# NETGEAR®

U.S. Cellular® 4G LTE™ Router (LG2200D)

Under the ADVANCED tab are options for unique situations such as when remote access by IP or by domain name from the Internet is needed. Users should have a solid understanding of networking to use this tab.

How To View Status Information

The NETGEAR genie Advanced > Advanced Home screen displays the status of the router, the Internet connection, and the Wi-Fi settings. The user can also reboot the router from this screen.

How To User Keywords To Block Internet sites

You can use keywords to block certain Internet sites from your network. You can choose to block all the time or based on a schedule. To setup keyword blocking, select the NETGEAR genie Advanced > Security > Block Sites.

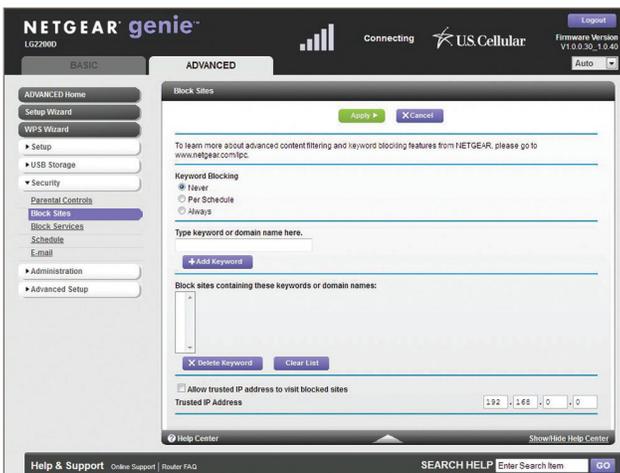

How To Upgrade The Firmware

From the NETGEAR genie Advanced > Administration > LTE Modem Upgrade screen the user can check to see if new firmware is available and to update their product.

Check For Firmware Update

How To Change Admin Password

To change the admin password, select NETGEAR genie Advanced > Administration > Set Password. Type the old password, and type the new password twice.
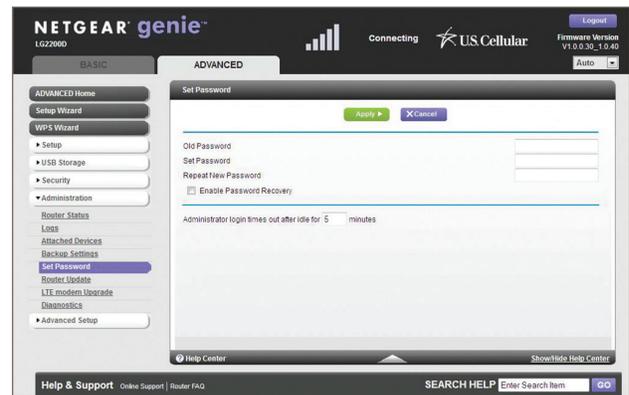

Troubleshooting And Support

Basic troubleshooting suggestions are found in the NETGEAR 4G LTE Router (LG2200D) User Manual. To view this manual and other support information click on the Online Support link in the NETGEAR genie or visit support.netgear.com

To contact U.S. Cellular technical support, call 1-888-944-9400 (or dial 611 on a U.S. Cellular® mobile phone).
