How to install Phone Wallet

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen.

How to register Phone Wallet

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

In order to register the application, please go to Options – Register and enter the registration code that was sent to you. Be aware that the code is case sensitive and contains the letters from A to F as well as numbers from 0 to 9

Working with Phone Wallet

How to start

Phone Wallet Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → Phone Wallet
- Clicking on the Menu button → My Own/Programs → Phone Wallet

General information

Phone Wallet application is meant to keep your confidential information safely. You have a possibility to set a password and change it any time for security reason.

At the first application start you will be prompted to enter a password. This password is used to enter Phone Wallet and to protect the confidential information, so it should be something that can be easily remembered:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

At first there is no default password. In the process of application usage you will be able to change the password in security reasons using Settings.

Attention: Please do not forget the password, as there is NO WAY to retrieve it and your data will be lost!

Opening the Phone Wallet application you will see the list of predefined Folders every of which consists of records

To begin using Phone Wallet application you have to click the left soft key Options of this screen, where you will see the following list of settings:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

- New – to create new Folder or Record
- Customize – to modify the details of records and folders (here you can **Change Icon** or **Rename** the current item)
- Delete – to remove the current item
- Move to folder – to move data into already existing folders
- Settings – option where user can modify Settings' fields
- Backup – option where user can backup all his data and transfer it to the PC or restore it from file
- Register – allows to register the application by entering reg. code
- Help – contains all necessary information for navigation across the application
- About – contains brief information about the developer
- Exit – exits the application

Phone Wallet Folders

To create a new folder you have to click left soft key Options → New → Folder.

To get the newly-created folder you have to enter name of the new folder:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

After creating a new folder you can see it on the main screen of the application.

Please note: you may create as many folders as you wish. The new folder will appear in the place where the highlighting is placed at the moment.

You may also organize your folders, using the left soft key **Options** – **Move to folder**. In this way you can create a folder tree with as many levels as you need.

You may any time **Delete** your folder or **Rename** existing one as you wish.

Phone Wallet Records

Inside Folders there are Records. To create a new record you have to click left soft key Options → New → Record.

To get the newly-created record you have to choose record type depending on the data type from the predefined list. Any predefined record consists of the predefined fields.

Tip: you may always make a new blank record and fill it with your own fields.

Every record has its definite icon, you may choose from the list of icons:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

After creating new record you should choose the folder to move it. The number of records in one folder is unlimited.

The records are very customizable: you may any time Change the records Icon, Rename the record, or move the record to another folder.

Please note: by default the name of the record is build from the first filed name the record contains. If you rename the record manually afterwards, the name of the record will be another then the name of the first field.

Phone Wallet Fields

All Phone Wallet records consist of fields. In the predefined records the field names and field types are also predefined.

To create new field you have to click on **Options - Add field** button, then select the type and enter name of the new field:

You can add new fields to the list of already existing fields in a current record. The number of fields in one record is unlimited. The new field will appear in the place where the highlighting was placed for the moment when you pressed New Record.

You may any time **Rename** existing fields or **Delete** them using the left soft key.

Data Backup

You can backup all data from your Phone Wallet software, which can be transferred to PC. Now you do not need to enter it once again after firmware updating or phone changing.

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

When clicking left soft key Options → Backup, you will see the next screen:

Here you can choose the action which you want to perform to backup your data to file or to restore it from file.

Data Backup option

If you want to backup your data from Phone Wallet software you should press left soft key Options – Backup to file. After that you will have to select the target storage of this file. When you have memory card you will have the following screen message:

In case the Memory card is not available, you will be able to backup your data only to Phone memory, and the screen will have the following view:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

In case the destination chosen is Phone memory, you also have to select the folder from the list of available and then enter the name of the file:

If the destination is Memory card, the same as previously, you have to choose the folder from the list of available and then enter the name of the file:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

Restore data option

In order to restore your backup data to the phone wallet software after firmware updating you will have to enter the program, press left soft key Options – Backup – Restore from file option.

After that you will have to choose the storage, where your backup is stored.

In case your backup is stored on memory card and your memory card is available you will have the following:

In case the Memory card is not available, you will be able to restore your backup file only from Phone memory, and the screen will have the following view:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

After that you will have to choose the folder where your backup file is stored:

After that you were asked if you are sure that all your previous data will be stolen and everything will be overwritten.

After pressing Ok button you will be prompted to enter the password to Phone Wallet software

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

After that all your data will be restored and you will be able to use the software.

Phone Wallet Settings

You can access Settings of Phone Wallet clicking left soft key Options → Settings:

Settings contain following items:

- Change password – you can change the personal password any time (it may consist of numbers and letters, up to 10 chars)
- Icons (for your convenience you can select the size of the icons on the screen, they can be Large or Small)
- Layout (the space between the fields in records can be Double Spaced or Compact)
- Autolock after (after some time not being used the application will close automatically). This feature secures your data for the case when you leave the phone with the application already open.

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

- Lock in background (when being in Background Phone Wallet application autolocks after definite period of time). This feature makes the application safer in the case when you are interrupted during your work with Phone Wallet by for example a call.

How to uninstall Phone Wallet

In order to uninstall Phone Wallet, please go to the Menu → System → Applications Manager, choose the Phone Wallet Application from the list and uninstall it in the usual way.
