| The GFI MailArchiver synchronisation process requires a user with special authority on all user mailboxes. This user must also have executable rights on the machine on which GFI MailArchiver is installed. Exchange 2000/2003 1. Launch Microsoft Exchange System Manager 2. Right click on the Servers node within the appropriate Administrative Group and select Properties 3. Access the Security tab and click Add to add the user to whom you granted special authority on all user mailboxes. NOTE: It is recommended to create a non-realistic user account (with no roaming profile) that is difficult to guess. The usermane here is for illustration purposes only. 4.
