At the **Settings** menu, select **Phone Info → Phone Number**. The phone number assigned by your Wireless Provider appears in the display.
2. Press  to return to the **Phone Info** menu.

### **Icon Glossary**

This option causes the ICON GLOSSARY list to appear in the display and show the icons that can appear in the display and the names of the icons.

1. At the **Settings** menu, select **Phone Info → Icon Glossary**. A list of the icons that can appear on the top line of the display shows in the display.
2. Press  to return to the **Phone Info** menu.

## **Version**

You can view both the software and hardware version of your phone using this feature. This feature is helpful if you need to contact Customer Service.

1. At the **Settings** menu, select **Phone Info → Version**.

Your phone's hardware and software version information appears in the display.

2. Press **OK** to return to the **Phone Info** menu.

## **ESN / MEID**

You can view the ESN (Electronic Serial Number)/MEID (Mobile Equipment Identifier) values for your phone in both Decimal and Hex values from this menu.

1. At the **Settings** menu, select **Phone Info → ESN/MEID**.

The ESN/MEID information displays in Dec and Hex.

2. Press **OK** to return to the **Phone Info** menu.

## **Warranty Date Code**

1. At the **Settings** menu, select **Phone Info → Warranty Date Code**. The Warranty Date Code displays.

2. Press **OK** to return to the **Phone Info** menu.

## Section 12: Health and Safety Information

---

This section outlines the safety precautions associated with using your phone. These safety precautions should be followed to safely use your phone.

### Health and Safety Information

#### *Exposure to Radio Frequency (RF) Signals*

#### **Certification Information (SAR)**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. government.

These FCC exposure limits are derived from the recommendations of two expert organizations, the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE).

In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The exposure limit set by the FCC for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of

absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg).

The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that

contains no metal and that positions the handset a minimum of 1.5 cm from the body.

Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. The maximum SAR values for this model phone as reported to the FCC are:

- **Head:** 1.26 W/Kg.
- **Body-worn:** 0.964 W/Kg.

SAR information on this and other model phones can be viewed online at <http://www.fcc.gov/oet/ea>. To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone.

Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional product specific SAR information can also be obtained at [www.fcc.gov/cgb/sar](http://www.fcc.gov/cgb/sar).

## **UL Certified Travel Adapter**

The Travel Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

**FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE.**

**IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.**

**DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.**

**FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET. THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTATED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.**

## **Consumer Information on Wireless Phones**

The U.S. Food and Drug Administration (FDA) has published a series of Questions and Answers for consumers relating to radio frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

### ***What kinds of phones are the subject of this update?***

The term wireless phone refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radio frequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies.

When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures well within the FCC's compliance limits.

### ***Do wireless phones pose a health hazard?***

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radio frequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

### ***What is FDA's role concerning the safety of wireless phones?***

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radio frequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the

health hazard and to repair, replace or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.

FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones.

Base stations are thus not the primary subject of the safety questions discussed in this document.

### ***What are the results of the research done already?***

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radio frequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with

cancer-causing chemicals so as to be pre-disposed to develop cancer in absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phones RF exposures.

However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

### ***What research is needed to decide whether RF exposure from wireless phones poses a health risk?***

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can

provide data that is directly applicable to human populations, but ten or more years' follow-up may be needed to provide answers about some health effects, such as cancer.

This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

### ***What is FDA doing to find out more about the possible health effects of wireless phone RF?***

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radio frequency energy (RF).

FDA has been a leading participant in the World Health Organization international Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.

FDA and Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations.

CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

### ***What steps can I take to reduce my exposure to radio frequency energy from my wireless phone?***

If there is a risk from these products - and at this point we do not know that there is - it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radio frequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone

away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

### ***What about children using wireless phones?***

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radio frequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000.

They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it

was not based on scientific evidence that any health hazard exists.

### ***Do hands-free kits for wireless phones reduce risks from exposure to RF emissions?***

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.

### ***Do wireless phone accessories that claim to shield the head from RF radiation work?***

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that accessories that claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing

more than a metallic accessory attached to the phone. Studies have shown that these products generally do not work as advertised. Unlike "hand-free" kits, these so-called "shields" may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption. In February 2002, the Federal Trade Commission (FTC) charged two companies that sold devices that claimed to protect wireless phone users from radiation with making false and unsubstantiated claims.

According to FTC, these defendants lacked a reasonable basis to substantiate their claim.

### ***What about wireless phone interference with medical equipment?***

Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested

wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a compatible phone and a compatible hearing aid at the same time. This standard was approved by the IEEE in 2000.

FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

## Road Safety

Your wireless phone gives you the powerful ability to communicate by voice, almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features, such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
2. When available, use a hands-free device. If possible, add an additional layer of convenience and safety to your wireless phone with one of the many hands free accessories available today.

3. Position your wireless phone within easy reach. Be able to access your wireless phone without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voice mail answer it for you.
4. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice and even heavy traffic can be hazardous.
5. Do not take notes or look up phone numbers while driving. Jotting down a "to do" list or flipping through your address book takes attention away from your primary responsibility, driving safely.
6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.
7. Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.
8. Use your wireless phone to call for help. Dial 9-1-1 or other local emergency number in the case of fire, traffic accident or medical emergencies.
9. Use your wireless phone to help others in emergencies. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other local emergency number, as you would want others to do for you.
10. Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency number.

## **Responsible Listening**

---

**Caution!:** Avoid potential hearing loss.

---

Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds, and Bluetooth or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing.

Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings and equipment.

You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, you noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.
- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.

- Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

## Operating Environment

Remember to follow any special regulations in force in any area and always switch your phone off whenever it is forbidden to use it, or when it may cause interference or danger.

When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating position (held to your ear with the antenna pointing over your shoulder if you are using an external antenna).

## Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Consult the manufacturer to discuss alternatives.

## Implantable Medical Devices

A minimum separation of six (6) inches should be maintained between a handheld wireless phone and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

- Should ALWAYS keep the phone more than six (6) inches from their implantable medical device when the phone is turned ON;
- Should not carry the phone in a breast pocket;

- Should use the ear opposite the implantable medical device to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place;
- Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless phone with such a device, consult your health care provider.

For more information see:

<http://www.fcc.gov/oe1/rfsafety/rf-faqs.html>

## **FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices**

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids.

The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are

more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is

relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This is synonymous for T ratings. This should provide the hearing aid user with "normal usage" while using their hearing aid with the particular wireless phone. "Normal usage" in this context is defined as a signal quality that is acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules.

The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

### **Other Medical Devices**

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your phone off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

### **Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

### **Posted Facilities**

Switch your phone off in any facility where posted notices require you to do so.

### **Potentially Explosive Environments**

Switch your phone off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks

in such areas could cause an explosion or fire resulting in bodily injury or even death.

Users are advised to switch the phone off while at a refueling point (service station). Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

## **Emergency Calls**

This phone, like any wireless phone, operates using radio signals, wireless and landline networks as well as user-programmed functions, which cannot guarantee connection in all conditions. Therefore, you should never rely solely on any wireless phone for essential communications (medical emergencies, for example).

Remember, to make or receive any calls the phone must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless phone

networks or when certain network services and/or phone features are in use. Check with local service providers.

To make an emergency call:

1. If the phone is not on, switch it on.
2. Key in the emergency number for your present location (for example, 911 or other official emergency number).

Emergency numbers vary by location.

3. Press the  key.

If certain features are in use (call barring, for example), you may first need to deactivate those features before you can make an emergency call. Consult this document and your local cellular service provider.

When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your phone may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

## ***Restricting Children's access to your Phone***

Your phone is not a toy. Children should not be allowed to play with it because they could hurt themselves and others, damage the phone or make calls that increase your phone bill.

## **FCC Notice and Cautions**

### **FCC Notice**

The phone may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the phone if such interference cannot be eliminated.

Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association:

### **Cautions**

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment, and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the

phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.

## **Other Important Safety Information**

- Only qualified personnel should service the phone or install the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
- Check regularly that all wireless phone equipment in your vehicle is mounted and operating properly.
- Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.
- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.
- Switch your phone off before boarding an aircraft. The use of wireless phone in aircraft is illegal and may be dangerous to the aircraft's operation.
- Failure to observe these instructions may lead to the suspension or denial of telephone services to the offender, or legal action, or both.

## **Product Performance**

### **Getting the Most Out of Your Signal Reception**

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal.

If you're inside a building, being near a window may give you better reception.

### **Understanding the Power Save Feature**

If your phone is unable to find a signal after searching, a Power Save feature is automatically activated. If your phone is active, it periodically rechecks service availability or you can check it yourself by pressing any key.

Anytime the Power Save feature is activated, a message displays on the screen. When a signal is found, your phone returns to standby mode.

### **Understanding How Your Phone Operates**

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts in digital mode.

## **Maintaining Your Phone's Peak Performance**

For the best care of your phone, only authorized personnel should service your phone and accessories. Faulty service may void the warranty.

There are several simple guidelines to operating your phone properly and maintaining safe, satisfactory service.

- To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth and WLAN components must be disabled during a call. For more information, refer to the *"Disabling Bluetooth or WLAN"* section.
- If your phone is equipped with an external antenna, hold the phone with the antenna raised, fully-extended and over your shoulder.
- Do not hold, bend or twist the phone's antenna, if applicable.
- Do not use the phone if the antenna is damaged.
- If your phone is equipped with an internal antenna, obstructing the internal antenna could inhibit call performance.
- Speak directly into the phone's receiver.
- Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, immediately turn the power off and remove the battery. If it is inoperable, call Customer Care for service.

### **Availability of Various Features/Ring Tones**

Many services and features are network dependent and may require additional subscription and/or usage charges. Not all

features are available for purchase or use in all areas. Downloadable Ring Tones may be available at an additional cost. Other conditions and restrictions may apply. See your service provider for additional information.

## **Battery Standby and Talk Time**

Standby and talk times will vary depending on phone usage patterns and conditions. Battery power consumption depends on factors such as network configuration, signal strength, operating temperature, features selected, frequency of calls, and voice, data, and other application usage patterns.

## **Battery Precautions**

- Avoid dropping the cell phone. Dropping it, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.
- Never use any charger or battery that is damaged in any way.
- Do not modify or remanufacture the battery as this could result in serious safety hazards.
- If you use the phone near the network's base station, it uses less power; talk and standby time are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
- Follow battery usage, storage and charging guidelines found in the user's guide.

- Battery charging time depends on the remaining battery charge and the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.
- If left unused, a fully charged battery will discharge itself over time.
- Use only Samsung-approved batteries and recharge your battery only with Samsung-approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.
- Do not use incompatible cell phone batteries and chargers. Some Web sites and second-hand dealers, not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers. Consumers should purchase manufacturer or carrier recommended products and accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.
- Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, leakage, or other serious hazard.
- Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.
- Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as you will reduce the capacity and

lifetime of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0 °C (32 °F).

- Do not place the phone in areas that may get very hot, such as on or near a cooking surface, cooking appliance, iron, or radiator.
- Do not get your phone or battery wet. Even though they will dry and appear to operate normally, the circuitry could slowly corrode and pose a safety hazard.
- Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.
- Do not permit a battery out of the phone to come in contact with metal objects, such as coins, keys or jewelry.
- Do not crush, puncture or put a high degree of pressure on the battery as this can cause an internal short-circuit, resulting in overheating.
- Dispose of used batteries in accordance with local regulations. In some areas, the disposal of batteries in household or business trash may be prohibited. For safe disposal options for Li-ion batteries, contact your nearest Samsung authorized service center. Always recycle. Do not dispose of batteries in a fire.

## Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years.

- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and liquids contain minerals that will corrode electronic circuits.
- Do not use the phone with a wet hand. Doing so may cause an electric shock to you or damage to the phone.
- Do not use or store the phone in dusty, dirty areas, as its moving parts may be damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the phone in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which may damage the phone's electronic circuit boards.
- Do not drop, knock or shake the phone. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

- Do not paint the phone. Paint can clog the device's moving parts and prevent proper operation.
- Do not put the phone in or on heating devices, such as a microwave oven, a stove or a radiator. The phone may explode when overheated.
- If your phone is equipped with an external antenna, use only the supplied or an approved replacement antenna. Unauthorized antennas or modified accessories may damage the phone and violate regulations governing radio devices.
- If the phone, battery, charger or any accessory is not working properly, take it to your nearest qualified service facility. The personnel there will assist you, and if necessary, arrange for service.

## Section 13: Warranty Information

---

### Standard Limited Warranty

#### What is Covered and For How Long?

SAMSUNG TELECOMMUNICATIONS AMERICA, LLC ("SAMSUNG") warrants to the original purchaser ("Purchaser") that SAMSUNG's Phones and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

Phone	1 Year
Batteries	1 Year
Leather Case	90 Days
Holster	90 Days
Other Phone Accessories	1 Year

**What is Not Covered?** This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abuse, neglect, unusual physical, electrical or electromechanical stress, or modification of any part of Product, including antenna, or cosmetic damage; (b) equipment that has the serial number

removed or made illegible; (c) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (d) malfunctions resulting from the use of Product in conjunction with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (e) defects or damage from improper testing, operation, maintenance, installation, or adjustment; (f) installation, maintenance, and service of Product, or (g) Product used or purchased outside the United States or Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery, (ii) any of the seals on the battery are broken or show evidence of tampering, or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

**What are SAMSUNG's Obligations?** During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service

facility in an adequate container for shipping, accompanied by Purchaser's sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to deliver the Product, call Samsung Customer Care at 1-888-987-4357. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt, reconditioned or new Product. Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG.

If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must pay all parts, shipping, and labor charges for the repair or return of such Product.

**WHAT ARE THE LIMITS ON SAMSUNG'S WARRANTY/LIABILITY?**

EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY

OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

- THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE;
- WARRANTIES OF TITLE OR NON-INFRINGEMENT;
- DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT;
- THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR
- COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME STATES/PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE

OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL, CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER PARTY. SOME STATES/PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE/PROVINCE TO PROVINCE. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS PRODUCT AND STATES PURCHASER'S EXCLUSIVE REMEDY. IF ANY PORTION OF THIS LIMITED WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS THE LAW PERMITS. THE PARTIES UNDERSTAND THAT THE PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT

IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRDPARTY SOFTWARE OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE, INCLUDING THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT LIE SOLELY WITH THE PURCHASER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.

This Limited Warranty allocates risk of Product failure between Purchaser and SAMSUNG, and SAMSUNG's Product pricing reflects this allocation of risk and the limitations of liability contained in this Limited Warranty. The agents, employees, distributors, and dealers of SAMSUNG are not authorized to make modifications to this Limited Warranty, or make additional warranties binding on SAMSUNG. Accordingly, additional statements such as dealer advertising or presentation, whether oral or written, do not constitute warranties by SAMSUNG and should not be relied upon.

## End User License Agreement for Software

**IMPORTANT. READ CAREFULLY:** This End User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and Samsung Electronics Co., Ltd. for software owned by Samsung Electronics Co., Ltd. and its affiliated companies and its third party suppliers and licensors that accompanies this EULA, which includes computer software and may include associated media, printed materials, "online" or electronic documentation ("Software"). BY CLICKING THE "I ACCEPT" BUTTON (OR IF YOU BYPASS OR OTHERWISE DISABLE THE "I ACCEPT", AND STILL INSTALL, COPY, DOWNLOAD, ACCESS OR OTHERWISE USE THE SOFTWARE), YOU AGREE TO BE BOUND BY THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THE TERMS IN THIS EULA, YOU MUST CLICK THE "DECLINE" BUTTON, DISCONTINUE USE OF THE SOFTWARE.

1. **GRANT OF LICENSE.** Samsung grants you the following rights provided that you comply with all terms and conditions of this EULA: You may install, use, access, display and run one copy of the Software on the local hard disk(s) or other permanent storage media of one computer and use the Software on a single computer or a mobile device at a time, and you may not make the Software available over a network where it could be used by multiple computers at the same time. You may make one copy of the Software in machine-readable form for backup purposes

only; provided that the backup copy must include all copyright or other proprietary notices contained on the original.

2. **RESERVATION OF RIGHTS AND OWNERSHIP.** Samsung reserves all rights not expressly granted to you in this EULA. The Software is protected by copyright and other intellectual property laws and treaties. Samsung or its suppliers own the title, copyright and other intellectual property rights in the Software. The Software is licensed, not sold.

3. **LIMITATIONS ON END USER RIGHTS.** You may not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code or algorithms of, the Software (except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation), or modify, or disable any features of, the Software, or create derivative works based on the Software. You may not rent, lease, lend, sublicense or provide commercial hosting services with the Software.

4. **CONSENT TO USE OF DATA.** You agree that Samsung and its affiliates may collect and use technical information gathered as part of the product support services related to the Software provided to you, if any, related to the Software. Samsung may use this information solely to improve its products or to provide customized services or technologies to you and will not disclose this information in a form that personally identifies you.

5. **UPGRADES.** This EULA applies to updates, supplements and add-on components (if any) of the Software that Samsung may provide to you or make available to you after the date you obtain your initial copy of the Software, unless we provide other terms along with such upgrade. To use Software identified as an upgrade, you must first be licensed for the Software identified by Samsung as eligible for the upgrade. After upgrading, you may no longer use the Software that formed the basis for your upgrade eligibility.

6. **SOFTWARE TRANSFER.** You may not transfer this EULA or the rights to the Software granted herein to any third party unless it is in connection with the sale of the mobile device which the Software accompanied. In such event, the transfer must include all of the Software (including all component parts, the media and printed materials, any upgrades, this EULA) and you may not retain any copies of the Software. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the Software must agree to all the EULA terms.

7. **EXPORT RESTRICTIONS.** You acknowledge that the Software is subject to export restrictions of various countries. You agree to comply with all applicable international and national laws that apply to the Software, including the U.S. Export Administration Regulations, as well as end user, end use, and destination restrictions issued by U.S. and other governments.

8. **TERMINATION.** This EULA is effective until terminated. Your rights under this License will terminate automatically without notice from Samsung if you fail to comply with any of the terms and conditions of this EULA. Upon termination of this EULA, you shall cease all use of the Software and destroy all copies, full or partial, of the Software.

9. **DISCLAIMER OF WARRANTIES.** You expressly acknowledge and agree that use of the Software is at your sole risk and that the entire risk as to satisfactory quality, performance, accuracy and effort is with you. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE SOFTWARE IS PROVIDED "AS IS" AND WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND, AND SAMSUNG AND ITS LICENSORS (COLLECTIVELY REFERRED TO AS "SAMSUNG" FOR THE PURPOSES OF SECTIONS 9, 10 and 11) HEREBY DISCLAIM ALL WARRANTIES AND CONDITIONS WITH RESPECT TO THE SOFTWARE, EITHER EXPRESS, IMPLIED OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY OR WORKMANLIKE EFFORT, OF FITNESS FOR A PARTICULAR PURPOSE, OF RELIABILITY OR AVAILABILITY, OF ACCURACY, OF LACK OF VIRUSES, OF QUIET ENJOYMENT, AND NON-INFRINGEMENT OF THIRD PARTY RIGHTS. SAMSUNG DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE SOFTWARE, THAT THE FUNCTIONS CONTAINED IN THE SOFTWARE WILL MEET YOUR

REQUIREMENTS, THAT THE OPERATION OF THE SOFTWARE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE SOFTWARE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY SAMSUNG OR A SAMSUNG AUTHORIZED REPRESENTATIVE SHALL CREATE A WARRANTY. SHOULD THE SOFTWARE PROVE DEFECTIVE, YOU ASSUME THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES OR LIMITATIONS ON APPLICABLE STATUTORY RIGHTS OF A CONSUMER, SO THESE EXCLUSIONS AND LIMITATIONS MAY NOT APPLY TO YOU.

10. EXCLUSION OF INCIDENTAL, CONSEQUENTIAL AND CERTAIN OTHER DAMAGES. TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL SAMSUNG BE LIABLE FOR PERSONAL INJURY, OR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES WHATSOEVER, OR FOR LOSS OF PROFITS, LOSS OF DATA, BUSINESS INTERRUPTION, OR FOR ANY PECUNIARY DAMAGES OR LOSSES, ARISING OUT OF OR RELATED TO YOUR USE OR INABILITY TO USE THE SOFTWARE, THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT OR OTHER SERVICES, INFORMATION, SOFTWARE, AND RELATED CONTENT THROUGH THE SOFTWARE OR OTHERWISE ARISING OUT OF THE USE OF THE SOFTWARE, OR OTHERWISE UNDER OR IN CONNECTION WITH ANY PROVISION OF THIS EULA, HOWEVER CAUSED, REGARDLESS OF THE THEORY OF LIABILITY (CONTRACT, TORT

OR OTHERWISE) AND EVEN IF SAMSUNG HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF LIABILITY FOR PERSONAL INJURY, OR OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT APPLY TO YOU.

11. LIMITATION OF LIABILITY. Notwithstanding any damages that you might incur for any reason whatsoever (including, without limitation, all damages referenced herein and all direct or general damages in contract or anything else), the entire liability of Samsung under any provision of this EULA and your exclusive remedy hereunder shall be limited to the greater of the actual damages you incur in reasonable reliance on the Software up to the amount actually paid by you for the Software or US\$5.00. The foregoing limitations, exclusions and disclaimers (including Sections 9, 10 and 11) shall apply to the maximum extent permitted by applicable law, even if any remedy fails its essential purpose.

12. U.S. GOVERNMENT END USERS. The Software is licensed only with "restricted rights" and as "commercial items" consisting of "commercial software" and "commercial software documentation" with only those rights as are granted to all other end users pursuant to the terms and conditions herein.

13. APPLICABLE LAW. This EULA is governed by the laws of TEXAS, without regard to conflicts of laws principles. This EULA

shall not be governed by the UN Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded. If a dispute, controversy or difference is not amicably settled, it shall be finally resolved by arbitration in Seoul, Korea in accordance with the Arbitration Rules of the Korean Commercial Arbitration Board. The award of arbitration shall be final and binding upon the parties.

14. ENTIRE AGREEMENT; SEVERABILITY. This EULA is the entire agreement between you and Samsung relating to the Software and supersedes all prior or contemporaneous oral or written communications, proposals and representations with respect to the Software or any other subject matter covered by this EULA. If any provision of this EULA is held to be void, invalid, unenforceable or illegal, the other provisions shall continue in full force and effect.

### ***Precautions for Transfer and Disposal***

If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software.

To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung's Customer Care Center for an Extended File System (EFS) Clear which will eliminate all user memory and return all settings to

default settings. Please contact the **Samsung Customer Care Center** for details.

---

**Important!** Please provide warranty information (proof of purchase) to Samsung's Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.
