acer_DownloadTool_V14.01	<p>Add Acer Diag VID/PID:</p> <ol style="list-style-type: none"> mtp/adb/diag: 0502/36FE ptp/adb/diag: 0502/36FF rndis/adb/diag(USB tethering): 0502/3700 	Crystal Lin 2014/10/02

acer_DownloadTool_V14.00	<ol style="list-style-type: none"> 1. Support DA2V0K0: N3-2200, M3-2200, DA2V052, DA222HQL 2. Change Log path: log store at each platform folder: NV/Qualcomm/Intel 	Crystal Lin 2014/08/20
acer_DownloadTool_V13.01	<p>Support Qualcomm unmerge BIN files flash projects such as E600, flash bootloader in BIN first then flash all images after reboot-bootloader command.</p> <p>Reason: Do not do repartition in E600 or factory data might be lost.</p> <p>Solution in bootloder to force skip repartition since 8/12's images.</p> <p>Why still need to add this function in download tool? This is due to some user's device is old bootloader.</p>	Crystal Lin 2014/08/13
acer_DownloadTool_V13.00 SOP veriosn: V13.00_2	Modify SOP for E600 enter fastboot mode	Crystal Lin 2014/08/12

1. Requirement

1.1 Microsoft .NET Framework 2.0

1.2 Do not operate this program on virtual machine.

2. List of support

2.1. List of Support Models

Project	Model	Android Version	Support Flash Mode	Notice
M220V0LO	M220	V0LO	Mass Storage: WinUSB Device Press volume up + power key for about 6 minutes.	
Z220V0LO	Z220 (Original Model Name Z100)	V0LO	1. OS Mode(adb), 2. fastboot mode	
Z100V0LO	Z100	V0LO	1. OS Mode(adb), 2. fastboot mode	
DA2V0K0	N3-2200, M3-2200, DA2V052, DA222HQL	V0K0	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	
E600	E600	V0K0	1. OS Mode(adb), 2. fastboot mode	Support Acer develops SKU only.
DA2AV0K0 (NVIDIA)	DA222HQLA	V0K0	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	This project is detached from DA2.
Ducati2HD (Intel)	A1-840	V0K1	1. OS Mode(adb) 2. Emergency Download Mode(DNX) 3. Droidboot mode	Security: Device is user version (UEFI is user releasekey also), can flash user BIN only. Device is userdebug version (UEFI is userdebug testkey also), can flash userdebug only.

Ducati2FHD (Intel)	A1-840FHD	V0K1	1. OS Mode(adb) 2. Emergency Download Mode 3. Droidboot mode	Security: Device is user version (iafw is user releasekey also), can flash user BIN only. Device is userdebug version (iafw is userdebug testkey also), can flash userdebug only.
A12 Phone (Qualcomm)	S520	V052, V0K0	1. OS Mode(adb), 2. fastboot mode	Since v4.007 add “adb shell sync” command.
DA2 Smart Display (NVIDIA)	DA2V052,N3-2200, N3-2400,M3-2200, M3-2400,DA222HQL,DA242HL, DA242HQL,	V052	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	
TA2 Smart Display (NVIDIA)	TA272HUL, M3-245HQL, N3-245HQL, L3-245HQL,TA272HL	V052	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	
DA245HQL Smart Display (NVIDIA)	DA245HQL	V052	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	This project is detached from TA2.
DA2AV052 (NVIDIA)	DA222HQLA	V052	1. OS Mode(adb), OS Mode(adb), if adb mode is supported. 2. Boot Recovery Mode (Choose from engineer mode)	This project is detached from DA2.

2.2. List of Unsupported Models

Following projects please see latest version.

New version of download tools are not support following models after latest version.

Device	Model	Android Version	Support Flash Mode	Latest Version	Notice
ManU (Intel)	A1-820	V052	1. OS Mode(adb) 2. Emergency Download Mode 3. Droidboot mode	RD: acer_DownloadTool_V7.001 CSD: NA, unreleased project.	Security: Device is user version (iafw is user releasekey also), can flash user BIN only. Device is userdebug version (iafw is userdebug testkey also), can flash userdebug only.
Picasso Tablet (NVIDIA)	A500/A501	V041/V042	OS Mode(adb), Boot Rcovery Mode (Key combination1)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
PicassoE Tablet (NVIDIA)	A200	V032/V041/V042	OS Mode(adb), Boot Rcovery Mode (Key combination1)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
VanGogh Tablet (NVIDIA)	A100/A101 (Huawei included)	V041/V042/HV041	OS Mode(adb), Boot Rcovery Mode (Key combination1)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
PicassoM Tablet (NVIDIA)	A510/A511	V041/V051	Boot Rcovery Mode (Key combination2)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
PicassoMF Tablet (NVIDIA)	A700/A701	V041/V043/V051	Boot Rcovery Mode (Key combination2)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
PicassoE2 Tablet (NVIDIA)	A210, A211 Without flexrom	V041, V043, V051	Boot Rcovery Mode (Key combination2)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	
A110 Tablet (NVIDIA)	A110 (CSD mode only)	V051	Boot Rcovery Mode (Key combination3)	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	Not internal project.
A9 Phone (Qualcomm)	S500	V041, V043, V051	OS Mode(adb), fastboot mode	RD: acer_DownloadTool_V7.000 CSD: acer_DownloadTool_V5.003_CSD	

Flash mode hot key:

Boot-Recovery mode: (Depends on each device's spec. Please reference to PES document.)

(Key combination1) RESET hole and power key, wait for 3 seconds.

(Key combination2) volume up + volume down + power key, wait for 3 seconds.

(Key combination3) Volume down key + power key, wait for 3 seconds.

OS mode:

(ICS) Device enter OS → Settings → Applications → Development → USB debugging On.

(JB, KitKat) Device enter OS → Settings → Developer options → USB Debugging On.

If Developer options does not appears on Settings list, please go to About tablet -> click build number until message "you are now a developer" appears on device's screen.

Fastboot mode: (Depends on each device's spec.)

Volume **up** (the button which near power key) + power key

E600: Volume **down** + power key

Engineer mode: Depends on each device's spec.

Droidboot mode: Press volume down key and do not release then press power key, after device vibrates once release power key wait for 8 seconds then release volume down key. (Droidboot mode as following figure.)

Emergency Download Mode (DNX mode): volume up + volume down do not release then press power key, press these three keys until device boot then keep press for 8 seconds.

How to know in emergency mode or not? You can check with device manager in your computer and see download tool detect emergency device=1

In current projects:

IAFW: for example, A1-840FHD, in emergency mode see stop at ACER logo.

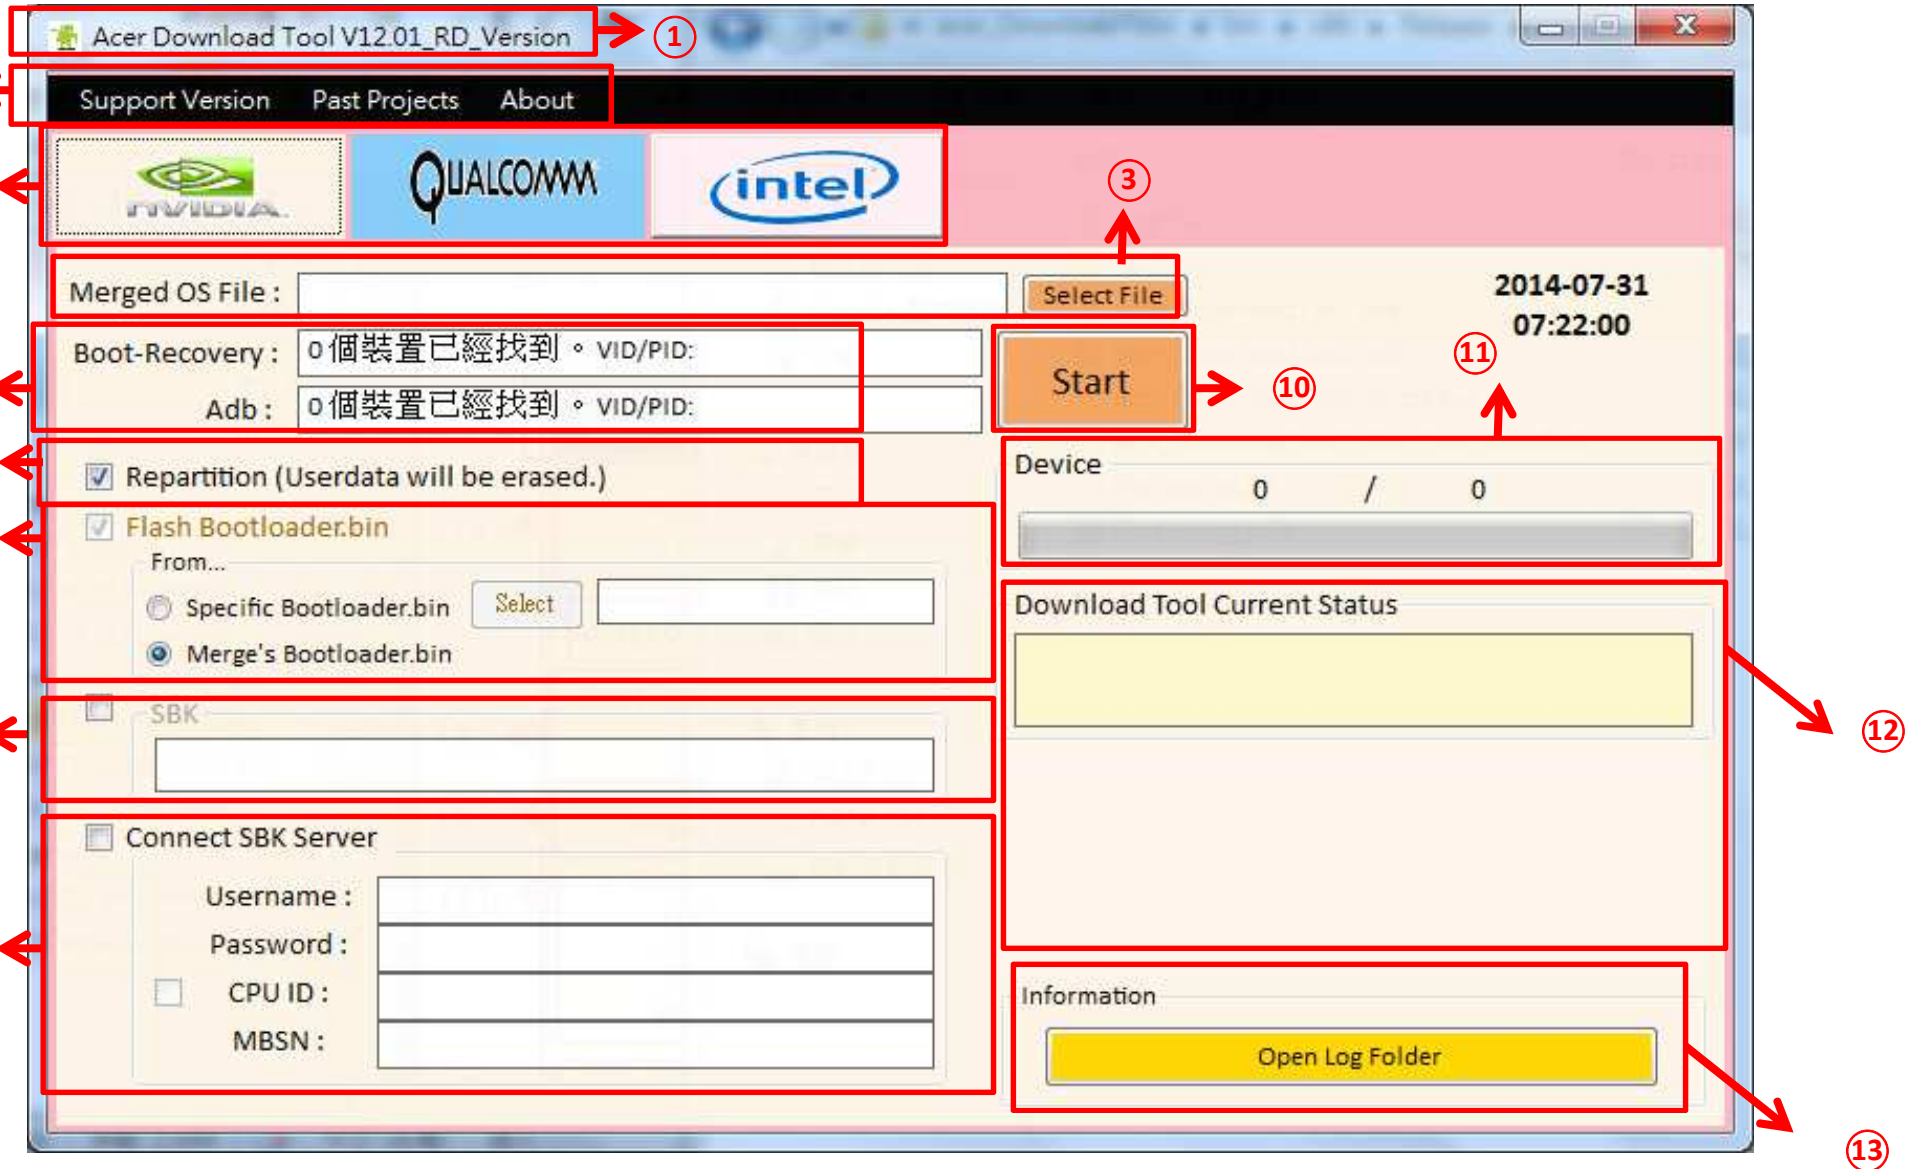

UEFI: forexample A1-840 (HD Wi-Fi), show DNX on screen.

Windows Mass Storage: Press volume up + power key for about 6 minutes.
You can see logo on device screen as following figure.

3. Download Tool Diagram

3.1 RD Mode NVIDIA Page Setting

1. Program name and version.

RD version: for RD, DV, TE testing using.

CSD version: for Repair Center using.

2. Main MENU:

Support Version: see support model here.

Past Project: see past model here and past model's download tool version.

3. The selected Acer merge bin file

4. Choose page for NVIDIA, Qualcomm or Intel

5. Adb and Boot-Recovery

To identify the device.

6. Repartition

User data will be erased when "Repartition" is selected.

7. Flash Bootloader.bin

The Bootloader will be updated when "Flash Bootloader.bin" is selected.

If "Specific Bootloader.bin" is selected, the chosen file will be updated to the device.

If "Merge's Bootloader.bin" is selected, the bootloader will be updated from the Merge's file.

8. Type SBK

You can type SBK while SBK item is checked. This item is for fused devices.

(You can use 9 to instead this item.)

9. Connect SBK Server

If your device already save SBK information on SIC server, you can select "Connect SBK Server" to connected to the Server for SBK procedure.

This item is for fused devices

10. Start button

Click start to flash BIN.

11. Progress bar

To indicate the download progress.

12. Debug message window

Flash status here.

13. Log folder

Click button to open log folder.

Operating Flow

a-1 There are two way to download bin file, **OS mode** and **Boot-Recovery Mode**.

OS mode is recommended. **BR mode** can be executed when the device fails to boot-up on OS mode.

a-2 OS mode : Be sure that the device is open

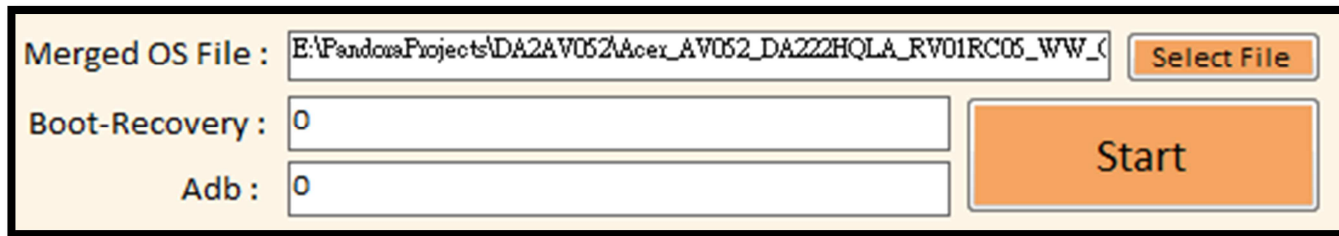

and connected to PC before pressing start button.

BR mode : Press the hot key (depends on your device spec.) wait for 3 seconds.

a-3 OS mode : Turn on Debug mode of the device.

BR mode : Connet to PC after the device opened on BR mode.

a-4 OS mode : The text of **Adb** will show as below:

Merged OS File : E:\PandoraProjects\DA2AV052\Acer_AV052_DA222HQLA_RV01RC05_WW_C [Select File]

Boot-Recovery : 0

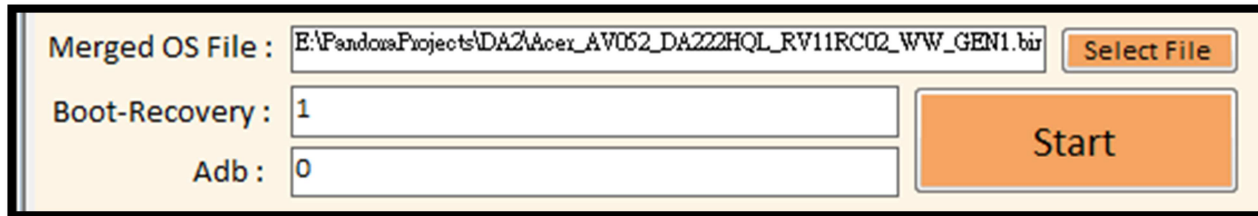

Adb : 0

Start

If Show following message means your adb driver does not finish install yet, please check your adb/fastboot driver has been installed.

BR mode : The text of **Boot-Recovery** will show as bellow:

Merged OS File :	E:\PandoraProjects\DAZ\Acer_AV052_DA222HQL_RV11RC02_WW_GEN1.bin	Select File
Boot-Recovery :	1	Start
Adb :	0	

a-5 Select the Acer merge bin file.

a-6 Decide if “Repartition” is needed.

a-7 Decide if bootloader download is needed or which bootloader to be downloaded.

a-8 Press Start button and you will find the program running as below.
Please wait for check merge bin file process.

Merged OS File : E:\PandoraProjects\DA2AV052\Acex_AV052_DA222HQLA_RV01RC05_WW_C [Select File] 2014-06-16 11:12:28

Boot-Recovery : 1

Addb : 0

[Start]

Repartition (Userdata will be erased.)

Flash Bootloader.bin

From...

Specific Bootloader.bin [Select] []

Merge's Bootloader.bin

SBK []

Connect SBK Server

Username : []

Password : []

CPU ID : []

MBSN : []

Device 2 / 5

Download Tool Current Status

燒錄進行中，請勿移除USB線!

>> 即將開始驗證.BIN檔案，請等候一下。
>> now, in Boot-Recovery mode
>> going to flash your device
>> Flash bootloader.bin Succ!!
>> Flash recovery.img Succ!!

Information

[Open Log Folder]

a-10 BIN file has been downloaded successfully.

3.2 CSD Mode NVIDIA Page Setting

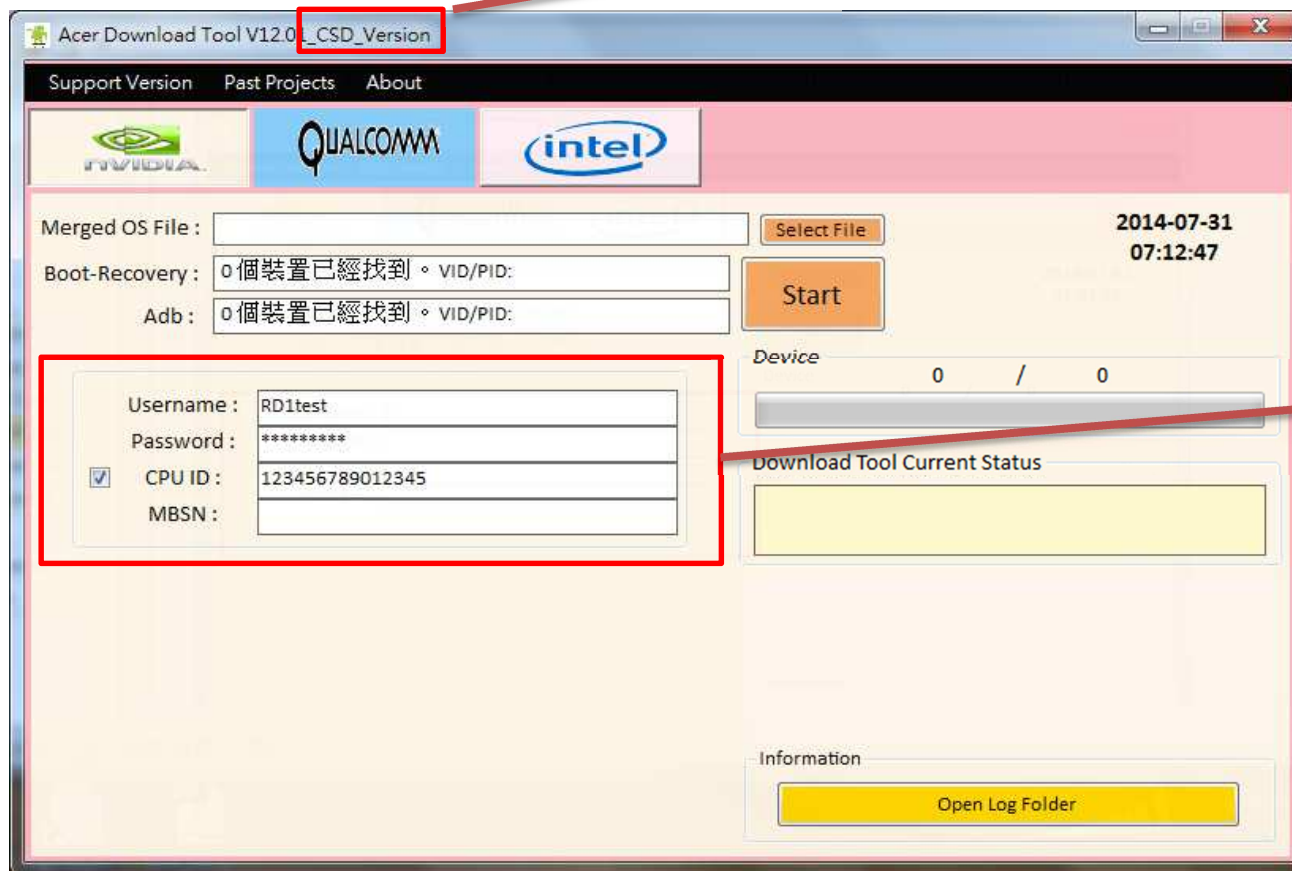

Please reference to RD Mode UI descriptions.

→ Type User name & Password

→ If Start from Boot Recovery mode type CPUID or MBSN

→ Click Start

CSD Version

This information is associated with SIC server. Need following items:

1. User name
2. Password
3. CPU ID or MBSN

3.3 RD mode Qualcomm Setting

Step0. Choose Mobile Qualcomm Page first.

Step1. Device Enter “fastboot mode” or ADB mode

Device will show “boot mode: fastboot/ADB on screen, and download tool will show “1 devices has been founded.”

If start from fastboot mode, device shows 1 on Fastboot textbox.

Step2. Folder Selection selected: ✓

[Note] about SETTING 's Items:

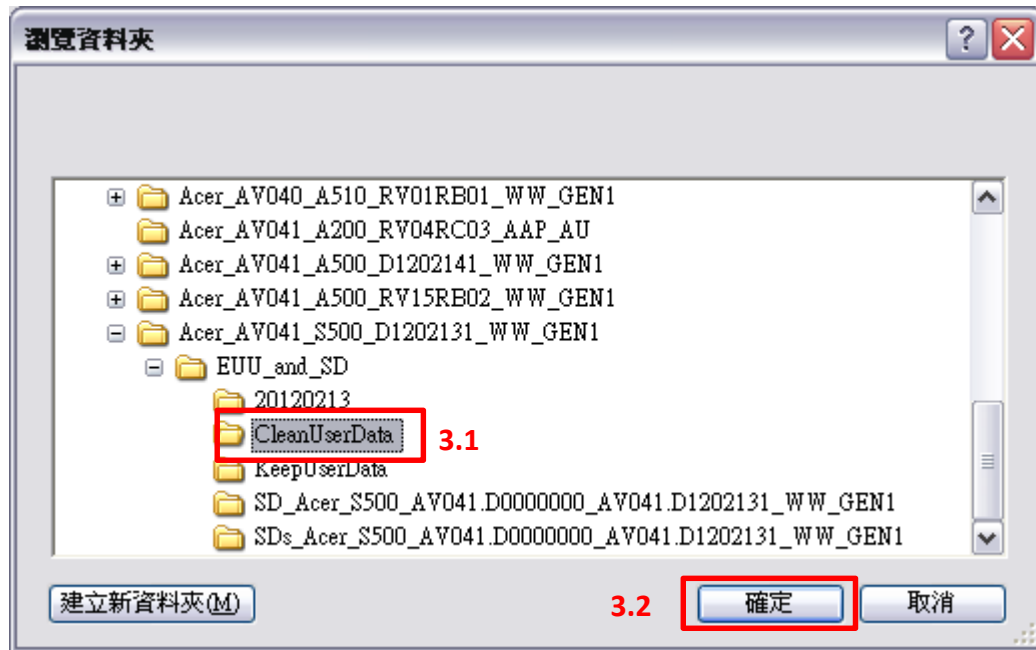

1. Reboot Is Needed: selected if you want to reboot device after finish burn BIN files.
2. Merge Bin File: selected while you are burn BIN files.

Click "User MENU for Items" for more function.

Step3. Click “SELECT”

Step3.1 Choose your bin file folder (BIN or _system.img inside)

Step3.2 Choose “確定”

Step 4. Press “START” button, Image will start burn.

As following figure “Flash process is running!”

It may cost 8 to 15 minutes to burn depends on image size and your system.

Step5. After Finishing Image burn will show following message:

Flash Process Success! (See following figure).

If you need to flash next file, please wait for clean data process done.

The screenshot shows a software interface with the following sections:

- SELECTION:** Folder Selection (checked), path: E:\PandoraProjects\old_projects\A12\A12LTEVOKO\Acer_AV00, Select button.
- SETTING:** Reboot Is Need (checked), Merge Bin File (checked), User Menu for Items button, START button.
- STATUS:** Flash Status: 最終結果: 全部的Download流程皆成功!! 程式結束, USB線可以移除了。 (highlighted with a red box).
- Information:** Open Log Folder button (highlighted with a red box, with an arrow pointing to a box labeled "Open log folder").

The right-hand side of the interface displays a log window with the following text:

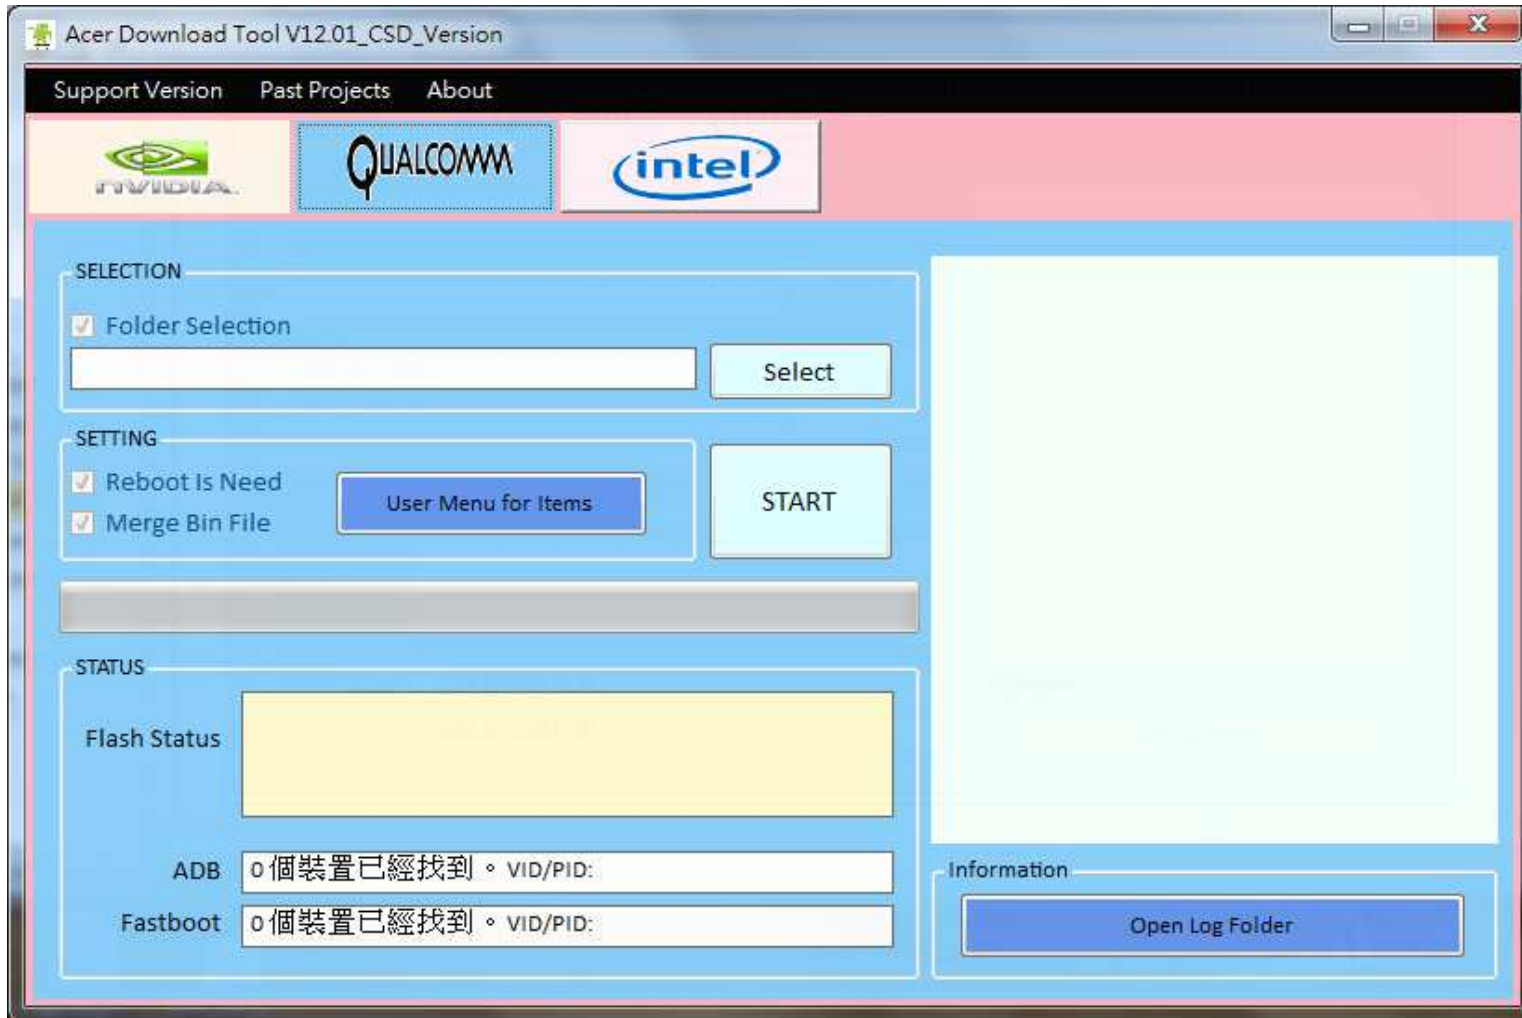

```
[OKAY] OKAY [ 19.350s]
flash bin OKAY. iRet0
flash bin "E:\PandoraProjects\old_projects\A12\A12LTEVOKO\Acer_AV0KO_S520_D1405161_EMEA_GEN1L\user\CleanUserData\Acer_AV0KO_S520_D1405161_EMEA_GEN1L_2.bin"
[OKAY] OKAY [ 33.385s]
(bootloader) system update ready with sparse function!
[OKAY] OKAY [ 86.036s]
flash bin OKAY. iRet0
Reboot the device.
= Clean files, please wait =
Data clean done, you can going to flash images now.
```

3.4 CSD mode Qualcomm Page Setting

Almost same as RD mode but can not select some function, flash BIN file only.

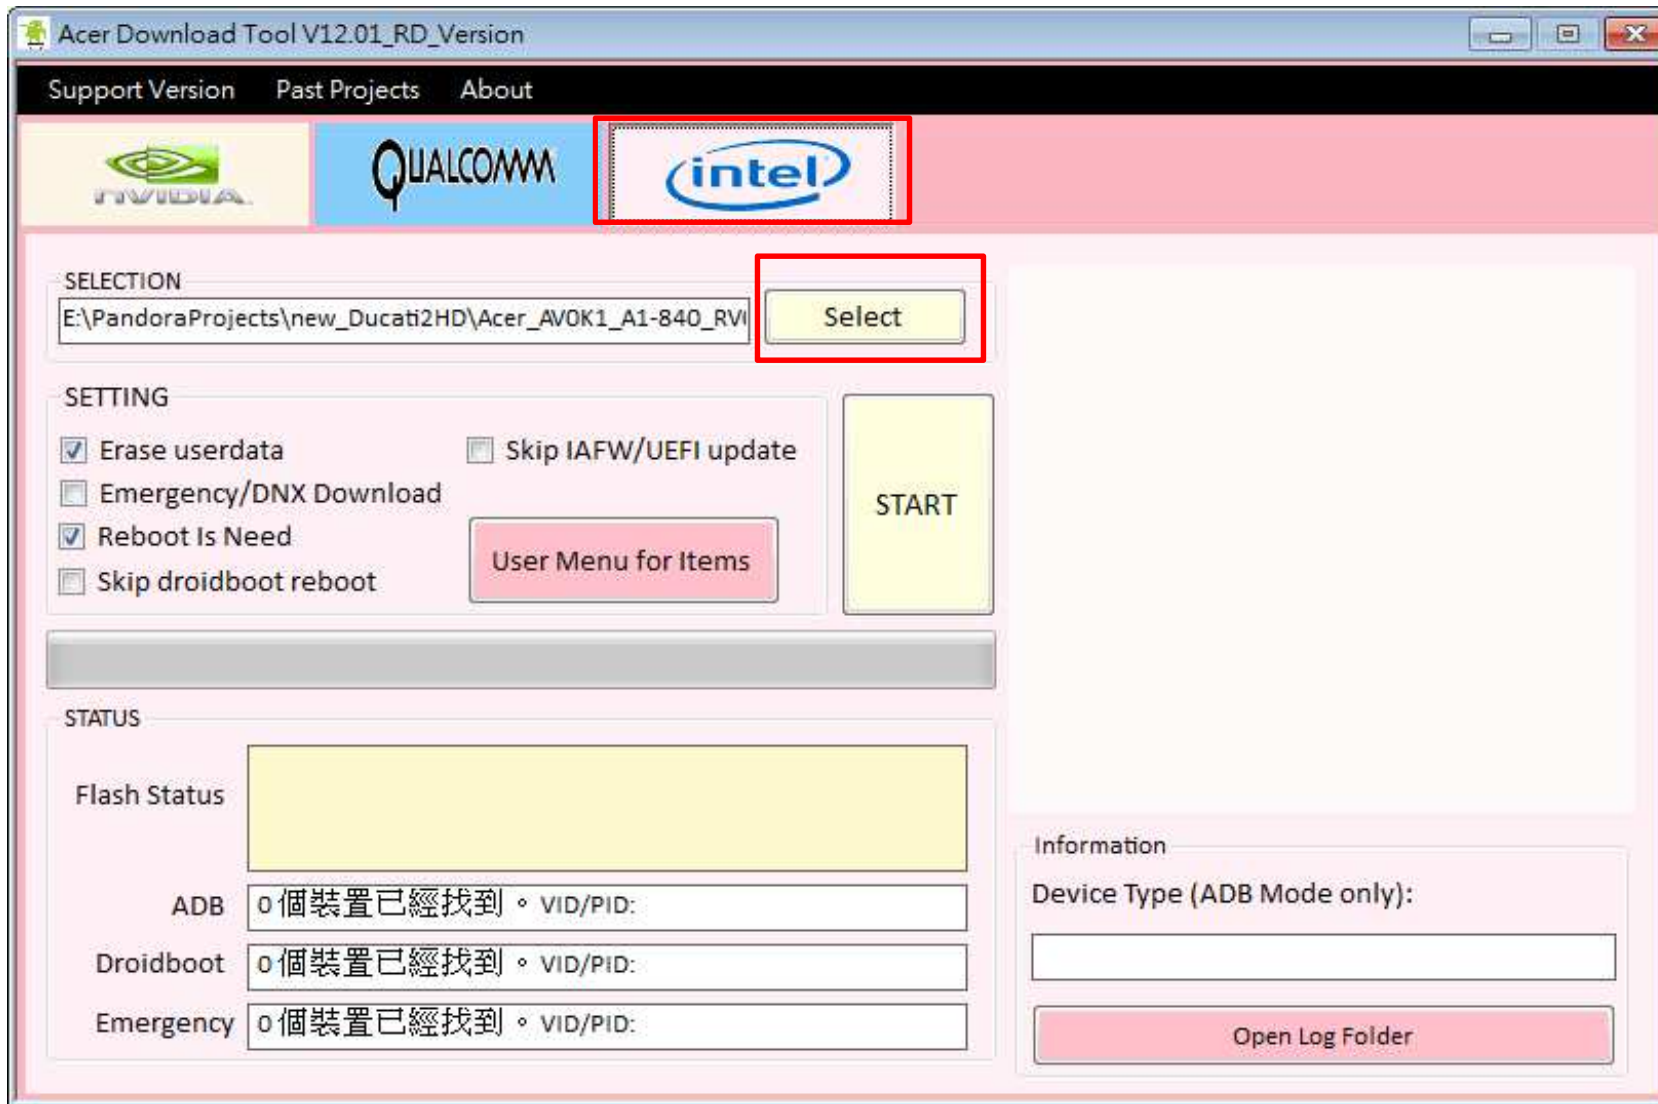

Steps: Select BIN file folder → After device is found → Click “START”

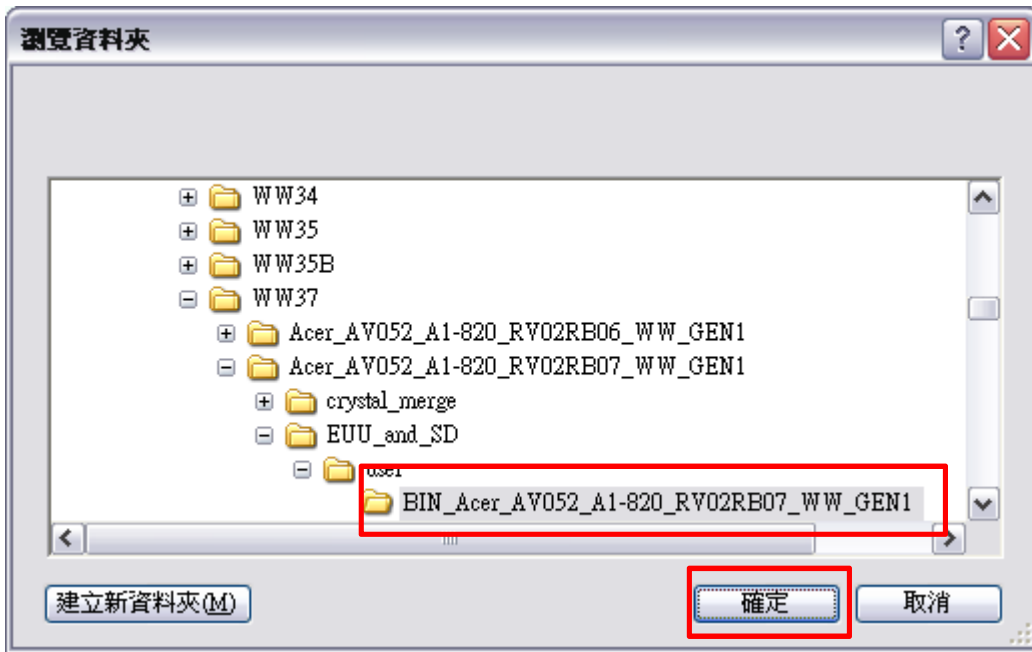

You can start from fastboot mode or adb mode.

3.5 RD mode Intel Page Setting

Step 1. Click "Select" Button choose your BIN file folder

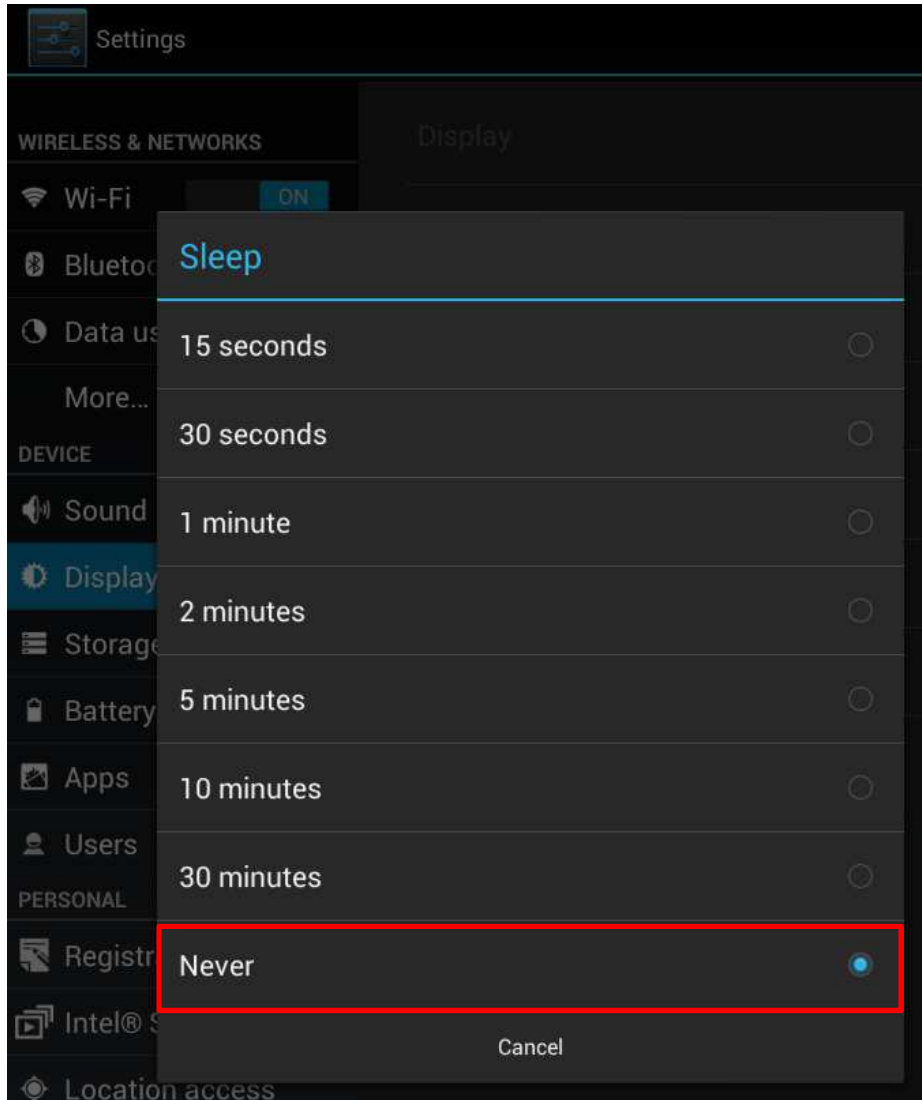

Step2. Choose "Intel" page

[Flash Mode1: ADB mode](#)

You can start from ADB (OS mode)

Go to settings->Display->Sleep->Choose Never

Go to settings->Developer options-> USB debugging on-> pop out a window: Allow USB debugging? Choose OK
If device is found, download tool show ADB: 1

If you see following pop-up window:

Please check device appears following message box, please click “Always allow from this computer” then click OK.
Then you can click “OK” on “adb devices error” window to continue flash process.

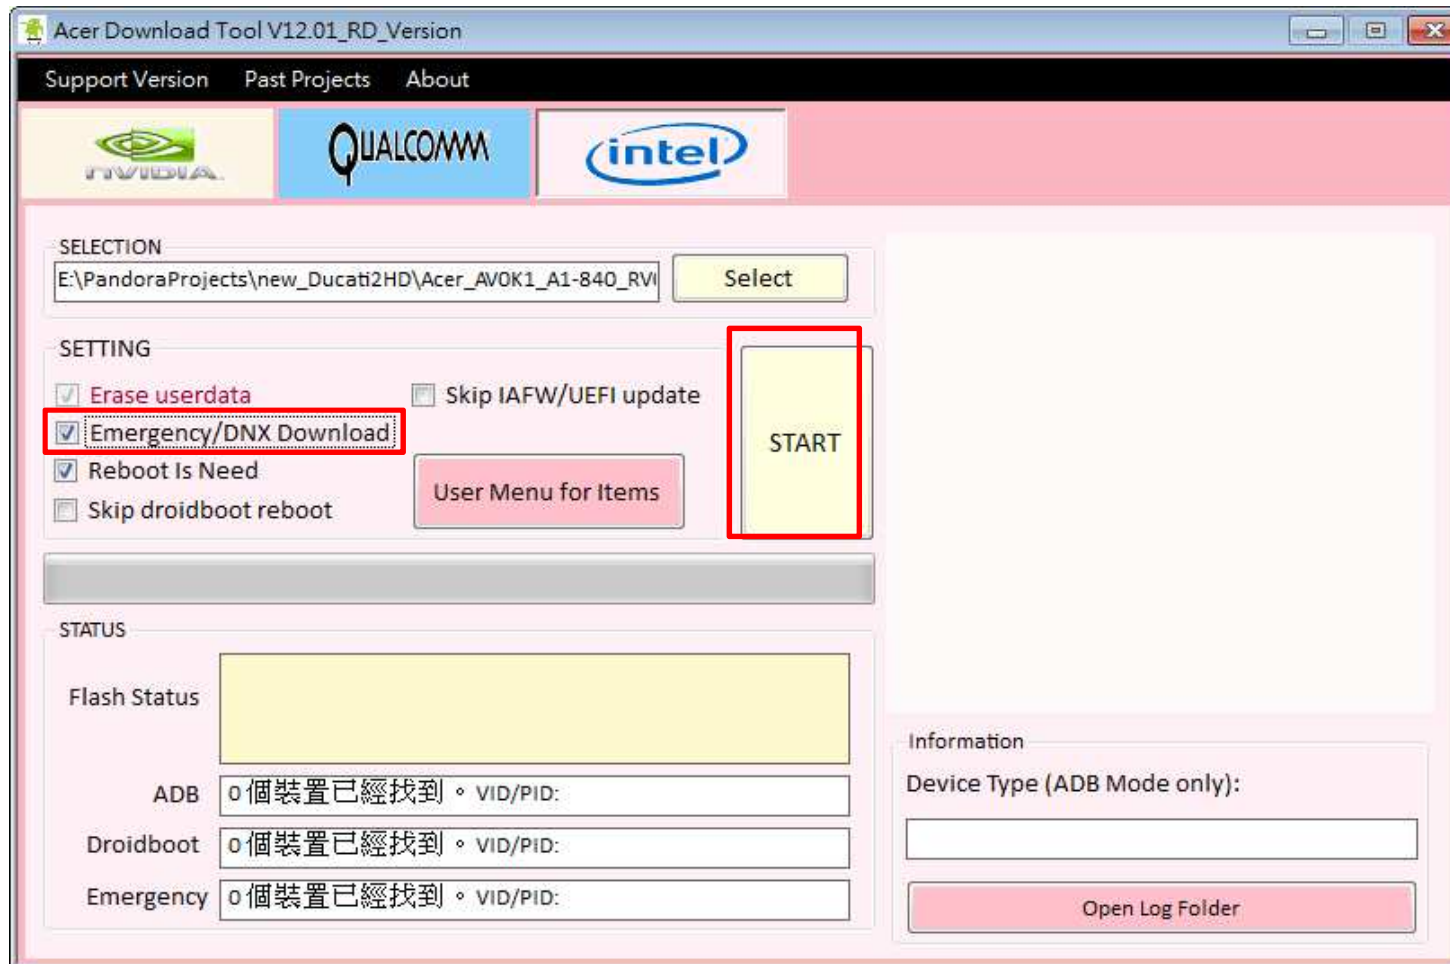

Flash Mode2: Emergency download mode

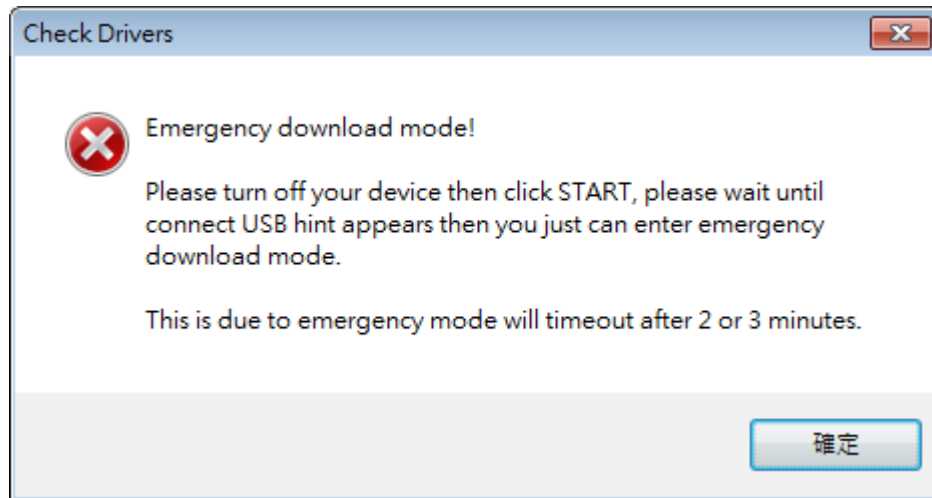

If device cannot boot to OS, please using emergency download mode to flash image:

Click “**Emergency Download**” item:

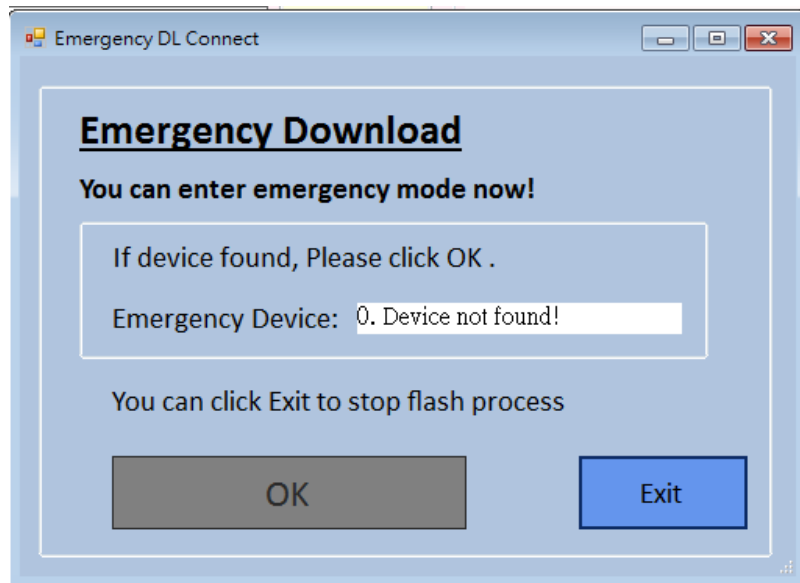

You can click “**START**” directly with device power off.

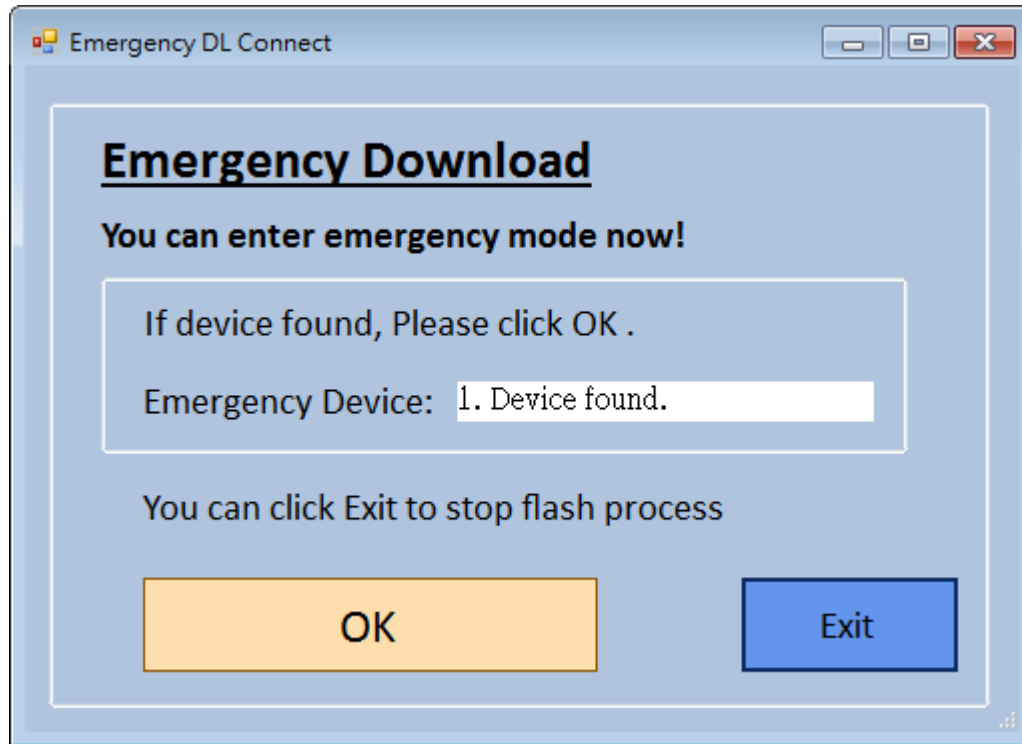

If you click "START" but device already in emergency mode, you will see following message:
Please turn off your device.

After Emergency Download message pop-up, you can enter emergency mode now.

Device found then you can click OK or "Exit" to stop flash process.

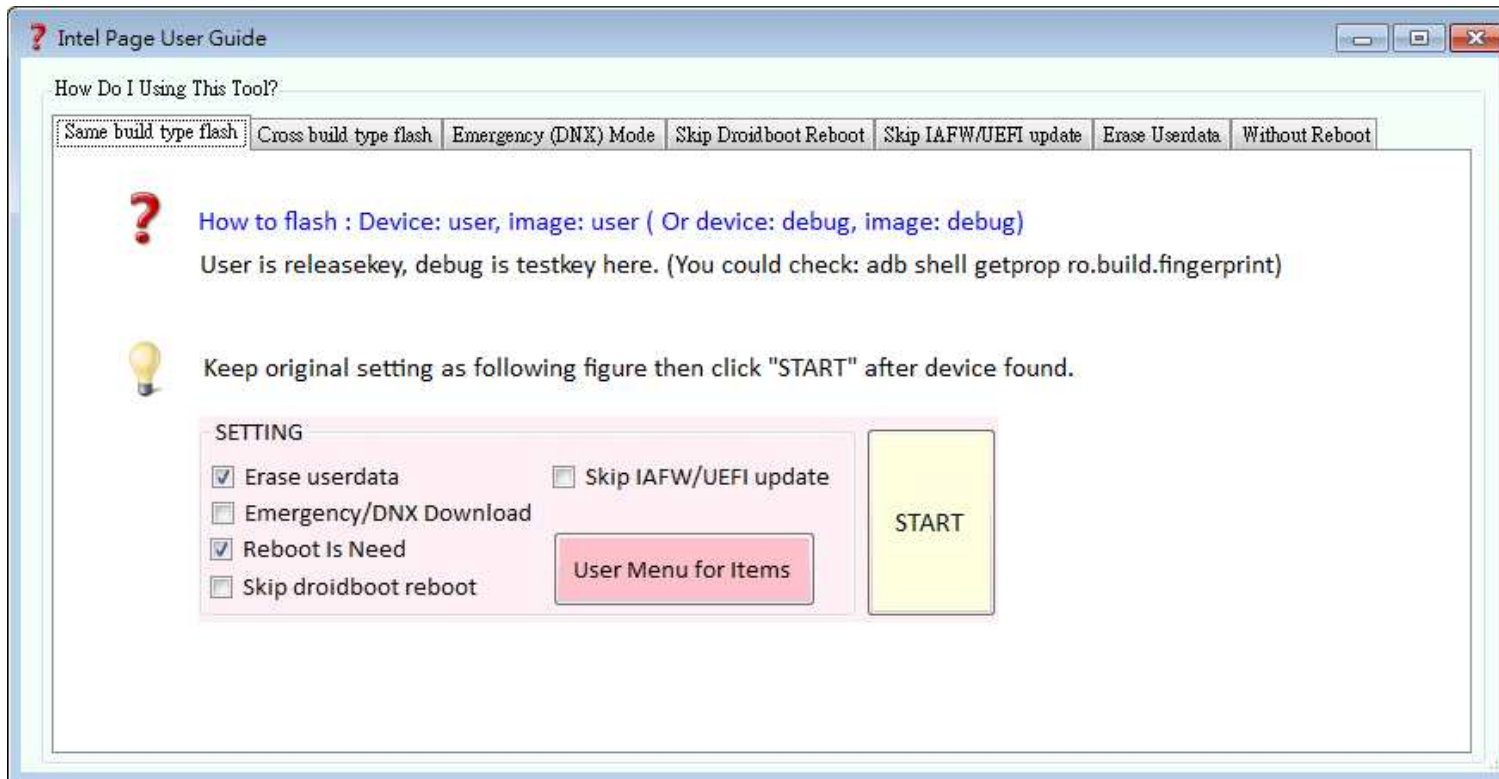

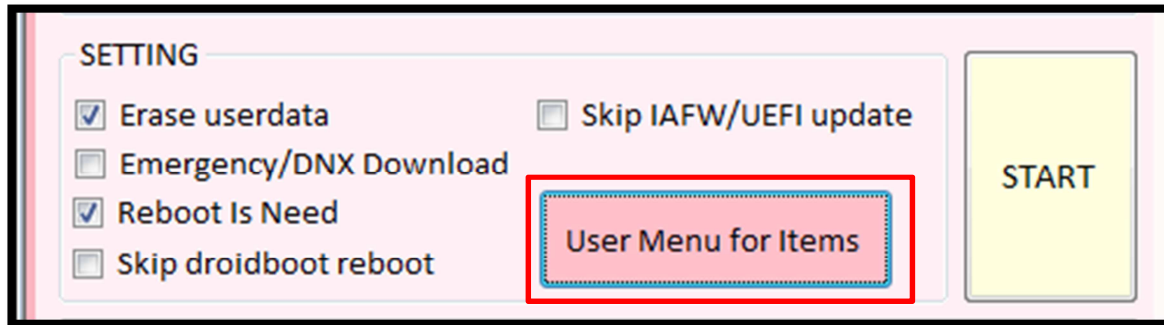

Flash Mode3. Droidboot mode

Enter droidboot mode, found droidboot device: 1

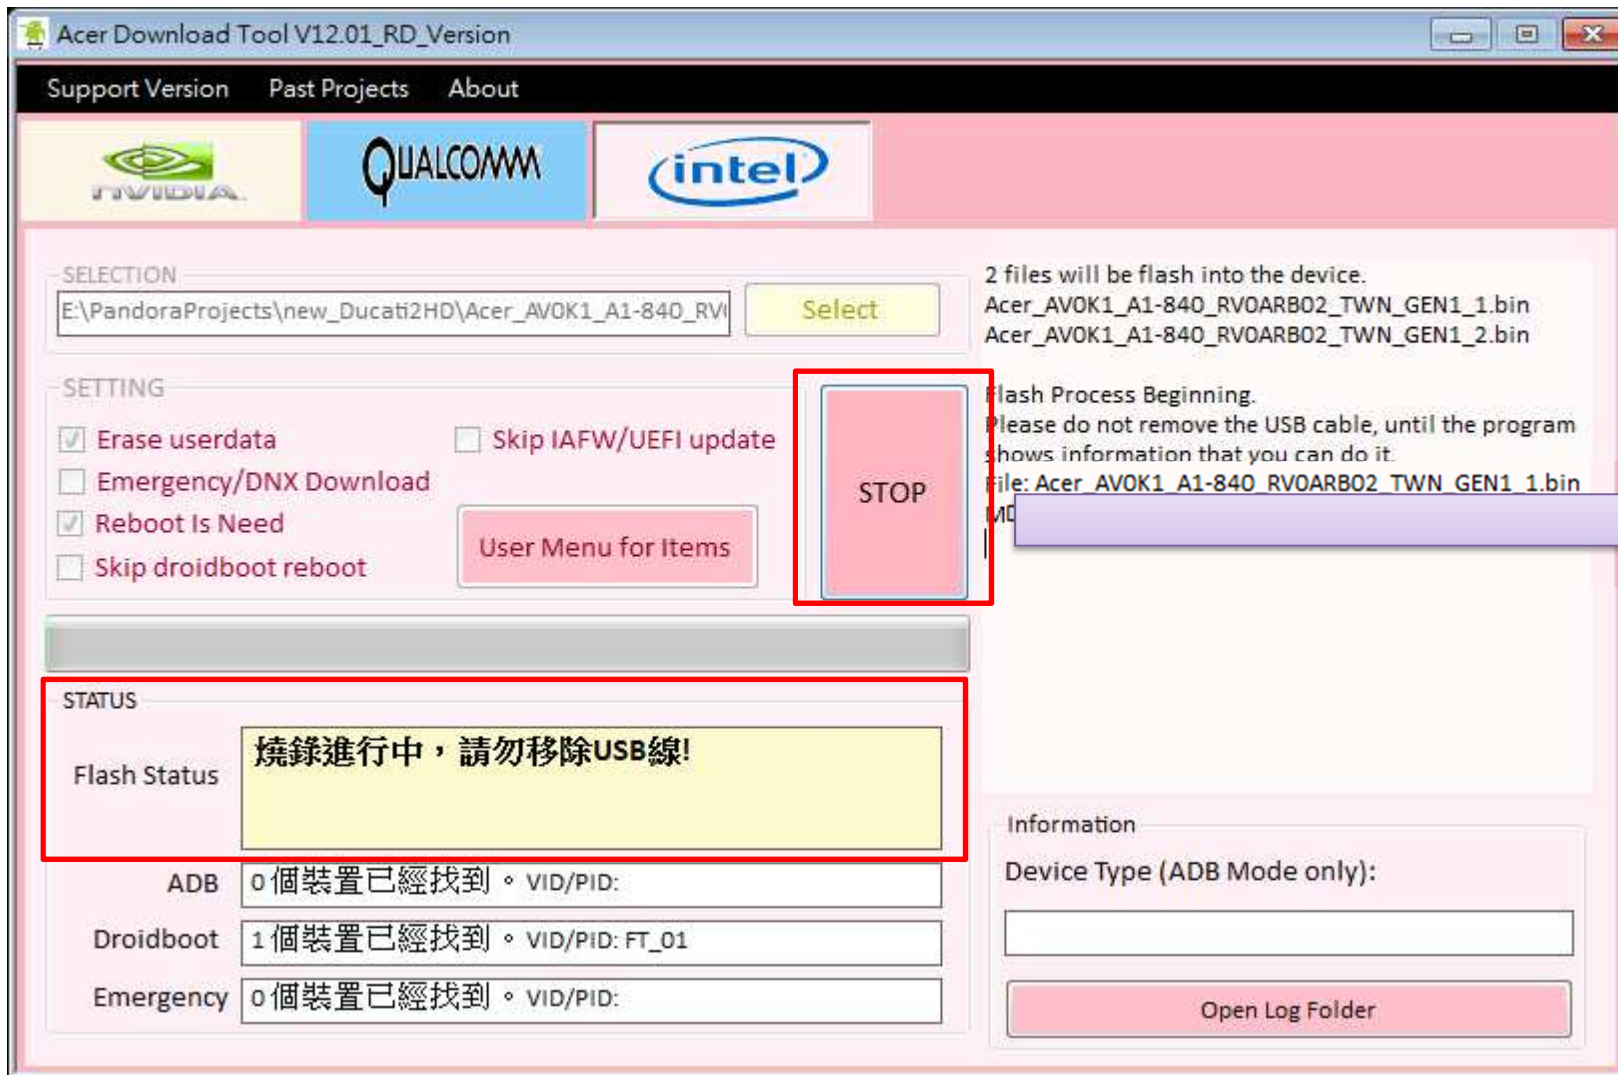

[See more items in user menu:](#)

Click "User Menu for Items" to see more function.

Step 3. Click "START" on Tool UI, start to flash your device.

"START" turn to "STOP".

Step 4. If flash success will show message as following figure, then you can remove your device with USB. After "All Process Done!" message appears, you can close download tool or flash next device.

The screenshot shows the following interface elements:

- SELECTION:** Path: E:\PandoraProjects\new_Ducati2HD\Acer_AVOK1_A1-840_RV\, Select button.
- SETTING:** Erase userdata (checked), Emergency/DNX Download (unchecked), Reboot Is Need (checked), Skip IAFW/UEFI update (unchecked), Skip droidboot reboot (unchecked), User Menu for Items button, START button.
- STATUS:** Flash Status: 最終結果：全部的Download流程皆成功!! 程式結束, USB線可以移除了。 (highlighted in green). ADB, Droidboot, and Emergency sections each show 0 devices found.
- Log Output:** [OKAY] OKAY [0.789s], [IT Md] flash recovery OKAY. iRet: 0, flash system "system.img" [OKAY] OKAY [100.083s], [OKAY] OKAY [60.811s], [IT Md] flash system OKAY. iRet: 0, Reboot the device. [OKAY] OKAY [0.253s], = Clean files, please wait = All Process Done! (highlighted in red).
- Information:** Device Type (ADB Mode only): (empty field, highlighted in red, with arrow pointing to 'Device is user/userdebug (ADB Mode only)').
- Buttons:** Open Log Folder (highlighted in red, with arrow pointing to 'Log folder').

Stop update process:

In Intel platform need to change mode during flash process, change mode behavior need to wait for 30 to 40 seconds.

(It is associated with your computer performance.)

“STOP” process button can stop flash process but this function is not suggest user to click unless your device is no response and need to close download tool.

In some condition you need to wait for a while then process could be stopped.

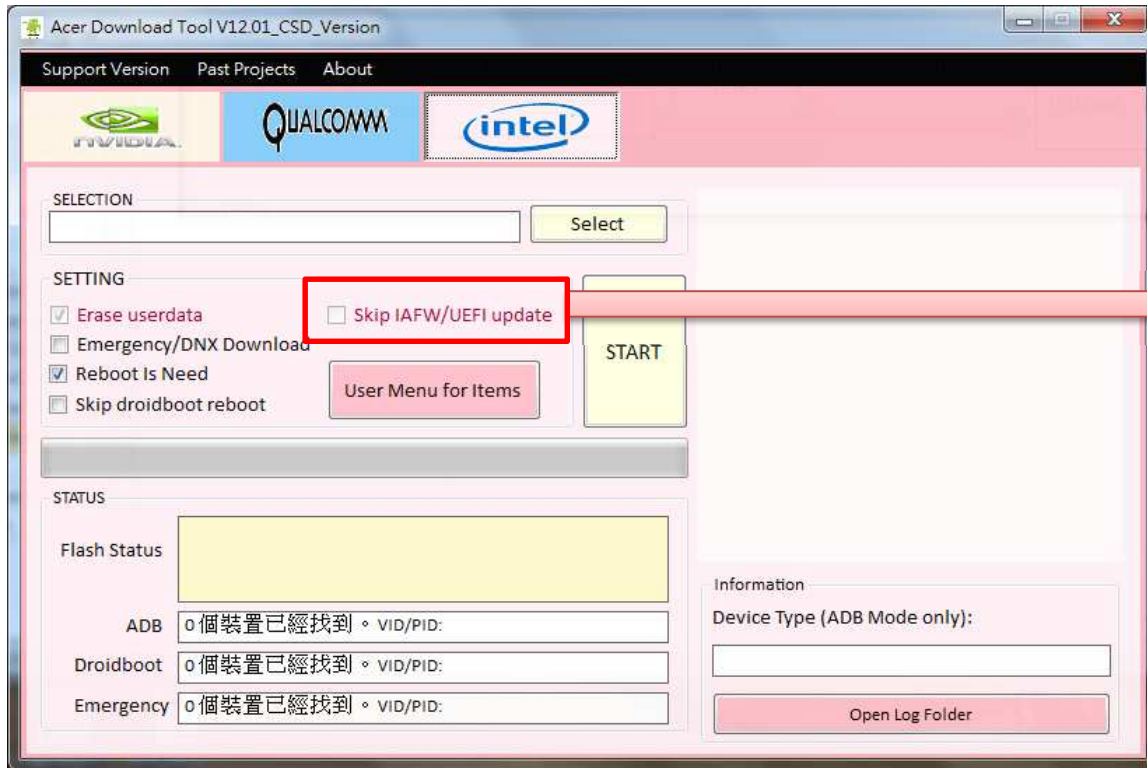

Such as: device is under repartition or flash main images.

3.6 CSD mode Intel Page Setting

Item "Skip IAFW update" do not support CSD mode.

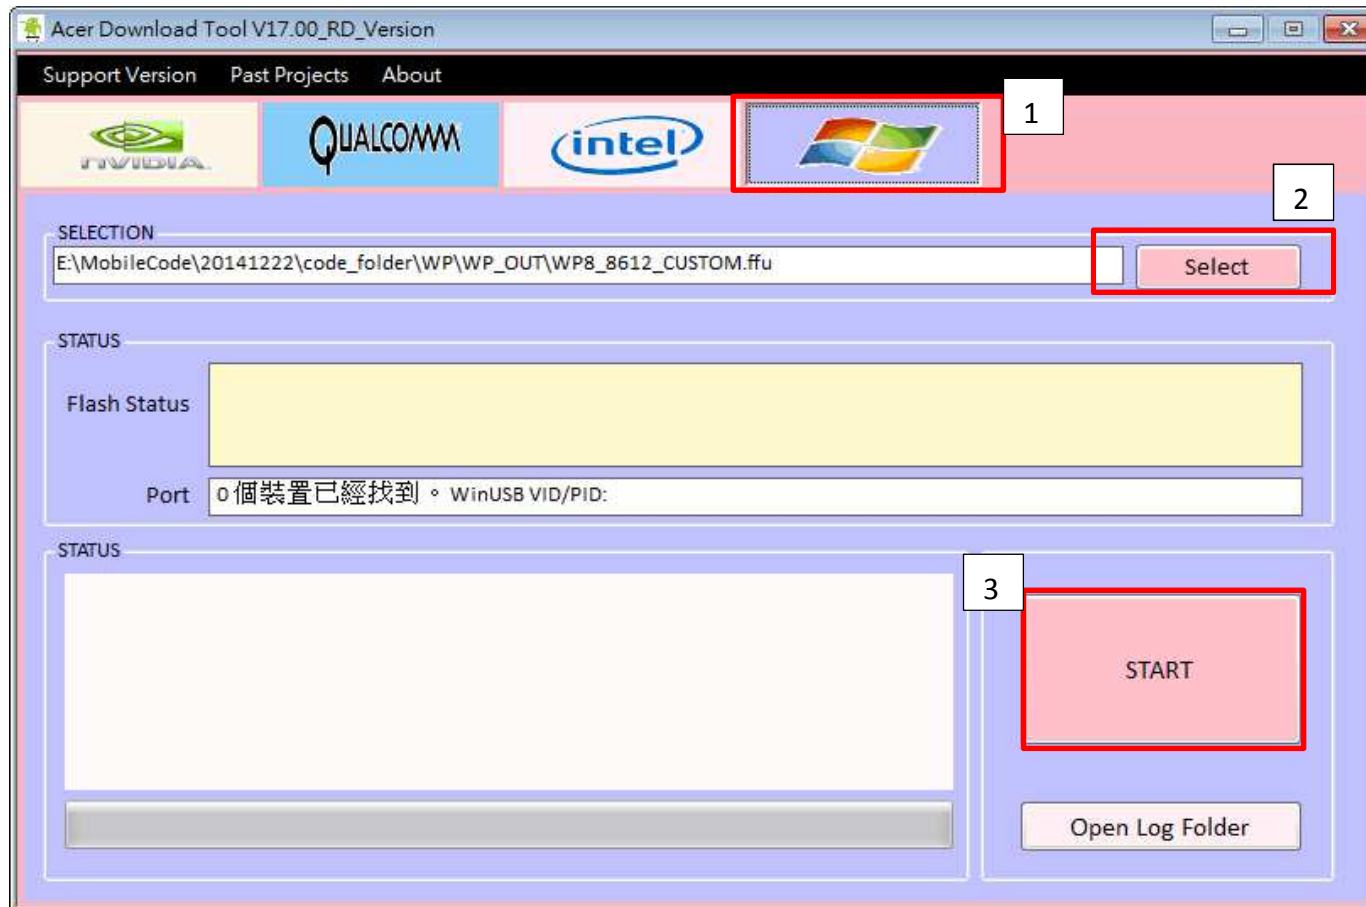

Flash steps please see 3.5 RD mode Intel Page Setting.

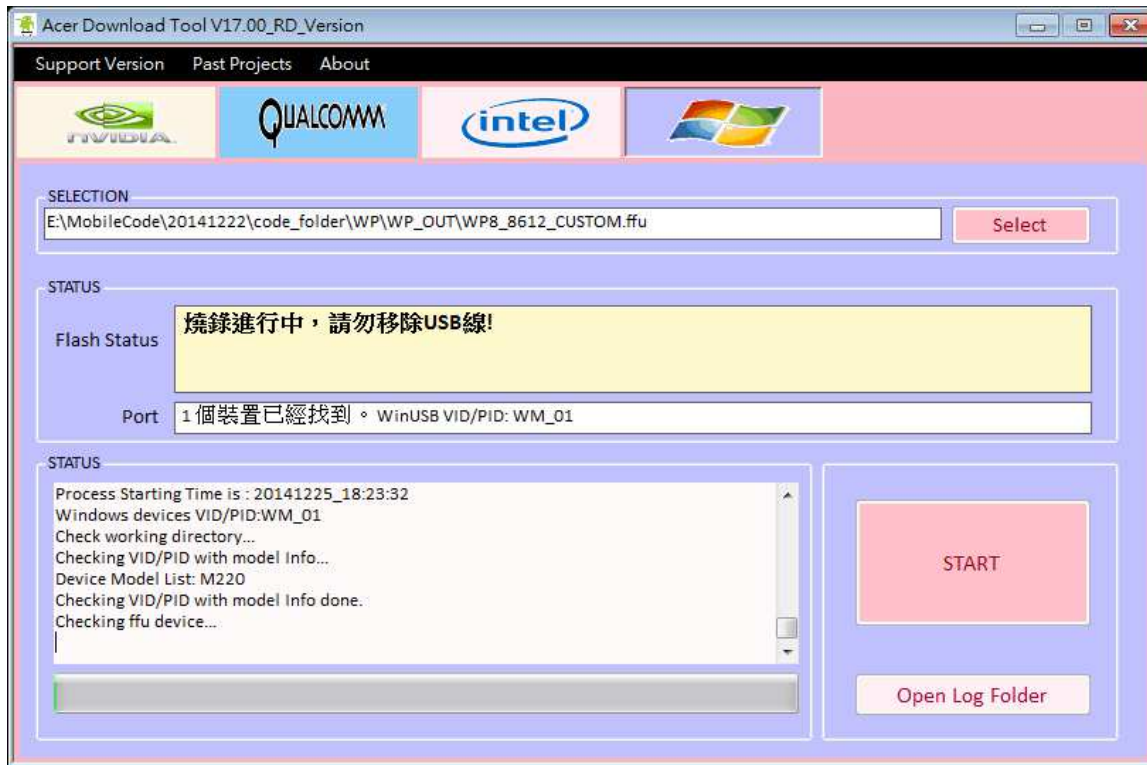

Cannot click "Skip IAFW update" item.

3.6 RD mode Windows Page Setting

1. Choose “Windows Flash Page”
2. Select .ffu file for flash.
3. If “1” device found then click “START” to flash ffu image.

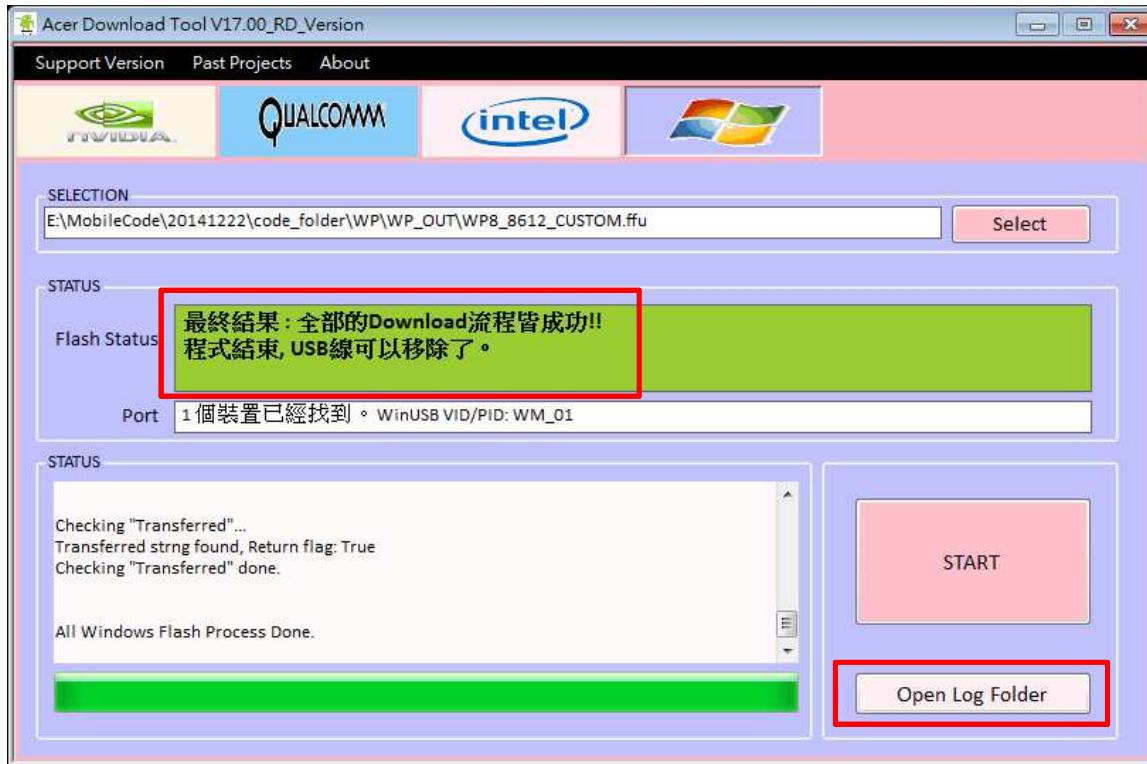

Flashing image please wait for 10~15 minutes.

Windows .ffu image flash success.

You can open log folder by using "Open Log Folder" button.

4. Appendix

4.1 CSD error message

For CSD download tool error message handling:

使用者方面問題	
中英文訊息提示	說明
沒有可供升級的.BIN 檔案。 There is no .BIN file for upgrading.	請使用者確定指定的路徑有 BIN 檔存在
沒有可供升級的檔案(散檔)。 There is no images (unmerged files) for upgrading.	請使用者確定指定的路徑有散檔存在
存放.BIN 檔所在位置的硬碟空間不足。 Out of disk space where you place .BIN file.	使用者需清出足夠的空間才能進行燒錄 請清出所需空間顯示的大小 (依據 BIN 檔的兩倍大小空間)
請點選 Image 的 Android 版本。 Please select images' Android verion.	A110 燒錄散檔時的選項 因為散檔無法從 BIN 中解析版本資訊的關係，需 要使用者選取 ICS or JB 等選項
此裝置不支援從 OS mode 進行燒錄， 請換成 Download mode 再開始燒錄。 Unsupported mode: OS mode, please switch device to download mode.	Tablet: 目前有 EC 的案子支援從 OS mode (adb) 其他 Tablet 案子從 boot-recovery mode 燒錄 Phone: 支援 OS mode(adb) 及 fastboot mode
此裝置是手機系列，請選擇手機燒錄頁面! This is Phone Series, not support in tablet tool page.	使用者需切換到 Phone 的燒錄頁面
請輸入正確的使用者帳號密碼! Please fill in correct user name and password!	如果確定使用者的帳號密碼輸入正確， 則可能是伺服器資料登記錯誤， 需與登記人員確認。

CPUID/MBSN 不正確或登記資訊有誤。 CPUID/MBSN incorrect or registered data incorrect!	輸入的裝置 CPUID 或是 MBSN 有誤 或是這個裝置沒有建立資料在 Database 也有可能是資料登記錯誤 需要與登記資料的相關人員聯絡
無法連線到伺服器，請確定可連線到網際網路後再試一次。 Link to SBK server fail. Please check internet connection is OK then try again.	使用者網路問題，無法連線到 Server

伺服器連線或資料登記問題	
中英文訊息提示	說明
SBK 不正確或不是燒斷的裝置不需要 SBK。 SBK incorrect or device is unfused doesn't need SBK.	對 CSD 而言，由於機器都是燒斷的，此訊息代表 Server 登記的 SBK 可能是錯誤的。需向 Server 端評估
SBK 伺服器連線錯誤，無法取得資訊。 SBK server Error, can not obtain data from SBK server.	SBK 伺服器連線問題，需聯絡 D 棟 IT
從伺服器取得 SBK 資訊發生錯誤。 Obtain SBK from server fail!	未知的伺服器連線問題需看 log 分析原因

沒有被分類到的錯誤訊息都請跟 Download Tool RD 聯絡謝謝！

RD 分析類型	
中英文訊息提示	說明
裝置問題，需要裝置分析問題！ Device Problem! Need device to analyze!	板子可能損壞了，需要機器分析
flash.cfg 內定義的形式不支援。 需使用支援的 NV 版本。	image 檔案格式不被 NV flash 支援的問題

flash.cfg type unsupported. Need to use correct version NV.	
找不到 NV flash 資料夾。 NV flash folder not found!	BIN 檔找不到對應的 Nvflash
請使用正確版本的 NV flash Using wrong version NV.	不支援的 Nvflash 版本需更新
NV flash 燒錄時發生錯誤！ Error occur while nvflash.	需看 download tool log 分析燒錄錯誤的地方

4.2 Check Driver

[ADB] or [Fastboot] or [Droidboot] Please using Acer driver.

Check adb device is found as following, and check adb driver has been installed.

Some devices's fastboot has the same name with "ADB Interface".

[Fastboot] or [Droidboot]

Check fastboot device is found as following, and check fastboot driver has been installed.

[Boot-Recovery]

Check Boot-Recovery device is found as following, and check Boot-Recovery driver has been installed.

[Emergency Mode]

Please using Intel Driver.

[Mass Storage Mode]
