- In order to capture high quality pictures, the power supply's cable and video output cable should not be too

## 4 Access to the IP Camera via IE

1. Use correct power supply
2. Make sure the device IP address is in the same LAN with the router, the default IP address of the IPC is 192.168.1.168
3. Go to CD->IPCSearch.exe and copy it to your computer
4. Open IPC Search, click "Search", you will find the device IP, and you also can modify the IP information, see the picture on the left:
5. Factory default IP setting:  
 IP Address : 192.168.1.168  
 Subnet Mask : 255.255.255.0  
 Gateway : 192.168.1.1  
 User name : admin  
 Password : admin
6. After modifying IP, click "Search" again, you will find the new IP of the your device. Double-click the new IP, you can access to the IPC via IE, or enter the IP Address in the address bar of IE, then click "Enter", the download\_OCX controls interface please see below picture:

Then it will install the OCX, when complete ,the window below will pop up:

Click "OK" and refresh the page. You will enter the login interface, as is shown in the left picture:

Enter your username and password, you can start to access and control your IP Camera.

## 5 Access to the IP Camera via Multi\_window

Go to CD->find Multi\_window.exe. Copy Multi\_window.exe to your computer and install it, then run it. See below:

1. Config: Group. See below:

Here you can add your IP Cameras and set the Capture Path. If you forget the IP Address, you can click "Search" to search your IP Cameras. You can

## 2 Brief Introduction of the products

### Specifications

|                      |   |
|----------------------|---|
| Model                | BGIP-130NF60N   |
| Image Sensor         | 1/3" Aptina Low Illumination 1.3 Megapixel CMOS Sensor    |
| Resolution           | 960P@25fps, 720P@25fps, D1@25fps                          |
| Minimum Illumination | 0.1Lux  |
| S/N Ratio            | >50db   |
| Focus Mode           | Manual  |
| Day/Night            | IR cut filter with auto switch                            |
| Weatherproof         | IP66  |
| Network              | 1 RJ45 Ethernet interface, 10/100M adaptation             |
| Delay                | Within The LAN 0.3S                                       |
| Frame Rate           | 25 FPS ( Adjustable)                                      |
| Video Compression    | H.264 /JPEG   |
| Protocol             | Protocols: TCP/UDP/RTSP/FTP/PPPOE/DHCP/DDNS/NTP/UPnP/SMTP |
| Onvif                | Support Onvif 2.0   |
| User Permission      | Multi-user Classification Management                      |
| Power                | DC 12V/1300MA   |
| Consumption          | 3.0W  |
| Lens                 | 2.8-12mm Manual Zoom Lens                                 |
| IR Status            | IR LED: ϕ5X72PCS IR range: 60M                            |
| Dimension (mm)       | 318W)x110(H)x107(D)mm                                     |
| Weight (g)           | 1700  |
| Temperature          | -20~50℃   |
| Humidity             | 0%-90%RH, Without Condensation                            |

### Features:

- ◆ Weatherproof IR Camera IP66
- ◆ Advanced H.264 High profile compression
- ◆ Support all kinds of browsers: IE, Chrome, Firefox
- ◆ Support several servers, IP address, DDNS, FTP, SMTP
- ◆ Support single, dual, three streams
- ◆ Support iPhone, iPad, Android remote monitor
- ◆ Support connect to NVR
- ◆ Support ONVIF 2.0
- ◆ Reliability and compatibility
- ◆ Low streams and high resolution image

## 3 Connection

7. Please click here to download the OCX controls, as is shown in the following picture:

Click run, the system will automatically download the OCX, click "yes" in the following picture:

double click the IP info to add the camera. You also can enter the IP Info manually in the "IPcam Information area" Then you can view the images and set the parameters of IP Camera, such as Alarm, Video, Net, Camuser, Date, etc. Please refer to Multi\_window Customer Manual for detail.

### 2. View the images

After adding the devices, you can see the devices in "List" of the main interface, you can double\_click the device to control it to play or stop. See below picture:

the devices in "Camera", see the picture on the right:

Click the button "PTZ", and you will see the PTZ function buttons, see below picture:

Button function:

| Button | Name         | Button | Name            |
|--------|--------------|--------|-----------------|
|        | Play         |        | Switch channels |
|        | Snapshot     |        | PTZ Control     |
|        | Local Record |        | Zoom            |
|        | Configure    |        | Focal           |
|        | PTZ          |        | Iris            |
|        | About        |        |                 |

## 3. Device list

- : Add device, Input Device name, IP address or domain name, port, username, password, Max Channel, then click "OK" to finish and save.
- : Edit device. Modify Device name, IP address or domain name, port, username, password, Max Channel, then click "OK" to finish.

 : Delete device. If you want to delete the device, please click this button, then select the device name to delete it.

#### 4.Saved photos

Please see the picture on the right:

If you want to delete the photos, select the photo and click "Delete" on the top right of the interface, it will pop up a tip, click "OK" to delete the photo.

#### 5.Local Video

Please see the picture on the right:

Select the file to playback. If you want to delete the videos, select the video and click "Delete" on the top right of the interface, it will pop up a tip, click "OK" to delete it.

#### 6.About

Please see the picture on the right:

It is the information about the monitor software.

- Double tap again to return to multi view.
- Touch a channel on the screen and drag it to the channel position to rearrange your viewing window. As is shown in the following figure:

- Switch the channel viewing mode from four to six using these buttons on the control bar:

#### 4.About

It is the information about the monitor software. As is shown in the picture on the right:

#### 5.Other Buttons

| Button   | Name            | Button  | Name        |
|--|-----------------|---|-------------|
|  | Play            |  | PTZ         |
|  | Snapshot        |  | PTZ Control |
|  | Local Record    |  | Zoom        |
|  | System settings |  | Focal       |

#### 7 Access to the IP Camera via iPhone

Search and install the surveillance software "ASee+" on line to your mobile from App store. Then you can see the icon of the

software  click it to run.

1.The following picture shows the main interface:

You can see the PTZ function buttons in the tool bar, see the picture on the right:

Button function:

| Button  | Name         | Button  | Name        |
|---|--------------|---|-------------|
|  | Play         |  | Clear       |
|  | Snapshot     |  | PTZ Control |
|  | Local Record |  | Zoom        |
|  | Menu         |  | Focal       |
|  | Iris         |   |             |

#### 2.Device list

 : Add device. Input Device name, IP address or domain name, port, username, password, Channel number, then click "Save" to finish.

| Button  | Name   | Button  | Name            |
|---|--------|---|-----------------|
|    | Iris   |  | Switch channels |
|    | Stop   |  | Clear           |
|    | Photos |  | Records         |
|  | About  |   |                 |

#### 4 Package List

| NO. | Name                           | Model         | Number (pcs) |
|-----|--------------------------------|---------------|--------------|
| 1.  | HD-IP Camera                   | BGIP-130NF60N | 1            |
| 2.  | CD                             | BGIP-130NF60N | 1            |
| 3.  | IPC Fast Operation User Manual | BGIP-130NF60N | 1            |

: Edit the device. Modify Device name, IP address or domain name, port, username, password, Max Channel, then click "Save" to finish.

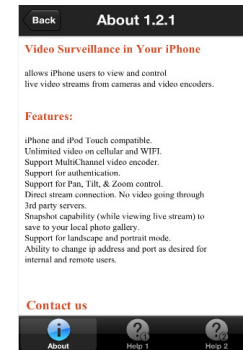

: Delete device. If you want to delete the device, please click this button, then select the device name to delete it.

#### 3.Local files

**Photos** :Select the photos to view. If you want to delete the photos, select the photo and click "Delete" on the bottom-right of the interface, it will pop up a tip, click "OK" to delete the photo.  
**Records**: Select the file to playback. If you want to delete the records, click "Edit", click "Delete" to delete the record, then click "Done" to finish.

#### 4.About&Help

It is the information about the monitor software. As is shown in the left picture:

#### 5 FAQ

##### 1.Why cannot capture?

Answer: If you capture failed and the storage folder cannot pop up automatically ,please check your IE, don't select "Enable protected mode", as is shown in the following figure:

##### 2.Why can not access the camera after update?

Answer: Clean browser cache.  
 Steps: open IE, click "Tools" and select "Internet Options", then you can see "Temporary Internet files" and click "Delete Files", it will prompt a dialog you need to check "Delete all offline content" and click "OK".  
 You also can click "Start" and select "Run" then enter "cmd", enter "arp -d" in "Command Prompt" interface. Re-access the camera.

##### 3.Why can not show the whole interface?

#### 8 Access to the IP Camera via iPad

Search and download the surveillance software "ASee+" to your mobile from App store and install it. Then you can see the

icon of the software  ,click it to run.

1.The following picture shows the main interface:

#### 2.Device Management

 : Add device, Input Device name, IP address or domain name, port, username, password, Max Channel, then click "OK" to finish and save.

 : Edit device.

Modify Device name, IP address or domain name, port, username, password, Max Channel, then click "OK" to finish.

: Delete device. If you want to delete the device, please click this button, then select the device name to delete it.

#### 3.Channel Control
